## **APPENDIX E**

#### PHASE I ENVIRONMENTAL SITE ASSESSMENT

HOUSTON SCHOOL 4600 E ACAMPO ROAD ACAMPO, CALIFORNIA

PROJECT NUMBER: 2019-00013 April 2, 2019

This document and its use is intended for the recipient and specific identified users contained within. Any unauthorized use of this report without prior consent is strictly prohibited.

April 2, 2019 Project No. 2019-00013

Mr. Leonard Kahn **Chief Business Officer** 1305 E. Vine Street Lodi, CA 95240

Subject: Phase I Environmental Site Assessment 4600 E Acampo Road Acampo, CA 95220 APN: 017-310-01

Dear Mr. Kahn:

We are pleased to present the following report, which contains the findings and conclusions of our Phase I Environmental Site Assessment conducted for the subject site. This report was designed to provide a Phase I Environmental Site Assessment in compliance with the ASTM E 1527-13 Standard and is in accordance with the All Appropriate Inquiries (AAI) rule standard. This report is also developed in compliance with the Department of Toxic Substances Control Phase I Site Assessment Advisory: School Property Evaluations, Revised September 5, 2001. Findings for this project have been provided in the body of the report and are listed in the executive summary.

Petralogix Engineering, Inc. uses professionals who meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. As an environmental consulting company, we have the specific qualifications (based on education, professional certification, training, and experience) to assess properties. Petralogix has developed and performed the all appropriate inquiries in conformance with the standards and practices as set forth in 40 CFR 312.

We appreciate the opportunity to provide our expertise on this project and look forward to question offestional Ger providing other services in the future. Please feel free to contact us if you have any questions.

Sincerely, Petralogix Engineering, Inc.

Tonya R. Schefoner

Tonya R. Scheftner, Project Geologist B.Sc. Geology, GIT No. 685

Daniel Edward Kramer No. 8657

OFCALIF

Daniel E. Kramer, President Professional Geologist No. 8657

## <u>PHASE I ENVIRONMENTAL SITE ASSESSMENT – IMPORTANT</u> <u>CONSIDERATIONS AND LIMITATIONS</u>

## Contact Petralogix to Discuss all Questions

It is important to contact our firm whenever you have any questions. The value in retaining our company for your environmental consulting needs is that we are here to help and guide. No question or comment is unimportant to Petralogix. We can save our clients time, money, and confusion by discussing development components at critical times within a project's timeframe. We are here to help regarding possible environmental conditions that could affect your project.

## Limitations of the Phase I Environmental Site Assessment (ESA)

When reviewing and considering the final Phase I ESA report it should be understood that it is not intended to be an all exhaustive end all review. Rather, a Phase I Environmental Site Assessment is written to provide database search results, third party information, observations, and professional opinions regarding a specific site for a specific project, under a specific timeframe.

There are many uncertainties that can exist about a property even with appropriate review being met under the requirements of the AAI and ASTM standards. Additional research can be performed to aid in a higher level of certainty about a site's historic environmental risk. The amount of research required to do this depends on the type of property, the risk tolerance of the client, and information developed in the course of the property review.

This Phase I ESA Report is useable for 180 days from the date of completion. The Report is produced for the client and project owner, and may not be used by a different entity or person without also satisfying the User's Responsibilities and having express consent from Petralogix Engineering, Inc.

## Client & User Responsibilities

The ASTM Standard E1527-13 requires the user to be involved in the process and adequately inform professionals of their whole knowledge for a site. In order to meet the requirements to qualify for the innocent landowner defense within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) the following items must be performed.

- **<u>Required</u>** review title and judicial records for environmental liens or activities and use limitations (AULs).
- <u>Must</u> communicate any specialized knowledge or experience to the environmental professional that is material to recognized environmental conditions in connection to the property.
- <u>Must</u> communicate any actual knowledge of environmental liens or AULs encumbering the property to the environmental professional.
- **Shall** consider the relationship of the purchase price of the property to the fair market value. If the amount is lower, a written explanation of the lower value is required.
- <u>Must</u> communicate commonly known or reasonably ascertainable information about recognized environmental conditions in connection to the property to the environmental professional.

#### PHASE I ENVIRONMENTAL SITE ASSESSMENT

#### 4600 E ACAMPO ROAD

#### ACAMPO, CALIFORNIA

#### **OUR PROJECT NO: 2019-00013**

#### 1.0 SUMMARY

Petralogix Engineering, Inc. has been retained by the Lodi Unified School District to conduct a Phase I Environmental Site Assessment for the property located at 4600 E Acampo Road, in Acampo, San Joaquin County, California. The site assessor parcel number (APN) is 017-310-01.

Our firm conducted a Public Records review, in which information was obtained from both federal and state databases. Petralogix uses Environmental Data Resources Inc. (EDR) to assist and supply many of these documents. In addition, we have supplemented this data with regional and local sources to determine whether or not obvious recognized or historically recognized environmental conditions (RECs) may exist (and/or be known to exist by regulatory agencies) for the site. The search radius for this investigation extended to adjoining properties, and properties within a search distance varying from one-eighth to one mile, depending on the information type that was being researched.

Background and past uses of the subject property were investigated in great detail. Sources describing the physical characteristics of the property, many of the surrounding properties, and the general region were compiled for review. These sources were studied in order to determine the topography, geologic setting, and groundwater depth and flow direction beneath the property. Site reconnaissance of the subject property was also performed. Immediate surroundings were also reviewed during our site reconnaissance. The complete data review and summary required for compliance (under the ASTM and AAI standards) can be found in the body of this document. This assessment was conducted under the supervision of Daniel E. Kramer, Chief Professional Geologist (PG#8657) and President of Petralogix.

Petralogix Engineering, Inc. 26675 Bruella Road, Galt, Ca 95632 (209)-400-5729 www.petralogix.com

#### **1.1 Executive Summary**

#### 1.1.1 <u>Findings</u>

The site consists of the Houston K – 8 School campus. The overall parcel is approximately 8.57 acres in size. The campus includes permanent and portable classrooms located in the western portion of the site and a large field in the eastern portion of the site. The parcel is fenced. The general vicinity consists of residential and agricultural use with some commercial. The property was vacant land that may have been used for agriculture prior to 1940 based on one aerial photograph dated 1937. Pesticides and herbicides may have been applied to the subject property during agricultural use, however, this site was reportedly purchased in 1904 by the Lodi Unified School District, with no known agricultural use reported. This is considered a *de minimis* condition. Considering the long period of time that the school has already been developed, the short period of time that the site would have been exposed to agricultural use, the lack of records showing storage or use of agricultural pesticides on the site, the site reportedly purchased by the school district in 1904, and the multiple historic site developments without incidence related to pesticides, agricultural use is not considered to be an environmental concern.

Based on the historical aerial photographs and topographic maps, the subject property was vacant land from at least 1894 and a school (North School, Houston School), from at least 1908 to present. The western portion of the subject property may have had three historic structures present in 1937 and removed by 1940. A portion of the land may have been farmed in 1937; the photographs from 1940 to present do not indicate agricultural use. Surrounding land appears to have been primarily agricultural land developed into residential and residential agricultural lots over time. The majority of structures on the campus appear built-up by 1975, with potential demolition of up to three small structures between 1937 to 1940. The location of the previous structures appears developed in areas replaced with asphalt and/or other structures and therefore not considered an environmental concern for the subject property. Lead and asbestos are not a required part of a Phase I ESA evaluation under the CERCLA ASTM Standard when a structure remains intact, and we are not certified asbestos and lead experts.

The subject property (4600 E Acampo Road) is listed on the UST and HIST UST database, with the facility type reported as a School. There is one historic 550-gallon regular fuel UST listed. A review of San Joaquin County Environmental Health records for the site (section 8.2.1) indicate the removal of the 500-gallon UST occurred on June 22, 1987. Records indicate the San Joaquin County Environmental Health Department (EHD) was onsite for inspection during removal, that no odor of petroleum was observed, and soil samples obtained during removal indicate TPH was non-detect; EHD issued a "No Further Action Required" letter on February 16, 1994. The former UST is therefore not considered a REC to the subject property.

Three pole-mounted transformers were observed adjacent the southern boundary and one pole-mounted transformer was observed across E Acampo Road near the northern boundary of the subject property. No leaking was observed. Three ground-mounted transformers were observed in good condition located within the subject property boundary. Based on the locations and observed conditions, the transformers are not considered an environmental concern.

Surrounding land appears to have been primarily agricultural land developed into residential and residential agricultural lots over time, with some commercial and industrial use interspersed. Five underground storage tanks (USTs), and two leaking underground storage tank (LUST) sites were

#### ENVIRONMENTAL PROFESSIONAL?

A person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding the presence of releases or threatened releases (per ASTM Standards E1527)

& In California such a person must hold a current Professional Engineer's or Professional Geologist's license. reported within 0.25 mile of the subject property. Based on the site conditions, groundwater gradient, regulatory status, and/or distances of the USTs, the USTs do not constitute a REC to the site. Based on the regulatory status and distance from the subject property, the two LUST sites reported do not constitute recognized environmental conditions to the subject property.

1.1.2 Conclusions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 for 4600 E

Acampo Road, Acampo, California, (the subject property). Any exceptions to, or deletions from, this practice are described in the Limitations Section of this report. This assessment identified no recognized environmental conditions (RECs) in connection with the subject property.

This assessment has identified the following *de minimis* conditions:

- Pesticides and herbicides may have been applied to the subject property during possible agricultural use prior to 1940. This is considered a *de minimis* condition. Considering the long period of time that the school has already been developed, the short period of time that the site would have been exposed to agricultural use, the lack of records showing storage or use of agricultural pesticides on the site, the site reportedly purchased by the school district in 1904, and the multiple historic site developments without incidence related to pesticides, agricultural use is not considered to be an environmental concern. This is considered a *de minimis* condition.
- Minor staining observed in parking lots.
- 1.1.3 <u>Recommendations</u>

No further investigation recommended.

#### 2.0 INTRODUCTION

#### 2.1 Purpose

In order to obtain State funding for school property acquisition or new construction, the California Educational Code (CEC) § 17213.1 requires a school district to conduct a comprehensive Phase I Environmental Site Assessments (ESA) be conducted to determine whether there has been, or may have been, a release of hazardous materials or the presence of naturally occurring hazardous material. The CEC requires DTSC to review the Phase I ESA and to make a determination regarding any need for further action or remediation. The main objective of any study should be to determine current and/or past occupants (or surrounding land uses) which could adversely impact property development, the environment, or the human health.

Performance of a Phase I Environmental Site Assessment according to ASTM Standard E1527-13 and the All Appropriate Inquiries (AAI) rule satisfies one of the requirements to qualify for landowner liability protections (LLPs) within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). Under the Education Code, DTSC's review of Phase I ESAs is performed for the sole purpose of identifying RECs at the school site in accordance with the requirements of the Education Code, for determination of further investigation if necessary. DTSC's approval of a Phase I pursuant to Education Code § 17213.1(a) does not establish confirmation that the "All Appropriate Inquiry" has been conducted within the meaning of CERCLA.

