

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Carroll Creek Road Bridge Replacement Project

Lead Agency: Inyo County Public Works Department

Contact Name: Ashley Helms

Email: ahelms@inyocounty.us

Phone Number: 760-878-0200

Project Location: Lone Pine

Inyo County

City

County

Project Description (Proposed actions, location, and/or consequences).

The Inyo County Public Works Department proposes the Carroll Creek Road Bridge Replacement Project, which would involve the replacement of County Bridge 48C0011 with a new bridge and would decommission the existing bridge. The proposed project would also include the realignment of Carroll Creek Road as it approaches the bridge in either direction. The proposed project is located in Inyo County, approximately 8 miles south of Lone Pine, west of U.S. Highway 395. The proposed project is needed to improve bridge functionality and public safety. The existing bridge has been evaluated under the Federal Highway Administration's Highway Bridge Program and was classified as functionally obsolete according to the National Bridge Inspection Standards. The project would construct a new bridge that is structurally sound, meets modern structural and safety codes, and provides safe access for vehicles, including emergency vehicles, between U.S. Highway 395 and recreation areas, residences, and other destinations west of the bridge.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potentially significant impacts could occur on the resources listed below.

Air Quality

Biological Resources

Cultural and Tribal Cultural Resources

Hazards and Hazardous Materials

The project would have a less than significant impact on each resource with the incorporation of mitigation measures defined in the Initial Study (IS) and this Mitigated Negative Declaration (MND). The mitigation measures include dust and engine emissions control; Mojave desert tortoise, special-status bats, and burrowing owl protection measures; worker training regarding protected species, cultural resources, and hazards.

Based on the analysis presented in the attached IS and the findings included in the attached MND, the Lead Agency (Inyo County Public Works) has determined that the proposed project would not have a significant effect on the environment.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

The project is not controversial.

Provide a list of the responsible or trustee agencies for the project.

Los Angeles Department of Water and Power
California Department of Fish and Wildlife
Great Basin Unified Air Pollution Control District
State Water Resources Control Board
