Prepared by:
The Environmental Services Department
City of San José

June 19, 2019
Phase I Environmental Site Assessment

St. James Park
2nd Street and St. James Street
San José, California

EXECUTIVE SUMMARY

The Environmental Services Department (ESD) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 for St. James Park (Site) in downtown San José. The Site is square shaped and consists of two parcels (APN 467-21-001 and 467-21-014) that are approximately seven-acres total. The park is bounded by East St. James Street to the north, East St. John Street to the south, North 1st Street to the west, and North 3rd Street to the east. North 2nd Street bisects the park. The surrounding area is urban and developed. Regional, vicinity, and aerial maps of the project site can be seen in Figures 1-3. It is understood that the City of San José plans to implement improvements to the park including the demolition and removal of most existing structures in the park and construction of a music pavilion, café and restroom building, picnic pavilion, dog parks, playground, park office, and various walking trails.

The purpose of this Phase I ESA is to determine if there are any recognized environmental conditions (RECs) indicating that presence or likely presence of any hazardous substances or petroleum products in, on or at the property due to a release to the environment, under conditions indicative of a release to the environment or under conditions that pose a material threat of a future release to the environment.

SITE HISTORY
The Site was established as a park called St. James Square in Charles Lyman's 1847 survey. The parks development was completed in 1868-1869 with the construction of paths, fences, and plantings. After 1880 the property was formerly designated as St. James Park from St. James Square and its general use since 1880 to present day has been for recreational park use. In 1955, City residents voted to build North Second Street through the center of the park, and a senior community center was constructed on the northeast portion of the site in1968 and demolished in late 2010 or early 2011. The surrounding properties are and have historically been primarily commercial office buildings, places of worship, and government buildings and are not expected to pose an environmental concern.

SITE RECONNAISSANCE
A field inspection of the 7-acre project Site was completed on June 13, 2019. At the time of inspection, the property was a developed recreational park with paved pathways, various monuments, a fountain, children's playground and a temporary dog park. The land was relatively flat with open grassy lawns and large trees. The vegetation was well maintained. There were no signs of any significant illegal dumping.

FINDINGS, OPINIONS AND CONCLUSIONS

Based on the results of the site reconnaissance, our review of available local, state, and federal environmental records, and the limited soil investigation, City of San Jose – Municipal Environmental Compliance Department has developed the following findings, opinions and conclusions:

RECs

Based on our review of available local, state, and federal environmental records, personal interviews conducted with knowledgeable parties, and a site reconnaissance, this assessment has revealed no evidence of recognized environmental conditions in connection with the Site.

HRECs

This assessment has revealed no evidence of Historical RECs (HRECs) in connection with the Site.

De Minimis Conditions and Other Environmental Concerns

This assessment has revealed no evidence of de minimis conditions in connection with the Site.

1 INTRODUCTION

1.1 PURPOSE

At the request of the City of San José (City) Parks, Recreation, and Neighborhood Services (PRNS) department, the Environmental Services Department (ESD) has performed a Phase I Environmental Site Assessment (ESA) for St. James Park, which is approximately seven acres and bounded by East St. James Street to the north, East St. John Street to the South, North 1st Street to the west, and North 3rd Street to the east. North 2nd Street bisects the park (Figure 1). The City is interested in improving this public space by demolishing all existing park structures and constructing various new improvements including a pavilion, park office, and various trails. The purpose of this Phase I is to determine if there are any environmental liabilities or concerns that exist on the subject site.

This report was prepared using the standard practice presented in the document titled "STANDARD PRACTICE FOR ENVIRONMENTAL SITE ASSESSMENTS: PHASE I ENVIRONMENTAL SITE ASSESSMENT PROCESS" (The American Society for Testing of Materials ASTM, E1527-13) and in general accordance with the federal EPA "All Appropriate Inquiries" (AAI) final rule in 40 CFR Part 312, effective November 1, 2006. This Phase I ESA is "intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability…" as defined in CERCLA Section 101(14) (§ 312.1 (c)) and conduct "an evaluation of business environmental risk associated with the parcel of commercial real estate…"

Under EPA and ASTM Standard Practice E1527-13, the purpose of conducting this Phase I ESA is to conduct an inquiry designed to identify whether a recognized environmental condition exists on the subject property. This practice is intended for voluntary use by persons that wish to assess the environmental condition of a property taking into account commonly known or reasonable ascertainable information.

As defined by ASTM Standard Practice E1527-13 standards, "the term recognized environmental condition (REC) means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." The term is not intended to include de minimis conditions that generally do not present a threat to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not recognized environmental conditions (ASTM E1527-13, 3.2.22, page 4).

As defined by ASTM Standard Practice E1527-13 standards, a controlled recognized environmental condition (CREC) is "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the

satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls."

As defined by ASTM Standard Practice E1527-13 standards, a historical recognized environmental condition (HREC) is "a past release or any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls."

1.2 SCOPE OF WORK

The scope of the Phase I ESA includes research to the extent feasible of readily available records and information relevant to the environmental conditions of the property, past uses of the property, physical features on the property, a site reconnaissance, documentation of conditions on the property, interviews with persons knowledgeable of the property, and a statement of findings, opinions and conclusions.

The contents of this report and work conducted are summarized below:

***Introduction*:** Identifies the property and the purpose of the Phase I ESA, scope of services, standard practice, significant assumptions, limitations, exceptions, special terms and conditions, and any additional services.

***Site Description*:** Describes the sites location and condition at the time of this report.

User Provided Information: Describes provided information such as title records, environmental liens or activity and use limitations, specialized knowledge, commonly known or reasonably ascertainable information, valuation reduction for environmental issues, owner, property manager and occupant information, and special contractual conditions between user and environmental professional.

Physical Setting: Describes the sites local and regional geology and hydrogeology.

***Site History*:** Evaluates the past uses of the site and adjacent properties based on a review of historical aerial photographs, Sanborn Fire Insurance Maps, City directories, historical topographic maps, and any other available records.

***Records Review*:** Various records and databases are reviewed as available from federal, state, and local regulatory agencies regarding hazardous substance release, use, storage, or disposal activities at the site or within the ASTM specified search distance. Information provided by the client or owner, and physical site characteristics such as topography, soils, and groundwater conditions are reviewed.

***Site Reconnaissance*:** Describes the observations made during the inspection of the site, such as the general site setting, interior and exterior observations, property uses and conditions, methods utilized, and limiting conditions.

***Interviews*:** Summarizes telephone, email and in-person interviews conducted with past and present owners, and occupants. Additional interviews may be conducted with adjoining property representatives, state and local government officials, or persons with historical knowledge regarding the site.

Evaluation: Discusses the findings, opinions, and conclusions of the Phase I ESA, as well as data gaps, data failures, deletions, environmental professional statement and signatures.

1.3 SIGNIFICANT ASSUMPTIONS

The information obtained and utilized in completing this report has been derived in part from the City of San José employees or agents and third-party sources, such as, property occupants and/or representatives, government agencies and regulatory agency databases. This information is assumed to be reasonably accurate and complete, but no effort is conducted to validate the accuracy and completeness. It should be noted that this information is subject to professional interpretation, which leads to conclusions which may differ, based on opinions specific to individuals.

1.4 SPECIAL TERMS AND CONDITIONS

ESD was authorized to perform this Phase I ESA by the City of San José Parks, Recreation and Neighborhood Services (PRNS) Department. Information regarding the property was provided by PRNS.

2 SITE DESCRIPTION

2.1 LOCATION AND LEGAL DESCRIPTION

Property information is summarized in the following table. A Site location map and parcel map is provided as Figure 1 and 2.

2.2 SITE SETTING

Presently, the Site consists of landscaping, including lawn areas and mature landscape trees, paved walkways, seating areas, an 840 square foot fitness parcourse, 2,750 sq ft dog park, 17,556 sq ft playground, restrooms, memorials, wood stage, and fountain. A Santa Clara Valley Transportation Authority (VTA) light rail and local bus stops are located on North 2nd Street, which bisects the park from north to south. The surrounding land consists primarily of commercial uses and government office buildings. The adjacent properties are zoned for Downtown Commercial.

2.3 SITE VICINITY SETTING

The Site vicinity is located in the Downtown San Jose area. The community of Autumn-Montgomery is located to the west; Japantown to the north; Horace Mann neighborhood to the east; the continuation of Downtown San Jose to the south. The area is made up of primarily office commercial buildings with retail businesses servicing the Downtown area.

3 USER PROVIDED INFORMATION

3.1 TITLE RECORDS

A review of the current Title Report was not reviewed for this Phase I ESA.

3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

A review of environmental lien or activity and use limitations were not reviewed for this Phase I ESA.

3.3 SPECIALIZED KNOWLEDGE

The PRNS department has specialized knowledge of this property as St. James Park has been a historic public park within the City's ownership since 1868. The City has access to historic records, master plans, and general knowledge of the surrounding developed areas.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

This investigation included the review of all commonly known or reasonably ascertainable information sources from the state, federal, and local agencies, property owner, and tenants.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

Environmental Services is not aware of any environmental issues that would qualify as a valuation reduction for environmental issues at this time.

3.6 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

The site owner is the City of San Jose, and the site is currently a public park.

3.7 SPECIAL CONTRACTUAL CONDITIONS

The report was prepared for the City of San José, which is the only entity that may rely on this Phase I Environmental Site Assessment. The Environmental Professional that prepared the report is an employee of the City of San José.

4 PHYSICAL SETTING

Information about the physical setting and regional geology and hydrology is presented in the following two tables.

PHYSICAL PARAMETER	GENERAL INFORMATION
Regional Geology	The Santa Clara Valley is a northwest-trending alluvial basin, bounded by the Santa Cruz Mountains to the west, the Diablo Range to the east, and San Francisco Bay to the north. The elongate valley lies between active Hayward and San Andreas faults that are a part of the California Coast Range Province. Consolidated sedimentary and metamorphic rocks, ranging from Jurassic to Pliocene age are exposed at the ground surface throughout the adjacent mountain areas. Semi-consolidated, Plioceneto Pleistocene-age sediments (conglomerate, sandstone, siltstone, and claystone) of the Santa Clara Formation occur along both flanks of the valley and in the valley trough beneath an accumulation of unconsolidated Pleisocene- through Holocene-age sediments. The consolidated deposits include stream-derived alluvium, alluvial fan deposits, and Bay deposits. Regional soil type is Clay loam. Based on the *City Monitored Site Naturally Occurring Asbestos Areas Map*, the site is not located within a naturally occurring asbestos (NOA) area.
Regional Hydrology	The Site lies within the Santa Clara Groundwater Sub-basin made up of two aquifers. Regionally, groundwater flow is estimated to generally flow to the northwest, towards the San Francisco Bay. Groundwater in the regions deep aquifer begins between 95-250 feet below ground surface (bgs).

5 SITE HISTORY

The history of the site was researched to identify obvious past land uses using available aerial photographs, Sanborn Fire Insurance Maps, historical topographic maps, and city directories provided by Environmental Database Resources, Inc. (EDR) in an environmental database resource package. The following table summarizes the availability of historical information reviewed during this assessment.

PARAMETER	YEARS REVIEWED
Aerial Photographs	1939, 1948, 1950, 1956, 1963, 1968, 1974, 1982, 1993, 1998, 2006, 2009, 2012, 2016
Sanborn Fire Insurance Maps	1884, 1891, 1915, 1950, 1969, 1984
Historical Topographic Maps	1889, 1897, 1899, 1953, 1961, 1968, 1973, 1980, 2012
City Directories	1922-2013
Previous Assessment(s)/ Records	Environmental Services performed a Phase I Environmental Site Assessment on the eastern portion of St. James Park in 2016.

5.1 AERIAL PHOTOGRAPHS

Historical aerial photographs of the site and surrounding vicinity were reviewed for the years referenced above and further discussed herein. Precise observations are limited, due to the extended scale of the aerials. The historical photos series are included in the EDR Aerial Photo Decade Package provided in Appendix A.

YEAR	DESCRIPTION
1939	The site appears to be developed as its current recreational park use. Surrounding properties appear to be developed as commercial spaces.
1948	The site and surrounding properties appear similar to the 1939 photo.
1950	The site and surrounding properties appear similar to the 1948 photo.
1956	The site and surrounding properties appear like the 1950 photo except for 2nd street runs north to south bisecting St. James Park into two equal blocks.
1963	The site and surrounding properties appear like the 1956 photo except for what looks like three to four structures in the northeast most corner of the park along N 3rd St and E St James St.

1968	The site and surrounding properties appear like the 1956 photo.
1974	The site and surrounding properties appear like the 1968 photo. There five structures clearly visible in the northeast corner of the park.
1982	The site and surrounding properties appear like the 1974 photo.
1993	The site appears to have undergone structural improvements, but primary use appears to remain recreational park use. The site and surrounding properties appear like the 1982 photo.
1998	The site and surrounding properties appear like the 1993 photo.
2006	The site and surrounding properties appear like the 1998 photo.
2009	The site and surrounding properties appear like the 2006 photo.
2012	The site's structures located in the northeast corner were removed sometime in between 2009 and 2012. The remainder of the site and surrounding properties appear to be like the 2009 photo.

The aerial photographs show the site has a long history of recreational park land use. From at least 1968 the northeast corner of the site has structures onsite, and by 2012 those structures had been demolished and removed. The surrounding area has historically been commercial office use. No environmental concerns were identified reviewing the historical aerials maps.

5.2 SANBORN FIRE INSURANCE MAPS

Sanborn maps for the site and nearby properties were reviewed for the years referenced above. The Sanborn maps depicted the Site historically referenced as St. James Square and St. James Park and contained very little detail. The 1984 Sanborn map shows a total of six structures in the northeast corner of the park labelled as a Senior Center. No environmental concerns were identified reviewing the historical Sanborn maps for the site.

The surrounding vicinity has been developed back to the earliest Sanborn map in 1884. The maps show the surrounding area has a history of residences, court houses, a post office, churches, offices and other site uses not indicative of significant hazardous materials storage or us. A structure labelled "Gas and Oil" (likely Gas Station) was observed in the 1950 and

1969 Sanborn map at the northwest corner of East St James and North First Street, about 100 feet northwest of or the northwest corner of St. James Park. The property is in the expected down groundwater gradient from the park. The EDR Certified Sanborn Map Report is provided in Appendix B.

5.3 CITY DIRECTORIES

City directories for the site and nearby properties were reviewed for the years referenced above. The subject site was not listed on any city directories dating from 1922-2014. The listings provided for adjoining properties did not contain any suspicious listings (e.g. gas stations, dry cleaners) in either a downgradient or upgradient groundwater flow direction indicating environmental concern. The listings are included in the EDR-City Directory Abstract provided in Appendix C.