The purpose of this Phase I Environmental Site Assessment is to identify to **the extent feasible**, pursuant to the processes prescribed by the AAI rule and in ASTM Standard E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, recognized environmental conditions in connection with the property. Additional investigative procedures, designed to meet the due diligence criteria specified by many lending institutions, have also been implemented. As defined by ASTM<sup>1</sup> E1527-13, §1.1.1, the term "recognized environmental conditions" or (REC) refers to:

"The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any **release** to the environment; (2) under conditions indicative of a **release** to the environment; or (3) under conditions that pose a material threat of a future **release** to the environment."

#### Under CERCLA the definition of a **release** is given as:

42 U.S.C. § 9601(22) defines a "**release**" as "<u>any spilling, leaking, pumping, pouring, emitting, emptying,</u> discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discharging of barrels, containers, and other closed receptacles containing any hazardous substances or pollutant or contaminant."

It is important to note the issuance and consideration of Business Recognized Environmental Concerns, Historic Recognized Environmental Concerns (HREC), and/or Controlled Recognized Environmental Concerns (CREC). Each of these items is more clearly defined in the regulatory literature and standards. We have considered the application of these definitions as part of this review. We do this to help determine impact significance for sites which once had items of recognized concern due to use and or historic practice, but for which a cleanup or change of regulatory law and regulation has removed the hazardous condition from the site.

<sup>&</sup>lt;sup>1</sup> American Society for Testing and Materials, www.astm.org

#### ASTM STANDARDS AND REQUIREMENTS

Phase I ESAs must be conducted in accordance with the current version of American Society for Testing and Materials International (ASTM) Standard E1527 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process", ASTM International in conjunction with ASTM Standard E1528 "Standard Practice for Environmental Site Assessments: Transaction Screen Process", ASTM International. For referenced ASTM standards, visit the ASTM website, www.astm.org, or contact ASTM Customer Service at <u>service@astm.org</u>. <u>Contact Petralogix to discuss these requirements in</u> <u>more detail. If preferred, we can come to your office and present a 30-minute power point on the</u> ASTM Standard as topic for better understanding. Contact us at <u>questions@petraolgix.com</u> to setup a presentation.

#### 2.2 Detailed Scope-of-Review

The scope of work performed to develop the information contained in this Phase I Environmental Site Assessment report includes:

- 1. Collecting available information concerning the property
- 2. Review of other data pertinent to the specific site
- 3. Conducting a site visit to assess physical features, observe adjacent land use, and gather evidence of indiscriminate and/or illegal waste disposal
- 4. Conducting a review of regulatory agencies' records
- 5. Contacting appropriate regulatory personnel,
- 6. Reviewing regulatory files regarding the property in question.
- 7. Detailed discussions with both the Client and all previous owners who are available to discuss the history of the site.

No previous environmental assessments were identified for review.

This Phase I Environmental Site Assessment discusses all work performed by Petralogix to date with regard to this specific project. The principal findings are outlined throughout the body of this text and are summarized in the conclusion of this report.

#### 2.3 Significant Assumptions

<u>No significant assumptions</u> were made in the course of this assessment. To clarify, a significant assumption is defined in the following statement: "things and/or items that were based on speculative reports or study, or which were not verified through rigorous evaluation and objective review."

#### 2.4 Limitations and Exceptions

This report was compiled as a Phase I Environmental Site Assessment for the subject project. This report contains information and data that was provided to Petralogix by a variety of outside sources. Petralogix cannot warrant the accuracy and/or completeness of the information which was provided to us by those sources.

When an assessment is completed without adequate subsurface exploration or chemical screening very little certainty (or conclusive statement) can be made about the conditions of the soil and groundwater beneath a particular site. As is the case with this study, uncertainty regarding latent subsurface conditions which may be the result of on-site or off-site sources exists. In order to best determine with certainty these conditions, physical testing would be required. <u>Therefore, the findings</u> and conclusions of this report are not scientific certainty, but rather a statement of probability based on professional judgment. These statements of probability are based on the data gathered during the course of this investigation.

Petralogix is not able to represent that the site or adjoining land contains no hazardous waste, oil, underground storage tanks, or other latent condition beyond that detected or observed by Petralogix during the Phase I Environmental Site Assessment. Without physical tests and additional review for those sites, we can determine no definite answer. A possibility always exists for contaminants to migrate through surface water, air, or groundwater. An investigation to determine whether or not contaminants are present in the surface and subsurface soil is not within the scope of work required to produce the Phase I Environmental Site Assessment. Chemical analysis of soil and groundwater samples to quantify levels of contamination are also not within the scope of work required to develop a Phase I Environmental Site Assessment.

As discussed in ASTM E1527-13, it is never possible to eliminate all uncertainty from an investigation of this type:

No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and this practice recognizes reasonable limits of time and cost.

For this assessment, there were no specific limitations identified.

#### 2.5 Special Terms and Conditions

As part of this certain materials are not fully evaluated including Asbestos, Mold, Radon, Vapor, or Lead. These are discussed and considered, but we are not proposing to provide characterization of these items (nor is characterization required or intended within the ASTM scope). Intention here is directed towards screening.

Our office has not been provided with any specific criteria for the development of this report that is separate from the general request to evaluate the property in question for possible problems related to toxic or hazardous agents. We have not been directed to address any specific questions concerning the site. If there is a need to conduct an investigation into a specific question not addressed in this report, please contact Petralogix immediately regarding your concerns.

#### 2.6 User Reliance

This report was prepared for the exclusive use of Lodi Unified School District. No other person or entity is entitled to use or rely upon this report without specific written authorization from Petralogix. Such reliance is subject to the same limitations, terms, and conditions as our original contract with the above stated client(s). Petralogix specifically rejects anv responsibility for unauthorized use of this report. Unauthorized use is any use that is not consented for by Petralogix in writing. This Phase I ESA is only reliable for 180 days from the date of the completion, April 2, 2019.

#### 180 Day Limitation?

Phase I ESAs are only valid for 180 days. Many clients want a more detailed explanation of why. Over time, conditions may change at the site which cause an impact and form an environmental liability. There are many examples of this happening. One value of retaining the same professional with time is that the revised and updated Phase I ESAs are generally more simplified than if using multiple consultants.

#### 3.0 SITE DESCRIPTION

#### 3.1 Location and Legal Explanation

The subject property address is 4600 E Acampo Road, Acampo, San Joaquin County, California (APN: 017-310-01). Residential agricultural land borders the site to the east and south; E Acampo Road and North 99 Frontage Road borders the site to the north and west, respectively. Highway 99 is adjacent west of North 99 Frontage Road. The site is located in Acampo and is generally surrounded by residential and agricultural use, with some commercial and industrial use in the vicinity.

A general location map (Vicinity Map – Plate 1) and a general site map showing survey photograph locations (Site Map – Plate 2) are attached to this report in **Appendix A**. Photographs from the onsite field survey of the subject property are attached to this report as **Appendix B**.

#### 3.2 Site and Vicinity Features

The site consists of the Houston K – 8 School campus. The overall parcel is approximately 8.57 acres in size. The campus includes permanent and portable classrooms located in the western half portion of the site and a large field in the eastern portion of the site. The parcel is fenced. The general vicinity consists of residential and agricultural use.

#### 3.3 Current Use - Property

#### 3.4 Descriptions of Structures, Roads, Other Improvements for the Site

The western half of the site consists of several permanent structures that are joined and form two semi-enclosed outdoor areas, one paved and one with landscaping. There are six portable classrooms, a shed, and a playground located in the south west portion of the site. The subject property includes paved asphalt parking, and asphalt basketball courts/tether ball areas. There are at least two additional portable classroom structures in the center north of the site near the school entrance off E. Acampo Road. The eastern half of the subject property consists of a field surrounded by trees. The site is fenced.

#### 3.5 Current Uses - Adjoining Properties

To the north is E Acampo Road followed by residential properties; northwest is a commercial minimart. To the east and south are mixed agricultural and residential properties. To the west is N 99 Frontage road followed by State Route 99.

#### 3.6 Physical Setting

#### 3.6.1 <u>Topography</u>

According to the most recent United States Geological Survey Topographic map covering the subject property and vicinity<sup>2</sup>, the subject property is at an elevation of approximately 60 feet above mean sea level. The site is relatively flat. The general area slopes shallowly toward the west.

#### 3.6.2 Geology and Soils

According to the most detailed Geologic Map covering the subject property and vicinity, the majority of the subject property consists of undifferentiated alluvial deposits, mostly arkosic, of the Upper Member of the Modesto Formation (Qm2).<sup>3</sup>

Site soil consists of Tokay fine sandy loam (0-2 percent slopes) for approximately 90 percent of the site area and Acampo fine sandy loam (0-2 percent slopes) for approximately 10 percent of the site (the upper northeast portion). Tokay fine sandy loam is well drained with low runoff derived from granitic rock sources. <sup>4</sup> Acampo fine sandy loam is moderately well drained with very low runoff derived from granitic rock sources.<sup>5</sup>

#### 3.6.3 <u>Hydrogeology</u>

According to the San Joaquin County Spring 2016 and Fall 2016 Groundwater Reports<sup>6</sup> groundwater elevation contour map, groundwater elevation is approximately -15 feet below mean sea level (msl) during spring and -20 feet below msl during fall. The elevation at the site is approximately 60 feet msl, therefore depth to groundwater at the subject property is approximately 75 to 80 feet below ground surface (bgs). The groundwater flow direction is northeast with a gradient of approximately 10 to 15 feet per mile in the spring and fall.

#### 4.0 USER PROVIDED DATA

#### 4.1 Title Records

Chain of title reports were not provided by the client for Petralogix's use in preparing this report. Environmental Data Resources, Inc. (EDR) performed a Title Search to identify any Liens and AULs associated with the subject property address of 4600 E Acampo Road, San Joaquin County, California. EDR identified a deed for 4600 E Acampo Road, (APN: 017-310-01) recorded with the San Joaquin County Recorder dated "prior to 1980", identifying subject property owner as Houston School District. The previous owner was not identified.

#### 4.2 Environmental Liens or Activity and Use Limitations

EDR performed a Lien and AUL search for the subject property address of 4600 E Acampo Road in Acampo, San Joaquin County, California (APN: 017-310-01). No environmental liens or AULs were found for the subject property. In addition, Petralogix reviewed the California EPA Department of Toxic Substances Control (DTSC) databases<sup>7</sup> of land use restricted sites: "Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions" and "Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction."<sup>8</sup> The subject property was not listed on either database.

#### 4.3 Specialized Knowledge and Awareness

Ms. Vickie Brum indicated no specialized knowledge or experience that is important or relevant to assessing or identifying recognized environmental conditions in connection with the subject property, with the exception the subject property was purchased by Lodi Unified School District in 1904.

