STATE CLEARINGHOUSE

Mr. Eric Lee, Planner City of Davis Department of Community Development and Sustainability 23 Russell Boulevard, Suite 2 Davis. California 95616

DRAFT ENVIRONMENTAL IMPACT REPORT FOR THE UNIVERSITY COMMONS REDEVELOPMENT PROJECT – DATED NOVEMBER 2019 (STATE CLEARINGHOUSE NUMBER: 2018112044)

Dear Mr. Lee:

The Department of Toxic Substances Control (DTSC) received a Draft Environmental Impact Report (EIR) for the University Commons Redevelopment Project.

The proposed project would include demolition of approximately 90,653 square feet (sf) of the existing University Mall building to create a mixed-use development. Buildout of the project would result in the addition of 264 new multifamily residential units and approximately 136,800 sf of retail space.

DTSC recommends that the following issues be evaluated in the EIR, Hazards and Hazardous Materials section:

- 1. The EIR should acknowledge the potential for project site activities to result in the release of hazardous wastes/substances. In instances in which releases may occur, further studies should be carried out to delineate the nature and extent of the contamination, and the potential threat to public health and/or the environment should be evaluated. The EIR should also identify the mechanism(s) to initiate any required investigation and/or remediation and the government agency who will be responsible for providing appropriate regulatory oversight.
- 2. If buildings or other structures are to be demolished on any project sites included in the proposed project, surveys should be conducted for the presence of lead-based paints or products, mercury, asbestos containing materials, and polychlorinated biphenyl caulk. Removal, demolition and disposal of any of the above-mentioned chemicals should be conducted in compliance with California

Mr. Eric Lee December 10, 2019 Page 2

environmental regulations and policies. In addition, sampling near current and/or former buildings should be conducted in accordance with DTSC's 2006 Interim Guidance Evaluation of School Sites with Potential Contamination from Lead Based Paint, Termiticides, and Electrical Transformers (https://dtsc.ca.gov/wpcontent/uploads/sites/31/2018/09/Guidance_LeadContamination_050118.pdf).

- If any projects initiated as part of the proposed project require the importation of soil to backfill any excavated areas, proper sampling should be conducted to ensure that the imported soil is free of contamination. DTSC recommends the imported materials be characterized according to DTSC's 2001 Information Advisory Clean Imported Fill Material (https://dtsc.ca.gov/wpcontent/uploads/sites/31/2018/09/SMP_FS_Cleanfill-Schools.pdf).
- 4. If any sites included as part of the proposed project have been used for agricultural, weed abatement or related activities, proper investigation for organochlorinated pesticides should be discussed in the EIR. DTSC recommends the current and former agricultural lands be evaluated in accordance with DTSC's 2008 Interim Guidance for Sampling Agricultural Properties (Third Revision) (https://dtsc.ca.gov/wp-content/uploads/sites/31/2018/09/Ag-Guidance-Rev-3-August-7-2008-2.pdf).

DTSC appreciates the opportunity to review the EIR. Should you need any assistance with an environmental investigation, please submit a request for Lead Agency Oversight Application, which can be found at: https://dtsc.ca.gov/wp-content/uploads/sites/31/2018/09/VCP App-1460.doc. Additional information regarding voluntary agreements with DTSC can be found at: https://dtsc.ca.gov/brownfields/.