5.4 HISTORICAL TOPOGRAPHIC MAPS

Historical topographic maps for the property were reviewed for the years referenced above. From 1953 to 2012, the topographic maps indicate the site was developed as St. James Square. The 1889, 1897, and 1899 maps do not show enough site detail to evaluate. The 1961 map clearly shows the installment of N 2nd Street bisecting the park. The map series is included in The EDR Historical Topographic Map Report provided in Appendix D.

6 RECORDS REVIEW

6.1 ENVIRONMENTAL RECORD SOURCES

A review of environmental regulatory databases maintained by various federal, state, and local agencies was conducted by reviewing the environmental database resource report created by Environmental Database Resources, Inc. (EDR) specializing in environmental risk information services and data. The report is titled EDR Radius Map™ Report with GeoCheck® (radius report) and consists of data and information from the federal, state, and/or local agencies of known or suspected contaminated facilities, known generators or handlers of hazardous waste, known waste treatment, storage, and disposal facilities, and permitted underground storage tank sites. The radius report is provided in Appendix E.

6.2 RECORDS REVIEW FINDINGS

The radius report identifies facilities up to 1-mile search radii of the site at distances specified by ASTM standards for particular regulatory lists. Professional judgment was used factoring in the type of listing, distance, and location with respect to the expected groundwater gradient of northeast/northwest. Listings identified within ¼-mile of the site were closely evaluated for any existing environmental concerns to the site. The databases identified the following listings within 1-mile of the site.

ENVIRONMETNAL DATABASE	TOTAL LISTINGS
NPL	0
CERCLIS	5
CORRACTS	1
RCRA-LQG	1
RCRA-SQG	9
US ENG CONTROLS	0
US INST CONTROLS	0

SAN JOSÉ HAZ MAT	32
CUPA Listings	54
HAZNET	0
PRP	0
HWP	1
EDR US Hist Auto Stat	18
EDR Hist Cleaner	17

The radius report identifies facilities up to 1-mile search radii of the site at distances specified by ASTM standards for regulatory lists. Professional judgment was used factoring in the type of listing, distance, and location with respect to the expected groundwater gradient to the north/northwest. Listings identified within ¼-mile of the site were closely evaluated for any existing environmental concerns to the site. The databases identified the following listings within 1-mile of the site.

The site was not identified under any of the regulatory databases. 114 listings were identified within 1/8 mile; 144 between 1/8-1/4 mile; 93 between 1/4-1/2 mile; and 11 between ½-1 mile of the site.

Listings that are a potential concern due to location (cross or up groundwater gradient of the site), or active regulatory listed sites include the First Unitarian Church, Fairfield Marshall Squares, the U.S. Postal Service, and 252 North 1st Street.

A 500-gallon Underground Storage Tank (UST) of heating oil as removed from the First Unitarian Church property located at 160 N 3rd St in August 2000. Soil surrounding the tank was over excavated, sampled, and removed from the property. Soil samples collected from the over excavation were analyzed and results confirmed the extent of leaked heating oil was removed. The property received case closure status from Santa Clara Valley Water District (SCVWD) as of September 2001.

A UST was discovered at the Fairfield Marshall Squares property located at 98 N 1st St during excavation/construction activities in February of 2017. Soil samples collected beneath the removed UST did not report concentrations above applicable screening levels and the Santa Clara County Department of Environmental Health (SCCDEH) determined that the reported contamination posed no risk to human health and the environment and required no further investigation or mitigation.

One 6,000-gallon diesel tank was removed from the US Postal Service property located at 101 N 1st St in August of 1989. Soil samples collected beneath the removed UST detected 9.6 ppm Total Petroleum Hydrocarbon as Diesel (TPH-d). No other contaminants were detected. The

SCVWD found no substantial evidence of a significant release and required no further action on the part of the property developers.

A 250-gallon UST previously used to store heating oil (diesel fuel) was removed in November 2018 from 252 N 1st Street. Confirmation soil samples from the native soil below the UST found soil contamination of 51,000-57,000 mg/kg TPH-d and 46-50 mg/kg Naphthalene. Groundwater was not encountered during tank removal. A fuel leak case was opened in February of 2019 by the SCCDEH and a workplan to further assess site conditions was requested from the developer in April 2019.

In summary, a review of the surrounding database listings on the EDR Radius Map Report (Appendix E) did not show any listings that pose a significant environmental risk to the Site.

7 OTHER RECORDS REVIEWED-AGENCIES CONTACTED

Regulatory agencies were utilized and contacted as indicated by the checklist below for reasonably ascertainable documentation regarding environmental conditions or history on the site and adjoining properties. The information provided by the state and federal agency databases listed below are usually included as part of the EDR Radius Map™ Report with GeoCheck® that was summarized above. However, because multiple sources of information are managed by different agencies, all reasonably ascertainable information is reviewed.

INQUIRED	AGENCY	DATABASE
X	California Department of Toxic Substances Control (DTSC)	Envirostar http://www.envirostor.dtsc.ca.gov/public/
X	Regional Water Quality Control Board-San Francisco (SFRWQCB)	Geotracker http://geotracker.waterboards.ca.gov/
X	Santa Clara County Department of Environmental Health (SCCDEH)	Local Oversight Program Public Record Document http://lustop.sccgov.org/
X	City of San José Planning and Building Division	Chris and Permits System
X	San José Fire Department (SJFD)	Chris and Permits System

The DTSC, SFRWQCB and SCCDEH regulatory databases did not reveal any additional sites of concern that were not reviewed from the EDR radius report and discussed in Section 6.

A review of on-line records from the City of San José Planning and Building Department revealed 62 documents relating to the property all having to do with various park improvement projects including tree plantings, bench installation, storm drainage, water fountain installation, and community center construction. These documents did not reveal any evidence of potential environmental concerns.

It is important to note that the City of San José's electronic database for property records does not always function properly and some documents were not able to be retrieved. The potential for this information to present new data affecting the findings of this Phase I ESA are very low.

8 SITE RECONNAISSANCE

8.1 METHODOLOGY AND LIMITING CONDITIONS

An inspection of the site was conducted on June 13, 2019 by Environmental Services Department staff. The entire site was traversed on foot and a limited visual inspection of the adjacent properties was performed from the site. Photographs of the site were taken on June 13, 2019 and are included as Appendix F.

8.2 OBSERVATIONS

A field inspection of the 7-acre project site was completed on June 13, 2019. The weather on this day was sunny with clear skies. At the time of inspection, the property was a developed recreational park. The land was a relatively flat with open grassy lawns and large trees. The vegetation was well maintained. There were no signs of any significant illegal dumping. Below is a checklist of general observation.

GENERAL OBSERVATIONS	REMARKS	OBSERVED	NOT OBSERVED
Current Use	Recreational Park	**x**	
Current Use likely to indicate REC's			**x**
Past use likely to indicate REC's			**x**
Structures	Sidewalk, park benches, seating areas, statues, fountain	**x**	
Roads	2nd street bisects the property North to South	**x**	
Topography of site and surrounding area	Flat, naturally grassy meadow	**x**	
Above ground storage tank			**x**
Asbestos and Lead			**x**
Below grade vaults			**x**
Burned or buried debris			**x**
Chemical storage			**x**
Chemical Mixing areas			**x**
Discolored soil or water			**x**
Ditches, streams			**x**
Drains and piping (e.g. floor drains/trenches, bay drains, sand traps, grease traps			**x**
Drums			**x**

Electrical or hydraulic equipment/potential PCB transformer			**x**
Fill Dirt from unknown sources			**x**
Fill dirt from a known source			**x**
Hazardous chemical and petroleum products in connection with known use			**x**
Non-hazardous containers with contents			**x**
Hazardous Waste storage			**x**
Heating and cooling system and fuel source			**x**
Industrial waste treatment equipment			**x**
Loading and unloading areas			**x**
Odors			**x**
Pits, Ponds, Lagoons			**x**
Pools of liquids			**x**
Process wastewater			**x**
Sanitary sewer system			**x**
Septic system (e.g. tank and leach fields)			**x**
Soil piles			**x**
Solid waste			**x**
Unauthorized dumping			**x**
Stained pavement or concrete			**x**
Stains or corrosion (interior, non-water)			**x**
Storm drains/catch basins	Along the intersections of the Site 2ndSt., 3rd St., and E. St. James St	**x**	
Stressed vegetation	Brown patches of grass likely from patchy watering practices	**x**	
Sumps and clarifiers			**x**
Surface water			**x**
Underground storage tanks including heating oil tanks			**x**
Unidentified substance containers			**x**

Waste water discharge			**x**
Water supplies (potable and process)			**x**
Wells (irrigation, monitoring, or domestic)			**x**
Wells (dry)			**x**
Wells (oil and gas)			**x**

10 INTERVIEWS

10.1 INTERVIEW WITH OWNER

An Environmental Site Assessment Questionnaire was provided to Rebekah Ross, Planner III of the City of San José Parks, Recreation, and Neighborhood Services (PRNS) Department on June 9, 2019. Ms. Ross provided a cover letter attached to the previous questionnaire from the 2016 Phase I completed by Environmental Services stating that no significant changes to the site had occurred between that time and this current Phase I (2019). The April 2016 questionnaire confirmed the previous current and historical use of the property as public park space dating back to 1847. No further information was provided in the 2016 questionnaire that has not been addressed in other sections of this report (Appendix G).

10.2 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

No other government agency representatives were contacted regarding the history of the property. Information from appropriate government agencies was accessed via the internet.

11 EVALUATION

11.1 FINDINGS

Recognized Environmental Conditions (REC's) are defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

This investigation did not reveal any recognized environmental conditions associated with the subject property.

Controlled Recognized Environmental Conditions (CREC's) are defined by the ASTM Standard Practice E1527-13 as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

This investigation did not reveal any controlled recognized environmental conditions associated with the subject property.

Historic Recognized Environmental Conditions (HREC's) are defined by the ASTM Standard Practice E1527-13 as a past release or any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

This investigation did not reveal any historical recognized environmental conditions associated with the subject property.

11.2 OPINIONS

This assessment of St. James Park did not show any evidence of RECs or environmental concerns associated with the Site. The Site was originally developed for recreational use dating back to 1847 and the property has been occupied by open grass covered areas, paved walking paths, park benches, playgrounds, fountains and monuments for over 150 years. A senior community center consisting of a cluster of 6 buildings was in the northeast portion of the site from 1968 to 2010 and appears to be the only significant development in the park's history. None of the current or previous site history is expected to have included the storage or use of hazardous substances or petroleum products. In addition, no nearby threats posed by other properties with environmental liabilities were identified.

11.3 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E15727-13 for the property located between East

Saint James Street to the north, North 1st Street to the east, North 3rd Street to the west, and East St John Street to the south. Any exceptions to, or deletions from, this practice will be described in the scope of work and/or limitations of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property and the Site is suitable for a future music pavilion and other improvements.

11.4 DATA GAPS

ASTM Standard Practice E1527-13 requires the environmental professional to comment on significant data gaps that affect the ability to identify recognized environmental conditions. A data gap is a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. A data gap by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. No significant data gaps were identified during this Phase I ESA.

11.5 DATA FAILURE

ASTM Standard Practice E1527-13 requires the environmental professional to comment on significant data failures that affect the ability to identify recognized environmental conditions. A data failure is occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met, despite good faith efforts by the environmental professional to gather such information. A data failure is not uncommon in trying to identify the use of the property at five year intervals back to the first use of 1940 (whichever is first). A data failure is one type of data gap. A data failure by itself is not inherently significant; it only becomes significant if it raises reasonable concerns. No significant data failures were identified during this Phase I ESA.

11.6 LIMITATIONS

The scope of work was limited to observation of the property at the time of the site visit, readily available information, and persons available during the time of interviews. The extent of information obtained is based on the reasonable limits of time and budgetary constraints. This Phase I ESA cannot wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the property. This assessment is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions. ESD makes no warranty, expressed or implied, except that our services have been performed in accordance with the environmental principles generally accepted at this time and location.

Site conditions and activities could change at any time after the completion of this report, therefore, observations, findings and opinions can be presumed valid for 180 days prior to the date of acquisition of the property (date on which a person acquires title to the property) or for transactions not involving an acquisition, the date of the intended transaction (per Section 4.6 of the ASTM Standard).

The scope of this Phase I ESA does not incorporate ASTM standard non-scope considerations such as wetlands, regulatory compliance, asbestos containing materials, lead paint, cultural

and historical resources, industrial hygiene, ecological resources, endangered species, high voltage lines and electromagnetic radiation, natural gas pipelines, or indoor air quality.

11.7 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in §312.10 of 40 CFR §312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquires in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by City of San Jose Env. Services were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/11/2019 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there are 9

RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information

that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/28/2019 has revealed that there are 11 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 66 LUST sites within approximately 0.5 miles of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 22 CPS-SLIC sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

HIST LUST: A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

A review of the HIST LUST list, as provided by EDR, and dated 03/29/2005 has revealed that there are 39 HIST LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 7 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 8 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 54 CUPA Listings sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

GARDEN CITY GAS WORK	W. ST JOHN AND MONTG	WSW 1/2 - 1 (0.654 mi.)	257	601

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 18 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 17 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Violation Date: 01-24-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to establish and electronically submit an adequate emergency response plan and procedures for a release or threatened release of a hazardous material.
Violation Notes: Facility's last electronic HMBP submittal on CERS was 12/11/17. This submittal is incomplete and missing an Emergency Response/Contingency Plan. Submit a complete and accurate plan no later than 2/26/18. If you fail to submit a compliant plan by this date, then you will be required to attend an office hearing on 3/15/2018 where penalties may be assessed. You may take advantage of one final offer of assistance by contacting either Yoni Fajardo at 408-314-2781, yoni.fajardo@cep.sccgov.org; or Myra Reichardt at 408-918-1984, myra.reichardt@cep.sccgov.org no later than Friday, February 2, 2018.

File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	* Chlorinated Solvents - PCE

DR. EU BUILDING (Continued) **S103881542**

Site History: This site is an historical building in downtown San Jose. It was formerly a hotel that had a dry cleaning facility in the basement. There has been a release of tetrachloroethene (PCE), a solvent used in dry cleaning, to soil and groundwater. Soil and groundwater investigation is underway and a remedial action plan is required.