#### 4.4 Commonly Known or Reasonably Ascertainable Data

Ms. Vickie Brum indicates no knowledge of commonly known or reasonably ascertainable information related to the subject property that was relevant to this study or review.

#### 4.5 Valuation Decrease for Environmental Maters

Ms. Vickie Brum indicates the knowledge of valuation reduction of the subject property due to any environmental issues, or otherwise, is not currently applicable to the subject property.

<sup>&</sup>lt;sup>7</sup> https://www.dtsc.ca.gov/SiteCleanup/SCCleanupSites.cfm

<sup>&</sup>lt;sup>8</sup> https://www.dtsc.ca.gov/SiteCleanup/Cortese\_List.cfm

## 4.6 Owner, Property Manager, and Occupant Data

Ms. Vickie Brum indicates she is currently an employee representative for Lodi Unified School District. Information provided by the owner of the subject property is discussed in more detail in Section 8.1.

#### 4.7 Purpose for Performing Phase I ESA

#### **Orphan Sites**

An orphan site can be described as a toxic waste area where the polluter could not be identified, or the polluter refused to take action or pay for the cleanup. It therefore is of great significance for due diligence review.

Ms. Vickie Brum indicates the Phase I ESA has been requested for relocation/construction of new portable structures at the subject property.

#### 5.0 RECORDS EXAMINATION

In preparing this report, Petralogix has engaged the services of Environmental Data Resources, Inc. (EDR) of Milford, Connecticut. EDR provided Petralogix with a list and profile of the recorded sites within the project study area that have been identified by regulatory agencies of significance.

EDR's report #5583838.2s is included as **Appendix D**. The date of the latest agency version of each database searched by EDR and the date EDR acquired the latest update are noted in the EDR report as part of the record for this Phase I ESA.

The EDR governmental database search included a list of "orphan sites." Orphan sites are locations which have a physical existence, but whose exact location is "fuzzy" and therefore, requires additional review to determine relevance to the site in question. These sites were not depicted on the EDR radius map of identified sites. EDR identified 4 "orphan sites". The relevance of these sites is evaluated in section 5.3.3 below.

#### 5.1 Standard Environmental Records

A variety of standard environmental record sources have been reviewed based on the data provided by EDR in order to complete this report. Information on what sources were reviewed and search distances associated with those sources is listed in table form in **Appendix C**.

#### 5.2 Supplementary Environmental Records

In addition to the standard environmental record sources, additional environmental record sources have been reviewed as well. Those sources are listed on the last page of **Appendix C**.

#### 5.3 Environmental Record Discoveries

#### 5.3.1 <u>Subject Property</u>

The subject property is listed on multiple EDR databases, as discussed in the following table. The site address for the subject property is 4600 E Acampo Road (Houston School) and 1600 E Acampo Road (Houston Middle School).

Subject Property Address	Source	Comments
Houston School 4600 E Acampo Road	HIST UST, UST	The site is listed on the UST database. Tank status is listed as an inactive 550-gallon petroleum tank. The site is on the HIST UST database, with facility type reported as a School. There is one UST listed, tank capacity unspecified, fuel regular. Per the HIST UST State Water Resources Control Board, File No. 0002FEBE, dated June 1, 1988, the container type, year installed, gallons, and repairs (if any) are unknown; installation year is listed as 1967 containing regular fuel.

The subject property (4600 E Acampo Road) is listed on the UST and HIST UST database, with the facility type reported as a School. There is one historic 550-gallon regular fuel UST listed. A review of San Joaquin County Environmental Health records for the site (section 8.2.1) indicate the removal of the 500-gallon UST occurred on June 22, 1987. Based on records indicating EHD was onsite for inspection during removal, no odor of petroleum was observed, soil samples obtained indicate TPH was non-detect, and EHD issued a "No further action required" letter on February 16, 1994, the removed UST is not considered a REC to the subject property.

Nothing material to RECs were identified based on the databases reviewed.

#### 5.3.2 <u>Surrounding Sites</u>

Surrounding sites and adjacent properties were listed on some of the databases searched via EDR. These sites are listed below and discussed in detail.

Facility Name	Location (miles)	Source	Comments
Sav-Mor Oil Company A&M Market 4579 E Acampo Road	~ 40 feet N Cross-gradient	LUST, HIST CORTESE, CERS SWEEPS UST, HIST UST, UST	The site is on the LUST database. An 8,000-gallon UST containing regular unleaded fuel had an enforcement letter dated September 15, 1992 indicating an unauthorized leak. The impacted media is reported as soil. The LUST case was completed and closed on March 19, 1996. Based on the distance from the site and cross-gradient groundwater direction, this is not considered a REC to the site.
J. J. Rios Farm Service	~180 feet E	AST	There is a total of 3,070 gallons stored in above ground tank(s) per the AST information provided. Based on the

Facility Name	Location (miles)	Source	Comments
4890 E Acampo Road	Down-gradient		distance, depth to groundwater, and down-gradient groundwater direction, the AST(s) are not considered a REC to the site.
Bob Onishi 4799 Harvest Road	~845 feet N-NE Down-gradient	UST, SWEEPS UST	The location is listed as a historic UST site with a 350-gallon or 500-gallon UST, installed in 1965. The tank status is inactive. Based on the distance and hydrogeologic gradient, this does not constitute a REC to the site.
Maurer Property 4240 Acampo Road	~615 feet E Cross-gradient	UST, SWEEPS UST, LUST, HIST CORTESE, CERS	The databases report an inactive, 500-gallon UST and an inactive 550-gallon UST, both reported containing regular unleaded gasoline. Based on the distance and cross-gradient groundwater flow direction to the subject property, this does not constitute a REC. According to the databases reviewed, the location is a LUST site, with leak reported on July 28, 1988. The Central Valley Regional Water Control Board (Region 5S) indicates the media impacted as soil, contaminant of concern as gasoline. The case is completed and closed by the Board as of July 3, 2008. Based on the regulating agency closure, distance, and cross-gradient hydrology, this is not considered a REC to the site.
Western Oil Spreading 19256 Highway 99	~1-mile S Cross-gradient	ENVIROSTAR, LUST, HIST CORTESE, NPDES, WDS, CIWQS	The site is listed under ENVIROSTOR facility ID No. 39290004, with an initial site screening completed May 19, 1994. The ENVIROSTOR screening revealed no significant problems, however, the site was referred to the Regional Water Quality Control Board for storage of petroleum product in above ground tanks. The site is listed as a LUST Cleanup Site. Records indicate the case is closed, with all known on-site USTs removed, several grab water samples collected, and groundwater wells contaminated w/TPH-diesel are declining over time. Records indicate the facility is enrolled with NPDES Industrial program effective March 8, 2016 with status terminated as of March 2018. The facility is a nonhazardous solid waste producer, reported as a minor threat to water quality. Based on the distance from the site and regulatory closure status, the site is not considered a REC.
Lodi Airport 23987 N Highway 99	~1-mile N-NW Down-gradient	RESPONSE, ENVIROSTOR, LUST, HIST CORTESE, CERS, CA BOND EXP. PLAN, CERS	The site is listed on the ENVIROSTOR database identified from the Hazardous Waste Management Branch, with a preliminary environmental assessment performed in 1992 determined the levels of the pesticide DDT exceed the Total Threshold Concentration. The investigation appears open and continuing.

Facility Name	Location (miles)	Source	Comments
			The site is an open LUST Cleanup Site with Central Valley RWQCB (Region 5S), associated with three USTs removed in 1999.
			The site is approximately 1 mile north-northeast of the subject property, as well as down-gradient. The Lodi Airport does not constitute a REC to the site.

No information material to RECs were identified based on the databases reviewed.

#### 5.3.3 <u>Orphan Sites</u>

EDR identified 4 "orphan sites" without site addresses, site names, or databases assigned.

#### 6.0 HISTORICAL USE DATA

#### 6.1 Historical Aerial Photographs & Topographic Maps

Aerial photographs and topographic maps of the subject property provided by EDR were reviewed as part of this investigation:

### **Aerial Photograph Description Table**

Date	Photo Description
1937	The subject property appears to be agricultural rows for approximately two
	thirds of the eastern parcel. There may be one to three structures on the
	western portion of the site, however, the picture is not clear. To the north of the
	site is a road, followed by agricultural land with sparse residential structures.
	The land east and south appears agricultural. To the west there is a road
	followed by agricultural land and sparse residential structures. To the south is a
1940	road followed by primarily agricultural land with sparse residential use.
1940	The potential three structures are no longer visible on the western portion of subject property; the subject property appears developed with a large L-shaped
	structure in the northwest portion of the site. The remaining portion of the site
	appears as vacant land. To the north of the site is a light increase in residential
	structures. The general vicinity remains primarily agricultural with some
	residential housing.
1957	The subject property has similar building footprint as previous year (1940),
1937	however, there is now another one or two large structures just south. The
	remaining portion of the subject property appears to be vacant land. To the north
	is increased residential housing. To the west there is a large highway trending
<u>d</u>	is increased residential nousing. To the west there is a large highway trending

	north-south. The land adjacent south now has what appears to be a residence. The general vicinity remains primarily agricultural with some increase in residential housing.
1963	The subject property has similar building footprint as previous year (1957),
1975	however, there is now another large structure attached to the general L-shaped
	structure on the south. The remaining subject property appears vacant. The general vicinity appears similar to previous photo (1957).
1984	The subject property has similar building footprint as previous year (1975),
	however, there is now an additional smaller structure in the southwest corner of
	the site. The western half of the subject property appears to be developed with
	asphalt. The remaining portion of the subject property appears similar to previous
1000	photograph. The general vicinity appears similar to previous year (1975).
1993	The subject property has similar building footprint as previous year (1975),
2006	however, although the photo is unclear, there is now at least three additional
2009	smaller structures in the southwest corner of the site and two additional
2012	structures in the central northern portion of the site. The general vicinity remains
2016	similar to previous photo.

## **Topographic Maps**

Date	Scale	Quadrangle	Map Description
1894	1:125,000	Lodi	The subject property is depicted as vacant. The surrounding land appears vacant. There is a railroad trending northwest-southeast approximately 1 mile to the west of the site. The town of Acampo is depicted approximately 1 mile west of the subject property.
1908, 1910	1:24,000	E. Lockeford Woodbridge	The subject property is labeled North School. There are scattered residential houses in the surrounding areas.
1939	1:24,000	Lodi Bellota	The subject property is labeled Houston School. There surrounding area has an increase in intermittent housing structures. There appears to be agricultural use in the surrounding vicinity.

