Thank you for your business.Please contact EDR at 1-800-352-0050 with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

Copyright 2018 by Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, Inc., or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, Inc. or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

111 EVELYN AVENUE SUNNYVALE, CA 94086

COORDINATES

Latitude (North): 37.3776820 - 37° 22' 39.65" Longitude (West): 122.0290440 - 122° 1' 44.55"

Universal Tranverse Mercator: Zone 10 UTM X (Meters): 585965.9 UTM Y (Meters): 4137009.2

Elevation: 95 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 05/13/2018 has revealed that there are 2 NPL sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

FEI MICROWAVE INC	825 STEWART DR	ENE 1/2 - 1 (0.937 mi.)	0	56

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 05/18/2018 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
WESTINGHOUSE ELECTRI	401 HENDY AVENUE	NE 0 - 1/8 (0.023 mi.)	0	10

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 05/18/2018 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/01/2018 has revealed that there are 4 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 02/13/2018 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 04/30/2018 has revealed that there are 23 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 7 CA UST sites within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR

researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 3 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 4 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Summary Details:

Conditions at proposal October 15, 1984): Westinghouse Electric Corp. formerly manufactured electrical transformers at a plant covering 75 acres in Sunnyvale, Santa Clara County, California. The facility is surrounded by residential, industrial, and business areas. Monitoring wells on the site are contaminated with PCBs and dichloro-, trichloro-, and tetrachloroben ene, according to analyses conducted by a consultant to Westinghouse. Contamination is believed to have resulted from a leaking PCB storage tank and from locali ed spills. About 300,000 people depend on ground water within 3 miles of the site as a source of drinking water. Westinghouse has removed the leaking tanks and is working with the California Regional Water Quality Control Board CRWQCB) to determine the extent of soil and ground water contamination. This is one of 19 sites in the South Bay Area of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. Status June 10, 1986): In July 1985, CRWQCB issued Waste Discharge Requirements to the company for interim measures and a remedial investigation. The requirements are the board s legal mechanism for regulating activities at facilities under its jurisdiction. CRWQCB, in conjunction with EPA and the California Department of Health Services, is considering various response actions at the site.

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Summary Details:

Conditions at proposal June 24, 1988): The TRW Microwave, Inc. Building 825) Site is located at 825 Stewart Drive, Sunnyvale, Santa Clara County, California. Three other sites are nearby: Advanced Micro Devices, Inc., placed on the NPL inJune 1986; Signetics, Inc., proposed in October 1984 and later dropped); and Advanced Micro Devices, Inc. Building 915), also being

proposed at this time. The sites are owned and operated by

semiconductor/microprocessor manufacturers and havecontributed to a commingled plume of ground water contaminated with organic solvents that has migrated off

EDR ID Number

the sites to the north. Contamination at Building 825 was first identified in April 1983 when a TRW contractor found up to 41,000 parts per billion ppb) of trichloroethylene TCE) in on-site wells. In May 1983, the California Regional Water Quality Control Board CRWQCB) found that ground water beneath the building was contaminated with dichloroben ene, tetrachloroethylene, TCE, acetone, N-butyl acetate, and xylene. Upgradient wells on the south side of the property showed only low levels of contamination, indicating that TRW is a point source of contamination. In September 1983, TRW excavated soil at the site, removed an underground tank, and transported the materials to a ha ardous waste facility regulated under Subtitle C of the Resource Conservation and Recovery Act. However, CRWQCB found that these measures did not correct the ground water contamination problem. Contaminants from a leaking 750-gallon solvent storage tank at Building 825 have the potential to migrate to deeper drinking water aquifers. Municipal wells for Santa Clara and Mountain View tap a deep aquifer between 250 and 750 feet and serve an estimated 300,000 people. Imported surface drinking water is not considered an available alternative due to the si e of the potentially affected population. On June 21, 1984, CRWQCB issued a Cleanup and Abatement Order under the California Water Code requiring TRW Microwave, Advanced Micro, and Signetics to develop a joint plan to prevent further migration of contaminants. Since October 1985, under CRWQCB supervision, TRW has been operating a system to pump out contaminated ground water on its site, treat it on-site in an air stripper. and discharge the treated water to Calabasas Creek and South San Francisco Bay. Status February 21, 1990): TRW Microwave, Signetics, and Advanced Micro Devices, Inc. AMD) have formed a group known as The Companies to clean up the contaminated commingled plume. They are operating a system to pump and treat the plume with an air stripper and carbon adsorption unit at AMDs Building 915 site. The Companies are conducting a remedial investigation/feasibility study RI/FI) to determine the type and extent of contamination and identify alternatives for remedial action at the AMD, Signetics, and TRW sites. AMD is conducting a separate RI/FS for its Building 915 site.

Environmental Interest/Information System

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

SUPERFUND NPL

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

07/16/2015 Status Date: Case Worker: **GOR** 12-005 RB Case Number:

Local Agency: SANTA CLARA COUNTY LOP

File Location: All Files are on GeoTracker or in the Local Agency Database

Local Case Number: 06S2W25K01f

Potential Media Affect: Other Groundwater (uses other than drinking water), Soil

Potential Contaminants of Concern: Benzene, Toluene, Xylene, Gasoline

The site has been occupied by a gasoline service station since Site History:

approximately 1966. In 1986 two 4,000 gallon and one 2,000 gallon UST were removed. Up to 15 ppm petroleum hydrocarbons were detected in

