Project Title: Recycled Water Distribution System, Southwest Quadrant

Project Location (include county): City of Fresno

Project Description: See attached.

This is to advise that the City of Fresno has approved the above described project on
(☒ Lead Agency or ☐ Responsible Agency)

_____ and has made the following determinations regarding the above described projects.
(Date)

1. The project [☐ will ☒ will not] have a significant effect on the environment.
2. ☐ An Environmental Impact Report was prepared for this project pursuant to the provisions of CEQA.
☒ A Negative Declaration was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures [☒ were ☐ were not] made a condition of the approval of the project.
4. A mitigation reporting or monitoring plan [☒ was ☐ was not] adopted for this project.
5. A statement of Overriding Considerations [☐ was ☒ was not] adopted for this project.
6. Findings [☒ were ☐ were not] made pursuant to the provisions of CEQA.

This is to certify that the final EIR with comments and responses and record of project approval, or the Negative Declaration, is available to the General Public at:

City of Fresno Development and Resource Management Department, 2600 Fresno Street, Room 3043, Fresno, California 93721-3604.

Recycled Water Distribution System, Southwest Quadrant – Addendum No. 3***State Clearinghouse No. 2014081078******Project Description:***

The City is proposing modifications to the previously approved recycled water distribution pipeline alignment as analyzed in the Recycled Water Distribution System, Southwest Quadrant Tiered Mitigated Negative Declaration (MND). The adopted Tiered MND analyzed approximately 111,937 feet (22 miles) of pipeline throughout the southwest portion of the City. The total miles of pipeline were reduced by approximately 1,600 feet (.30 miles) as part of the refinements analyzed and approved in Addendum #1. Addendum #2 evaluated the addition of approximately 4 miles of pipeline. As a result, a total of approximately 131,137 feet or 24.83 miles of pipeline were approved and evaluated in the Tiered MND, as amended.

Over the course of construction of the recycled water distribution pipelines, some planned portions of the segments were not constructed and refinements to the measurements of the constructed segments were made. As a result, the total length of constructed and proposed pipeline through Addendum #2 is 113,139 linear feet or 21.43 miles.

Addendum #3 proposes a refinement for addition of approximately 5,802 linear feet (or 1.10 miles) of new pipeline under the project known as Recycled Water Distribution System Extension to the Martin Luther King Activity Center. The addition results in a total of approximately 118,941 feet or 22.53 miles of pipeline, a decrease of approximately 9.3 percent from the most currently approved alignment as analyzed in Addendum #2. The following describes the changes in detail.

The additional pipeline will connect to the previously approved alignment at the intersection of A Street and Inyo Street. From there it will run southeast along A Street for approximately 461 feet before turning southwest at the intersection of Mono and A Streets. The alignment will then run along Mono Street for approximately 1,194 feet to the intersection of California and Pottle Avenues. The alignment will then continue through the intersection of California Avenue and Pottle Avenue, running south along Pottle Avenue which immediately turns into South Martin Luther King Jr. Boulevard, for a total of approximately 3,465 feet to an end point approximately 500 feet south of Church Avenue. Additionally, the alignment will consist of an approximate 682 foot segment running west along Church Avenue from the intersection of Martin Luther King Jr. Boulevard and Church Avenue.

Construction of the pipelines along the refined alignments will be consistent with the construction considerations described in Chapter 1, Project Description, pages 1-8 through 1-11 of the, originally approved, Tiered MND including similar construction equipment, methods, and staging areas. The additional pipeline will be installed in existing street rights-of-way. As such, construction impacts would be sufficiently covered with the previously approved CEQA documents.