Date	Scale	Quadrangle	Map Description
1942 1947	1:24,000	Lodi Bellota	The subject property is similar to previous map, with at least one structure depicted on the site. The surrounding area is similar to the previous map.
1953	1:24,000	Lodi North Lockeford	The subject property is now depicted with at least three structures in the northwest portion of the site; the eastern half of the site. There appears to be several residential houses north of the site. The area has a slight increase in residential structures.
1968 1976 1979	1:24,000	Lodi North Lockeford	The subject property is similar to the previous map. Highway 99 is now depicted nearly adjacent west of the subject property. North of the site there is a residential neighborhood that appears more dense than previous map. The general area has a slight increase in residential as well as some commercial development. There appears to be several residential houses north of the site. The area has a slight increase in residential structures.
1993	1:24,000	Lockeford	The subject property is not visible on provided map sheet.
2012	1:24,000	Lodi North Lockeford	The subject property is depicted as vacant. The general vicinity appears similar; however, the structures are missing for the general vicinity.

Based on the historical aerial photographs and topographic maps, the subject property was vacant land from at least 1894 and a school (North School, Houston School), from at least 1908 to present. The western portion of the subject property may have had three historic structures present in 1937 and removed by 1940. A portion of the land may have been farmed in 1937; the photographs from 1940 to present do not indicate agricultural use. Surrounding land appears to have been primarily agricultural land developed into residential and lots over time. These photos and maps are included in **Appendix E**.

#### 6.2 Sanborn Insurance Company Maps

An attempt was made by EDR to obtain Sanborn Insurance Company maps for the period covering the years 1894 through the present in order to determine what types of activities were conducted on the subject property and on adjoining properties. No Sanborn maps for the subject property were identified.

#### 6.3 EDR Building Permit Search

An attempt was made by EDR to obtain Building Permit information. No building permits for the subject property were identified.

#### 6.4 Local Street Directories

Haines Criss-Cross City Directory and infoUSA<sup>9</sup> for Acampo were reviewed, including issues dated approximately every five years from 1975 through 2014. A description of the City Directory findings for the subject property are included in the table below.

#### **<u>City Directory Description Table</u>**

Year	City Directory Listing
1975	No listing
1980, 1985	Lodi High School, Lodi SC Houston
1990	No listing
1995, 2000, 2004, 2009, 2014	Lodi SC Houston, Lodi SC Middle Houston, Lodi SC Elementary Houston, Lodi SC attendance, Lodi Unified School District

Based on the City Directory findings, the subject property has been a high school from at least 1980 through 2014. Listings indicate adjacent properties consisted of residential homes. No listings material to RECs were identified in the City Directory findings. City Directory listings are included in **Appendix E**.

#### 7.0 SITE RECONNAISSANCE

A visual reconnaissance of the subject property was conducted on March 14, 2019, by Tonya Scheftner. During the site visit, the weather was sunny and cool. A site map and photographs of the subject property are attached to this report in **Appendices A** and **B**.

#### 7.1 Procedure and Restrictive Conditions

The periphery of the subject property, main office area, and the janitor closet were inspected. There was no access to the cafeteria or electrical room.

<sup>&</sup>lt;sup>9</sup> Provided by EDR.

www.petralogix.com

#### 7.2 Petralogix Site Visit Worksheet

Subject Property: 4600 E Acampo	Weather: Sunny, cool
Describe the current use of the property.	The subject property is currently used as the Houston School campus serving grades K – 8.
Describe evidence of historic uses on the property.	None observed.
Is there a Potable Water Source?	Private Well
Is there a Sewage Disposal Source?	Septic system
Are there any onsite odors?	None observed.
Are there any pools of Liquid?	None observed.
Are there any electric or hydraulic equipment likely to contain PCBs?	Three ground transformers located on concrete foundation on the subject property were observed in good condition. Three pole-mounted transformers were observed adjacen south of the subject property and one pole-mounted transformer was observed across E Acampo Road on the north side of the street. No green stickers stating "No PCE were observed. No leaking was observed; however, on pole-mounted transformer located the southern boundar appeared old.
Are there any storage tanks located onsite?	Three large water storage tanks located at well.
Are there any drums or other containers located onsite?	No drums observed. Small amounts (one-gallon or less) cleaning supplies observed in janitor closet.
<b>Observations</b> – Structure Interior	
Are there any heating/cooling system?	The systems appear to be split vacuum electric systems or swamp coolers depending on building.
Are there any stains or corrosion?	None observed.
Are there any sumps or drains?	A drain was observed in the janitor's closet.
<b>Observations -</b> Exterior	
Are there any Ponds, Lagoons, and/or Pits?	None observed.
Is there any stained soil or pavement visible onsite?	Very minor staining observed in parking lot.
Was there any solid waste storage or deposition onsite?	Four (4) Cal-waste dumpsters were observed on the site.

Site Visit Observations		
Any noticeable waste water discharge?	None observed.	
Are there any wells or septic systems visible onsite?	A well with three storage tanks was observed in the southeast corner of the school paved section (between structure and field); septic system manhole covers observed near the eastern center of the paved asphalt portion of the site, with leach fields/pits likely running to the east into the field.	
Observations – Vicinity Area		
Describe the topography of property and vicinity.	The subject property and vicinity are relatively flat.	
Describe the current use of adjoining properties.	To the north is E Acampo Road followed by residential homes. The northwest corner across E Acampo Road north is a mini-mart (A&M Market). East is a grape vineyard followed by rural residential housing. South is rural residential. West of the site is Highway 99 Frontage road followed by Highway 99.	
Is there any evidence of past uses?	None observed.	
Describe the current land uses in area.	Residential, Agricultural, Commercial	
Describe any evidence of past uses.	None observed.	

#### 8.0 INTERVIEWS

#### 8.1 Interview with Owner / Site Manager and Key Individuals

Ms. Vickie Brum, current Facilities Planner for Lodi Unified School District was interviewed via an owner questionnaire (**Appendix F**) regarding current and historical use of the subject property. The current property owner is Lodi Unified School District, purchased in 1904. The previous property owners or any other persons with historical knowledge of the subject property were not indicated. Current use of the property is education (school campus). The site has buildings however, the constructed dates were not indicated; no survey for lead paint was reported. There are no pesticides, paints, and other chemicals stored in containers greater than 5 gallons each at the subject property. No known use of past or current agriculture use or pesticide application is indicated. Environmental site assessment reports are not known for the site. The site has a private well and an on-site septic system approximately 10 years old. A parcel across the street is indicated as a former gas station or motor repair facility. No underground storage tank removal records were provided to Petralogix.

Mr. Joe Patty, site contact for Lodi Unified School District, was interviewed by Tonya Scheftner on March 14, 2019 during the site reconnaissance. Mr. Patty allowed access to the subject property. Mr. Joe Patty did not report any specialized knowledge of the site.

Ms. Vickie Brum, current Facilities Planner and employee for Lodi Unified School District was interviewed via a user questionnaire (**Appendix F**) regarding current and historical use of the subject property. Ms. Brum indicated the past use of the property has been utilized as a school, although a date was not provided. The Phase I ESA report is requested to satisfy relocation/construction of new portable structure requirements for schools.

#### 8.2 Interviews with Local Government Offices

#### 8.2.1 San Joaquin County Environmental Health Department

The San Joaquin County Environmental Health Department was contacted to determine whether any records were on file at that agency material to RECs in connection with the subject property addresses 4600 E Acampo Road and 1600 E Acampo Road. In addition, up to eight parcels were requested for the site addresses near or adjacent to the subject property. These records are discussed in detail in the table below.

Subject Property Address: 4600 E Acampo Road		
Date	Document Type	Description
2/16/1994	San Joaquin County Environmental Health Division, No Further Action Required Letter	San Joaquin County states "No Further Action Required" for 550-gallon UST tank removal dated June 22, 1987.
06/22/1987	San Joaquin County Inspection Report	Report indicated one 550-gallon UST previously containing leaded fuel was removed, Tank had holes in middle and north end. No odor of petroleum was observed in three samples collected for testing.
07/07/1987	California Water Labs	Per analytical report by California Water Labs, samples were tested for total petroleum hydrocarbons (TPH); all samples of lab reviewed are non-detect.
06/22/1987	Disposal Certification, Triangle Inc. of Sacramento	Certification of tank received on June 22, 1987 and disposed of on June 24, 1987.
01/03/1989	Incomplete Underground Storage Tank Closure Information & Correspondence	Multiple LUSD schools are included on the incomplete underground storage tank closure information required for Tokay High School, Alpine School, Live Oak School, Houston School, and Woodbridge Middle School. Correspondence between UST tank removal contractors Epco and NorCal Construction and LUSD for permit application requirements (tank receipts and soils analysis). Excavation receipt for the delivery of USTs to Rio Vista.
12/26/1962	Permit 15212	Permit 15212 for one 5,000-gal septic tank and disposal field.

07/09/1976	Permit 76-616	Permit 76-616 for additional seepage pit to existing septic.
07/19/1979	Permit 79-644	Permit 79-644 for three additional seepage pits to existing
		septic.
03/09/1990	Permit 90-561	Permit 90-561 repair permit for existing septic, add six
		seepage pits.
07/22/1996	Permit SR0009907	Permit SR0009907 for addition of four leach lines and
0, , = = , = , = , 0		seepage pits.
09/17/2004	Service Request	Service request for liquid waste plan check – emergency
0,1,1,2001	bervice Request	sump pump system.
11/19/2004	Lift Station Permit	Permit for 35 GPM pump station
	Lift Station Permit	
7/29/1988	Permit 88-2357	Repair permit 88-2357 for well pump.
1/9/1989	Permit 89-60	Well destruction permit; well depth 113 feet.
11/10/1998	Permit SR0017592	Well destruction permit (Well #1); well depth 400 feet.
11/10/1998	Permit SR0017593	Well installation permit (Well #2); well depth 500 feet.
Address: A&M Market – 4579 Acampo Road		
Date	Document Type	Description
04/14/1994	No Further Action	San Joaquin County EHD letter stating "No Further Action"
	Letter	required for a LUST case which reportedly impacted soil.

San Joaquin County Environmental Health Division (EHD) records indicate one 550-gallon UST was removed on June 22, 1987 at the subject property. No odor of petroleum was observed, and the three samples analyzed for total petroleum hydrocarbons were non-detect. EHD issued a "No further action required" letter on February 16, 1994. The removed UST is not considered a REC to the subject property.

No RECs were identified in connection with the subject property.

San Joaquin County EHD records were requested for up to eight parcels near or adjacent to the subject property. Records for A&M Market, located at 4579 E Acampo Road, north of the subject property following E Acampo Road, indicate a "No Further Action" letter was submitted for an 8,000-gallon leaking underground storage tank which impacted soil. Based on the site closure letter, this is not considered a REC in connection to the subject property.

#### 8.2.2 San Joaquin County Assessor-Recorder

Petralogix submitted a search request of property records for the subject property available at the San Joaquin County Assessor-Recorder Office. Records identify the current property owner as Houston School District for APN 017-310-01, with the acquisition year 1904. No owners prior to 1904 were identified.

