Notice of Completion and Environmental Document Transmittal for the Regional Lift Station Force Main Replacement Project SCH2019039032
Orange County

Dear Mr. Dmytryshyn:

We have reviewed the Notice of Completion and Environmental Document Transmittal for the Regional Lift Station Force Main Replacement Project (Project) which describes the proposed replacement of two existing force mains that carry pumped wastewater from Moulton Miguel Water District's (MMWD) sewer collection system to the Joint Regional Treatment Plant operated by the South Orange County Wastewater Authority.

Insufficient information is provided regarding the force main pipe alignment in the Project description to make an accurate jurisdictional determination with regards to the described work and it is unclear whether part or all the work will be subject to State jurisdiction for dam safety. Specifically, the alignment of the force main pipes adjacent to the spillway for Sulphur Creek Dam No. 1012-7, a dam subject to State jurisdiction, cannot be determined from the information provided; therefore, MMWD needs to submit preliminary plans so that we can make a jurisdictional determination.

If a portion of the work is subject to State jurisdiction, an alteration application, together with plans, specifications, and the appropriate filing fee must be filed with the Division of Safety of Dams for this project. All dam safety related issues must be resolved prior to approval of the application, and the work must be performed under the direction of a Civil Engineer registered in California. Erik Malvick, our Design Engineering Branch Chief, is responsible for the application process and can be reached at (916) 227-4660.

If you have any questions or need additional information, you may contact, Area Engineer Richard Draeger at (916) 227-4755 or me at (916) 227-4600.

Sincerely,

ORIGINAL SIGNED BY

Ernie. M. Tapia, Acting Regional Engineer
Southern Region
Field Engineering Branch
Division of Safety of Dams