FINDS:

Registry ID: 110002673401

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Facility employees stated that used oil is picked up once year. Facility may hold used oil in a container or tank for up to 180 days. Schedule a disposal of this waste and forward a copy of the receipt to HMCD (or forward a receipt to show that used oil has not accumulated for greater than 180 days).

Violation Date:	07-11-2018
Citation:	HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes:	Observed 1 x 55 gallon drum of oil filters containing the following: paper and metal-cased used oil filters, free-flowing liquid used oil, and oily rags. REMOVE FREE LIQUID, PAPER FILTERS, AND RAGS. PLACE RAGS AND PAPER FILTERS IN A CLOSED AND LABELED HAZARDOUS WASTE CONTAINER. Observed paper and metal filters in the "drained used oil and fuel filters" container. Per section 66266.130, only metal-cased filters are exempt from regulation as a hazardous waste under the scrap metal provision found in federal law. All paper filters must be disposed as hazardous waste and may be sent off with other oil contaminated solids (absorbents and saturated rags).

Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Facility employees stated that used oil is picked up once year. Facility may hold used oil in a container or tank for up to 180 days. Schedule a disposal of this waste and forward a copy of the receipt to HMCD (or forward a receipt to show that used oil has not accumulated for greater than 180 days).

Violation Date: 07-11-2018
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes: Observed 1 x 1 quart container of oil in the trash can that still contained free-flowing liquid. Containers must be emptied of all pourable materials before disposal in the trash.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 06-27-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: ON SITE FOR 2014 HAZARDOUS WASTE PERMIT INSPECTION JOSUE MATEOS, BUSINESS OWNER, SAN JOSE SMOG CHECK, ON SITE TO PROVIDE FACILITY ACCESS AND RECORDS REVIEW. THIS FACILITY IS A WASTE OIL GENERATOR ONLY. THE SPILL BUCKET ON THE UNDERGROUND STORAGE TANK (UST) WAS FOUND WITH APPROXIMATELY 4 INCHES OF WASTE OIL INSIDE. THIS SPILL BUCKET IS TO BE MAINTAINED AS CLEAN AND DRY. THE DRAIN VALVE SHALL BE SERVICED, OPERATIONAL, AND MAINTAINED AS DESIGNED. NOTE: THIS IS IDENTIFIED ON THE INSPECTION REPORT FOR THE UST BUSINESS OWNER, FOURTH & SANTA CLARA CHEVRON. THE SPILL BUCKET WAS EMPTIED AND CLEANED WHILE ON SITE BY JOSUE MATEOS. THE WASTE OIL WAS PLACED INTO THE UST. THE CONTAMINATED PAPER RAGS AND OTHER WASTE OIL CONTAMINATED MATERIALS WERE PLACED INTO A SOLID WASTE CONTAINER. THIS IS AN INITIAL ACCUMULATION START DATE. A 55 GALLON DRUM IDENTIFIED AS USED OIL FILTERS WAS OBSERVED 1/6TH FILLED, WITH APPROXIMATELY 2 INCHES OF WASTE OIL IN THE BOTTOM, SEVERAL PAPER [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 07-11-2018
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Inspection commenced on 7/9/18 with Hazardous Materials Specialist 1, Michelle Santos, and Owner Valentin Vasquez. Inspection concluded on 7/11/18 with review of hazardous waste manifests. San Jose Smog Check does primarily smog checks and some oil changes. Inspection included a walk-through of single bay service area, outdoor used oil storage tank, outdoor waste storage cage and surrounding dumpsters, and review of the following documentation: -3 years of hazardous waste manifests -Battery core exchange receipts -County small business disposal receipts The following hazardous waste streams were observed: -Used Oil: 1 x 200 gallon underground tank outside shop -Used Coolant: 1 x 1 gallon container inside shop -Used Oil Filters: 2 x 55 gallon drums in outdoor storage shed -Oily Rags: in the outdoor storage shed -Oily Absorbent: in a garbage bag in the shop -Batteries: approx. 15 in the

Local Agency:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E08L01f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	MTBE / TBA / Other Fuel Oxygenates, Gasoline
Site History:	12/83, a leak in the gasoline product line was discovered near the southwestern edge of the fuel dispenser island and a corroded section of pipe was replaced to stop the leak. 1/84, 6 groundwater monitoring wells were installed and commenced weekly monitoring for free product (FP). 2/84, one inch of FP measured in well MW-5 and also present in monitoring wells located near the USTs. 6/84, a pinhole sized leak was detected and repaired in the dispenser filter located at the southeastern edge of the fuel dispenser island. 2 additional monitoring wells were installed 10/84. 11/84 a hole was discovered near the northwest corner of a UST containing regular gasoline. The gasoline was pumped out of the UST, and the UST was removed from service until it was replaced in 1985. 5/85, USTs and piping were replaced. Product conveyance piping was also replaced with cathodic-protected conveyance piping. 11/89, advanced 6 soil borings, installed 2 wells, and determining the hydraulic conductivity and transmissivity after performing slug tests. Three areas containing soil and/or groundwater contamination were identified in the investigation: UST complex; waste oil UST and steam-cleaning area; and dispsenser islands in the southeast portion of the Site. 3/90, wells MW-6 and MW-8 located near the waste oil UST and steam-cleaning area were destroyed. Both wells had contained measurable amounts of FP and it was suspected that oily residue from the steam cleaning process was collecting in them and providing an additional source of groundwater contamination. Well MW-11 was installed as a replacement. Jan-Aug 1990, 5 soil borings advanced onsite; 19 borings and 1 monitoring well were advanced off-site. 4 extraction wells were also installed onsite along the northern border of the property. 4/90, conducted hydraulic testing and a soil vapor extraction (SVE) pilot study. The results of the SVE pilot study indicated that a full-scale SVE system could be used to remediate hydrocarbons in the unsaturated soils beneath the Site. 12/91, 4 off-site monitoring wells were installed. Groundwater extraction and treatment (GWET) system operated 2/92-6/96 and removed approximately 1,765,354 gal. of water and removed approximately 17 pounds of petroleum hydrocarbons. 5/00, 11 soil borings and 2 piezometers were advanced. 2002, a risk-based corrective action (RBCA) assessment was conducted to determine if the petroleum hydrocarbons in the soil and groundwater on and off-site presented a risk to human health. The RBCA indicated that all soil concentrations were below risk-based screening levels (RBSLs) assigned by the Regional Water Quality Control Board for the specified receptors (commercial workers, construction workers on and residents). Residents were included as on-site receptors based on the proximity of the Site to the senior apartment complex and the potential for the dissolved hydrocarbon plume to migrate beneath the building. The only exposure pathway of concern identified in the RBCA assessment was inhalation of benzene vapors in indoor air. The theoretical excess cancer risks and hazard quotients (for non carcinogens) were less than the respective Cal-EPA limits of one in a million. 1/04 a 2-phase extraction and treatment (TPET) system began

CHEVRON #9-4259 (Continued) **U001602681**

operating and ran through 11/06. 9/08, 9 soil borings were advanced to collect confirmation soil samples.

Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 12-20-2018
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: On-site to witness triennial secondary containment testing performed by Aneil Chand with Pinnacle Fuel Compliance Services, Inc. Mr. Chand has all required certifications to perform testing (eg. tank tester, Caldwell). The following components were tested: Annular Spaces (87,91, Diesel) - tested at 10 inches hg of vacuum for 1 hour. PASS. Sumps (87,91, Diesel) - hydrostatically tested for 30 minutes using Caldwell. PASS. Piping (87, 91, Diesel) - pressure tested at 5 psi for 1 hour. PASS. UDCs (1/2, 3/4) - hydrostatically tested for 30 minutes using Caldwell. PASS. Components yet to be tested today: Annular space (used oil) - To be tested at 10 inches hg of vacuum for 1 hour. UDC (5/6, 7/8) - To be tested hydrostatically for 30 minutes using caldwell.

Eval Type:	Other, not routine, done by local agency
Eval Notes:	The SB-989 Secondary Containment Testing was performed by Tony Fontana, ICC UST Service technician #1064273, exp. date = 5/29/16; Incon Tester # 1718713702, exp. date = 2/21/18 The following components were completed during the inspection: 3 Tank annulars (87, 91, diesel) tested at 10 inches of mercury for one hour. Test result = pass. 3 secondary product piping runs (87, 91, diesel) tested at 5 psi for hour. Test results = pass. 3 STP sumps (87,91 diesel) were tested hydrostatically using the INCON accelerated test method. Test results = pass. 1 UDC sump (1/2) was tested hydrostatically using the INCON accelerated test method. Test results = pass. The waste oil tank was under test at 10 inches of mercury for one hour and holding at the completion of the inspection. The UDC sump 3/4 was under test and passing at the completion of the inspection. The following components shall be tested on this date: 2 UDC sumps (5/6, 7/8). Send the secondary [Truncated]

Citation:	HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34
Violation Description:	Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.
Violation Notes:	Returned to compliance on 12/20/2018. Letter from the Chief Financial Officer (CFO) submitted in most recent electronic submission on 12-18-18 fails to follow the wording as required per 2808.1, subdivision (c)(1). Correct the regulatory reference in the letter from "section 2802.1, subdivision (d)(1)" to "section 2808.1, subdivision (c)(1)". Additionally, CFO Letter provided incomplete coverage per occurrence and indicated $500 instead of $5,000. CORRECTED AT TIME OF INSPECTION, NO FURTHER ACTION IS REQUIRED.

CERS HAZ WASTE:
Site ID: 70897
CERS ID: 10353847
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 70897
Site Name: ST JAMES HEALTH CENTER
Violation Date: 04-11-2014
Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes: Returned to compliance on 04/11/2014. Currently uses a product called "stain Kleen by Henry Schein for spot cleaning and tray cleaning. Product contains over 50% Sodium Nitrite (oxidizer). Product is added to water and disposed of via the drain. Cease disposal of this product via the drain until you make a hazardous waste determination.

Violation Date: 04-11-2014
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain and/or maintain an Active EPA ID.
Violation Notes: Returned to compliance on 04/11/2014. Facility EPA ID # CAL000045379 has been inactive since 6-30-1999. Per 25205.16(c) of the California Health and Safety Code, a generator of hazardous waste must maintain an active EPA ID #. Application provided to facility to reactivate EPA ID #.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 04-11-2014
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Facility is a non-profit health care organization and consists of a pharmacy and dental/medical offices. Walk-through performed with Gloria Pi?on, Clinic Coordinator. Inspection was performed 4-10-13 and report was issued today, 4-11-13. PHARMACY (Point of Contact - Helen Tong R.Ph.) Pharmacy currently uses a reverse distribution vendor named PharmaLink, Inc. Most expired/unwanted pharmaceuticals have a specific bar code that directs the staff to place the pharmaceuticals in a bin that will be sent to PharmaLink. Upon receipt, PharmaLink determines how the pharmaceuticals will be managed. Some pharmaceuticals are sent back to manufacturer and a credit is issued whereas others are destroyed via thermal destruction(waste-to-energy incineration). Pharmacy confirmed that products such as un-used Warfarin and Epinephrine have been sent for reverse distribution. Note: Using reverse distribution is encouraged for products that are eligible for a credit and/or for reuse. [Truncated]

Eval Type: Routine done by local agency
Eval Notes: FACILITY WALK THROUGH TOOK PLACE ON 9/14/15 AND INSPECTION REPORT WAS ISSUED TODAY. THE FOLLOWING HAZARDOUS MATERIALS IS STORED AT THIS LOCATION: - 240 GALLONS OF DIESEL ARE STORED IN A BELLY TANK OF AN EMERGENCY GENERATOR. THE EMERGENCY GENERATOR SERVICES AS BACK-UP POWER AND FOR THE FIRE PUMP. IN CASE OF AN ALARM AT THE GENERATOR THIS GETS RELAYED TO THE CITY OF SAN JOSE COMMUNICATIONS LINE. NOTES: IT IS REQUIRED FROM NOW ON THAT ANNUAL EMPLOYEE REFRESHER TRAINING BE DOCUMENTED FOR ALL EMPLOYEES AT THIS FACILITY. WRITTEN DOCUMENTATION OF EMPLOYEE TRAINING WILL BE REVIEWED DURING INSPECTIONS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs):	370
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs):	49
Waste code:	D007
Waste name:	CHROMIUM
Amount (Lbs):	6
Waste code:	D010
Waste name:	SELENIUM
Amount (Lbs):	6
Waste code:	P001
Waste name:	2H-1-BENZOPYRAN-2-ONE, 4-HYDROXY-3-(3-OXO-1-PHENYLBUTYL)-, & SALTS, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 0.3%
Amount (Lbs):	6
Waste code:	P075
Waste name:	NICOTINE, & SALTS
Amount (Lbs):	21

Violation Status: No violations found

FINDS:

Registry ID: 110002941933

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

WALGREENS #5219 (Continued) **1004676053**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SJSC TOWERS (Continued) **S121132576**

Local Agency:	SANTA CLARA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Lead, Diesel, Gasoline, Total Petroleum Hydrocarbons (TPH)
Site History:	Site is planned for development of two 28 story towers with 3 levels of below grade parking. Residual contamination from past site use has been reported at the site. Select areas of the site with elevated levels of lead will be excavated down to 3 feet and disposed of off-site. The remaining soils will then be excavated to approximately 40 feet and disposed of off-site. Please refer to the Soil and Groundwater Management Plan to review details of the reported contamination as well as the mitigation measures proposed to protect human health and the environment.

Violation Date:	09-25-2018
Citation:	HSC 6.95 25508.2 - California Health and Safety Code, Chapter 6.95, Section(s) 25508.2
Violation Description:	Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes:	As per CERS, intervals between 2016 and 2017 HMBP submittals were more than 12 months apart. 2016 submittal was certified in August, but 2017 was not submitted until December. Ensure that all future HMBP annual reviews are completed and electronically submitted within 12 months of the previous submission.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS

Site ID:	106366
Site Name:	CITY OF San Jose - FIRE STATION #01
Violation Date:	09-25-2018
Citation:	HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to complete and electronically submit a site map with all required content.
Violation Notes:	Facility site map is missing an emergency staging area and emergency response equipment. Facility failed to update the site map to reflect the conversion to B20 BioDiesel. Submit an updated map that includes current stored fuels and all required elements to Front Counter.