#### 8.2.3 San Joaquin Valley Air Pollution Control District

The San Joaquin Valley Air Pollution Control District (SJVAPCD) was contacted to determine whether any records were on file at that agency material to RECs in connection with the subject property. The

SJVAPD identified no locations potentially emitting hazardous air emissions or handling hazardous or acutely hazardous materials and substances of waste

#### 9.0 MOLD ASSESSMENT SCREENING

No obvious signs of mold were seen during our limited site visit. We are not certified mold experts. If the Lodi Unified School District is concerned with the possibility of mold, a survey is applicable. However, mold inspection is not a required part of a Phase I ESA evaluation under the ASTM Standard.

#### **10.0 LEAD SCREENING EVALUATION**

Based on the school purchase date of 1904, and review of hisotric aerial photographs, the campus was developed with several of the current structures begininng at least by 1940; numerous on-site structures were built prior the effect ban of lead paints and products. Therefore, the potential for lead-based paints located in/on the site structures is considered high. We are not certified lead experts and lead inspection is not a required part of a Phase I ESA evaluation under the ASTM Standard.

#### **11.0 ASBESTOS SCREENING EVALUATION**

The potential for asbestos containing building material located in/on the site structures is considered high. We are not certified asbestos experts and asbestos inspection is not a required part of a Phase I ESA evaluation under the ASTM Standard. Asbestos inspection by certified asbestos experts should be conducted, and if asbestos is present, removal should be conducted by a certified and licensed asbestos abatement contractor.

#### 12.0 RADON GAS ASSESSMENT

Radon gas emissions from the natural breakdown of elements in soil is a concern in many areas around the country. In particular, Radon gas can buildup in confined spaces such as tunnels and basements. A survey of the subject property was not conducted, but a review based on government data was performed. The area in question is listed on the US EPA Radon Check Map as having 1 local test having been historically performed. The one test was <4.0pCi/L, indicating low potential for Radon. The Federal EPA Radon Zone for San Joaquin County is Zone 3, indoor average level <2 pCi/L. Based on this low potential, Radon is a low concern for the subject property.

#### 13.0 VEC & VAPOR INTRUSION SCREENING

The EDR VEC App was used by our firm to perform a Tier 1 Screening for Vapor. This App provides integrated data, analytical tools, and professional reporting searches to help review available environmental records (**Appendx D**). Based on our review, the subject property does not have the potential to cause vapor intrustion/encroachment risk based on the former UST history. This is considered low due to the history indicating no known leaking or soil impaction, low tank volume, non-detect soil testing results, and site closure.

In addition, a search area of one-third of a mile was utilized in order to assess potential listings within the region which may have the potential to cause vapor intrusion/encroachment risk. Based on our review, there are no listings that may have the potential to cause vapor intrusion/encroachment risk.

#### 14.0 DISCOVERIES & FINDINGS

- Based on the historical aerial photographs and topographic maps, the subject property was vacant land from at least 1894 and a school (North School, Houston School), from at least 1908 to present. The western portion of the subject property may have had three historic structures present in 1937 and removed by 1940. A portion of the land may have been farmed in 1937; the photographs from 1940 to present do not indicate agricultural use. Surrounding land appears to have been primarily agricultural land developed into residential and residential agricultural lots over time, with some commercial and industrial use.
- Database records indicate one 550-gallon UST used for diesel fuel storage was removed from the subject property on June 22, 1987. No odor of petroleum was observed, and the three samples analyzed for total petroleum hydrocarbons were non-detect. The San Joaquin County Environmental Health Department (EHD) issued a "No further action required" letter on February 16, 1994. The removed UST is not considered a REC to the subject property.
- Minor staining observed in parking lots.
- Three ground mounted transformers on concrete foundations are located on the subject property, observed in good condition.
- Three pole-mounted transformers are located adjacent south and one pole-mounted transformer is located across E Acampo Road north of the subject property, observed in fair to good condition.
- Five underground storage tanks are reported within 0.25 miles of the subject property.
- Two LUST cases are reported within 0.25 miles of the subject property.

#### **15.0 PROFESSIONAL OPINIONS**

• Pesticides and herbicides may have been applied to the subject property during possible agricultural use prior to 1940. This is considered a *de minimis* condition. Considering the long period of time that the school has already been developed, the short period of time that the site would have been exposed to agricultural use, the lack of records showing storage or use of agricultural pesticides on the site, the site reportedly purchased by the school district in 1904, and the multiple historic site developments without incidence related to pesticides, agricultural use is not considered to be an environmental concern.

- Based on historic aerial photographs, there may have been three structures in 1937 removed by 1940. The former structure areas have been developed/replaced with structures and asphalt and therefore not considered an environmental concern to the subject property.
- Based on the "No Further Action Required" form from the San Joaquin County Environmental Health Department (EHD), San Joaquin County EHD oversite of the 500-gallon diesel UST removal, and the soil sample results indicating the soil was not impacted, the former 500-gallon UST which was removed in 1987 is not considered an environmental concern to the subject property.
- Based on the locations and observed conditions of the three pole-mounted transformers observed on or near the subject property, they are not considered an environmental concern to the site. The three ground mounted transformers observed on the subject property were in good condition and are also not considered an environmental concern for the subject property.
- Staining observed in the parking lots of the subject property are minor, and therefore considered *de minimis*.
- Based on the site conditions and topographically down or cross-gradient positions, and/or regulatory status of the reported nearby USTs and LUST cases, these do not constitute a REC to the site.
- Building materials in the on-site structures built prior to 1980 may contain lead and asbestos, as well as mold. However, we are not experts in these areas of environmental review, and this is outside of the investigation requirements of ASTM 1527-13. If this is considered to be significant to the User, testing could be performed to verify the presence or absence of these materials.

#### **16.0 FINAL CONCLUSIONS**

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 for 4600 E Acampo Road, Acampo, California, (the subject property). Any exceptions to, or deletions from, this practice are described in the Limitations Section of this report. This assessment identified no recognized environmental conditions (RECs) in connection with the subject property.

This assessment has identified the following *de minimis* conditions:

- Pesticides and herbicides may have been applied to the subject property during possible agricultural use prior to 1940. This is considered a *de minimis* condition. Considering the long period of time that the school has already been developed, the short period of time that the site would have been exposed to agricultural use, the lack of records showing storage or use of agricultural pesticides on the site, the site reportedly purchased by the school district in 1904, and the multiple historic site developments without incidence related to pesticides, agricultural use is not considered to be an environmental concern. This is considered a *de minimis* condition.
- Minor staining observed in parking lots.

#### **17.0 RECOMMENDATIONS**

No further investigation recommended.

#### **18.0 SPECIFIC DEVIATIONS**

No deviations have been taken from this standard.

#### **19.0 ADDITIONAL SERVICES**

No additional services were provided.

# **APPENDIX C**

Search Radius	Database Reviewed (EDR)	
1 mile	National Priority List (NPL) Source: U.S. Environmental Protection Agency (US EPA). The NPL database is a subset of CERCLIS (see below). It identifies sites for priority cleanup under Superfund Programs. NPL sites may encompass relatively large areas, thus the larger search radius.	
0.5 mile	<b>Delisted NPL List</b> Source: US EPA. The Delisted NPL database includes sites which have been deleted from the NPL due to a no further response being needed. The EPA uses the criteria of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP) to select sites for deletion. Generally this is based on cleanup action.	
0.5 mile	Comprehensive Environmental Response Compensation and Liability Information System List (CERCLIS) Source: US EPA. The CERCLIS database contains information on potentially hazardous waste sites that have been reported to the US EPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are included, propose for inclusion, or in the screening phase for possible inclusion in the NPL.	
0.5 mile	<b>CERCLIS "No Further Remedial Action Planned" (NFRAP)</b> Source: US EPA. The CERC-NFRAP database contains information on sites designated "No Further Remedial Action Planned" which have been remove from the CERCLIS database. NFRAP sites may be sites where no contamination was found following an initial investigation, where remedial action has been completed, or where the contamination was not serious enough to require Federal Superfund action or NPL consideration.	
1 mile	<b>Corrective Action Report (CORRACTS)</b> Source: US EPA. CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.	
Resource Conservation and Recovery Act "Treatment, Storage, and Disposal Facilities" (RCRA-TSDF)0.5 mileSource: US EPA. The RCRA-TSDF database contains basic information on facilities that treat, store, or dispose of hazardous waste as defined by RCRA This list is contained within the RCRAInfo database.		
property and adjoining	RCRA Large Quantity Generators (LQG) and Small Quantity Generators (SQG)Source: US EPA. These lists are contained within the RCRAInfo database.Each site is categorized as one of the following:RCRA-LQG: Facilities that generate more than 1000 kg per month of non-acutely hazardouswaste, or more than 1 kg per month of acutely hazardouswaste.RCRA-SQG: Facilities that generate between 100 kg and 1000 kg per month of non-acutely hazardous waste.	

Search Radius	Database Reviewed (EDR)	
property only	<b>Engineering Controls Sites List (US ENG CONTROLS)</b> Source: US EPA. The US ENG CONTROLS database is a list of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or affect human health.	
property only	<b>Sites with Institutional Controls (US INST CONTROL)</b> Source: US EPA. The US INST CONTROL database lists sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation case requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.	
property only	<b>Federal Emergency Response Notification System (ERNS)</b> Source: U.S. Coast Guard, National Response Center. ERNS database contains information on the reported releases of oil and hazardous substances.	
1 mile	<b>ENVIROSTOR</b> Source: California EPA Department of Toxic Substances Control (DTSC). The ENVIROSTOR database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes NPL sites; State response sites including military facilities and State Superfund; Voluntary Cleanup sites; and school sites.	
1 mile	HIST CAL-SITES Source: DTSC. The CAL-SITES database contains potential or confirmed hazardous substance release properties. In 1996, the EPA reevaluated and reduced the number of sites in this database. Cal-Sites is no longer updated and has been replaced by ENVIROSTOR.	
0.5 mile	<b>Spills, Leaks, Investigations, and Cleanups (SLIC)</b> Source: State Water Resources Control Board (SWRCB). The SLIC list includes unauthorized discharges from spills and leaks, other than from underground storage tanks or other regulated sites.	
0.5 mile	<b>Solid Waste Information System SWF/LF (SWIS)</b> Source: California Integrated Waste Management Board. The SWIS database contains an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 2004 criteria for solid waste landfills or disposal sites.	
0.5 mile	<b>Geotracker's Leaking Underground Fuel Tank Report (LUST)</b> Source: SWRCB. The LUST database contains an inventory of reported leaking underground storage tank incidents.	