S103967582

soil. In 1989 a 550 gallon used oil UST was removed. In 1992 MW1 was installed and detected up to 1.3 ppm benzene at a depth of 45 feet bgs. Three additional soil borings were constructed (AA, B, and C) and two more groundwater monitoring wells were installed (MW2, and MW3). Hydrocarbons were detected in each of the borings and in the groundwater sample collected from MW3. In 1994 three off-site monitoring wells were installed (MW4, MW5, and MW6) and two soil borings were constructed. Hydrocarbons were detected in a groundwater sampled collected from MW4, but were not detected in MW5 and MW6. A test showed that air sparging and soil vapor extraction (SVE) were feasible methods for site remediation. From June 11, to August 29, 1996 an SVE system was operated. Approximately 890 pounds of TPH-q was extracted. The system was shut down due to rising groundwater levels. From June 26, to August 1996 a groundwater extraction system (GETS) was operated. Approximately 5 pounds of TPH-g was extracted. In 1997 groundwater monitoring well MW7 was installed downgradient to monitor shallow groundwater. In 1999 eight borings (B1 through B8) were constructed to evaluate hydrocarbons in the shallow soils and groundwater. The soil sample collected from B1 At 25 feet bgs detected 1,800 ppm TPH-g. Grab groundwater samples were collected. The sample collected from B1 Detected 230,000 ppb TPH-g. In 2000 an extraction well (EW3) was installed in through the former UST excavation and a monitoring well (MW8) was installed near the former excavation. Up to 4,600 ppm TPH-g (27.5 feet bgs) was detected in soil samples collected from EW3. On November 28, 2000 an SVE system began removing vapors from EW3. The system operated intermittently up to August 27, 2003. Approximately 1508 pounds of hydrocarbons were removed. In 2002 four soil borings were constructed (SB1 through SB4), and two groundwater monitoring wells were installed (MW9 and MW10). In 2003 two soil borings (GP1 and GP2) were constructed. Maximum TPH-g soil concentrations were detected at 46.5 feet bgs in GP1 at 8,000 ppm. In October 2004 two groundwater monitoring wells (EW4 and EW5) were installed to a depth of approximately 46 feet bgs. Groundwater samples collected from EW4 and EW5 detected TPH-g at 14,000 and 55,000 ppb, respectively. On September 29, 2004 dual phase extraction (DPE) began operating. Groundwater and soil vapors were extracted from EW3 and MW10 to from September 29, 2004 to October 27, 2004. Groundwater and soil vapors were extracted from EW4 and EW5 from October 29, 2004 to November 10, 2004. Approximately 68.5 pounds of hydrocarbons were removed from the vapor stream. An upgraded DPE system operated from November 21, 2005 to February 7, 2007. DPE was applied to EW3, EW4, and EW5. Approximately 116 pounds of hydrocarbons were removed from the vapor stream. In 2008 two groundwater monitoring wells were installed. TPH-g and BTEX were not detected in soil and groundwater samples.

Citation: 22 CCR 23 66273.35 - California Code of Regulations, Title 22, Chapter

23, Section(s) 66273.35

Violation Description: Failure of the universal waste handler to properly process accumulated

universal waste within a maximum accumulation time of one year and /or demonstrate the length of time that the universal waste has been accumulated from the date it became a waste or was received. The universal waste handler may make this demonstration by: 1) Placing the universal waste in a container and marking or labeling the container with the earliest date that any universal waste in the container became a waste or was received; 2) Marking or labeling the individual item of universal waste (e.g., each battery or thermostat) with the date it became a waste or was received; 3) Maintaining an inventory system onsite that identifies the date the universal waste being accumulated became a waste or was received; 4) Maintaining an inventory system onsite that identifies the earliest date that any universal waste in a group of items of universal waste or a group of containers of universal waste became a waste or was received; 5) Placing the universal waste in a specific accumulation area and marking or labeling the area to identify the earliest date that any universal waste in the area became a waste or was received; or 6) Any

other method which clearly demonstrates the length of time that the universal waste has been accumulated from the date it became a waste

or was received.

Citation: 22 CCR 23 66273.35 - California Code of Regulations, Title 22, Chapter

23, Section(s) 66273.35

Violation Description: Failure of the universal waste handler to properly process accumulated universal waste within a maximum accumulation time of one year and /or

demonstrate the length of time that the universal waste has been accumulated from the date it became a waste or was received. The universal waste handler may make this demonstration by: 1) Placing the universal waste in a container and marking or labeling the container with the earliest date that any universal waste in the container became a waste or was received; 2) Marking or labeling the individual item of universal waste (e.g., each battery or thermostat) with the date it became a waste or was received; 3) Maintaining an inventory system onsite that identifies the date the universal waste being accumulated became a waste or was received; 4) Maintaining an inventory system onsite that identifies the earliest date that any universal waste in a group of items of universal waste or a group of containers of universal waste became a waste or was received; 5) Placing the universal waste in a specific accumulation area and marking or labeling the area to identify the earliest date that any universal waste in the area became a waste or was received; or 6) Any other method which clearly demonstrates the length of time that the

universal waste has been accumulated from the date it became a waste

or was received.