CITY OF SAN JOSE - FIRE STATION #01 (Continued) **S121287899**

	6.95, Section(s) 25508(a)(1)
Violation Description:	Failure to establish and electronically submit an adequate training program in safety procedures in the event of a release or threatened release of a hazardous material.
Violation Notes:	Facility is conducting safety tailgate meetings and site-specific emergency response training, but failed to document the training sessions or the employees that attended. Ensure that training is conducted annually and made available for review during an inspection. Provide documentation that all employees have been trained on emergency response in the event of a release and related site-specific safety protocols to the inspector.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	09-25-2018
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	A Hazardous Material Business Plan (HMBP) inspection was conducted with Mickey Pierce on 9/24/2018 and the report was given on today's date. The facility submitted an HMBP on 12/21/2017 via Front Counter. CERS ID 10349731. The facility owner is also the property owner. The following reportable hazardous materials were observed at the time of the inspection: 1. New fuels: -1000 gallon tank of B20 BioDiesel Note: Please provide clarification on the product(s) stored in the various fuel tanks, including the generator belly tank. The tank labeling, site map and inventory have conflicting information. While these fuels are similar in use, they are different chemicals and have different hazards associated with them. In order to reduce future confusion, it is recommended to update the labels on the fuel tanks to reflect the common or product name as it is listed on the Safety Data Sheet. Noted that the main tank is not fitted with a visual overfill indicator [Truncated]

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violations:

Site ID:	77228
Site Name:	TOWNSEND AUTOMOTIVE
Violation Date:	10-12-2017
Citation:	HSC 6.5 25250.22 - California Health and Safety Code, Chapter 6.5, Section(s) 25250.22
Violation Description:	Failure to properly manage used oil and/or fuel filters in accordance with the requirements.
Violation Notes:	Disposal records were unavailable for review for drained used oil filters
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID:	77228
Site Name:	TOWNSEND AUTOMOTIVE
Violation Date:	10-12-2017
Citation:	22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description:	Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes:	Per the hazardous waste tracking system, EPA ID# CAL000346741 is inactive. Provided facility with DTSC form 1358 to reactivate EPA ID#
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID:	77228
Site Name:	TOWNSEND AUTOMOTIVE
Violation Date:	08-15-2013
Citation:	HSC 6.95 25503.6 - California Health and Safety Code, Chapter 6.95, Section(s) 25503.6
Violation Description:	Failure to notify property owner in writing that the business is subject to the business plan program and has complied with its provisions.
Violation Notes:	Returned to compliance on 03/01/2017.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS

Site ID:	77228
Site Name:	TOWNSEND AUTOMOTIVE
Violation Date:	08-15-2013
Citation:	22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)
Violation Description:	Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.
Violation Notes:	Returned to compliance on 03/01/2017. Observed 2x5 gal buckets with a colored liquid stored near the used oil drums.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS

Site ID:	77228
Site Name:	TOWNSEND AUTOMOTIVE

TOWNSEND AUTOMOTIVE (Continued) **S112347009**

Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes:	Returned to compliance on 03/01/2017. Observed 1 used oil dolly without any hazardous waste markings. Also observed 2x55 gal drums of used oil and 2x55 gal drums of used antifreeze lacking a complete hazardous waste marking. All markings must be placed directly on drum.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	77228
Site Name:	TOWNSEND AUTOMOTIVE
Violation Date:	08-15-2013
Citation:	HSC 6.5 25189.5(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a)
Violation Description:	Failure to properly dispose of hazardous waste at an authorized location.
Violation Notes:	Returned to compliance on 03/01/2017. Observed 1xpint with approximately 200 ml of an extremely flammable intake system cleaner (Pure Power Plus by Heartland) disposed of in the dumpster on the property.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	77228
Site Name:	TOWNSEND AUTOMOTIVE
Violation Date:	08-15-2013
Citation:	HSC 6.95 25505(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)
Violation Description:	Owner/Operator failed to complete and/or submit a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet.
Violation Notes:	Returned to compliance on 03/01/2017. Submit a complete plan on the California Environmental Reporting System (CERS) within 30 days. DISREGARD VERBAGE BELOW IN REGARDS TO A FORM AND EHINFO.ORG. ALL HAZARDOUS MATERIALS BUSINESS PLANS (HMBP) MUST BE SUBMITTED ONLINE VIA CERS. "Getting started on CERS" sheet provided during inspection.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	77228
Site Name:	TOWNSEND AUTOMOTIVE
Violation Date:	10-12-2017
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	Observed 2 x 1 gallon containers of unknown substance in dumpster. Per facility, dumpster was left outside of their locked gate the prior night for garbage disposal. Make a hazardous waste determination for the liquids in the containers and if determined to be hazardous manage

TOWNSEND AUTOMOTIVE (Continued) **S112347009**

accordingly. Observed saturated/oily cardboard on the floor of shop near waste storage area. Per facility, cardboard may eventually need to be changed out. Make a hazardous waste determination for saturated/oily cardboard and if determined to be hazardous manage accordingly. Note: saturated/oily cardboard may be managed with drained used paper filters as "oily debris"

Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E08F01f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Gasoline
Site History:	1985 In February, 2 soil samples were collected from 9 and 10 feet below the ground surface (ft bgs) prior to closing an underground storage tank (UST) in place. These samples were reported to contain

RICHARDSONS AUTO SERVICE (Continued) **S103645849**

740 and 4,600 parts per million (ppm) Total Petroleum Hydrocarbons as Gasoline (TPHg). The USTs had not been in use for approximately 15 years and were reported to be empty. 1986 In July, the 500-gallon UST was reportedly removed. No documentation of the UST removal was found in the file. 1 soil sample was reported to have been collected at 14 ft bgs and contained 11,000 ppm TPHg. It is reported in a later report that approximately 20 cubic yards of soil were removed at this time. In September, the remaining USTs were reported to have been closed in-place by filling them with slurry. 1992 In August, 2 monitoring wells (MW1 and MW2) were installed onsite to 19.5-20.5 ft bgs. 6 soil samples were collected and reported to contain maximum concentrations of 170 ppm TPHg, 9.3 ppm Benzene, 3.9 ppm Toluene, 12 ppm Ethylbenzene, and 11 ppm Xylenes in samples collected from MW1. Well MW1 is located near the closed in-place USTs. In September, the initial groundwater samples were collected from the wells and reported to contain maximum concentrations of 36,000 parts per billion (ppb) TPHg, 6,800 ppb Benzene, 4,500 ppb Toluene, 1,800 ppb Ethylbenzene, and 3,600 ppb Xylenes. The wells have been sampled sporadically since this time. 1994 In November, well MW3 was installed onsite to approximately 22 ft bgs. 3 soil samples were collected and reported to contain 2,200 ppm TPHg, 7.1 ppm Benzene, 0.36 ppm Toluene, 11 ppm Ethylbenzene, and 2.1 ppm Xylenes. This well was added to the groundwater monitoring program. 1996 In July, 2 monitoring wells (MW4 and MW5) were installed offsite to depths of 17.5 and 20.5 ft bgs. 7 soil samples were collectyed and reported to contain low to non-detectable concentrations of the Constituents of Concern (COCs). These wells were added to the groundwater monitoring program. 1998 In April, monitoring well MW6 was installed offsite to 20 ft bgs. 2 soil samples were collected. The sample collected at 14 ft bgs was reported to contain 3,200 ppm TPHg, 3.9 ppm Benzene, 3 ppm Toluene, 23 ppm Ethylbenzene, 40 ppm Xylenes. Methyl tert-Butyl Ether (MtBE) was not reported to be present above the laboratory reporting limits. This well was added to the groundwater monitoring program. 2008 In May, 11 soil borings (EB1 through EB11) were advanced on and offsite. 11 soil samples were collected and reported to have maximum concentrations of 1,100 ppm TPHg, 6.3 ppm Benzene, 28 ppm Toluene, 9.8 ppm Ethylbenzene, and 51 ppm Xylenes. The highest TPHg concentrations were reported for samples collected from EB9 and EB11. 12 depth discrete grab groundwater samples were collected and reported to contain maximum concentrations of 3,000 ppb TPHg, 3.7 Benzene, 3.8 ppb Toluene, 0.6 ppb Ethylbenzene, and 2.1 ppb MtBE. The highest TPHg concentration was reported for the sample collected from EB8. In March 2010, a vapor extraction well was installed along with air sparge wells. Remedial feasibility testing is scheduled to be conducted. In November 2010, air sparge feasibility testing and vapor extraction feasibility testing was conducted. High concentrations were reported in the recovered soil vapor, which demonstrates mass is still present in areas near the building onsite. CAP to do SVE, AS and GWE at the site was approved 5/1/13. Delays have been encountered with obtaining necessary permits for the City of San Jose Building department. Proposed remedial action should be successful in reducing the mass remaining near and possibly under the onsite building.

File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E08G03f
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Heating Oil / Fuel Oil
Site History:	UST found in basement of apartment building. It is believed that it was installed after 1926 to store bunker fuel for boilers located in the basement. The boilers were reportedly used until the mid to late 1950s. In January 2015, the UST was found and it contained dark black viscous material. Approximately 1,950 gallons of mostly water and bunker fuel was pumped from the tank. Due to location, UST will be closed in place. Background: In January 2015 the property owner initiated the process of closing the UST in place by removing any residual contents and filling it with a cement slurry. Part of this closure in place included soil and groundwater sampling from areas around the UST. Petroleum hydrocarbons were detected on soil and groundwater samples around the UST. Contaminants detected in soil and groundwater include Total Petroleum Hydrocarbons as gasoline (TPHg), Total Petroleum Hydrocarbons and diesel (TPHd), and Oil and Grease range hydrocarbons. No wells were installed and only grab groundwater samples collected. Two phases of investigation have adequately defined the nature and extent of contamination which is limited in extent.

FINDS:

Registry ID: 110002783792

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS HAZ WASTE:
Site ID: 436354
CERS ID: 10748743
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 436354
Site Name: Cardenas Markets #203
Violation Date: 08-28-2017
Citation: 40 CFR 1 262.34(d)(5)(iii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(iii)
Violation Description: Failure to ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.
Violation Notes: Returned to compliance on 09/29/2017. Due to the number and type of violations observed additional training for the receivers is required.
Violation Division: Santa Clara County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 436354
Site Name: Cardenas Markets #203
Violation Date: 08-28-2017
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

MI PUEBLO NEWCO LLC (Continued) **S120049978**

Violation Notes:	Returned to compliance on 09/29/2017. 1. Observed 2 x cardboard boxes of hazardous waste stored haphazardly on hazardous waste storage drums. Mr. Delacruz stated these were positioned here due to a lack of space in the hazardous waste storage area. 2. Observed 1 x bag of discarded detergent with a hole in it stored on top of hazardous waste storage drum. Immediately place any compromised hazardous waste containers in secondary containment (i.e. a plastic bag) and place inside drum.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	436354
Site Name:	Cardenas Markets #203
Violation Date:	08-28-2017
Citation:	40 CFR 1 265.35 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.35
Violation Description:	Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless aisle space is not needed for any of these purposes.
Violation Notes:	Returned to compliance on 09/29/2017. Observed 1 x box of produce improperly stored on top of hazardous waste containers blocking access to 2 x 15 gallon poly drums of hazardous waste. Mr. Delacruz stated this was left here due to a shortage of space in the warehouse. Ensure all drums may be accessed, are not blocked, and that nothing is stored on top of containers.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	436354
Site Name:	Cardenas Markets #203
Violation Date:	08-28-2017
Citation:	40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)
Violation Description:	Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.
Violation Notes:	Returned to compliance on 09/29/2017. Observed no emergency posting at facility.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HW
Violation Source:	CERS
Site ID:	436354
Site Name:	Cardenas Markets #203
Violation Date:	08-28-2017
Citation:	22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description:	Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

MI PUEBLO NEWCO LLC (Continued) **S120049978**

Violation Notes: Returned to compliance on 09/14/2017. Observed 2 x cardboard boxes of hazardous waste with no hazardous waste markings. Mr. Delacruz stated that the STOU drum was full and therefore they had re-purposed some produce boxes to serve as hazardous waste containers.
Violation Division: Santa Clara County Environmental Health

235 WEST JULIAN STREET (Continued) **S108992047**

Site History: The approximately 0.65-acre Site is located at 235 West Julian Street near the intersection of Terraine Street and West Julian Street in San Jos, California in a commercial/light industrial area. The Site was occupied by Ropers Fruit Packing Depot in 1891; Bean Spray and Pump Company (with on-Site spray mixing, spray storage and machine shop activities) in 1915; a U.S. Government Warehouse in 1950; and foundry and lithograph businesses in 1969. A 2005 SECOR environmental investigation (Phase I and II) revealed elevated metal concentrations (arsenic, chromium, copper, lead, nickel and zinc in the upper 2 feet of soil. Diesel ranged petroleum hydrocarbons also were at depths ranging from 15 to 20 feet. Secor also reported elevated diesel ranged petroleum hydrocarbons in ground water (SB-8 @ 12,000 ppm). The results of the human health risk assessment indicated that potential on-Site construction workers and potential future residents will not incur significant carcinogenic or noncarcinogenic health effects via indoor and outdoor inhalation of the Chemicals of Concern in soil, soil vapor and ground water. The Site is zoned for commercial/industrial use but will be rezoned to high density residential use. The proposed Site use is for a 10 to 16 story residential tower. Construction is planned to commence in 2014 but could be as early as 2011. The discharger is proposing capping the Site with the development effectively limiting exposure to future residents.