Search Radius	Database Reviewed (EDR)	
0.5 mile	Leaking Underground Storage Tanks on Indian Land (INDIAN LUST) Source: US EPA. The INDIAN LUST database records leaking underground storage tanks on Indian land in Arizona, California, New Mexico, and Nevada.	
property and adjoining	<b>Active UST Facilities (UST)</b> Source: SWRCB. The UST list contains an inventory of active underground storage tank facilities gathered from local regulatory agencies.	
property and adjoining	<b>Facility Inventory Database (CA FID UST)</b> Source: Cal EPA. The CA FID UST database is a historical listing of active and inactive underground storage tank locations.	
property and adjoining	Hazardous Substance Storage Container Database (HIST UST) Source: SWRCB. The HIST UST database is a historical listing of underground storage tanks.	
property and adjoining	<b>Underground Storage Tanks on Indian Land (INDIAN UST)</b> Source: US EPA Region 9. The Indian UST database contains an inventory of underground storage tanks on Indian land.	
property only	<b>Deed Restriction Listing (DEED)</b> Source: DTSC. The DEED database contains an inventory of Site Mitigation and Brownfields Reuse Program (SMBRP) facility sites with deed restrictions and Hazardous Waste Management Program (HWMP) facility sites with deed or land use restrictions. The SMBRP list includes active deed restrictions and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The HWMP list includes current or former hazardous waste facilities that have a recorded land use restriction at the local County recorder's office.	
0.5 mile	mile <b>Voluntary Cleanup Program Properties (VCP)</b> Source: DTSC. The VCP database contains an inventory of low threat properties with either confirmed or unconfirmed releases in which the project proponents have requested that DTSC oversee investigation and/or cleanup activities.	
1 mile	US Brownfields Source: US EPA. The US Brownfields database includes properties listed as Cooperative Agreement Recipients and properties addressed by Targeted Brownfields Assessments (TBA). EPA's TBA program is designed to help states, tribes, and municipalities minimize the uncertainties of contamination often associated with brownfields. States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the US EPA.	

Search Radius	Database Reviewed (EDR)	
0.5 mile	<b>SLIC REG 5</b> Source: California Regional Water Quality Control Board Central Valley Region (5). The SLIC (Spills, Leaks, Investigations and Cleanup) program is designed to protect and restore water quality from spills, leaks, and similar discharges.	
0.5 mile	<b>Leaking Underground Storage Tanks (LUST) REG 5</b> Source: California Regional Water Quality Control Board Central Valley Region (5). The LUST database contains an inventory of reported leaking underground storage tank incidents.

#### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

#### STANDARD ENVIRONMENTAL RECORDS

#### State- and tribal - equivalent NPL

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
LODI AIRPORT	23987 NORTH HIGHWAY	NNW 1/2 - 1 (0.959 mi.)	E15	38

Status: Refer: Other Agency				
Facility Id: 39450001				

#### State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where

environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/28/2019 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

Completed Document Type: Completed Date:	05/19/1994
Completed Date.	
Comments.	Site Screening completed 5/19/94. Screening included a site visit
	that revealed no significant problems. File review revealed no
	documented contamination. Screening recommended no further action for
	the site. Site referred to Regional Water Quality Control Board for storage of petroleum product in above ground tanks. Letter will be
	sent to San Joaquin County Environmental Health informing them of the
	Department activities.

Department of Food and Agriculture (DFA) - site of North Coast Helicopter. PROJECT WIDE Completed Area Name: Completed Sub Area Name: Not reported Completed Document Type: Preliminary Endangerment Assessment Report Completed Date: 09/29/1992 Comments: PEA completed. Eight areas at Lodi Airport (Site) were determined to need further evaluation prior to remediation. The most notable results include levels of the pesticide DDT that exceed the Total Threshold Limit Concentration (TTLC) found in the north storage area, south storage area, and the drainage ditch south of Jahant Road. Potential routes of concern include direct contact and air. However, potential air route exposure is based on the contaminated soil being disturbed and the air velocity exceeding 27 miles per hour.

	oversight/monitoring of cleanup efforts. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with remedial investigations and cleanup activities.
Site Description:	This site is a commercial/private use airport which houses several agricultural aircraft operators. Inspections conducted by DHS in 1984 indicated extensive areas of soil contamination in areas used as a rinse/wash facility by the operators. There is also evidence of spillage and improper disposal in other areas of the airport. Sampling at the site indicated the presence of a variety of pesticides, some of which were measured at concentrations above the allowable limits.
Hazardous Waste Desc:	Pesticides found at the site include DDT, methoxychlor, carbaryl (Sevin), 2,4-dichlorophenoxyacetic acid (2,4-D), derivation tributyl phosphorotrithioate (DEF), disystan, ethyl parathion and endosulfans (I and II).
Threat To Public Health & Env:	The primary pathways are inhalation, direct contact and ingestion of drinking water. Potential receptors are humans.
Site Activity Status:	The Lodi Airport Corporation was issued a determination and notice of compliance order and required to post Hazardous Substance Area warning signs.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

### Federal NPL site list

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/12/2018 Date Data Arrived at EDR: 12/28/2018 Date Made Active in Reports: 01/11/2019 Number of Days to Update: 14 Source: EPA Telephone: N/A Last EDR Contact: 02/15/2019 Next Scheduled EDR Contact: 04/15/2019 Data Release Frequency: Quarterly

### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/12/2018 Date Data Arrived at EDR: 12/28/2018 Date Made Active in Reports: 01/11/2019 Number of Days to Update: 14 Source: EPA Telephone: N/A Last EDR Contact: 02/15/2019 Next Scheduled EDR Contact: 04/15/2019 Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

### Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/12/2018 Date Data Arrived at EDR: 12/28/2018 Date Made Active in Reports: 01/11/2019 Number of Days to Update: 14 Source: EPA Telephone: N/A Last EDR Contact: 02/15/2019 Next Scheduled EDR Contact: 04/15/2019 Data Release Frequency: Quarterly

### Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016 Date Data Arrived at EDR: 01/05/2017 Date Made Active in Reports: 04/07/2017 Number of Days to Update: 92 Source: Environmental Protection Agency Telephone: 703-603-8704 Last EDR Contact: 01/04/2019 Next Scheduled EDR Contact: 04/15/2019 Data Release Frequency: Varies

### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/12/2018 Date Data Arrived at EDR: 12/28/2018 Date Made Active in Reports: 01/11/2019 Number of Days to Update: 14 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 02/15/2019 Next Scheduled EDR Contact: 04/29/2019 Data Release Frequency: Quarterly

### Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/13/2018 Date Data Arrived at EDR: 12/28/2018 Date Made Active in Reports: 01/11/2019 Number of Days to Update: 14 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 02/15/2019 Next Scheduled EDR Contact: 04/29/2019 Data Release Frequency: Quarterly

### Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/01/2018	Source: EPA
Date Data Arrived at EDR: 03/28/2018	Telephone: 800-424-9346
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 12/03/2018

	Data Release Frequency: Quarterly

### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/03/2018 Next Scheduled EDR Contact: 04/08/2019 Data Release Frequency: Quarterly

#### Federal RCRA generators list

### RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/03/2018 Next Scheduled EDR Contact: 04/08/2019 Data Release Frequency: Quarterly

#### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/03/2018 Next Scheduled EDR Contact: 04/08/2019 Data Release Frequency: Quarterly

### RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018Source: Environmental Protection AgencyDate Data Arrived at EDR: 03/28/2018Telephone: (415) 495-8895Date Made Active in Reports: 06/22/2018Last EDR Contact: 12/03/2018Number of Days to Update: 86Next Scheduled EDR Contact: 04/08/2019Data Release Frequency: Quarterly

### Federal institutional controls / engineering controls registries

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 10/17/2018Source: Department of the NavyDate Data Arrived at EDR: 10/25/2018Telephone: 843-820-7326Date Made Active in Reports: 12/07/2018Last EDR Contact: 02/07/2019Number of Days to Update: 43Next Scheduled EDR Contact: 05/27/2019Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 07/31/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/28/2018	Telephone: 703-603-0695
Date Made Active in Reports: 09/14/2018	Last EDR Contact: 02/04/2019
Number of Days to Update: 17	Next Scheduled EDR Contact: 06/10/2019
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 07/31/2018 Date Data Arrived at EDR: 08/28/2018 Date Made Active in Reports: 09/14/2018 Number of Days to Update: 17 Source: Environmental Protection Agency Telephone: 703-603-0695 Last EDR Contact: 02/04/2019 Next Scheduled EDR Contact: 06/10/2019 Data Release Frequency: Varies

### Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/24/2018 Date Data Arrived at EDR: 09/25/2018 Date Made Active in Reports: 11/09/2018 Number of Days to Update: 45 Source: National Response Center, United States Coast Guard Telephone: 202-267-2180 Last EDR Contact: 02/08/2019 Next Scheduled EDR Contact: 04/08/2019 Data Release Frequency: Quarterly

### State- and tribal - equivalent NPL

### **RESPONSE:** State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 01/28/2019	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 01/29/2019	Telephone: 916-323-3400
Date Made Active in Reports: 03/05/2019	Last EDR Contact: 01/29/2019
Number of Days to Update: 35	Next Scheduled EDR Contact: 05/11/2019
	Data Release Frequency: Quarterly

#### State- and tribal - equivalent CERCLIS

#### ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 01/28/2019 Date Data Arrived at EDR: 01/29/2019 Date Made Active in Reports: 03/05/2019 Number of Days to Update: 35 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 01/29/2019 Next Scheduled EDR Contact: 05/11/2019 Data Release Frequency: Quarterly

### State and tribal landfill and/or solid waste disposal site lists

#### SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or i nactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 02/11/2019 Date Data Arrived at EDR: 02/12/2019 Date Made Active in Reports: 03/05/2019 Number of Days to Update: 21 Source: Department of Resources Recycling and Recovery Telephone: 916-341-6320 Last EDR Contact: 02/12/2019 Next Scheduled EDR Contact: 05/27/2019 Data Release Frequency: Quarterly

### State and tribal Brownfields sites

BROWNFIELDS: Considered Brownfieds Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 12/20/2018 Date Data Arrived at EDR: 12/21/2018 Date Made Active in Reports: 02/28/2019 Number of Days to Update: 69 Source: State Water Resources Control Board Telephone: 916-323-7905 Last EDR Contact: 12/21/2018 Next Scheduled EDR Contact: 04/08/2019 Data Release Frequency: Quarterly

### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/17/2018 Date Data Arrived at EDR: 12/18/2018 Date Made Active in Reports: 01/11/2019 Number of Days to Update: 24 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 12/18/2018 Next Scheduled EDR Contact: 04/01/2019 Data Release Frequency: Semi-Annually

Local Lists of Landfill / Solid Waste Disposal Sites

#### WMUDS/SWAT: Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

### Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 09/21/2018 Date Data Arrived at EDR: 09/21/2018 Date Made Active in Reports: 11/09/2018 Number of Days to Update: 49 Source: Drug Enforcement Administration Telephone: 202-307-1000 Last EDR Contact: 02/21/2019 Next Scheduled EDR Contact: 06/10/2019 Data Release Frequency: No Update Planned

### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005 Date Data Arrived at EDR: 08/03/2006 Date Made Active in Reports: 08/24/2006 Number of Days to Update: 21 Source: Department of Toxic Substance Control Telephone: 916-323-3400 Last EDR Contact: 02/23/2009 Next Scheduled EDR Contact: 05/25/2009 Data Release Frequency: No Update Planned

### SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 01/28/2019 Date Data Arrived at EDR: 01/29/2019 Date Made Active in Reports: 03/05/2019 Number of Days to Update: 35 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 01/29/2019 Next Scheduled EDR Contact: 05/11/2019 Data Release Frequency: Quarterly

### CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 12/31/2017 Date Data Arrived at EDR: 06/12/2018 Date Made Active in Reports: 08/06/2018 Number of Days to Update: 55 Source: Department of Toxic Substances Control Telephone: 916-255-6504 Last EDR Contact: 01/25/2019 Next Scheduled EDR Contact: 04/22/2019 Data Release Frequency: Varies

#### CERS HAZ WASTE: CERS HAZ WASTE

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 10/22/2018 Date Data Arrived at EDR: 10/23/2018 Date Made Active in Reports: 11/30/2018 Number of Days to Update: 38

Source: CalEPA Telephone: 916-323-2514 Last EDR Contact: 01/24/2019 Next Scheduled EDR Contact: 05/06/2019 Data Release Frequency: Quarterly

TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995 Date Data Arrived at EDR: 08/30/1995 Date Made Active in Reports: 09/26/1995 Number of Days to Update: 27

Source: State Water Resources Control Board Telephone: 916-227-4364 Last EDR Contact: 01/26/2009 Next Scheduled EDR Contact: 04/27/2009 Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 09/21/2018 Date Data Arrived at EDR: 09/21/2018 Date Made Active in Reports: 11/09/2018 Number of Days to Update: 49

HIST UST: Hazardous Substance Storage Container Database

The Hazardous Substance Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

Date of Government Version: 10/15/1990	Source: State Water Resources Control Board
Date Data Arrived at EDR: 01/25/1991	Telephone: 916-341-5851
Date Made Active in Reports: 02/12/1991	Last EDR Contact: 07/26/2001
Number of Days to Update: 18	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### SAN FRANCISCO AST: Aboveground Storage Tank Site Listing Aboveground storage tank sites

Date of Government Version: 09/11/2018	Source: San Francisco County Department of Public Health
Date Data Arrived at EDR: 09/12/2018	Telephone: 415-252-3896
Date Made Active in Reports: 10/11/2018	Last EDR Contact: 01/31/2019
Number of Days to Update: 29	Next Scheduled EDR Contact: 05/20/2019
	Data Release Frequency: Varies

CERS TANKS: California Environmental Reporting System (CERS) Tanks

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs.

Date of Government Version: 10/22/2018 Date Data Arrived at EDR: 10/23/2018 Date Made Active in Reports: 11/30/2018 Number of Days to Update: 38

Source: California Environmental Protection Agency Telephone: 916-323-2514 Last EDR Contact: 01/24/2019 Next Scheduled EDR Contact: 05/06/2019 Data Release Frequency: Quarterly

### CA FID UST: Facility Inventory Database

The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/1994	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 09/05/1995	Telephone: 916-341-5851
Date Made Active in Reports: 09/29/1995	Last EDR Contact: 12/28/1998
Number of Days to Update: 24	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

### Local Land Records

LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 11/29/2018	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 12/04/2018	Telephone: 916-323-3400
Date Made Active in Reports: 01/11/2019	Last EDR Contact: 02/27/2019
Number of Days to Update: 38	Next Scheduled EDR Contact: 06/17/2019
	Data Release Frequency: Varies

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 12/12/2018 Date Data Arrived at EDR: 12/28/2018 Date Made Active in Reports: 01/11/2019 Number of Days to Update: 14 Source: Environmental Protection Agency Telephone: 202-564-6023 Last EDR Contact: 02/15/2019 Next Scheduled EDR Contact: 05/06/2019 Data Release Frequency: Semi-Annually

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 12/03/2018 Date Data Arrived at EDR: 12/05/2018 Date Made Active in Reports: 01/11/2019 Number of Days to Update: 37 Source: DTSC and SWRCB Telephone: 916-323-3400 Last EDR Contact: 03/05/2019 Next Scheduled EDR Contact: 06/17/2019 Data Release Frequency: Semi-Annually

### **Records of Emergency Release Reports**

HMIRS: Hazardous Materials Information Reporting System Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 03/26/2018	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 03/27/2018	Telephone: 202-366-4555
Date Made Active in Reports: 06/08/2018	Last EDR Contact: 02/08/2019
Number of Days to Update: 73	Next Scheduled EDR Contact: 04/08/2019
	Data Release Frequency: Quarterly

### CHMIRS: California Hazardous Material Incident Report System

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 10/24/2018	Source: Office of Emergency Services
Date Data Arrived at EDR: 01/24/2019	Telephone: 916-845-8400
Date Made Active in Reports: 03/05/2019	Last EDR Contact: 01/24/2019
Number of Days to Update: 40	Next Scheduled EDR Contact: 05/06/2019
	Data Release Frequency: Semi-Annually

### LDS: Land Disposal Sites Listing (GEOTRACKER)

Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 12/10/2018 Date Data Arrived at EDR: 12/11/2018 Date Made Active in Reports: 01/15/2019 Number of Days to Update: 35 Source: State Water Quality Control Board Telephone: 866-480-1028 Last EDR Contact: 12/12/2018 Next Scheduled EDR Contact: 03/25/2019 Data Release Frequency: Quarterly

### MCS: Military Cleanup Sites Listing (GEOTRACKER)

Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 12/10/2018 Date Data Arrived at EDR: 12/11/2018 Date Made Active in Reports: 01/15/2019 Number of Days to Update: 35 Source: State Water Resources Control Board Telephone: 866-480-1028 Last EDR Contact: 12/12/2018 Next Scheduled EDR Contact: 03/25/2019 Data Release Frequency: Quarterly

#### SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012Source: FirstSearchDate Data Arrived at EDR: 01/03/2013Telephone: N/ADate Made Active in Reports: 02/22/2013Last EDR Contact: 01/03/2013Number of Days to Update: 50Next Scheduled EDR Contact: N/AData Release Frequency: No Update Planned

#### Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018 Number of Days to Update: 86 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 12/03/2018 Next Scheduled EDR Contact: 04/08/2019 Data Release Frequency: Quarterly

### FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 01/31/2015 Date Data Arrived at EDR: 07/08/2015 Date Made Active in Reports: 10/13/2015 Number of Days to Update: 97 Source: U.S. Army Corps of Engineers Telephone: 202-528-4285 Last EDR Contact: 02/22/2019 Next Scheduled EDR Contact: 06/03/2019 Data Release Frequency: Varies

### DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	
Date Data Arrived at EDR: 11/10/2006	
Date Made Active in Reports: 01/11/2007

### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Date of Government Version: 01/01/2017 Date Data Arrived at EDR: 02/03/2017 Date Made Active in Reports: 04/07/2017 Number of Days to Update: 63 Source: Environmental Protection Agency Telephone: 615-532-8599 Last EDR Contact: 02/15/2019 Next Scheduled EDR Contact: 05/27/2019 Data Release Frequency: Varies

US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 08/31/2018 Date Data Arrived at EDR: 09/25/2018 Date Made Active in Reports: 11/09/2018 Number of Days to Update: 45 Source: Environmental Protection Agency Telephone: 202-566-1917 Last EDR Contact: 02/04/2019 Next Scheduled EDR Contact: 04/08/2019 Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 02/08/2019 Next Scheduled EDR Contact: 05/20/2019 Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018 Number of Days to Update: 73 Source: Environmental Protection Agency Telephone: 703-308-4044 Last EDR Contact: 02/08/2019 Next Scheduled EDR Contact: 05/20/2019 Data Release Frequency: Varies

### TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2016 Date Data Arrived at EDR: 06/21/2017 Date Made Active in Reports: 01/05/2018 Number of Days to Update: 198 Source: EPA Telephone: 202-260-5521 Last EDR Contact: 12/21/2018 Next Scheduled EDR Contact: 04/01/2019 Data Release Frequency: Every 4 Years

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2016 Date Data Arrived at EDR: 01/10/2018 Date Made Active in Reports: 01/12/2018 Number of Days to Update: 2 Source: EPA Telephone: 202-566-0250 Last EDR Contact: 02/20/2019 Next Scheduled EDR Contact: 06/03/2019 Data Release Frequency: Annually

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009SDate Data Arrived at EDR: 12/10/2010TDate Made Active in Reports: 02/25/2011LaNumber of Days to Update: 77N

### ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 12/12/2018	Source: EPA
Date Data Arrived at EDR: 12/28/2018	Telephone: 703-416-0223
Date Made Active in Reports: 01/11/2019	Last EDR Contact: 02/15/2019
Number of Days to Update: 14	Next Scheduled EDR Contact: 03/18/2019
	Data Release Frequency: Annually

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 10/26/2018 Date Data Arrived at EDR: 11/06/2018 Date Made Active in Reports: 01/11/2019 Number of Days to Update: 66 Source: Environmental Protection Agency Telephone: 202-564-8600 Last EDR Contact: 01/22/2019 Next Scheduled EDR Contact: 05/06/2019 Data Release Frequency: Varies

#### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995 Number of Days to Update: 35 Source: EPA Telephone: 202-564-4104 Last EDR Contact: 06/02/2008 Next Scheduled EDR Contact: 09/01/2008 Data Release Frequency: No Update Planned

PRP: Potentially Responsible Parties A listing of verified Potentially Responsible Parties

#### **RADINFO:** Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 10/02/2018 Date Data Arrived at EDR: 10/03/2018 Date Made Active in Reports: 11/09/2018 Number of Days to Update: 37

Source: Environmental Protection Agency Telephone: 202-343-9775 Last EDR Contact: 01/03/2019 Next Scheduled EDR Contact: 04/15/2019 Data Release Frequency: Quarterly

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

#### HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMT	RA: Uranium Mill Tailings Sites	for fodoral government use in national defense programs. When the mills	

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS) The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Financial Accuracy O. Financial Accuracy Inform	ation Linking	

Financial Assurance 2: Financial Assurance Information Listing

A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

Date of Government Version: 02/15/2019 Date Data Arrived at EDR: 02/19/2019 Date Made Active in Reports: 03/05/2019 Number of Days to Update: 14 Source: California Integrated Waste Management Board Telephone: 916-341-6066 Last EDR Contact: 02/11/2019 Next Scheduled EDR Contact: 05/27/2019 Data Release Frequency: Varies

### HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2017Source: California Environmental Protection AgencyDate Data Arrived at EDR: 10/10/2018Telephone: 916-255-1136Date Made Active in Reports: 11/16/2018Last EDR Contact: 01/07/2019Number of Days to Update: 37Next Scheduled EDR Contact: 04/22/2019Data Release Frequency: Annually

#### WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Date of Government Version: 12/10/2018 Date Data Arrived at EDR: 12/12/2018 Date Made Active in Reports: 01/18/2019 Number of Days to Update: 37 Source: State Water Resources Control Board Telephone: 916-341-5810 Last EDR Contact: 12/12/2018 Next Scheduled EDR Contact: 03/25/2019 Data Release Frequency: Quarterly

### CIWQS: California Integrated Water Quality System

The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water Quality Control Boards to track information about places of environmental interest, manage permits and other orders, track inspections, and manage violations and enforcement activities.