23, Section(s) 66273.35

Violation Description: Failure of the universal waste handler to properly process accumulated

universal waste within a maximum accumulation time of one year and /or demonstrate the length of time that the universal waste has been accumulated from the date it became a waste or was received. The universal waste handler may make this demonstration by: 1) Placing the universal waste in a container and marking or labeling the container with the earliest date that any universal waste in the container became a waste or was received; 2) Marking or labeling the individual item of universal waste (e.g., each battery or thermostat) with the date it became a waste or was received; 3) Maintaining an inventory system onsite that identifies the date the universal waste being accumulated became a waste or was received; 4) Maintaining an inventory system onsite that identifies the earliest date that any universal waste in a group of items of universal waste or a group of containers of universal waste became a waste or was received; 5)

Lower Reponsible Party: NPL SITE CLEANUP WORKPLAN

Project Revenue Source Company: Not reported Actual: Project Revenue Source Addr: Not reported Project Revenue Source City, St, Zip: Not reported

> Project Revenue Source Desc: Westinghouse, the responsible party, has been conducting remedial activities

under the direction of the RWQCB and EPA. DHS has budgeted \$50,000 for development, review and approval of a RAP and for oversight/monitoring of cleanup efforts, and will seek to recover all actual costs from the responsible party. The RP will pay all costs associated with RI/FS and cleanup activities. The Westinghouse Electric Corporation site consists of office buildings,

Site Description:

manufacturing facilities, a parking area and some open areas. It encompasses approximately 75 acres of land. From 1947 to 1964, Westinghouse operated a

production and repair plant for electrical apparatus which contained

polychlorinated biphenyl (PCB) fluids.

Hazardous Waste Desc: Soil and ground water are contaminated with polychlorinated biphenyls (PCBs) as

a result of the manufacturing of electrical equipment. High levels of PCBs have been found in soils near a PCB-storage tank, and at shallower depths throughout open areas. The contamination extends to boundary fence lines and to backyards

WESTINGHOUSE ELECTRIC CORPORATION (Continued)

S100833422

of the residences and other properties along the west boundary. Ground water is

also contaminated near the PCB-storage tank.

The contaminated soil and ground water represent a potential health threat to Threat To Public Health & Env:

workers at the site and to residents of adjacent properties if they are exposed

to this material.

Site Activity Status: In November, 1984, PCB-contaminated soil was removed from neighboring

properties and along the boundary fence lines. In September, 1985,

PCB-contaminated soil was removed from storage yards on the Westinghouse property. Lead agency responsibility has been transferred from the RWQCB to the EPA. The RP entered into a consent decree with the EPA in August, 1988. Currently, a remedial investigation and feasibility study is being conducted

which will address the remaining PCB-contaminated soil near the old storage tank. Additional borings and ground water monitoring wells will be installed.

Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22,

Chapter 12, Section(s) 66262.34(e)

Violation Description: Failed to meet the conditions of satellite accumulation regulations,

including but not limited to the following: accumulate up to 55

gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator the container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words Hazardous Waste including specified information container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a 90 day accumulation area 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator

and distance transported), whichever comes first.

Violations:

Site ID: 398393

Site Name: Northrop Grumman Bldg. 17

Violation Date: 08-19-2015

Citation: 23 CCR 16 2715 - California Code of Regulations, Title 23, Chapter 16,

Section(s) 2715

Violation Description: Failure to comply with one or more of the designated operator monthly

inspection requirements: failed to inspect the monthly alarm history report; attach a copy of the alarm history; failed to inspect for the presence of liquid or debris in the spill container/spill bucket and under dispenser containment; failed to inspect the under dispenser containment to ensure that monitoring equipment is placed in the proper position; failure to inspect for liquid or debris in the

containment sump where an alarm occurred or for which there is no record of a service visit; or failure to check that all testing and

maintenance has been completed and documented.

Violation Notes: Returned to compliance on 08/31/2015. Inaccurate info on monthly DO

report

Violations:

Site ID: 398393

Site Name: Northrop Grumman Bldg. 17

Violation Date: 08-19-2015

Citation: 23 CCR 16 2715 - California Code of Regulations, Title 23, Chapter 16,

Section(s) 2715

Violation Description: Failure to comply with one or more of the designated operator monthly

inspection requirements: failed to inspect the monthly alarm history report; attach a copy of the alarm history; failed to inspect for the presence of liquid or debris in the spill container/spill bucket and under dispenser containment; failed to inspect the under dispenser containment to ensure that monitoring equipment is placed in the proper position; failure to inspect for liquid or debris in the

containment sump where an alarm occurred or for which there is no record of a service visit; or failure to check that all testing and

maintenance has been completed and documented.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as

cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

dairy waste ponds.

Completed Document Type: Correspondence
Completed Date: 07/31/2014

Comments: Letter from Sycamore Lake Partners, LLC, to DTSC providing

notification of sale of property at 555 East California Avenue (the former North Parking Lot, East Area) to Gray Area 555, LLC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 03/30/2015

Comments: The U.S. Environmental Protection Agency prepared the memorandum to

clarify the institutional control objectives and land use restrictions that were identified in the 2008 Explanation of

Significant Differences.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Payment Agreement

Completed Date: 12/04/2014

Comments: Gray Area 555, LLC, the current owner of the 555 East California

Avenue property (North Parking Lot, East Area) signed a letter agreement to reimburse DTSC's costs for amending the Land Use Covenant to change the age for the school age restriction from 21 to

18.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Land Use Restriction

Completed Date: 08/08/2013

Comments: A Land Use Covenant between DTSC and Sycamore Lake Partners, LLC, was

executed and then recorded with the Santa Clara County Recorder's

Office.