Potential Contaminants of Concern:	Not reported
Site History:	August 2018 Block BF LLC is planning to construct a 5-story podium-style apartment building with one full level of ventilated, subterranean parking. Prior commercial operations at the site date back to 1884 and have included underground storage tanks, oil water separators, associated piping, a railroad spur(s), and manufacturing of specialty bicycle parts. The Regional Water Board has issued several no further action letters for parcels within the site when the site was zoned for commercial use. Block BF LLC has submitted a vapor intrusion mitigation system (VIMS) VIMS Design Report that includes the following elements: Excavation of soil at the entire site to approximately10 feet below ground surface (bgs) to allow for the subterranean parking Excavation of soil at the elevator pit locations to approximately 15 feet bgs Vapor barrier under the entire building footprint Vapor collection system installed beneath the

Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E08M03f
Potential Media Affect:	Aquifer used for drinking water supply, Soil
Potential Contaminants of Concern:	Benzene, Toluene, Trichloroethylene (TCE), Xylene, Gasoline, Waste Oil / Motor / Hydraulic / Lubrica
Site History:	In 1997 a Phase I Environmental Site Assessment (ESA) was performed and a potential UST was noted near the northern site boundary. In January 1998, a Phase II ESA was performed and discovered the presence of petroleum hydrocarbons and related constituents in soil and groundwater beneath the site. In May 1998 two USTs were removed from the site. On May 10, 1998 a UST (Tank 1) with an estimated volume of 8,000 gallons was removed and was suspected to have contained leaded gasoline. On May 19, 1998 a second UST (Tank 2) with an estimated volume of was removed and was suspected to have also contained leaded gasoline. The UST removal included overexcavation of the impacted soils. However, excavation of visibly impacted soils to the north was stopped due to concerns regarding the integrity of Carlysle Street. The maximum level of TPH-g detected below the tank were was 3,300 ppm. At that time 460 tons of soil was removed to Kirby Canyon landfill in Morgan Hill. In September 1999 additional soil sampling was performed. The maximum level of contamination in soil was 280 ppm TPH-g, 2 ppm benzene, 9 ppm toluene, 8.5 ppm ethylbenzene and 38 ppm xylenes. Groundwater contamination was up to 2,400 ppb TPH-g, 11 ppb benzene, 44 ppb toluene, 28 ppb ethylbenzene and 170 ppb xylenes. MTBE was not detected. On December 9, 1999 additional soil was excavated from the area around the former USTs. Approximately 344 tons of soil was removed and disposed of at the Forward Landfill in Manteca on December 17, 1999. Eight soil samples were collected in and around the excavated area. The maximum detected soil concentrations were 14 ppm lead, 19 ppm TPG-g and 0.22 ppm benzene. On December 29, 1999 approximately 93 tons of soil was excavated from the area near the former USTs (between shoring columns 10 and 14) and eventually disposed of at the Forward Landfill in Manteca. Confirmation soil samples detected TPH-g and benzene up to 250 and 1.6 ppm, respectively in sample location E-1-19'). On December 30, 1999 302 tons of soil was excavated and transported to Forward Landfill. Confirmation soil samples collected from sample location E-13 identified an area of concern. Consequently, on December 31, 1999 further excavation was performed between columns 17 and 19 and confirmation samples E-14 through E-16 were collected for chemical analyses. It was determined that the area of concern had been removed. Approximately 302 tons of soil was removed to the

SAN JOSE MERCURY NEWS (Continued) **S103473094**

Forward Landfill. On February 10, 2000 approximately 20 tons of soil was excavated and disposed at Forward Landfill. Confirmation soil samples taken from the excavation indicated that all constituents were below the affected zone criteria. Prior to March 13, 2000 13 soil samples were collected from the base of the northern portion of the site excavation area. A sample collected between columns 13 and 14 at a depth of 23.5 feet contained 0.83 ppm benzene. Approximately 5 cubic yards (7 tons) of soil was excavated at this location and disposed of off-site. Two additional soil samples collected at this location on January 10, and February 18, 2000. The soils samples were below the affected zone criteria. Groundwater extraction was used to dewater the site to allow for construction activities beginning on October 11, 1999. Extraction rates varied between 5 and 30 gallons per minute (gpm) from the eleven extraction wells. The permit to discharge water was terminated on March 9, 2000. Approximately 7,176,000 gallons of impacted water was discharged to the sanitary sewer during site development activities.

SAN JOSE, CA 95113 | **CPS-SLIC DEED EMI CERS** | **S103671546 N/A**

Relative: Higher
Actual: 87 ft.

CPS-SLIC:
Site Name: CARLYSLE DEVELOPMENT
Region: STATE
Facility Status: **Completed - Case Closed**
Status Date: 08/28/2014
Global Id: T10000003326
Lead Agency: SANTA CLARA COUNTY LOP
Lead Agency Case Number: 07S1E07J02s
Latitude: 37.335639
Longitude: -121.895093
Case Type: Cleanup Program Site
Case Worker: GOR
Local Agency: SANTA CLARA COUNTY LOP

THE PRESS (Continued) **S103671546**

RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Lead, Gasoline
Site History:	Subsurface investigations conducted prior to site redevelopment found elevated concentrations of lead and petroleum hydrocarbons in soil and groundwater at the site. Proposed to excavate and remove impacted soil. The project encompasses the entire city block.

Lead Agency Case Number:	Not reported
Latitude:	37.334262
Longitude:	-121.888452
Case Type:	Cleanup Program Site
Case Worker:	AVC
Local Agency:	SAN JOSE, CITY OF
RB Case Number:	43S1110
File Location:	Regional Board
Potential Media Affected:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Waste Oil / Motor / Hydraulic / Lubricating, * Metals
Site History:	The "Block 2 - City of San Jose Parking Lot Site" is located at 8 East San Fernando Street, between South First Street and South Second Street, in downtown San Jose. This 1-acre parcel has been used as a paved parking lot since at least 1980. Prior to 1980, the Site was occupied by several small stores and the OB Hale and Company Department Store. Prior to 1900, the Site operation included a paint shop. Block 3, an adjacent lot, has similar land use histories and has detected VOCs and TPHs in soil and groundwater. A former coal gasification plant was formerly located about 300 feet away. The Redevelopment Agency of the City of San Jose (the Agency) is currently planning to construct a new mixed-use building complex and underground parking structure. Specifically, the planned development includes excavation of the entire site to a depth of about 40 feet below the current surface to accommodate a three-level, underground parking structure. The space above the parking structure at ground level is planned for commercial use. The space above the commercial area is planned for hotel and residential use. To date, three rounds of site investigation have been conducted to study Site soil, groundwater, and soil gas. Investigation results were used in a Human Health Risk Evaluation and compared to screening levels such as CHHSL, ESLs and PRGs for the proposed exposure scenarios. Overall, the Site data compare favorably to these screening levels. Exceedances of those screening levels were found in only one soil sample for mercury (21 mg/kg vs. 18 mg/kg) and in soil gas samples for 1,3-butadiene (16.0 vs. 4.85 ug/cubic meter). However, the targeted exposure pathway may not even be complete when considering the proposed land use scenario (i.e., with the underground parking) and construction method.

File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: * Petroleum - Automotive gasolines, * Solvents, Stoddard solvent / Mineral Spriits / Distillates
Site History: Development of site is in two phases. Phase I is complete. About one half of the site is included in Phase 1. Phase 1 was excavated to 30-40 feet and dewatered during construction. Contaminated soil and groundwater were handled in accordance with an approved RAP. An nfa letter was issued for the Phase 1 portion of the site. Phase 2 is currently a parking lot. A RAP was being developed for Phase 2 prior to the elimination of the redevelopment agency. Currently the site R.P. for the Phase 2 portion of the site is the Sucessor Agency to the San Jose Redevelopment Agency.

Local Case Number:	07S1E08G02f
Potential Media Affect:	Other Groundwater (uses other than drinking water), Soil
Potential Contaminants of Concern:	Diesel, Gasoline
Site History:	Phase II Assessment was conducted June 2008. Former gasoline service station believed to have been in operation from 1915 through 1965. Soil borings resulted in finding soil and groundwater contamination as follow:In soil 1,200 ppm TPHd, 297 ppm TPHg, 0.22 ppm n-Propylbenzene at 17.5 ft bgs and in groundwater 12,200 ppb TPHd, 2,300 ppb TPHg, 69.2 ppb n-Propylbenzene. Additional soil and groundwater investigation took place August 2008 and showed high levels of TPHg and TPHd. Work Plan was requested to be submitted in July 2009 for additional site assessment report to inlcude determination of groundwater flow direction and the gradient and efforts to locate the UST. Extension to submit the work plan was given to April 2010.

Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Diesel
Site History:	The site is currently an AT&T property occupying an entire city block. The surrounding area is primarily commercial properties. Currently a nine story office building which originally dates back to approximately 1950 when AT&T purchased land from the Greyhound bus lines company. In 1992, five 10,000 gallon underground storage tanks (USTs) containing diesel fuel and all associated piping were removed from the southwest corner of the site. Soil samples collected during the UST removal contained elevated concentrations of petroleum hydrocarbons. Three new 20,000 gallon USTs were subsequently installed approximately 90 feet to the north of the original UST pit. In 1995 six monitoring wells were installed on-site to monitor groundwater contamination. In 1996 free product was observed in monitoring wells MW-1 and MW-6 and both passive and active free product removal activities were initiated. Groundwater monitoring and free product recovery continued through 2001 when a corrective action plan (CAP) was approved. The CAP approved injection of oxygen-releasing compound (ORC) into the subsurface to promote biodegredation. In 2002 passive free product recovery skimmers were installed in wells MW-1 and MW-6 and currently remain in these wells.

PACIFIC BELL - 95 S ALMADEN (Continued) **S111217095**

In 2008 another CAP was submitted recommending the removal of remaining contamination through excavation. In 2012 the pre-excavation design investigation was performed during which two direct push soil borings and nineteen CPT UVOST borings were drilled to determine the extent of soil contamination in order to help finalize and excavation design. Groundwater monitoring is currently being performed on a semi-annual basis in the first and third quarters.

Region:	STATE
Facility Status:	**Open - Assessment & Interim Remedial Action**
Status Date:	06/16/2017
Global Id:	T10000010480
Lead Agency:	SANTA CLARA COUNTY LOP
Lead Agency Case Number:	2017-11s
Latitude:	37.34028
Longitude:	-121.88283
Case Type:	Cleanup Program Site
Case Worker:	GOR
Local Agency:	SANTA CLARA COUNTY LOP
RB Case Number:	Not reported
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Soil Vapor, Under Investigation
Potential Contaminants of Concern:	Tetrachloroethylene (PCE)
Site History:	The church is undergoing a redevelopment project and site assessment data reported chlorinated solvent contamination in groundwater beneath the property. The contaminated groundwater is from an up-gradient dry cleaner currently regulated by the Regional Water Quality Control Board. Additional assessment is underway to determine vapor intrusion risk.

Case Type:	Cleanup Program Site
Case Worker:	REG
Local Agency:	Not reported
RB Case Number:	43S0253
File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Aquifer used for drinking water supply, Sediments, Soil, Soil Vapor, Surface water
Potential Contaminants of Concern:	1,1,1-Trichloroethane (TCA), Other Chlorinated Hydrocarbons, Trichloroethylene (TCE), Vinyl chloride, Other Petroleum
Site History:	The area of the Site is approximately 13 acres, centered on Old West Julian Street, bounded on the west by the Guadalupe River, on the east by the Guadalupe Parkway (Route 87), on the north by the Union Pacific Railroad, and on the south by West Julian Street. The Site is under development by Sobrato Development Companies (SDC), the current owner. Two buildings and a parking structure have been completed. Construction on a third building was iscontinued prior to completion due to economic reasons. FMC and predecessor companies occupied the Site from the early 1900s through 1986. Manufacturing operations, including production of agricultural machinery, food-processing equipment, and military tracked vehicles, occurred at the Site beginning in the early 1900s. Manufacturing operations at the Site ceased in 1986 and the facility was leased for warehousing and other storage purposes. In June 1998, FMC sold the property to SDC.FMC initiated environmental investigations at the Site in 1986. Soil sampling in former manufacturing and product storage areas revealed the presence of petroleum hydrocarbons, volatile organic compounds (VOCs), and metals. Further investigations included the installation of groundwater monitoring wells that detected VOC constituents in two shallow water-bearing zones beneath the Site. Quarterly groundwater monitoring was conducted from the third quarter of 1989 through the first quarter of 2001. Semi-annual groundwater monitoring and reporting began in April 2001. On June 21, 1989, the State of California Regional Water Quality Control Board, San Francisco Bay Region (RWQCB) adopted Order Number 89-107, Site Cleanup Requirements for FMC Corporation-Ground Systems Division, 333 West Julian Street, San Jose, Santa Clara County (RWQCB, 1989). On August 15, 1990, Order Number 90-122 (RWQCB, 1990) was adopted by the RWQCB, amending Order Number 89-107 with respect to the adoption of final Site cleanup levels. On January 21, 1998, Order Number 98-006 was adopted (RWQCB, 1998) for the Site, amending Orders 89-107 and 90-122 with respect to revising soil cleanup standards and adding additional tasks to protect groundwater and address risks associated with exposure to residual soil contamination. On March 21, 2001, Order No. 01-031, Final Site Cleanup Requirements and Rescission of Orders Nos. 89-107, 90-122, and 98-006 for FMC Corporation, for the property located at 333 West Julian Street, San Jose, Santa Clara County (RWQCB, 2001) was adopted by the RWQCB. This annual compliance report is being

FMC CORP SAN JOSE ORDNANCE PLT (Continued) **S106235203**

submitted to the RWQCB as required by Order No. 01-031, Provision D.5. FMC implemented VOC source removal using a Soil Vapor Extraction system in thesouthwest portion of the Site from 1991 through March 1994. In addition, a groundwater extraction and treatment system for the A-level aquifer operated at the Site from March 1992 through January 1997, when it was discontinued due to changed groundwater flow directions, limited mass removal over time, and completion of effective source removal. Authorization to discontinue operation of the groundwater extraction and treatment systemwas given by the RWQCB in their letter to FMC, dated January 2, 1997 (RWQCB, 1997). The RWQCB documented the achievement of meeting the Site soil cleanup goals forchlorinated solvents in prior Order No. 98-006. FMC performed a natural attenuation evaluation in 2000 (HSI GeoTrans, 2000) to consider methods of remediating the residual VOCs present in Site groundwater. The evaluation concluded that VOC degradation could be accelerated through the introduction of an electron donor that would enhance the biodegradation. Cheese whey was selected as the electron donor material, and, in accordance with Task C.2. of Order Number 01-031 and the Work Plan for In-Situ Bioremediation Using Cheese Whey Injection (Work Plan) dated May 30, 2001 (GeoTrans, 2001), cheese whey injection was conducted at ten Site monitoring wells and piezometers in July2001 to enhance biodegradation of VOCs in groundwater. Additional cheese whey was injected at nine monitoring wells and piezometers in May 2003 to increase the in-situ reactive zone and further promote an environment for biodegradation. Groundwater sampling was conducted to evaluate the effectiveness of enhanced biodegradation on a monthly basis from September through December 2001, and on a semi-annual basis from March 2002 to March 2005. Discharger was urged to evaluate the site for case closure under the low threat closure criteria in February 2015.

Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Gasoline
Site History:	The site is an inactive dry cleaner. Previous site investigations indicated that the dry cleaning chemical tetrachoroethene had contaminated soil and groundwater beneath the site. The Regional Water Board has required the responsible parties to define the extent of contamination originating from the site. Investigation is still ongoing with the remedial actions to be evaluated by June 2016.

