

Initial Study with Mitigated Negative Declaration/Environmental Assessment with Finding of No Significant Impact (IS with MND/EA with FONSI) for the I-5 (I-405 to SR-55) Improvement Project.

The California Department of Transportation (Caltrans) District 12, in cooperation with the Orange County Transportation Authority (OCTA), has prepared and approved an Initial Study with Mitigated Negative Declaration/Environmental Assessment with Finding of No Significant Impact (IS with MND/EA with FONSI) for this project. The purpose of the proposed project is to increase freeway capacity, improve traffic operations, improve mobility and reduce congestion.

This Final Environmental Document identifies Alternative 2 with Design Variation B (Alternative 2B) as the Preferred Alternative and provides responses to the Draft IS/EA comments received during the public circulation period. The Preferred Alternative would add one general purpose lane in each direction on I-5 between I-405 and SR-55. The proposed project would also provide operational improvements at various locations, including increasing ramp capacity, converting carpool lanes to continuous access and standardizing lanes and shoulders.