Completed Document Type: Land Use Restriction Monitoring Report

Completed Date: 01/27/2014

Comments: An annual inspection was performed on behalf of the property owner to

verify compliance with the restrictions of the Land Use Covenant. No evidence of recent construction, excavation, grading or major modifications were observed on the property during the inspection.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: 5 Year Review Reports

Completed Date: 08/23/2016

Comments: The United States Environmental Protection Agency, Region 9, approved

the Fourth Five-Year Review Report and made the determination that the remedy at the Site currently protects human health and the environment because exposure pathways that could result in unacceptable risks are being controlled. However, in order for the remedy to be protective in the long-term, the planned Land Use Covenants for the main portion of the Site need to be recorded, the source of elevated polychlorinated biphenyls outside the Westinghouse property need to be investigated, and a groundwater remediation

system evaluation needs to be conducted.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: Remedial Action Completion Report

Completed Date: 03/19/2017

Comments: The Report documents soil remediation to address locations where soil

less than 8 feet deep had concentrations of polychlorinated biphenyls greater than 25 milligrams per kilogram, the cleanup standard identified by the Record of Decision approved by the U.S. Environmental Protection Agency for the site; A total of 2,351 tons of soil was excavated and disposed at permitted, off-site facilities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Consent Order
Completed Date: 08/30/1988
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Record of Decision
Completed Date: 10/16/1991

Comments: US EPA approved a Record of Decision for the project. The selected

remedy involves the removal of contaminated soil, installation of a groundwater extraction and treatment system, and institutional

controls.

Completed Date: 11/30/1984

Comments: PCB-contaminated soil was removed from neighboring properties and

along the boundary fence lines.

Completed Area Name: PROJECT WIDE Completed Sub Area Name: Not reported

Completed Document Type: 5 Year Review Reports

Completed Date: 10/04/2006

Comments: The U.S. Environmental Protection Agency finalized the Second

Five-Year Review Report for the Site. Surface cracks that were visibly evident on the capping system at the Site were identified as an issue; however, it was noted that it was not affecting the protectiveness of the remedy, but could in the future. Continual cap inspections on a routine basis and repair of areas showing signs of

deterioration were recommended. The Five-Year Review Report concluded that the remedy at the Site currently protects human health and the environment because routine cap inspections are conducted,

groundwater extraction and treatment continues, and access controls are in place. However, in order for the remedy to be protective in the long-term, deed restrictions, as required by the 1991 Record of

Decision should be completed for the Site.

Background Info: The Westinghouse Electric Corporation site consists of office

> buildings, manufacturing facilities, a parking area and some open areas. It encompasses approximately 75 acres of land. From 1947 to 1964, Westinghouse operated a production and repair plant for electrical apparatus which contained polychlorinated biphenyl (PCB) fluids as a coolant. Soil and groundwater are contaminated with PCBs as a result of the manufacturing of electrical equipment. High levels of PCBs have been found in soils near a PCB-storage tank, and at shallower depths throughout open areas. The contamination extends to boundary fence lines and to backyards of the residences and other properties along the west boundary. Groundwater is also contaminated near the PCB-storage tank. The project was listed on the Federal

Superfund List and U.S. EPA is the lead agency.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Case Worker: REG

Local Agency: SUNNYVALE, CITY OF

RB Case Number: 43S1101

File Location: All Files are on GeoTracker or in the Local Agency Database

Potential Media Affected: Aquifer used for drinking water supply Potential Contaminants of Concern: Tetrachloroethylene (PCE), Diesel, Gasoline

Site History:

The Site is located in downtown Sunnyvale in the area bounded by Washington Avenue, Mathilda Avenue, Iowa Avenue, and Sunnyvale Avenue. Soil vapor extraction and groundwater moitoring are currenty being performed. The City of Sunnyvale Redevelopment Agency (the Redevelopment Agency) and Downtown Sunnyvale Mixed Use LLC (the Project Developer) have entered into an agreement to redevelop the Site. The current redevelopment project includes the demolition of most of the former Sunnyvale Town Center Mall facilities and the replacement of those facilities with a new, mixed-use development consisting of various commercial, retail and residential buildings, parking, and associated infrastructure and amenities. During review of historical records it was learned that three dry cleaners had once been located on the eastern portion of the Site between Washington Avenue and Iowa Avenue. Based on the Site investigations, these dry cleaners used PCE (a chlorinated solvent) as a cleaning solvent. Site investigations conducted from August 2007 to June 2008 included the collection of soil, soil vapor and groundwater samples, PCE contamination was discovered in the eastern portion of the Site and off-Site, predominantly towards the north-northeast. The contamination is believed to be the result of past releases from the three dry cleaners that were located on the eastern portion of the Site. Low levels of PCE contamination was detected in on-Site soil at concentrations ranging from 5 to 470 parts per billion (ppb). Significant PCE contamination was detected in on-Site soil vapor at locations throughout the northeastern parking lot area and around the southeastern parking structure area at concentrations up to 690,000 micrograms per cubic meter ("g/m3). Significant PCE contamination was detected in on-Site shallow groundwater samples collected at 40 feet at concentrations up to 2,270 ppb, and decrease to less than 5 ppb at approximately 115 feet deep. PCE contamination in groundwater has been detected at locations north of Washington Avenue to East Evelyn Avenue. The downgradient extent (to the north) of the PCE contaminated groundwater is not defined. The City of Sunnyvale provides drinking water to the area. Past and recent testing shows no indication that PCE found at the Site has contaminated the City water system. Groundwater monitoring wells have been installed on- and off-Site to help complete the characterization of groundwater contamination, as well as monitor the effectiveness of the groundwater cleanup. Two soil vapor extraction (SVE) systems were installed as an interim remedial measure at the Site in late 2007 and are currently operating. The purpose of each system is to remove PCE-contaminated soil vapor. Concentrations of PCE in soil vapor have decreased significantly since the SVE systems began operating in January 2008. The SVE systems will continue to operate to remove and treat PCE in soil vapor. The proposed interim groundwater cleanup plan consists of cleaning up PCE-contaminated groundwater by a process called dechlorination. Iron filings were injected into the ground using specialized drilling equipment. Iron filings cleanup PCE contaminated groundwater by destroying the chemical through a process called dechlorination. This process progressively removes the chlorine atoms leaving harmless end products. Vegetable oil with

naturally occurring bacteria that break down PCE were also be injected into the ground. Vegetable oil provides a food source for the bacteria. These harmless bacteria will cleanup any remaining chemicals not cleaned up by the iron filings, completing the PCE-dechlorination process. In addition to remediating groundwater, this interim groundwater cleanup will help to reduce residual soil vapor contamination by removing PCE in groundwater that may be volatizing into the soil vapor. The SVE systems were shut down in July 2015 for rebound testing. The SVE system was restarted in May 2016.

