The proposed project would construct and operate a utility scale, solar photovoltaic (PV) electricity generation and energy storage facility that would produce up to 650 MW of power and include up to 450 MW of battery storage capacity on approximately 3,500 acres of land. The project would use existing electrical transmission infrastructure adjacent to the Coolwater Generating Station, a recently retired natural gas-fired power plant, to deliver renewable energy to the electric grid. Daggett Solar Power 1 LLC (the applicant) selected the project site based on its proximity to existing electrical transmission infrastructure in order to repurpose former fossil fuel-based electricity generation capacity with renewable energy.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "X".
If you have already sent your document to the agency please denote that with an "S".
