Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: 2018111030

Project Title: California Central Coast Veterans Cemetery

Lead Agency: State of California Department of Veterans Affairs

Contact Name: Terry Ash, Senior Environmental Planner

Email: cccvcproject@ddaplanning.com Phone Number: Phone: (916) 376-3824

Project Location: Former Fort Ord (*City*) Monterey (*County*)

Project Decription (Proposed actions, location, and/or consequences).

The proposed project would involve the adoption and implementation of the 2015 Master Plan for the cemetery site and the construction and operation of Phase 2 of the CCCVC.

The primary purpose of the CCCVC 2015 Master Plan is to create a comprehensive, long-term development plan that identifies and addresses any issues related to the development of the CCCVC. The CCCVC Master Plan outlines a process and strategy for the implementation of the entire CCCVC, including utility constraints, architectural and design concepts, environmental issues, a signage plan, grading and geotechnical considerations, landscaping needs, phasing and associated cost estimates. The CCCVC 2015 Master Plan includes a phased approach to build-out that would serve the anticipated needs of veterans for the next hundred years. As a result, the full build-out of the CCCVC 2015 Master Plan is analyzed in the EIR/EA at a programmatic level.

Phase 2 of the 2015 Master Plan is considered a near-term project; therefore, it is analyzed at project level in the EIR/EA. Phase 2 would include the development of approximately 4.4 acres adjacent to the existing Phase 1 development. It includes a combination of burial facilities anticipated to meet Veteran's needs, as well as road and access from the existing Phase 1 site, irrigation, landscaping, and other ancillary improvements.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potentially significant effects were identified in the areas of biological resources, cultural and tribal resources, geology and soils, hydrology and water quality, noise, and transportation. With implementation of the Mitigation Measures identified in the EIR/EA, impacts would be reduced to a less-than-significant level and the proposed project would not result in any significant impacts.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Areas of controversy include potential impacts to biological resources, hazardous materials, water supply, transportation, and alternative locations.

Provide a list of the responsible or trustee agencies for the project.

Potential Responsible or Trustee Agencies may include:

California Department of Fish and Wildlife
U.S. Fish and Wildlife Service
State Architect
State Fire Marshal
Regional Water Quality Control Board
Monterey Bay Air Resources District
County of Monterey
City of Seaside
