## 2019038713

## Reasons why Mary Chapa Academy Addition is exempt:

Consistent with General Plan and Zoning. The Mary Chapa Academy property has a City of Greenfield General Plan land use designation of Public and Quasi Public (City of Greenfield General Plan Land Use Map). The property is zoned PQP — Public and Quasi Public (City of Greenfield Zoning Map). The proposed project includes additions to the existing Mary Chapa Academy. A review of the City of Greenfield General Plan provides no indication that the Mary Chapa Academy is inconsistent with the plan.

Location and Size. The school is located within the City of Greenfield limits on a 2.25-acre project site surrounded by urban uses.

Habitat Value. The proposed improvements are located within the boundaries of the existing Mary Chapa Academy, in an urbanized and fully-developed area of Greenfield. Therefore, the proposed project would have no impact on endangered, rare or threatened species.

Significant Effects Related to Traffic, Noise, Air Quality, or Water Quality. There is no reason to conclude that addition of classrooms to the Mary Chapa Academy would have significant traffic, noise, air quality, or water quality impacts.

Required Utilities. The City of Greenfield Public Works Department is responsible for water supply and delivery in the City of Greenfield. Wastewater collection, treatment, storage, and effluent recycling facilities are owned and operated by the City of Greenfield. Storm water generally drains to the east of the City, where it is collected in retention ponds near the sewage plant. Tri-Cities Disposal and Recycling Service provides refuse and recycling collection services for the City of Greenfield. Pacific Gas and Electric provides electricity and natural gas to the City. The existing school is adequately served by public utilities, as would the proposed improvements.

Required Public Services. The Greenfield Fire Protection District provides fire protection service and the Greenfield Police Department provides law enforcement service to the City of Greenfield, including the school. The nearest fire station is located approximately 0.9 miles driving distance from the school and nearest police station is located approximately 0.6 miles driving distance from the school.

Unusual Circumstances. There are no unusual circumstances known to the Greenfield Union School District or their consultants that would imply a reasonable possibility that implementation of the project would have a significant effect on the environment due to unusual circumstances.

Scenic Highways. The school is not within, or in the vicinity of, a state scenic highway.

Hazardous Waste Sites. The property is located on the California Department of Toxic Substances
Control ("DTSC") list of hazardous materials sites complied pursuant to Government Code section
65962.5. However, communication with Jose Salcedo at DTSC revealed that the location of
contaminated soils at the property is outside the area to be disturbed by the proposed project.

Therefore, the proposed project would not result in a hazard to the public or the environment.
