PROPOSED PROJECT:

The Project proposes the redevelopment of the existing Westfield Promenade Shopping Center located within the Warner Center Specific Plan area on a 34-acre site (after dedication) consisting of the demolition of 641,164 square feet of existing floor area for the construction of a multiple-phase, mixed-use development comprised of residential, retail/restaurant, office, hotel and entertainment uses. Upon completion, the Project would include a total of 3,271,050 square feet of floor area, resulting in a net

increase of 2,629,886 square feet of new floor area, including up to 1,432 multi-family residential units, approximately 244,000 square feet of retail/restaurant uses, approximately 629,000 square feet of office space, up to 572 hotels rooms within two hotels, and an Entertainment and Sports Center approximately 320,050 square-foot and 15,000 seats in size. The proposed uses would be provided in several buildings throughout the Project Site that would range in height from one-story retail and three- to four-story creative office, to a 28-story office tower. The Project proposes 5,610 parking spaces on-site in a combination of parking structures, subterranean parking, and limited surface parking. The Project proposes approximately 5.6 acres of ground-level, publicly accessible open space, including a central green space and plaza areas. The Project includes the removal and/or relocation of eight (8) on-site protected trees and 90 street trees.

The EIR for the Project evaluated the following alternatives to the Proposed Project, which could be considered:

Alternative 1: No Project/No Build Alternative-Assumes that the Project would not be implemented; Alternative 2: No Project/Base Maximum Development in Accordance with the Warner Center Plan – Considers development of the Project Site in accordance with the maximum development parameters set forth in the Warner Center Plan; Alternative 3: Reduced Density – Reduces Floor Area Ratio of Proposed Project to 1.75:1, by reducing the residential and office uses proposed; Alternative 4: Studio Mixed Use development – Reduces density of retail/restaurant and office uses, would introduce studio uses, and would not include hotel uses or the Entertainment and Sports Center; and Alternative 5: Reduces Entertainment and Sports Center Seating (Option 1 – 10,000 seats and Option 2 – 7,500 seats) within the 320,050 square-foot Entertainment and Sports Center.

Unlike the Draft SEIR, comments on the Final SEIR are not required to be responded to by the City. If written comments are received, they will be provided to the decision-makers as part of the staff report for the Project.