FINDS:

Registry ID: 110002943183

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

<u>Click this hyperlink</u> while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

Comments: DTSC performed a site screening to determine whether any release of

hazardous substances or wastes have occurred at the site that require corrective actions. The site has been overseen by the Regional Water Quality Control Board (RWQCB) since May 1982. The main contaminants of concern onsite were trichloroethylene and other volatile organic

compounds (VOCs) in groundwater. RWQCB did not hold Zymos responsible

for cleanup because it appeared the contamination came from upgradient sources. There has been no documented investigation

activity at the site since 1990. Groundwater monitoring data (the most recent from 1990) showed a steady decrease in the concentrations

of VOCs in the groundwater.

Historical Generators:

Date form received by agency: 02/23/2004

Site name: SUNPOWER CORPORATION Classification: Large Quantity Generator

. Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Current Owner: Local Government Future Prog: Not reported

Description: The site is located in Washington Park in Sunnyvale, Santa Clara

> County, California. The City of Sunnyvale currently owns the land and has converted it into a city park known as Washington Park, a senior citizens center, a school, and a residential area. Military munitions were produced or demilitarized at this location and therefore may

present an explosive hazard.

Current Program: Not reported

History: The site was used as a bivouac area for the army. from February to

> October 1943. The U.S. constructed buildings required for housing troops to include barracks, latrines, shower facilities, and a mess hall. The army personnel participated in routine military training to include physical training, drill, and classroom work and housed staff and command vehicles of the II Armored Corps. After WWII, the site

reverted back to city of Sunnyvale.

ON CORTESE LIST 360 NORTH PASTORIA ENVIRONMENTAL CORP, A SUBSIDIARY Comments: OF EASTMAN KODAK, IS NOW AS-SUMING ALL RESPONSIBILITY FOR THE GROUND

WATER TREATMENT FACILITY FORMERLY OPERA- TED BY THE VERBATIM COMPANY AT THIS LOC- ATION. DHS HAS BEEN HISTORICALLY INVOLV- ED WITH THIS SITE, WHICH IS NOW BEING MANAGED BY THE SF RWQCB UNDER ORDER # 87-034. THE SITE IS ON A SELF-MONITORING PROGRAM, AS REQUIRED BY THE ORDER. TWO ADJACENT SITES, XIDEX AND DATA GENERAL CORPORATION, ARE ALSO INCLUDED IN THE ORDER & MONITORING PROGRAM. SITE SCREENING DONE THERE ARE 31 ON-SITE & OFF-SITE MONITOR- ING WELLS BEING SAMPLED ON A QUARTERLY BASIS UNDER RWQCB MANAGEMENT. SOIL & GROUNDWATER AT THE SITE HAVE BEEN FOUND TO BE CONTAMINATED WITH TETRAHYDROFURAN (THF). GROUNDWATER BENEATH THE SITE HAS ALSO BEEN POLLUTED BY OTHER ORGANIC

SOL- VENTS INCLUDING METHYLENE CHLORIDE, 2- METHOXYETHANOL,

1-METHOXY-2-PROPANOL, 2- BUTANONE, & ACETONE. THF CONCENTRATIONS HAVE BEEN FOUND AS HIGH AS 380 PPM IN GROUNDWATER & 9 PPM IN SOIL. RWQCB IS THE LEAD AGENCY, DHS RECOMMENDS MEDIUM PRIORITY PRELIMI- NARY

ENDANGERMENT ASSESSMENT.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments: DTSC performed a site screening to determine whether any release of

hazardous substances or wastes have occurred at the site that require corrective actions. The site has been overseen by the Regional Water Quality Control Board (RWQCB) since March 1996. The main contaminants

of concern onsite were trichloroethylene; tetrachloroethylene; 1,2-dichloroethane; TCA; and freon, chloroform; 1,1-dichloroethene. Philips Electronics assumed full responsibility for meeting all cleanup requirements at the site. RWQCB rescinded its Site orders in

December 2015.

Hydrocarbon, Tetrachloroethylene (PCE), Trichloroethylene (TCE)
The 740 Kifer Road site is located between Fair Oaks Avenue and Wolfe

Site History: The 740 Kifer Road site is located between Fair Oaks Avenue and Wolfe

Road (see site location map). Land use in the area is predominantly commercial and light industrial. Signetics Corporation (Signetics) operated a semiconductor fabrication facility that used volatile organic compounds (VOCs) such as trichloroethylene (TCE) in manufacturing processes at this site from 1970 to 1982. Underground storage tanks (USTs) and two former wastewater neutralization systems

were used at the site. Philips acquired Signetics and assumed responsibilities for cleanup per Order No. 97-064 adopted on Mary 21, 1997. The site is no longer owned or operated by Philips, and is now occupied by Maxim Integrated Products. The Regional Water Quality Control Board (Water Board) is the lead regulatory agency overseeing

