The Councilwoman stated 'no comments from this evening will be formally be reviewed or responded to Unless they applied to the EIR' :

8/15/19

Susan Blake

Resident of the Reserve at Napa

Regarding ERI, appendix I (HUD Explosive and Fire Hazard Review:

I am specifically concerned about the danger associated with homeless who have nothing to occupy them during the day hours. The overflow of the facility creates an opportunity for some to be tempted into criminal activity during the night.

The numerous medical and dental offices that are in close proximity to the proposed homeless shelter were not built as high-security buildings but are simple brick and mortar homes converted. There is no night security nor bars on windows to prevent a person or persons from breaking in to steal and use or sell the drugs, syringes and gases that are kept there increasing the possibility of exploding a gas cylinder while improperly handling (during or after theft).
