

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Cache Creek Area Plan (CCAP) Update

Lead Agency: Yolo County CAO Natural Resources Division

Contact Name: Casey Liebler

Email: casey.liebler@yolocounty.org

Phone Number: (530) 666-8236

Project Location: Unincorporated Yolo County

City

County

Project Description (Proposed actions, location, and/or consequences).

Ten-year update to the CCAP consisting of a general plan amendment, specific plan amendment, rezoning and adopting various ordinance amendments to update the CCAP to make clarifications and corrections, reflect changing conditions, integrate analysis of monitoring data, identify new acreage for future off-channel mining, and allow for continued maintenance of flows and riparian restoration within lower Cache Creek.

Key proposed changes include: 1) increase of the in-channel material removal limit from 210,000 tons to 690,800 tons annually; 2) identification of an additional 1,188 acres within the planning area to be rezoned to add the Sand and Gravel Reserve Overlay (SGRO) zone, which allows for future possible aggregate mining; and 3) extension of the plan horizon year to 2068.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The DEIR identifies the potential for impacts in the areas of Aesthetics, Agricultural and Forestry Resources, Air Quality, Biological Resources, Cultural and Tribal Cultural Resources, Geology, Soils, and Mineral Resources, Greenhouse Gas Emissions and Energy, Hazards and Hazardous Materials, Hydrology and Water Quality, Noise and Groundborne Vibration, Transportation, and Cumulative Effects. Mitigation measures in the form of changes to the regulating ordinances are identified and will be integrated into the proposed CCAP Update.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

The program has been in effect and under successful implementation since 1996. There are no known areas of controversy with the proposed CCAP Update. Issues to be resolved include:

Whether to adopt all changes and modifications included as art of the proposed CCAP Update.

Whether to increase the in-channel material removal limit from 210,000 tons to 690,800 tons annually.

Whether to rezone 1,188 acres to add the Sand and Gravel Reserve Overlay (SGRO) which would allow possible future mining.

Whether to include all additional changes and modifications proposed in the EIR as mitigation measures.

Provide a list of the responsible or trustee agencies for the project.
