Project Description: (please use a separate page if necessary)

Request to reorganize the herd at an existing dairy facility, located on a 75.25± acre parcel, in the A-2-40 (General Agriculture) zoning district. This is a request to expand the approved number of combined milk and dry cows from 570 to 975. Calf numbers are to increase from 110 to 125. Heifers will be housed at an off-site heifer facility. Nutrients produced from the herd will be utilized to fertilize approximately 55 farmable acres on the same parcel. No construction is proposed, but the applicant proposes to add an additional wastewater storage pond with a storage capacity of approximately 340,481 cubic feet; otherwise, the existing dairy operation contains all the necessary corrals, feed storage, and utilities necessary to accommodate the proposed herd modification. The site is served by a private well and septic system and receives irrigation water from Oakdale Irrigation District. The site takes access off of County-maintained angworth Road.

Reviewing Agencies Checklist:

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X". If you have already sent your document to the agency, please denote that agency with an "S".
