Project Description (Proposed actions, location, and/or consequences).

The California Department of Transportation (Caltrans) proposes to reline or replace 43 culverts along State Route 38 (SR-38) between Zaca Road and the junction of SR-18 at Big Bear Lake Dam. The project is entirely located within the County of San Bernardino and spans the length of SR-38 from the Big Bear dam at Post Mile (PM) 59.4 on the west end to PM 47.5 on the east end. The culverts are severely rusted and have reached the end of their design service life.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Caltrans has prepared an Initial Study/Proposed Negative Declaration for this project and, pending public review, expects to determine from this study that the proposed project would not have a significant effect on the environment.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