Case Worker:	AC
RB Case Number:	18-007
Local Agency:	SANTA CLARA COUNTY LOP
File Location:	All Files are on GeoTracker or in the Local Agency Database
Local Case Number:	07S1E08B01f
Potential Media Affect:	Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern:	Benzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates
Site History:	On December 22, 2009 sampling subcontractor, GeoRestoration, Inc., collected groundwater samples from the three on-site monitoring wells MW-1, MW-2, and MW-3 and one off-site monitoring well, MW-4. On November 3, 2009, RMA met with the SCDEH staff to discuss the status and conduct of several on-going Robinson Oil Company (ROC) projects including the Rotten Robbie 42 site. Particular concern was expressed regarding the benzene concentration that had been detected in the groundwater grab sample that had been collected from soil boring SB-1 on June 20, 2003. SB-1 is located on the ROC site but is less than 10 feet from the building on the adjacent property (317 N. 10th Street) that is used as a church. The benzene concentration of 750 ug/L detected in the grab sample from SB-1 is higher than the benzene environmental screening level for vapor intrusion of 540 ug/L. A subsequent groundwater grab sample collected from soil boring SB-2 installed (May 13, 2004) immediately adjacent to the church on the opposite (northwest) side was non-detect for benzene at <0.5 ug/L. During the discussion, it was decided that an additional soil boring (SB-5) would be installed proximal to the earlier boring SB-1. Only if the benzene concentration in the groundwater grab sample exceeded the vapor intrusion screening level (540 ug/L), would soil vapor testing be required. On December 22, 2009, concurrent with groundwater monitoring at the site, soil boring SB-5 was installed using a hand auger. Benzene was reported at 164 ug/L in the grab groundwater sample collected in SB5. Remediation at this site was removal of soil when USTs were replaced in 1997. This case was closed by the SWRCB.

CERS HAZ WASTE:
Site ID: 149190
CERS ID: 10092736
CERS Description: Hazardous Waste Generator

Violations:
Site ID: 149190
Site Name: ROTTEN ROBBIE #42
Violation Date: 03-05-2015
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion.
Violation Notes: Returned to compliance on 03/05/2015. THE 5-GALLON SPILL BUCKET FAILED WHEN IT WAS HYDROSTATICALLY TESTED WITH WATER. TECHNICIAN CLEANED OUT THE DRAIN VALVE AND CHECK THE SWIVEL ADAPTER. ADDITIONALLY THE TECHNICIAN ADDED WD40 TO THE ADAPTER TO MAKE IT LOOSER. THE SPILL BUCKET WAS THEN RETESTED AND PASSED. NO FURTHER ACTION IS REQUIRED.

Violation Date: 03-05-2015
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an

ROTTEN ROBBIE #42 (Continued) **U001602621**

audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.

Violation Notes: Returned to compliance on 03/05/2015. FOR BOTH PLUS AND PREMIUM TANKS OVERFILL PREVENTION IS PROVIDED BY AN AUDIBLE/VISUAL ALARM AT 90% CAPACITY THAT WAS NOT FUNCTIONING WHEN TESTED BY THE TECHNICIAN. ACCORDING TO THE TECHNICIAN THE FUSES ON THE OUTSIDE ALARM WERE OUT AND HE REPLACED THEM. OVERFILL ALARMS WERE THAN RETESTED AND PASSED. NO FURTHER ACTION IS REQUIRED. 3/

Eval Type: Routine done by local agency
Eval Notes: **This is a time sensitive report and must be given to the station owner/operator immediately.** On-site to observe the annual UST Monitoring Certification. The Service Technician that conducted all tests was Jessie Rodriguez from Service Station Systems, Inc.; all required UST certifications were verified to be current. Verified that all equipment tested today matched equipment listed on the CERS submittal, dated 3/20/15. All spill buckets were hydrostatically tested with 5-gallons of water for 60-minutes with no drop in liquid. The 87-grade and Diesel tanks were equipped with mechanical overfill devices (flapper valves). The 89 & 91 ATG probes were removed and the floats raised to 90%, which activated both the audible and visual alarms at the monitoring panel and exterior alarm. All STP sump sensors were tested with water and produced an audible and visual alarm at the monitoring panel as well as positive shutdown of the turbines. All annular sensors [Truncated]

Facility Name: ROTTEN ROBBIE #42
Site ID: 149190
CERS ID: 10092736
CERS Description: Underground Storage Tank

Violations:
Site ID: 149190
Site Name: ROTTEN ROBBIE #42
Violation Date: 03-05-2015
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion.
Violation Notes: Returned to compliance on 03/05/2015. THE 5-GALLON SPILL BUCKET FAILED WHEN IT WAS HYDROSTATICALLY TESTED WITH WATER. TECHNICIAN CLEANED OUT THE DRAIN VALVE AND CHECK THE SWIVEL ADAPTER. ADDITIONALLY THE TECHNICIAN ADDED WD40 TO THE ADAPTER TO MAKE IT LOOSER. THE SPILL BUCKET WAS THEN RETESTED AND PASSED. NO FURTHER ACTION IS REQUIRED.

	Section(s) 2665
Violation Description:	Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.
Violation Notes:	Returned to compliance on 03/05/2015. FOR BOTH PLUS AND PREMIUM TANKS OVERFILL PREVENTION IS PROVIDED BY AN AUDIBLE/VISUAL ALARM AT 90% CAPACITY THAT WAS NOT FUNCTIONING WHEN TESTED BY THE TECHNICIAN. ACCORDING TO THE TECHNICIAN THE FUSES ON THE OUTSIDE ALARM WERE OUT AND HE REPLACED THEM. OVERFILL ALARMS WERE THAN RETESTED AND PASSED. NO FURTHER ACTION IS REQUIRED. 3/

Site ID:	149190
Site Name:	ROTTEN ROBBIE #42
Violation Date:	03-05-2015
Citation:	23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description:	Failure to comply with one or more of the following: failure to install a spill bucket, have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container, and/or be resistant to galvanic corrosion.
Violation Notes:	Returned to compliance on 03/05/2015. THE 5-GALLON SPILL BUCKET FAILED WHEN IT WAS HYDROSTATICALLY TESTED WITH WATER. TECHNICIAN CLEANED OUT THE DRAIN VALVE AND CHECK THE SWIVEL ADAPTER. ADDITIONALLY THE TECHNICIAN ADDED WD40 TO THE ADAPTER TO MAKE IT LOOSER. THE SPILL BUCKET WAS THEN RETESTED AND PASSED. NO FURTHER ACTION IS REQUIRED.

Violation Date: 03-05-2015
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.
Violation Notes: Returned to compliance on 03/05/2015. FOR BOTH PLUS AND PREMIUM TANKS OVERFILL PREVENTION IS PROVIDED BY AN AUDIBLE/VISUAL ALARM AT 90% CAPACITY THAT WAS NOT FUNCTIONING WHEN TESTED BY THE TECHNICIAN. ACCORDING TO THE TECHNICIAN THE FUSES ON THE OUTSIDE ALARM WERE OUT AND HE REPLACED THEM. OVERFILL ALARMS WERE THAN RETESTED AND PASSED. NO FURTHER ACTION IS REQUIRED. 3/

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	03-03-2016
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	**This is a time sensitive report and must be given to the station owner/operator immediately.** On-site to observe the annual UST Monitoring Certification. The Service Technician that conducted all tests was Jessie Rodriguez from Service Station Systems, Inc.; all required UST certifications were verified to be current. Verified that all equipment tested today matched equipment listed on the CERS submittal, dated 3/20/15. All spill buckets were hydrostatically tested with 5-gallons of water for 60-minutes with no drop in liquid. The 87-grade and Diesel tanks were equipped with mechanical overfill devices (flapper valves). The 89 & 91 ATG probes were removed and the floats raised to 90%, which activated both the audible and visual alarms at the monitoring panel and exterior alarm. All STP sump sensors were tested with water and produced an audible and visual alarm at the monitoring panel as well as positive shutdown of the turbines. All annular sensors [Truncated]

Violation Date: 03-05-2015
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665
Violation Description: Failure of the overfill prevention system to meet one of the following requirements: 1. Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or 2. Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or 3. Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or 4. Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling.
Violation Notes: Returned to compliance on 03/05/2015. FOR BOTH PLUS AND PREMIUM TANKS OVERFILL PREVENTION IS PROVIDED BY AN AUDIBLE/VISUAL ALARM AT 90% CAPACITY THAT WAS NOT FUNCTIONING WHEN TESTED BY THE TECHNICIAN. ACCORDING TO THE TECHNICIAN THE FUSES ON THE OUTSIDE ALARM WERE OUT AND HE REPLACED THEM. OVERFILL ALARMS WERE THAN RETESTED AND PASSED. NO FURTHER ACTION IS REQUIRED. 3/

Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: Conducted a hazardous waste inspection with Walt Mullen and Felecia Ortiz present. Reviewed disposal records and inspected waste accumulation area. Verified that the site's EPA ID number CAL000048152 was active. Facility had the following items on-site and available for use: Fire extinguishers, spill kit, eye wash, first aid kit, posted emergency procedures. Reviewed area inspection requirements and accumulation time-lines with Walt Mullen. The following violations were observed and corrected during the inspection: G020: MARKING OF HAZARDOUS WASTE The required facility information, physical state, hazardous properties and accumulation start date were sun faded on the hazardous waste label on the metal drum containing UST spill bucket test fluid. The sun faded information was re-applied to the label during the inspection. No further action is required. G020: ACCUMULATION TIME 1-55 gallon drum marked as hazardous waste, containing UST test fluid was [Truncated]

Eval General Type: Compliance Evaluation Inspection
Eval Date: 03-01-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On-site to observe the annual UST Monitoring Certification. The Service Technician that conducted all tests was Jesse Rodriguez from Service Station Systems, Inc; all required UST certifications were verified to be current. Verified that all equipment tested today matched equipment listed on the CERS submittal, dated 2/28/2017. All spill bucket were hydrostatically tested with 5-gallons of water for 60-minutes with no drop in liquid. Only the diesel and 87-grade tanks are equipped with mechanical (flapper valves) for overfill protection. ATG probes for 89 and 91-grade were removed to verify the overfill setting was at 90% and that the external audio/visual alarms were functional. UDCs are equipped with float & chain mechanisms; all were tested with water and functioned as required. All sensors (STP, annular and fill sumps) were tested and functioned as required. The Mechanical Line Leak Detectors were tested using VMI LDT-890 test system to simulate a [Truncated]

Evaluation:

Eval General Type:	Compliance Evaluation Inspection
Eval Date:	01-12-2018
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site with Ana Bui of HMCD to witness the annual monitoring system certification performed by Jarrod Cooke of Tanknology. Verified Mr. Cooke's ICC Certification, ICC-8155550 expires 4/5/19, Veeder Root Certification, B35255 expires 5/9/18, and VMI Certification, expires 2/23/19. 2 tanks: 87 and 91. Annular, STP, and under dispenser containment(UDC) sensors were tested in water and provided audible and visual alarms. STP and UDC sump sensors also provided positive shutdown. Sensor out and power out (fail safe) were tested and provided positive shutdown of all turbines. Overfill prevention is provided by flapper vales in the fill tubes. A 3 gph leak at 10 psi was simulated using the Tanknology LDT-5000 apparatus. The electronic line leak detectors were able to detect the simulated leak and shut down all turbines. Spill buckets for 87 and 91 are direct buried and were tested using Tanknology's vacuum apparatus with no loss. DUSTO monthly reports, DUSTO [Truncated]

Eval Date:	01-12-2018
Violations Found:	Yes
Eval Type:	Routine done by local agency
Eval Notes:	On site with Ana Bui of HMCD to witness the annual monitoring system certification performed by Jarrod Cooke of Tanknology. Verified Mr. Cooke's ICC Certification, ICC-8155550 expires 4/5/19, Veeder Root Certification, B35255 expires 5/9/18, and VMI Certification, expires 2/23/19. 2 tanks: 87 and 91. Annular, STP, and under dispenser containment(UDC) sensors were tested in water and provided audible and visual alarms. STP and UDC sump sensors also provided positive shutdown. Sensor out and power out (fail safe) were tested and provided positive shutdown of all turbines. Overfill prevention is provided by flapper vales in the fill tubes. A 3 gph leak at 10 psi was simulated using the Tanknology LDT-5000 apparatus. The electronic line leak detectors were able to detect the simulated leak and shut down all turbines. Spill buckets for 87 and 91 are direct buried and were tested using Tanknology's vacuum apparatus with no loss. DUSTO monthly reports, DUSTO [Truncated]

Eval Type:	Other, not routine, done by local agency
Eval Notes:	On-site to witness the underground storage tank system secondary containment (SB989) testing performed by Mr. Jarrod Cooke (certifications current) of Tanknology. Product piping is flexible pipe and the secondary was tested at 5 psi for one hour with no loss. The annular space of the tanks were tested at 10 inHg for one hour. The regular passed one hour with no loss. The Super test could not be completed due to time constraints. The piping sumps and under dispenser containment (UDC) were tested with a Tanknology VPLT accelerated test. The sumps passed a 30 minute test and the UDCs passed a 15 minute test. Contact our office at least two days prior to testing the Premium tank annular space. Submit a copy of the Secondary Containment Test report to our office within 30 days and keep a copy available for review for at least 3 years. Reports may be sent via email to USTinspector@deh.sccgov.org.

Eval Date:	01-19-2017
Violations Found:	No
Eval Type:	Routine done by local agency
Eval Notes:	On site to witness the annual monitoring system certification performed by Mr. Jesus Saldivar (all certifications current) of Tanknology. NOTE: The spill bucket testing and paperwork review were performed on 1/13/2017. See that inspection report for details. The annular, under dispenser containment (UDC) and sump sensors were tested in water and provided audible and visible alarms. The turbine sump and UDC sensors also provided positive shutdown of the turbines. Sensor out and power out (fail safe) triggered positive shutdown of all turbines. The electronic line leak detectors (ELLD) were tested and detected a simulated 3 gph leak at 10 PSI using the Tanknology LDT-5000 tester and provided turbine shutdown. Overfill protection is provided by flapper valves in the fill tubes. The emergency shut off (ESO) button was tested and shut down both turbines. email: sbala4@yahoo.com, Jamil.Hershewe@7-11.com Submit a copy of the Monitoring Certification and [Truncated]

Completed Sub Area Name: Not reported
Completed Document Type: Soils Management Plan
Completed Date: 07/21/2006
Comments: Comments on the report were: a soil management plan is required; asphalt removal, if needed and liquifaction issues for the SE corner will need to be addressed, and any other project ("Ball Park") that might involve a parking structure to be added to the parking lot at the HP pavilion.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 06/27/2003
Comments: Site Screening completed which recommended No Further Action. The soil remediation was completed in 1992 by a paved parking lot system, slurry wall around the Arena footprint, and soil cap at the Arena Green. The site was approved as closed by RWQCB in 1997. A deed restriction was recorded by DTSC in May 2003.

