Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: Shoreline Lake Improvements Project

Lead Agency: City of Mountain View

Contact Name: Raymond Wong

Email: Raymond.Wong@mountainview.gov Phone Number: 650-867-3304

Project Location: Mountain View, Santa Clara County
City *County*

Project Description (Proposed actions, location, and/or consequences).

The project would reduce erosion and sediment deposition and replace aging boating facilities. The project includes installation of rip-rap along the northeast shore, replacement of the existing boat dock system with a new floating boat dock system, installation of a new concrete kayak launch ramp facility, removal of sediment around the boat launch ramp, replacement of the existing maintenance pier with a fixed pier and installation of a sheet-pile wall to prevent sediment migration, and grading of the south beach shoreline.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Air Quality: Fugitive dust impacts during project construction; proposed mitigation would require all construction contractors to implement the basic construction mitigation measures recommended by the BAAQMD to reduce fugitive dust emissions.

Biological Resources: Potential impacts to special-status species; proposed mitigation would implement pre-construction surveys for nesting birds to avoid/minimize impacts.

Hazardous Materials: Potential impacts related to construction in proximity to former landfill; proposed mitigation would require preparation and implementation of a Health and Safety Plan to provide processes and procedures to minimize potential human health effects and environmental contamination.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

N/A

Provide a list of the responsible or trustee agencies for the project.

San Francisco Regional Water Quality Control Board
California Department of Fish and Wildlife
