Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Monterey Municipal Wharves I and II Structural Maintenance Program

Lead Agency: City of Monterey

Contact Name: John Haynes, Harbormaster

Email: haynes@monterey.org Phone Number: (831) 646-3950

Project Location: Municipal wharf structures within waters and shoreline of Monterey Harbor, Monterey, Monterey County
City *County*

Project Decription (Proposed actions, location, and/or consequences).

The City's two municipal wharf structures, Wharves I and II, have degraded due to age, abrasion, and marine borer attack. In order to facilitate continued and future uses of the wharf structures a "program" of maintenance activities is required. The purpose of the proposed Program is to perform the necessary structural maintenance on the wharves in order to facilitate safe and reliable continued and future uses of the municipal wharves. The Program aims to restore the original capacity of specific structural wharf members that have degraded. The proposed Program would be located on the City of Monterey's two existing and actively used municipal wharf structures, Wharf I (also known as Old Fisherman's Wharf) and Wharf II. The City's wharves are located within waters and shoreline of the Monterey Harbor, in southern Monterey Bay, in the City of Monterey.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Biology: May affect biological resources. Mitigation measures require that pile driving be done in accordance with 2013 USACE/NMFS NLAA Program criteria, 2013 Corps/NMFS NLAA Program criteria, marine mammal monitoring, black abalone surveys, standard construction best management practices, etc.
Cultural: May affect architectural and archaeological resources. Mitigation measures require conformance with the Secretary of the Interior's Standards, vibration monitoring during impact hammer activity, an archaeological monitoring plan, adherence to Public Resources Code Section 21083.2, PRC Section 15126.4(b)(3), inadvertent discovery procedures, etc.
Hydrology & Water Quality: Same as Biology.
Noise: May cause vibration. Mitigation measures require vibration monitoring during impact hammer activity, restrict extreme noise-generating construction activities to 8:00 a.m. to 5:00 p.m., Monday through Friday, etc.
Tribal Cultural Resources: Same as Cultural.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None

Provide a list of the responsible or trustee agencies for the project.

U.S. Army Corps of Engineers, Central Coast Regional Water Quality Control Board, California Coastal Commission