soil and groundwater investigation and cleanup activities at this site. Site Investigation: Site investigations began in 1982 to determine the vertical and horizontal extent of the area impacted with VOCs. The investigations found the USTs and two former wastewater neutralization systems were VOC source areas. Groundwater at the site is approximately 8 to 15 feet below the ground surface. In 2014, the maximum TCE groundwater concentration onsite was 44 ug/Ldetected, and offsite was 130 ug/L. Offsite TCE concentrations in groundwater have decreased from 35 ug/L in 1986 to 1.7 ug/L in 2014 in the furthest distal monitoring well (S110A) located approximately 700 feet downgradient of the Sites northern property boundary. There are no locations at the site where groundwater reaches the surface, or can be directly contacted. Shallow groundwater beneath the site is not used for drinking water. The City of Sunnyvale provides drinking water for the site and surrounding areas. Site Cleanup: In 1982, the USTs and impacted soil were removed. Soil samples collected from the excavated areas confirmed that VOC concentrations were below soil cleanup standards. Treatment of impacted groundwater began in 1988. and continued until April 8, 2009 when the system was shut down. The groundwater was pumped from two extraction wells and treated using granular activated carbon. The treatment process has significantly reduced contaminants at the site over the last two decades. The system has been removed. Groundwater monitoring for natural attention was completed between 2009 and 2015, after the groundwater treatment system was shut down and removed. The groundwater concentrations were monitored regularly using a network of wells, and reports were prepared and submitted annually to the Regional Water Board for review. In December 2015, the Water Board issued Order No. R2-2015-0051, Rescission of Site Cleanup Requirements (Order Nos. 96-037 and 97-064). The basis for rescission included the groundwater plume is decreasing and cleanup levels are expected to be achieved within a reasonable time frame. Risk management measures are not necessary, but if the Site is ever re-zoned residential, it is standard practice for a redeveloper of a site with a history of contamination to perform a current soil gas survey, which would inform the developer of any remaining concentrations. Refer to Order No. R2-2015-0051 for more details of rescission. Next Steps: Per the new Order, referenced above, the former groundwater treatment system and monitoring wells owned by the discharger need to be properly removed before this case is closed by the Water Board, to eliminate vertical conduits for potential future groundwater contamination. Currently, the remaining well destructions are planned in 2017, pending access agreements. The Water Board will issue a case closure letter after receiving a well destruction completion report.

. Waste code: 181

. Waste name: Other inorganic solid waste

Waste code: 792

. Waste name: Liquids with pH < 2 with metals

Waste code: D002

. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as

cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

dairy waste ponds.

Comments: DTSC performed a site screening to determine whether any release of

hazardous substances or wastes have occurred at the site that require corrective actions. The Regional Water Quality Control Board (RWQCB) has been overseeing investigation and cleanup activities at the site since January 20, 1988. The main contaminants of concern at the site were trichloroethene and other volatile organic compounds in

groundwater. RWQCB identified Signetics as the discharger responsible

for cleanup in its initial order. Philips acquired Signetics, and

RWQCB identified Philips as the discharger responsible for cleanup in subsequent orders. The site was sold and converted into an apartment complex in 1989, and Philips has continued to work with the new owner

and RWQCB in performing groundwater remediation.

Potential Media Affected: Indoor Air, Other Groundwater (uses other than drinking water), Soil

Vapor

Potential Contaminants of Concern:

Site History:

* Volatile Organic Compounds (VOC)

The former Philips Semiconductors located at 730 East Evelyn Avenue site between Wolfe Road and Fair Oaks Avenue. (see site location map). Currently, land use in the area is predominantly residential.

Historically, the site and surrounding area was

commercial/industrial. Philips operated a semiconductor fabrication facility that used volatile organic compounds (VOCs) such as trichloroethene (TCE) in manufacturing processes at this site from 1975 to 1984. Underground storage tanks (USTs) were used at the site.

The site is no longer owned or operated by Philips, and is now

occupied by the Bristol Commons apartment complex. The Regional Water Quality Control Board (Water Board) is the lead regulatory agency

Quality Control Board (Water Board) is the lead regulatory agency overseeing soil and groundwater investigation and cleanup activities

at this site since at least 1988. Site Investigation: Site

investigations began in 1982 to determine the vertical and horizontal extent of the impacted area with VOCs. The investigations found the USTs were VOC source areas. Groundwater at the site is located approximately 15 to 20 feet below the ground surface. The current

EDR ID Number

maximum TCE concentration is detected in groundwater offsite at 170 micrograms per liter in well S099A. Historically, the highest TCE concentrations were detected in onsite well S022A. The TCE plume extends approximately 1,000 feet northeast of the site. There are no locations at the site where groundwater reaches the surface, or can be directly contacted. Shallow groundwater beneath the site is not used for drinking water. The City of Sunnyvale provides drinking water for the site and the surrounding areas. Soil gas investigations were completed in 2014 and 2015 surrounding historical high groundwater concentrations detected in onsite well S022A. Site Cleanup: In 1983, the USTs and impacted soil were removed. Soil samples collected from the excavated areas confirmed that VOC concentrations were below soil cleanup standards. Treatment of impacted groundwater began in 1988 and ended March 30, 2009. The groundwater was pumped out from an extraction well and treated using granular activated carbon. The treatment process has significantly reduced contaminants at the site over time. The groundwater concentrations are monitored regularly using a network of wells, and reports are prepared and submitted annually to the Water Board for review. Next Steps: Groundwater monitoring and cleanup activities will continue until groundwater cleanup standards for the site are met. A third vapor intrusion assessment was completed in 2017 to evaluate offsite risks to residents. On December 21, 2017, the Regional Water Board required additional soil vapor intrusion assessment workplan for soil gas and indoor air to evaluate risks to offsite residents based on the results in the December 7, 2017, Soil Gas Investigation Report.

