

# Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Lower Marsh Creek Stream Corridor Restoration Program

Lead Agency: Contra Costa County Department of Conservation and Development

Contact Name: Claudia Gemberling, Environmental Services, Contra Costa County Public Works Department/Flood Control

Email: claudia.gemberling@pw.cccounty.us Phone Number: 925-313-2192

Project Location: Brentwood Contra Costa  
*City* *County*

Project Description (Proposed actions, location, and/or consequences).

The Lower Marsh Creek Stream Corridor Restoration Program (Program) is a creek restoration and flood risk reduction Program proposed by the Contra Costa County Flood Control and Water Conservation District ("District") and American Rivers, a national nonprofit organization that protects wild rivers, restores damaged rivers, and conserves clean water for people and nature. The goal of the Program is to incentivize willing landowners and developers to work with the District and other local partners to improve Marsh, Deer, and Sand creeks. Implementation of the proposed Program will result in: 1) improved habitat conditions for fish, birds, reptiles, and amphibians by providing a mosaic of riparian, floodplain, wetland, and aquatic habitat types for these species to utilize, 2) expanded channel capacity to meet or exceed flood channel conveyance capacity, 3) improved local water quality by shading the creek and reducing mobilization of fine sediments, and 4) improved public recreational opportunities.

Construction would occur during the summer and fall months and occur over an approximately a 45-working day period. Excavation and grading activities would occur during the dry season (July to October) with plant restoration occurring afterwards (November to December). Construction activities will be generally limited to the hours between 7:00 a.m. to 5:00 p.m.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Environmental analysis identified potentially significant impacts in the environmental area of Air Quality, Biological Resources, Cultural Resources, Geology and Soils, and Noise and determined that measures were available to mitigate potential adverse impacts to insignificant levels.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

There are no known or anticipated public controversy.

Provide a list of the responsible or trustee agencies for the project.

Responsible Agency: Delta Conservancy  
Trustee Agencies: California Department of Fish and Wildlife, California Regional Water Quality Control Board