Completed Document Type: 5 Year Review Reports
Completed Date: 05/02/2008
Comments: The remedy (cap) continues to be protective of public health, safety and the aenvironment. the next 5 year review is due March 2013.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/20/1991
Comments: Report of Completion of Interim Remedial Measure/Removal Action (IRM/RA). Polynuclear aromatic hydrocarbons (PAHs) contaminated soil (23,000 cubic yards(CY)) resulting from a former PG&E gas manufacturing site was excavated and encapsulated into the nearby parking lots. Gasoline contaminated soil (17,000 CY) was also excavated and stockpiled nearby for vapor extraction treatment. The excavated area was backfilled with clean fill.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 06/28/1991
Comments: Completion of Phase I Construction Documentation Report. Required a deed restriction to be filed. PNA contaminated soil from a former PG&E site was excavated and encapsulated into a nearby parking lot. Gasoline contaminated soil was also excavated and stockpiled on a nearby lot for vapor extraction treatment. The excavated areas were backfilled with clean soil. The volume of excavation for PNA contaminated soil was approximately 23,000 cubic yards. The volume of excavation for gasoline contaminated soil was approximately 17,000 cubic yards. Groundwater treatment was performed under San Francisco RWQCB's requirements. Current files at the RWQCB list the site closed on 06/20/97.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence

SAN JOSE SPORTS ARENA (Continued) **S105954447**

Completed Date: 04/28/2015
Comments: The City of San Jose notified DTSC in an email of its plans to repair asphalt at the site, which is currently the location of the San Jose Arena (SAP Center). An attachment was included with the email shown the locations where the asphalt repairs would be done.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 05/30/2012
Comments: DTSC conducted its annual site visit to check the condition of the cap over contaminated soil and to verify compliance with the restrictions and requirements of the Land Use Covenant. During the inspection, numerous cracks were observed in the Hewlett Packard Pavilion parking lot. The cap consists of two feet of fill and clay and is overlaid with asphalt for use as a parking lot. The observed cracks appeared to only be in the asphalt, and the cap appears to remain protective of human health. There was no evidence of any activities prohibited by the Land Use Covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 07/06/2018
Comments: This email is an update from the City of San Jose about a Terradex alert for an excavation to repair a leak near a fire hydrant. Excavation is in the street and the activity does not require a Soil Management Plan.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Soils Management Plan
Completed Date: 07/21/2006
Comments: Comments on the report were: a soil management plan is required; asphalt removal, if needed and liquifaction issues for the SE corner will need to be addressed, and any other project ("Ball Park") that might involve a parking structure to be added to the parking lot at the HP pavilion.

SAN JOSE SPORTS ARENA (Continued) **S105954447**

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Other Report
Completed Date: 06/27/2003
Comments: Site Screening completed which recommended No Further Action. The soil remediation was completed in 1992 by a paved parking lot system, slurry wall around the Arena footprint, and soil cap at the Arena Green. The site was approved as closed by RWQCB in 1997. A deed restriction was recorded by DTSC in May 2003.

Completed Document Type: 5 Year Review Reports
Completed Date: 05/02/2008
Comments: The remedy (cap) continues to be protective of public health, safety and the aenvironment. the next 5 year review is due March 2013.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 06/20/1991
Comments: Report of Completion of Interim Remedial Measure/Removal Action (IRM/RA). Polynuclear aromatic hydrocarbons (PAHs) contaminated soil (23,000 cubic yards(CY)) resulting from a former PG&E gas manufacturing site was excavated and encapsulated into the nearby parking lots. Gasoline contaminated soil (17,000 CY) was also

SAN JOSE SPORTS ARENA (Continued) **S105954447**

excavated and stockpiled nearby for vapor extraction treatment. The excavated area was backfilled with clean fill.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 06/28/1991
Comments: Completion of Phase I Construction Documentation Report. Required a deed restriction to be filed. PNA contaminated soil from a former PG&E site was excavated and encapsulated into a nearby parking lot. Gasoline contaminated soil was also excavated and stockpiled on a nearby lot for vapor extraction treatment. The excavated areas were backfilled with clean soil. The volume of excavation for PNA contaminated soil was approximately 23,000 cubic yards. The volume of excavation for gasoline contaminated soil was approximately 17,000 cubic yards. Groundwater treatment was performed under San Francisco RWQCB's requirements. Current files at the RWQCB list the site closed on 06/20/97.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 04/28/2015
Comments: The City of San Jose notified DTSC in an email of its plans to repair asphalt at the site, which is currently the location of the San Jose Arena (SAP Center). An attachment was included with the email shown the locations where the asphalt repairs would be done.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction - Site Inspection/Visit
Completed Date: 05/30/2012
Comments: DTSC conducted its annual site visit to check the condition of the cap over contaminated soil and to verify compliance with the restrictions and requirements of the Land Use Covenant. During the inspection, numerous cracks were observed in the Hewlett Packard Pavilion parking lot. The cap consists of two feet of fill and clay and is overlaid with asphalt for use as a parking lot. The observed cracks appeared to only be in the asphalt, and the cap appears to remain protective of human health. There was no evidence of any activities prohibited by the Land Use Covenant.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 07/06/2018
Comments: This email is an update from the City of San Jose about a Terradex alert for an excavation to repair a leak near a fire hydrant. Excavation is in the street and the activity does not require a Soil Management Plan.

Background Info:	The current address on the building is 525 West Santa Clara Street. The site is bounded by Autumn Street to the east; West Santa Clara Street to the south; Julian Street, Montgomery Street, and St. John Street to the north; and the Southern Pacific Railroad tracks to the west. In May 1987, a site screening identified contaminants in the soil as polycyclic aromatic hydrocarbons (PAH's) from a former Pacific Gas & Electric (PG&E) site with concentrations ranging from non-detect to above 3,000 ppm in localized areas. EPA completed screening site inspection in 1989. The City of San Jose Redevelopment Agency (SJRA) acquired 22 parcels in a former industrial area in downtown San Jose that had a former Pacific Gas & Electric (PG&E) coal gasification plant, various automobile repair and service businesses, underground storage tanks, oil/water clarifers, and drums.

Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 12/27/1991
Comments: Completed Site Screening. In January 1989, additional sampling was conducted at the site. Soil boring results detected total oil and grease (TOG) and total petroleum hydrocarbons as diesel (TPHd) in excess of 1000 ppm. Lead was detected at 938 ppm. In May 1989, two groundwater monitoring wells (MW-1 and MW-2) were installed at the property. Lead was detected in groundwater at a concentration of 0.181 ppm. In May 1989, contaminated soil was removed from the previous sampled area. Final soil sample results indicated only one sample contained TOG at 780 ppm and lead at 191 ppm. The sample that contained the TOG and lead was collected beneath the foundation of the building. The excavations were backfilled with clean, imported fill.

CERS HAZ WASTE:
- Site ID: 120254
- CERS ID: 10352215
- CERS Description: Hazardous Waste Generator

Violations:
- Site ID: 120254
- Site Name: GORDON BIERSCH BREWING CO
- Violation Date: 05-04-2017
- Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
- Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
- Violation Notes: The facility routinely generates hazardous waste and has CA EPA ID Number CAL000335296, but the ID Number has been inactive since 6/30/2014. Furthermore, the facility has repeatedly obtained temporary EPA ID Numbers to dispose of hazardous waste at household hazardous waste collection facilities (see comments section below). All generators who routinely generate hazardous waste must obtain a permanent EPA ID Number and the EPA ID Number must remain active pursuant to HSC 25205.16(c). Temporary EPA ID Numbers are not for use by generators who routinely generate hazardous waste. A copy of DTSC FORM 1358 will be provided with this inspection report.
- Violation Division: Santa Clara County Environmental Health
- Violation Program: HW
- Violation Source: CERS

- Site ID: 120254
- Site Name: GORDON BIERSCH BREWING CO
- Violation Date: 05-04-2017
- Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
- Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
- Violation Notes: The following hazardous materials/wastes were observed in HMBP reportable quantities, but not included in the HMBP: - Diatomaceous Earth: Approximately 6,000 pounds. - Lerapur 3800XP: 60 gallons - The two wastewater settling tanks, two elementary neutralization tanks , and one reclaim tank used to accumulate and treat wastewater - The propylene glycol tank and propylene glycol in the fermentation tank cooling system - Sodium Hydroxide ?Caustic Tank? for CIP activities - Sulfuric Acid ?Acid Tank? for CIP activities - Battery Electrolyte (e.g. forklift batteries) The following hazardous materials are incorrectly reported: - Carbon dioxide compressed gas incorrectly reported in pounds, rather than cubic feet - Lerasept Special CC is incorrectly reported in pounds, rather than gallons

GORDON BIERSCH BREWING CO (Continued) **S103655146**

Violation Description:	Failure to notify property owner in writing that the business is subject to the business plan program and has complied with its provisions.
Violation Notes:	Returned to compliance on 03/06/2014.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	120254
Site Name:	GORDON BIERSCH BREWING CO
Violation Date:	05-04-2017
Citation:	22 CCR 15 66265.52 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.52
Violation Description:	Failure to include one or more elements in the Contingency Plan including but not limited to the following: description of actions personnel will take in response to a release or emergency, arrangements with local authorities, list of emergency coordinators including name, addresses & phone numbers, list of emergency equipment and their physical description, location and capabilities,?evacuation plan, and OES phone number. (If the owner or operator has already prepared a Spill Prevention, Control, and Countermeasures (SPCC) Plan or some other emergency or contingency plan, the owner or operator need only amend that plan to incorporate hazardous waste management provisions.)
Violation Notes:	The facility?s Contingency Plan does not contain the required information: - The names, addresses, and phone numbers (office and home) of all persons qualified to act as emergency coordinator. Note: Where more than one person is listed, one shall be named as primary emergency coordinator and others shall be listed in the order in which they will assume responsibility as alternates. - All of the emergency equipment at the facility (such as fire extinguishing systems, spill control equipment, communications and alarm systems (internal and external), and decontamination equipment). Furthermore, the plan does not include a physical description of each item on the list, and a brief outline of its capabilities.

GORDON BIERSCH BREWING CO (Continued) **S103655146**

Violation Description:	Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes:	- Lerasept SR: 165 gallons observed - 55 gallons of Lerades CSR is reported in the Hazardous Materials Inventory, but 115 gallons was observed. - 304 cubic feet of Nitrogen is reported, but 1340 cubic feet was observed. - 55 gallons of bleach is reported, but 288 gallons was observed.
Violation Division:	Santa Clara County Environmental Health
Violation Program:	HMRRP
Violation Source:	CERS
Site ID:	120254
Site Name:	GORDON BIERSCH BREWING CO
Violation Date:	05-04-2017
Citation:	HSC 6.5 25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25201(a)
Violation Description:	Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to this chapter.
Violation Notes:	1) The pH chart recorder for the two wastewater neutralization tanks and sampling point prior to POTW discharge were reviewed for the time period between 11/29/2016 ? 4/11/2017. At least five occurrences of the sample point?s pH being at or greater than 12.5 (e.g. 12.9, 12.5-12.7, 12.8) and the pH of the second neutralization tank being greater than 12.5 were observed on the chart recorders for the time period between 3/5/2017-4/11/2017. Three of the corrosive discharges continued for a prolonged period of time, while the others were short spikes. The sample point?s pH was also recorded as 12.6 for least one time period between 2/3/2017-3/5/2017 and once between 11/29/2016-1/4/2017. 2) HMCD was notified by San Jose-Santa Clara Regional Wastewater that a sample of the facility?s discharged corrosive wastewater on 12/30/2015 had a pH of 1.8. Upon inquiry as to what caused the illegal discharge of pH 1.8 corrosive wastewater on 12/30/2015, Mr. Chavez said that there was a [Truncated]

Citation:	HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5, Section(s) Multiple
Violation Description:	Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes:	1) The facility is a brewery who is in SIC Code Major Group 20 (SIC Code 2082) and is exempted from obtaining a hazardous waste treatment permit for the elementary neutralization of their 2.8%-5% sodium hydroxide wastes and 1.4%-5% sulfuric acid wastes generated from CIP activities pursuant to HSC 25201.13(c). However, the facility also directs any corrosive wastes, including wastes which meet hazardous waste corrosivity criteria, generated from leaking pipes, equipment malfunctions, and spills to the neutralization units via the drains located throughout the facility. At the time of inspection, a pipe associated with the ?caustic tank? holding 5% sodium hydroxide used for CIP activities was leaking and mixing with the water condensate on the floor underneath and in front of the tank. The resultant caustic-water condensate mixture was pH stripped and determined to have a pH = 11, which is consistent with the spilled caustic solution having a pH > 12.5. Mr. Chavez and [Truncated]

Violation Date:	05-04-2017
Citation:	22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11
Violation Description:	Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.
Violation Notes:	1) Chemical Room: A white-ish, opaque liquid with a small amount of foam was observed in the 5 gallon open bucket container located underneath the 50% sodium hydroxide and 36% sulfuric acid fill ports that is used as a spill bucket during deliveries. Mr. Chavez stated that the liquid in the container cannot be used and is a waste. NOTE: While Mr. Chavez stated that the same spill bucket is not used for both the sulfuric acid and sodium hydroxide fill ports, no other spill bucket was observed in the room. Ensure that incompatible hazardous wastes (sulfuric acid and sodium hydroxide) are not commingled in the same container. Determine if the liquid is a hazardous waste, as instructed below. 2) Room near Cooling Tower: The lid of a 5 gallon container labeled as ?Scale Solve? descaler was observed to be broken and a brown, pungent smelling liquid was observed to be spilling out of the container and onto the floor. Determine if the contents of the container is a waste or is [Truncated]

Violation Date:	05-04-2017
Citation:	40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31
Violation Description:	Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

GORDON BIERSCH BREWING CO (Continued) **S103655146**

Violation Notes: Used oil was observed to be leaking and accumulating on the floor near the mixing tank. Some of the spill was observed to still be in liquid form, while dried used oil residue was observed in other places on the floor. Furthermore, the drains in the floor are automatically directed to the on-site elementary neutralization unit (before POTW discharge), which is not equipped to separate and capture used oil from the other aqueous waste streams. Ensure that any spilled used oil is immediately collected and managed as hazardous waste.

