Project Description (Proposed actions, location, and/or consequences).

The Development Plan Projects consist of the construction, operations, and maintenance of: (1) a 1,500 square foot Title 22 compliant tertiary wastewater treatment system; (2) Essential Services Building and parking lot; and (3) five solar structures and panels. The recycled water produced from the tertiary wastewater treatment system would be used to help irrigate the adjacent existing 55.63-acre Santa Barbara cemetery. The use of recycled water for the irrigation of the cemetery will allow the cemetery to cease use of potable water for irrigation purposes.

MSD has determined the following issue areas would require mitigation measures to reduce potential impacts to a less-than-significant level.
