Re: Cultural Resources Study for Sunroad Plaza Project, California

Dear Mr. Stephenson,

This report presents the results of an archaeological investigation conducted by ASM Affiliates, Inc. (ASM) for the recently proposed Sunroad Plaza Project (Project). The purpose of the archaeological investigation was to determine the presence or absence of cultural resources within the Project's area of potential effects (APE), as described below. This study was completed in compliance with the California Environmental Quality Act and the City of Vista.

## **PROJECT DESCRIPTION AND LOCATION**

The Sunroad Plaza Project proposes the construction of approximately 4 acres for a shopping plaza. The Project is located in the city of Vista, San Diego County, California (Figure 1). The Project is shown on the USGS 7.5' San Marcos quadrangle map within Township 11S, Range 4W, Section 24 (Figure 2).

The Project APE is located southeast of the corner of Vista Village Drive and Highway 78. The APE has never been built but was roughly graded when Hwy 78 was constructed. Based on historic aerial photographs and topographic maps, it appears that the property had been developed for residential purposes by 1946. These structures had been later removed by 1997. It should be noted that the grading disturbed the APE in its entirety.

## **METHODS**

A records search request of the archives at the South Coastal Information Center (SCIC), San Diego State University, of the California Historical Resources Information System (CHRIS), was submitted by ASM on June 14, 2018 for the Project APE and the results were received on August 15, 2018 (Appendix A). The record search area encompasses the Project area and a search radius of 1 mile (mi.) around it. The California Register of Historical Resources and the National Register of Historic Places were also examined to identify any additional resources within 1 mi. of the Project area.

On August 15, 2018, a letter was sent to the California Native American Heritage Commission (NAHC) to request a search of the Sacred Lands File and a list of Native American contacts who may have knowledge of areas of cultural concern, such as traditional cultural places, sacred sites, archaeological sites, or cultural landscapes that may exist within the Project APE or within 1 mi. of the proposed Project area. On August 27, 2018, ASM received a reply from the NAHC that indicated a search of the Sacred Lands File for the

Project APE and the 1-mi. radius surrounding it was negative for areas of cultural concern. A list of Native American tribal contacts was also provided (Appendix B).

The Sunroad Plaza Project APE was surveyed by ASM Associate Archaeologist Joel Lennen and Native American Monitor Jon Chavez of Saving Sacred Sites on July 17, 2018. The Project area was surveyed along transects spaced at 5-meter (m) intervals. All accessible portions of the Project APE were inspected for the presence of cultural material. There were no structures or any other obstacles to impede the ability to access the entire APE. The Project area was a vacant lot that has been roughly graded during the construction of Hwy 78.

## RECORDS SEARCH RESULTS

The results of the records search are summarized below (Tables 1-3). The detailed results are also available in confidential Appendix A, bound separately from this document. CHRIS records identified 53 previous reports that addressed areas within a 1-mi. radius of the Project area. Of these reports, only five reports intersect the Project area (Table 2). CHRIS records also indicate the presence of 28 previously recorded cultural resources within a 1-mi. radius of the Project area (Table 3). None of these intersect the APE. Additionally, 15 unique historical addresses were also identified as occurring within the 1-mi. radius.

Table 1. Summary of Record Search Results

SCIC Record Type	Mapped within 1 Mi. of APE	Intersects with APE
Previous Reports	53	5
Historical Addresses	15	0
Cultural Resources	28	0

### Summary of Reports Intersecting the Project APE

Five previously conducted cultural resource studies intersect the Project APE. Two previous studies encompass the entire project APE (Marben-Laird Associates 1987; Rosenberg et al. 2007). The Project APE is currently a graded dirt lot, indicating that the entire area has been disturbed. However, subsurface cultural resource deposits might be preserved below the previous grade or along the edges of the Project APE where soil may not have been as impacted.

### Summary of Sites Occurring within One-Mi. of the Project APE

Of the 28 previously recorded cultural resources within the 1-mi. search radius of the Project APE, eight are prehistoric sites, four are historic-period sites, and 16 are historic buildings. The closest recorded site to the Project APE is 544 m to the east. Fifteen historic addresses occur within the 1-mi. search radius. None of the previously recorded cultural resources or historic addresses intersect the proposed Project APE.

### ARCHAEOLOGICAL SURVEY RESULTS

As mentioned previously, the Sunroad Plaza Project APE was surveyed by ASM Associate Archaeologist Joel Lennen and Native American Monitor Jon Chavez, of Saving Sacred Sites, on July 17, 2018. The intensive visual inspection of the Project APE provided no evidence for the presence of cultural resources in those areas. The entire Project APE is a vacant dirt lot that has been graded. There was high visibility (95 percent) and a moderate scatter of modern refuse. All accessible areas of exposed soil were visually examined. Many of the accessible portions of exposed soil appear to consist primarily of graded and/or fill soils.