Site ID: 120254
Site Name: GORDON BIERSCH BREWING CO
Violation Date: 05-04-2017
Citation: HSC 6.5 25201 - California Health and Safety Code, Chapter 6.5, Section(s) 25201
Violation Description: Failure to obtain a permit or grant of interim status after generator has accumulated hazardous waste on-site for longer than 90 days.
Violation Notes: Used oil generated from facility-wide equipment maintenance is consolidated into 5 gallon containers in the used oil accumulation area on the second floor and is taken to a household hazardous waste (HHW) drop-off location to be discarded. Mr. Chavez stated that pumps and equipment require oil changes approximately once per year and equipment and pumps observed during inspection were labeled with the most recent ?service? date? and next service due date. The five gallon bucket currently used to accumulate used oil was observed to be marked with an initial accumulation date of 2/11/2017, but per the auger?s label, the used oil consolidated into the container during inspection (see corrected container marking violation below) was generated on approximately 1/26/2017. Furthermore, HHW receipts reviewed during inspection only identified used oil being disposed of on 3/29/2017 and 4/2/2015 during the past three years. Hazardous waste cannot accumulate on-site for longer than [Truncated]

Site Name: GORDON BIERSCH BREWING CO
Violation Date: 05-04-2017
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: The facility routinely generates hazardous waste and has CA EPA ID Number CAL000335296, but the ID Number has been inactive since 6/30/2014. Furthermore, the facility has repeatedly obtained temporary EPA ID Numbers to dispose of hazardous waste at household hazardous waste collection facilities (see comments section below). All generators who routinely generate hazardous waste must obtain a permanent EPA ID Number and the EPA ID Number must remain active pursuant to HSC 25205.16(c). Temporary EPA ID Numbers are not for use by generators who routinely generate hazardous waste. A copy of DTSC FORM 1358 will be provided with this inspection report.

Violation Description: Hazardous Waste Generator Program - Abandonment/Illegal Disposal/Unauthorized Treatment - General
Violation Notes: 1) The facility is a brewery who is in SIC Code Major Group 20 (SIC Code 2082) and is exempted from obtaining a hazardous waste treatment permit for the elementary neutralization of their 2.8%-5% sodium hydroxide wastes and 1.4%-5% sulfuric acid wastes generated from CIP activities pursuant to HSC 25201.13(c). However, the facility also directs any corrosive wastes, including wastes which meet hazardous waste corrosivity criteria, generated from leaking pipes, equipment malfunctions, and spills to the neutralization units via the drains located throughout the facility. At the time of inspection, a pipe associated with the ?caustic tank? holding 5% sodium hydroxide used for CIP activities was leaking and mixing with the water condensate on the floor underneath and in front of the tank. The resultant caustic-water condensate mixture was pH stripped and determined to have a pH = 11, which is consistent with the spilled caustic solution having a pH > 12.5. Mr. Chavez and [Truncated]

Violation Date: 05-04-2017
Citation: HSC 6.5 25201 - California Health and Safety Code, Chapter 6.5, Section(s) 25201
Violation Description: Failure to obtain a permit or grant of interim status after generator has accumulated hazardous waste on-site for longer than 90 days.
Violation Notes: Used oil generated from facility-wide equipment maintenance is consolidated into 5 gallon containers in the used oil accumulation area on the second floor and is taken to a household hazardous waste (HHW) drop-off location to be discarded. Mr. Chavez stated that pumps and equipment require oil changes approximately once per year and equipment and pumps observed during inspection were labeled with the most recent ?service? date? and next service due date. The five gallon bucket currently used to accumulate used oil was observed to be marked with an initial accumulation date of 2/11/2017, but per the auger?s label, the used oil consolidated into the container during inspection (see corrected container marking violation below) was generated on approximately 1/26/2017. Furthermore, HHW receipts reviewed during inspection only identified used oil being disposed of on 3/29/2017 and 4/2/2015 during the past three years. Hazardous waste cannot accumulate on-site for longer than [Truncated]

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 05-10-2017
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: The following minor violations were observed during inspection: 1) G020C: Marking of Hazardous Waste: Auger Area: A small quantity of used oil accumulating in an un-labeled 5 gallon, red bucket was observed. The used oil was transferred into the properly labeled hazardous waste container in the used oil consolidation area during inspection. 2) G023C: Open Container: Auger Area: Used oil accumulating in an un-labeled 5 gallon, red bucket was observed, but transferred into the properly labeled hazardous waste container in the used oil consolidation area during inspection. NOTES TO FACILITY: 1) Ensure hazardous waste container transfer and storage areas are inspected at least weekly, looking for container leaks and deterioration. [CCR 66265.174]. 2) Ensure that a hazardous waste determination is conducted on any debris (filters, rags, disposable

CERS Description: Industrial Facility Storm Water

Violations:
Site ID: 120254
Site Name: GORDON BIERSCH BREWING CO
Violation Date: 05-04-2017
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: The facility routinely generates hazardous waste and has CA EPA ID Number CAL000335296, but the ID Number has been inactive since 6/30/2014. Furthermore, the facility has repeatedly obtained temporary EPA ID Numbers to dispose of hazardous waste at household hazardous waste collection facilities (see comments section below). All generators who routinely generate hazardous waste must obtain a permanent EPA ID Number and the EPA ID Number must remain active pursuant to HSC 25205.16(c). Temporary EPA ID Numbers are not for use by generators who routinely generate hazardous waste. A copy of DTSC FORM 1358 will be provided with this inspection report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/11/2019

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/11/2019

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Southeast Map:	5640414 SAN JOSE EAST, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

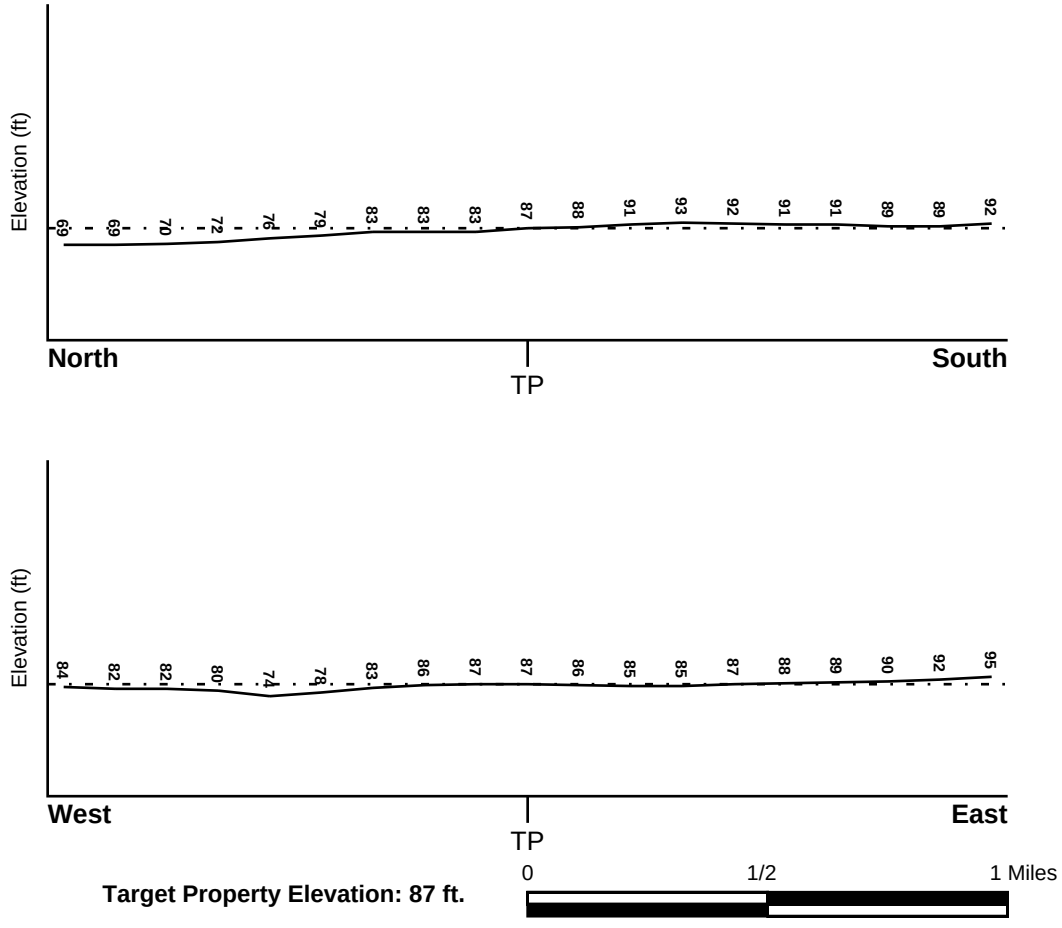
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

SAN JOSE WEST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile WSW
Site Name:	Fmc Corp San Jose Ordnance Plt
Site EPA ID Number:	CAD009146952
Surficial Aquifer Flow Dir.:	NE. THIS FLOW APPLIES TO THE "A" AQUIFER THAT IS PRESENT AT 15 FEET TO 30 FEET DEEP.
Measured Depth to Water:	15 feet.
Hydraulic Connection:	A silty and clay aquitard separates the "A" and "B" aquifers. A separate aquitard underlies the "B" aquifer.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	BOTELLA
Soil Surface Texture:	clay loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Questionnaire

SAN JOSE
PARKS, RECREATION & NEIGHBORHOOD SERVICES

Geoff Blair, Associate Engineer

Environmental Services Department, City of San José

San José City Hall, 10th Floor

200 E Santa Clara Street, San José, CA 95113

June 18, 2019

Dear Mr. Blair,

I have reviewed the information included on the attached Environmental Site Assessment Questionnaire (completed in 2016) which was completed for a Phase I Report for St. James Park.

None of the site information has changed since 2016.

Thank you for using the completed 2016 questionnaire to complete the Phase I report for the pending EIR.

Thank you! ~ Rebekah

Phase I Environmental Site Assessment - Questionnaire Form

Date: April 20, 2016

Application Charge Code: 375-571 85441 xxxx (Fund 375; Appn. 7789; RC 0175440)

Property Information

Property APNs: 467-21-001 and 467-21-014

Property Address: St. James Park as bound by East St. John Street, North 1st Street, St. James Street, and North 3rd Street. The park is bisected by North 2nd Street.

City: San Jose **County:** Santa Clara **State:** California **Zip:** 95113

Legal Description:

Property is: Improved and occupied as a public park

Questionnaire Preparer Information

Name: CSJ PRNS, Capital Improvement Projects, Planning Team, Attn: Rebekah Ross, Planner III

Phone: (408) 535-3804 **Fax:** n/a **E-mail:** Rebekah.ross@sanjoseca.gov

Address: 200 East Santa Clara Street, Tower, 9th Floor

City: San Jose **County:** Santa Clara **State:** CA **Zip:** 95113-1905

Property Owner: The City of San Jose

Relationship to Property Owner: Owners Representative

Property Description and Analysis

Current Use of Property/ Current Tenant/Business/ Duration at Location

The present condition of St. James Park consists of two equal square blocks bisected by a one-way, three-lane arterial (Second Street) running north to south. Most of the dense vegetation has been trimmed so that at present the informal arrangement of large trees and the open grassy lawns define the general design character.

Past Use of Property/ Past Tenant/Business

St. James Park was known before the 1880s as St. James Square. The park was established as part of Charles Lyman's 1847 survey of the City. It remained generally undeveloped as a park until 1868 and 1869 when paths, fences, and plantings were added, specifically lawns and American elm trees.

Additional Comments

The City will complete an Environmental Impact Report (file no. PP16-037) for the Capital Vision for St. James Park which includes physical and programmatic changes to St. James Park to transform it from an underutilized public space to a vibrant, attractive, and active public park through a multi-prong revitalization strategy. The attached draft Project Description describes the potential physical and programmatic changes that could occur within the park. In summary, the project could implement the elements included in the 2002 St. James Master Plan Update and construct a music pavilion located in the northeastern quadrant of the park. Preliminary construction drawings and a draft Site Plan for the music pavilion are included as part of this application.

General Questionnaire

Do you know of any pending, threatened, or past administrative proceeding, notice of violation, or litigation relevant to hazardous substances (HS) or petroleum products (PP) that involves the property?

There are no known historic or present use of hazardous substances or petroleum product use within the park.

Do you know whether the following documents exist, and, if so, whether copies can and will be provided to the environmental professional within reasonable time and cost constraints:

Documents	Exists	Doesn't Exist	To be Provided	No Knowledge
Environmental Site Assessment Reports				X
Environmental Compliance Audit Reports				X
Analytical Data of Soil, Groundwater, or other Media				X
Environmental Permits:				X
Solid waste disposal				X
Hazardous waste disposal				X
Wastewater				X
NPDES				X

Air				X
Storage tanks and other registrations:				X
Registrations for: Underground Storage Tanks				X
Registrations for Above Ground Storage Tanks				X
Registrations for Underground Injection System				X
Material Safety Data Sheets				X
Community Right-to-Know Documents				X
Safety Plans:				X
Preparedness and Prevention				X
Spill Prevention, Countermeasures and Control				X
Storm Water Pollution Prevention				X
Waste Minimization/Pollution Prevention				X
Process Safety Management				X
Chemical Hygiene				X
Hazardous Communication Standard				X
Occupational Exposure to hazardous chemicals in laboratories				X
Occupational Exposure to Blood borne Pathogens				X
Reports regarding hydrogeologic on the property or in the surrounding area				X
Notices from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property				X
Hazardous waste generator notices or reports				X
Geotechnical studies				X
Risk Assessments				X
Recorded Land Use Restrictions				X

Are you aware of any environmental cleanup lien against the property that has been filed or recorded under federal, tribal, state or local law?

No

Are you aware of any Activity and Use Limitation, such as an engineering control, land use restriction or institutional control that is in place at the property and/or has been filed or recorded in a registry under federal, tribal, state or local law?

Yes, this is charted public park land. Any proposed land use change would have to be approved through a vote of the people.

Additionally, St. James Park is an existing historic public park. It is listed on the National Register of Historic Places as part of the St. James Square National Register Historic District and is eligible for the California Register of Historic Resources. St. James Park is also listed as part of the City of San José St. James Square Historic District.

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes. I am a City employee and have access to historic records, Master Plans, and knowledge of surrounding development in the area. I have no knowledge of any chemicals processed in the area.

Do you believe that the purchase price being paid for this property reasonably reflects the fair market value of the property?

This question is not applicable. The City intends to retain the land.

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, do you know the past uses of the property? Do you know of specific chemicals that are present or once present, spills/chemical releases, and/or environmental cleanups that have taken place at the property?

The property has been a public space/park since the 1800's. The location of an historic artesian well is suspected to be within the confines of the park. This has not been mapped or confirmed.

Groundwater might be encountered within 0'-10' of the surface.