RB Case Number: 43S0221
File Location: Regional Board

Potential Media Affected: Other Groundwater (uses other than drinking water)

Potential Contaminants of Concern: Trichloroethylene (TCE), Gasoline

Site History: Summary The San Francisco Bay Regional Quality Control Board (Water

Board) announces a proposed groundwater cleanup plan for the former Royal Auto Body facility. The cleanup plan consists of enhanced in-place bioremediation which includes injection of a carbohydrate solution into subsurface soil and groundwater as a nutrient for the Map ID Direction Distance Elevation MAP FINDINGS

naturally occurring microbes that breaks down trichloroethene (TCE) into harmless byproducts. We invite any interested parties to comment on the proposed cleanup plan. Written comments are due to the Water Board at the above address by January 18, 2007. Background The site is located near the intersection of North Wolfe Road and Kifer Road in east Sunnyvale. Land use in this area is industrial and commercial. The site is shown on the attached site location map. The site was previously occupied by analytical laboratory facilities during the 1960s and 1970s. Royal Auto Body operated an auto body and towing facility at this location from approximately 1978 until early 2003. The site was then vacant through early 2005 when the site was again occupied by a body shop and a towing company. Chemicals used include chlorinated solvents such as TCE, 1,2,-dichloroethylene (1,2-DCE), 1,2,4-trichlorobenzene (1,2,4-TCB), 1,2,3-trichlorobenzene (1,2,3-TCB), and total petroleum hydrocarbons as diesel (TPH-d), and motor oil (TPH-mo). The Water Board is the lead agency overseeing soil and groundwater investigation and cleanup at this site. Site Investigations Several subsurface investigations have been conducted at this site and along North Wolfe Road since 1987. In 2003, Royal Auto Body conducted an environmental assessment during which it discovered a drain attached to a sump. Soil sampling was conducted around the sump to define the extent of soil contamination. Additional subsurface investigations were conducted in 2004, 2005 and 2006. Royal Auto Body has installed several monitoring wells onsite and offsite, and has conducted quarterly groundwater monitoring. The major contaminant of concern at this site is TCE. Current TCE concentrations in groundwater range between 21 and 390 micrograms per liter. The TCE plume extends approximately 100 feet northeast of the site. Shallow groundwater beneath the site is not currently used for drinking or any other purpose. The City of Sunnyvale supplies drinking water to the site and the vicinity. Previous Cleanup Activities In 2003, Royal Auto Body excavated and removed the sump and 23 tons of contaminated soil from the vicinity of the sump. The excavation was backfilled with clean fill. Proposed Cleanup Activities The proposed cleanup strategy for this site is enhanced in-place bioremediation which includes injection of a carbohydrate solution as a nutrient for the naturally occurring microbes in subsurface soil and groundwater to produce hydrogen which breaks down TCE into harmless byproducts. The carbohydrate solution will be injected under pressure in a series of onsite and offsite borings. The effectiveness of groundwater cleanup activities will be monitored periodically by collection and analysis of water samples from onsite and offsite monitoring wells. If needed, additional carbohydrate solution and microbes will be injected into subsurface soil and groundwater to accelerate groundwater cleanup. We invite any interested persons to comment on the proposed cleanup plan.

File Location: Regional Board

Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE)

Site History:

The building at 180 North Wolfe Road was constructed in 1971 and was used by loare to manufacture electrical harness assemblies from 1971

used by Icore to manufacture electrical harness assemblies from 1971 to 1991. The building at 170 North Wolfe Road was constructed in 1975. Icore took over the building at 170 North Wolfe Road in 1980 and operated there until 1991. Icore used chlorinated volatile organic compounds (VOCs) during the manufacturing processes at this site and stored VOCs in two 550-gallon underground storage tanks (USTs). Icore initiated soil and groundwater investigations in 1987. Soil and groundwater contamination was identified at the site, consisting of VOCs such as trichloroethene (TCE) and

tetrachloroethene (PCE). Icore and Smiths have been sampling six groundwater monitoring wells to monitor the VOC plume beneath the site. The current (2008) maximum concentrations of TCE and PCE in groundwater are 99 micrograms per liter (a%g/L) and 33 a%g/L, respectively. VOC groundwater plumes originating from other nearby sites have also commingled with the VOC plume at this site and extend north of the Central Expressway. The two 550-gallon USTs were removed from the site in 1987. Icore operated a soil vapor extraction (SVE) system from 1991 through 1997 at the site. During installation of the SVE system, 50 cubic yards of VOC-impacted soil was excavated and removed. The VOC concentrations in soil vapor gradually decreased and stabilized in 1997 when asymptotic concentrations were reached. The SVE system removed approximately 530 pounds of VOCs. The SVE system

including four SVE wells and eleven air induction wells was decommissioned in 2001. In 2002, Icore implemented enhanced biological treatment (EBT) at the site. EBT involves injecting a carbohydrate solution into the subsurface as a food source for natural microbes that live in the soil and groundwater beneath the site. These microbes break down the VOCs into carbon dioxide, water and salt. Based on currently available information, some of the remaining groundwater pollution beneath the site is most likely the result of offsite, up-gradient releases of VOCs. The Former Royal Auto Body located at 150 North Wolfe Road is an up-gradient source. The Regional Water Board has required investigation and remediation

of the Former Royal Auto Body site in Order No. 89-060. Other potential up-gradient sources are C & G Tools located at 165 San Lazaro Avenue and Radiation Detection located at 162 North Wolfe Road.