While most of the Project APE was previously disturbed by the construction of Hwy 78, it is possible that intact subsurface cultural deposits are still present beneath the level of previous disturbance within the APE.

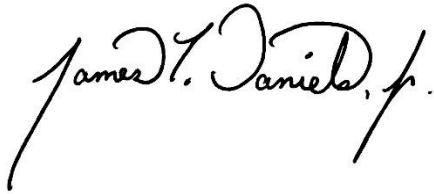

### CONCLUSIONS AND RECOMMENDATIONS

No cultural resources were identified during the archaeological survey for the Sunroad Plaza APE and the records search from the SCIC and the NAHC have informed ASM that there are no previously recorded cultural resources within the proposed project APE. However, construction monitoring by a qualified archaeologist and a Native American monitor is recommended for ground-disturbing activities during the project construction phase to confirm the depth of previous disturbance within the APE and to monitor grading of any native soils that may be disturbed during construction grading. This recommendation is based on the presence of archaeological sites within the vicinity of the Project area, specifically SDI-644 and SDI-646 located within .75 km of the APE. Once a sufficient depth is reached that precludes finding cultural resources (typically depths where paleontological resources may be present, or approximately 1.5 m below the surface), ASM recommends a cessation to cultural monitoring.

## CALIFORNIA HISTORICAL RESOURCES INFORMATION SYSTEM RECORDS SEARCH

**Company:** ASM Affiliates, Inc.

**Company Representative:** Mark Becker

**Date Processed:** 7/29/2018

**Project Identification:** Sunroad Plaza

**Search Radius:** 1 mile

**Historical Resources:** YES

Trinomial and Primary site maps have been reviewed. All sites within the project boundaries and the specified radius of the project area have been plotted. Copies of the site record forms have been included for all recorded sites.

**Previous Survey Report Boundaries:** YES

Project boundary maps have been reviewed. National Archaeological Database (NADB) citations for reports within the project boundaries and within the specified radius of the project area have been included.

**Historic Addresses:** YES

A map and database of historic properties (formerly Geofinder) has been included.

**Historic Maps:** YES

The historic maps on file at the South Coastal Information Center have been reviewed, and copies have been included.

Re: Cultural Resources Inventory for the Sunroad Plaza Project located in Vista, California

To Whom It May Concern,

ASM Affiliates, Inc. (ASM) is conducting a cultural resource inventory of a 4.8-acres for the Sunroad Plaza Project located at 460 Hacienda Drive in the City of Vista, San Diego County, California. It is the southeast corner Vista Village Drive and Hwy 78. APN 164-231-01, 164-213-02, 164-231-03, 164-231-04. The project seeks to develop a shopping center and restaurants. This study is being undertaken in accordance with the California Environmental Quality ACT (CEQA) and the City of Vista (City). ASM has conducted a records search with the South Coastal Information Center and has conducted a pedestrian survey of the proposed project area. No cultural resources were identified within the project area during the records search or the pedestrian survey. I am writing to request a search of the Sacred Lands Files and to inquire if you have registered any cultural resources, traditional cultural properties, or areas of heritage sensitivity within this proposed project area.

We would like to request a listing of the appropriate individuals that may have additional information or concerns associated with this project to submit to the City of Vista. Please submit your response to me via e-mail at [jdaniels@asmaffiliates.com](mailto:jdaniels@asmaffiliates.com).

Sincerely,

A handwritten signature in black ink that reads "James T. Daniels, Jr." with a stylized flourish at the end.

Re: Sunroad Plaza, San Diego County

Dear Mr. Daniels,

A record search of the Native American Heritage Commission (NAHC) Sacred Lands File (SLF) was completed for the information you have submitted for the above referenced project. The results were negative. However, the absence of specific site information in the SLF does not preclude the presence of cultural resources in any project area. Other sources for cultural resources should also be contacted for information regarding known and/or recorded sites.

Enclosed is a list of Native Americans tribes who may have knowledge of cultural resources in the project area. I suggest you contact all of those indicated, if they cannot supply information, they might recommend others with specific knowledge. By contacting all those listed, your organization will be better able to respond to claims of failure to consult with the appropriate tribe. If a response has not been received within two weeks of notification, the Commission requests that you follow-up with a telephone call to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from any of these tribes, please notify me. With your assistance we are able to assure that our lists contain current information. If you have any questions or need additional information, please contact me at 916-573-1033 or [frank.lienert@nahc.ca.gov](mailto:frank.lienert@nahc.ca.gov).

Sincerely,

A handwritten signature in blue ink, appearing to read "Frank Lienert", with a long horizontal stroke extending to the right.
