Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: _____

Project Title: City of Coalinga Trails Master Plan Segments 1, 2, 13, 14

Lead Agency: City of Coalinga

Contact Name: Sean Brewer, Assistant City Manager

Email: sbrewer@coalinga.com Phone Number: (559) 935-1533 x143

Project Location: City of Coalina, Fresno County
City *County*

Project Decription (Proposed actions, location, and/or consequences).

The City of Coalinga (City) is proposing the design, construction, and operation of portions of four segments (Segments 1 [portion], 2, 13, and 14) of the City's planned 8.8-mile perimeter trail and spur system identified in the City's Trails Master Plan using Congestion Mitigation Air Quality (CMAQ) funding (proposed project). The proposed project would develop approximately 10,520 linear feet (1.97 miles) of a multi-use (vehicle separated) loop-and-spur Class I bicycle/ pedestrian trail in the city of Coalinga, Fresno County, California. The project would connect residents in Coalinga (and a disadvantaged census tract) to different activity centers within the city.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Air Quality: potential to conflict with an applicable air quality plan, result in release of naturally occurring asbestos (NOA), and expose sensitive receptors to short-term air pollutant concentrations during construction. Mitigation includes implementation of measures to reduce construction-generated emissions and require geologic evaluation for NOA.
Biological Resources: potential disturbance to special-status wildlife, migratory birds, and roosting bat species. Mitigation includes preconstruction surveys, environmental awareness training, biological monitoring, and San Joaquin kit fox (SJKF) conservation measures.
Cultural Resources/Tribal Cultural Resources: potential to impact previously unidentified cultural materials or buried human remains during subsurface grading and excavation activities (survey was negative).
Hazards & Hazardous Materials: potential to release NOA during construction activities. Mitigation requires geologic evaluation for NOA.
Land Use & Planning: potential to be inconsistent with the City's General Plan. Implement mitigation from Air Quality, Biological Resources, Cultural Resources, Hazards & Hazardous Materials, and Noise.
Noise: potential to increase ambient noise level in the vicinity of the project during construction. Mitigation includes compliance with the City's Municipal Code and proper equipment maintenance.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

No known areas of controversy.

Provide a list of the responsible or trustee agencies for the project.