PROJECT WIDE Completed Area Name: Completed Sub Area Name: Not reported Completed Document Type: Site Screening Completed Date: 07/01/1991

Comments: Site screening. Verbatim Microdisk operated a microdisk assembly at the site between 1983 and 1987. Subsequently Sola/Barnes Hind have

used the facility for administrative offices and research and

development of contact lenses. During Verbatim's occupation, wastes

stored in 'rated' storage included small quantities of various

halogenated solvents, alcohol, methanol, ketones, and hexane. The wastes were transported and disposed at class 1 disposal sites when Verbatim moved out. Sola/Barnes Hind's operation involved use of small quantities of solvents and other hazardous chemicals. The wastes are stored in exterior fenced and bermed area and are routinely picked up and disposed offsite by safety specialists. The site has two interconnected aguifers underneath. The deeper one has been in use for drinking water in the surrounding area. Analysis of site soils to depths up to 36 feet has not revealed presence of solvents. The groundwater in the lower aquifer has shown presence of ICA. RWQCB has determined Signetics, an adjoining facility, as the

source. No further remedial action planned. EPA PA completed.

Waste code: D001

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE

EDR ID Number

MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002

. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F003

. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR

MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT

MIXTURES.

. Waste code: U068

. Waste name: METHANE, DIBROMO-

Waste code: U069

. Waste name: 1,2-BENZENEDICARBOXYLIC ACID, DIBUTYL ESTER

Waste code: U123

. Waste name: FORMIC ACID (C,T)

Waste code: U213

Waste name: FURAN, TETRAHYDRO-(I)

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to

represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as

cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

dairy waste ponds.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Lead Agency Case Number: 1820700

37.3759305992471 Latitude: Longitude: -122.011328142228 Case Type: Cleanup Program Site

Case Worker: UUU

Local Agency: Not reported RB Case Number: 43S0225 File Location: Regional Board

Potential Media Affected: Other Groundwater (uses other than drinking water)

Site History:

Potential Contaminants of Concern: Other Solvent or Non-Petroleum Hydrocarbon, Trichloroethylene (TCE) The site received case closure in 2010 by the Regional Board. Files are available on Geotracker and at the Regional Water Board office. Background: The site is located at 895 Kifer Road in Sunnyvale, south of the Central Expressway, near the intersection of San Lazaro Avenue and Kifer Road (see site location map). Land use in this area is generally industrial and commercial. The former Pilkington Barnes Hind (PBH) facility historically manufactured contact lens solutions, including saline and cleaning solutions. Manufacturing operations at the site ceased in 1990 and the property was sold to Reliance Technical Services in 1995. Volatile organic compounds (VOCs) were used in the manufacturing operations at the site. The Regional Water Quality Control Board (Water Board) is the lead regulatory agency overseeing soil and groundwater investigation and cleanup activities at this site. Site Investigation: Soil and groundwater investigations conducted at and near the PBH facility indicate that shallow groundwater beneath the site is impacted with trichloroethene (TCE) and other VOCs. PBH initiated water quality investigations at the site in the late 1980s. The current maximum concentration of TCE in groundwater beneath the site is 220 micrograms per liter. This concentration represents a reduction of 96% from the highest concentration measured in 1994 at the site. The current groundwater monitoring program by PBH consists of annual groundwater elevation monitoring at four wells and annual groundwater sampling for VOCs at two wells. Shallow groundwater beneath the site is not used for drinking water. The City of Sunnyvale supplies drinking water to the site and the surrounding areas. Site Cleanup: PBH operated an onsite groundwater pump and treatment system (GWPTS) from 1994 through 1998. The GWPTS was shut down at that time because it was believed that the pumping was pulling in contaminated groundwater from another site located west of PBH.

NO SITES FOUND

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

South Map: 5640178 CUPERTINO, CA

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

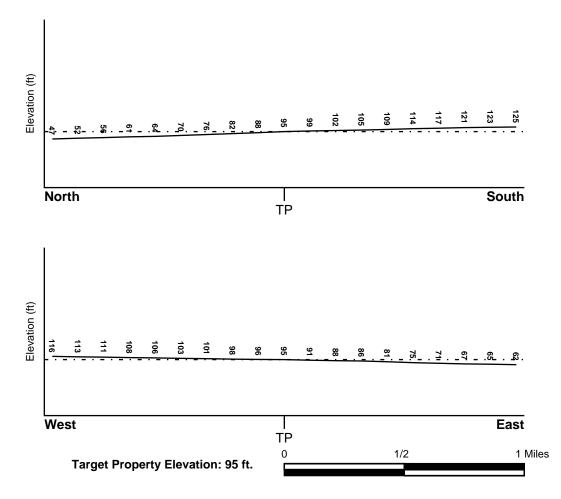

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

MOUNTAIN VIEW YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles

Location Relative to TP: 1/8 - 1/4 Mile ESE

Site Name: Westinghouse Electric Corp. (Sunnyvale)

Site EPA ID Number: CAD001864081

Surficial Aquifer Flow Dir.: GENERALLY N IN THE "A" AQUIFER, WITH A NW FLOW AT THE SOUTHEAST CORNER

OF THE SITE.

Measured Depth to Water: approximately 25 feet in the "A" aquifer.

Hydraulic Connection: The surficial "A" aquifer and underlying "B" aquifer are separated by

an aquitard, but are hydraulically connected.

Sole Source Aquifer: No information about a sole source aquifer is available
Data Quality: Information based on site-specific subsurface investigations is

documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era: Cenozoic Category: Stratifed Sequence

System: Quaternary Series: Quaternary

Code: Q (decoded above as Era, System & Series)

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOTELLA
Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep,

moderately well and well drained soils with moderately coarse

textures.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208 Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

'

EPA Radon Zones Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor

radon levels.