Date of Government Version: 12/03/2018 Date Data Arrived at EDR: 12/04/2018 Date Made Active in Reports: 01/11/2019 Number of Days to Update: 38 Source: State Water Resources Control Board Telephone: 866-794-4977 Last EDR Contact: 03/05/2019 Next Scheduled EDR Contact: 06/17/2019 Data Release Frequency: Varies

### CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

#### EDR HIGH RISK HISTORICAL RECORDS

### EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

# OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date:	2012
East Map:	5619732 LOCKEFORD, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- Groundwater flow direction, and
   Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

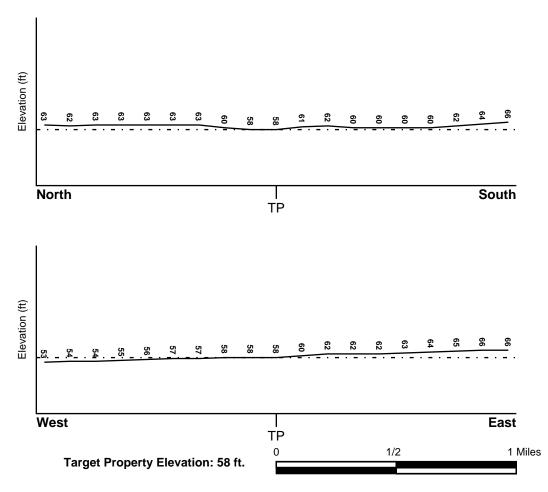

## **TOPOGRAPHIC INFORMATION**

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

# SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06077C0170F	FEMA FIRM Flood data
Additional Panels in search area:	FEMA Source Type
06077C0160F 06077C0190F	FEMA FIRM Flood data FEMA FIRM Flood data
NATIONAL WETLAND INVENTORY	NWI Electronic
NWI Quad at Target Property LODI NORTH	<u>Data Coverage</u> YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:			
Search Radius:	1.25 miles		
Status:	Not found		

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

# **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

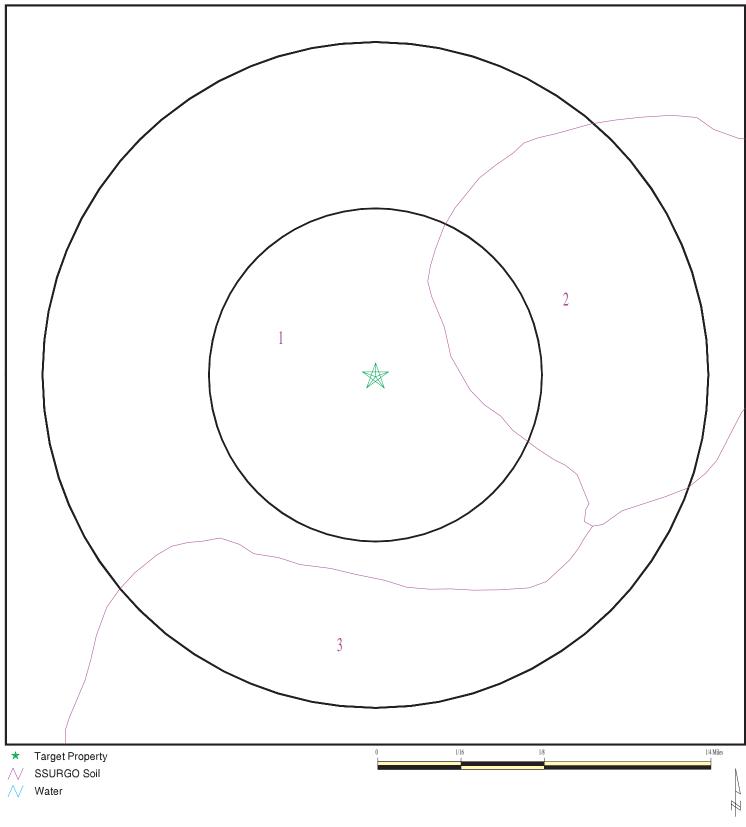

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# **ROCK STRATIGRAPHIC UNIT**

### **GEOLOGIC AGE IDENTIFICATION**

# DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	ТОКАҮ
Soil Surface Texture:	fine sandy loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained
Hydric Status: Partially hydric	
Corrosion Potential - Uncoated Steel:	High
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

	Soil Layer Information						
	Boundary			Classi	Classification		
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	hydraulic conductivity micro m/sec	
1	0 inches	18 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.1
2	18 inches	44 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.1
3	44 inches	59 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.1

# Soil Map ID: 2

Soil Component Name:	ACAMPO
Soil Surface Texture:	sandy loam
Hydrologic Group:	Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.
Soil Drainage Class:	Moderately well drained
Hydric Status: Partially hydric	
Corrosion Potential - Uncoated Stee	el: High
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

Boundary			Classification		Saturated hydraulic

2	5 inches	14 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6
3	14 inches	27 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6
4	27 inches	42 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6
5	42 inches	61 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 8.4 Min: 6.6

# LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

#### HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

#### LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS) This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database Source: Department of Water Resources Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

#### **OTHER STATE DATABASE INFORMATION**

California Oil and Gas Well Locations Source: Department of Conservation Telephone: 916-323-1779 Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

#### RADON

State Database: CA Radon Source: Department of Public Health Telephone: 916-210-8558 Radon Database for California

Area Radon Information

Source: USGS Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones Source: EPA Telephone: 703-356-4020 Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

#### OTHER

Airport Landing Facilities: Private and public use landing facilities Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Petralogix were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## **EDR Environmental Lien and AUL Search**

The EDR Environmental LienSearch Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

*Thank you for your business.* Please contact EDR at 1-800-352-0050 with any questions or comments.

# **EXECUTIVE SUMMARY**

## DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

## **RECORD SOURCES**

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

## **RESEARCH SUMMARY**

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

#### EDR BUILDING PERMIT REPORT

#### About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

#### **ASTM and EPA Requirements**

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

#### Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

# PUBLIC HEALTH SERVICES

ENVIRONMENTAL HEALTH DIVISION Ernest M. Fujimoto, M.D., M.P.H., Acting Health Officer 445 N. San Joaquin Street • P.O. Box 388 • Stockton, CA 95201-0388 (209) 468-3420

EDNA HUNT LODI UNIFIED SCHOOL DISTRICT 815 W LOCKEFORD ST LODI CA 95240

FEB1 6 1994

RE: HOUSTON SCHOOL 4600 ACAMPO RD ACAMPO CA 95240

San Joaquin County Public Health Services, Environmental Health Division (PHS/EHD) has recently reviewed the analytical results of the soil and/or water results taken from beneath the underground storage tank(s) that were/was removed from this site on June 22, 1987.

This letter confirms the completion of the tank removal investigation for the underground storage tank(s) #39-1797-01 at the above site. With the provision that the information provided to this agency was accurate and representative of existing conditions, it is our position that no further action is required at this time.

Please be advised that this letter does not relieve you of any liability under the California Health and Safety Code or Water Code for past, present, or future operations at the site. Nor does it relieve you of the responsibility to clean up existing, additional, or previously unidentified conditions at the site which cause or threaten to cause pollution or nuisance or otherwise pose a threat to water quality or public health.

Additionally, be advised that changes in the present or proposed use of the site may require further site characterization and mitigation activity. It is the property owner's responsibility to notify this agency of any changes in report content, future contamination findings or site usage.

If you have any questions regarding this matter, please contact Steven Sasson, Senior REHS, at (209) 468-3459.

Subject:

Underground Tank Removal - Tokay High School, Lodi High School, Alpine, Live Oak, Houston and Woodbridge Schools

Gentlemen:

Attached is a letter from the San Joaquin Local Health District informing us that information has not been submitted to their office relative to subject. Bob Nayes of your office was contacted on <u>October 15, 1987</u> and assured me he would contact the Health Department and provide the documentation requested.

In order to avoid costly litigation, it is necessary that you comply with the County requirements. We will expect the information requested by the County to be in our office no later than February 1, 1989.

If you have any problems with this time frame, please notify us immediately.

Sincerely Mike White

#### UNDERGROUND TANK REMOVAL

#### AT VARIOUS SITES

(Maintenance Yard (3), Live Oak, Alpine, Houston, Woodbridge, and Tokay High Schools)

#### GENERAL REQUIREMENTS

Lodi Unified School District invites bids to remove and dispose of underground storage tanks within the District. Tank locations, capacities and previous contents are listed below. All removal, soil sampling and analysis and disposal methods will follow regulations of the Environmental Protection Agency (EPA), San Joaquin County Local Health District, the Lodi City Building Department, the appropriate local Fire Department, Cal/OSHA, and the State Department of Health Services.

- 1. Lodi Unified School District will apply for permits to close the underground tanks. When a contractor has been named the application will be completed. The District will pay application fees.
- The Contractor will apply for permits from the Lodi City Building Department, the San Joaquin County Building Department, and the appropriate local Fire Department. The contractor will pay all costs associated with these permits.
- 3. The tanks and all associated plumbing must be emptied of product. S REMOVED
- 4. Tanks must be purged of all combustible vapor prior to removal 4 + 15 LBS. DRY (CE/10006ALLONG OF TANK
- 5. Extreme care must be employed by the Contractor to prevent tearing, ripping or puncturing of tanks. Vent pipes or other openings in the tanks or associated plumbing must be plugged immediately upon discovery, preferably with screwed plugs.
- 6. Appropriate notifications, for tank inspections and soil sampling requirements, must be made to the San Joaquin County Health Department and the appropriate Fire Department. ATLEAST 48 HPS. IN ADVANCE
- 7. When the tank is removed, the County will determine appropriate soil sampling strategy. Sampling and analytical services will be performed by California Water Lavs, 1430 Carpenter Road, Modesto, CA, phone (209) 527-4050.
- 8. The Contractor will then backfill the hole to ground level with fill dirt, provided by the Contractor.

4) IF SOIL SAMPLE ANALYSIS SHOW S CONTAMINATION, ALL DIRT PLACED BACKINTO EXCANATION WILL HAVE TO BE REMOVED, & MORE SOIL SAMPLES MAY BE

REQUIRED-

SEE OVER

GENERAL REQUIREMENTS Page 1 of 3

- 9. During excavation, temporary fencing or barricades will be placed and maintained by the Contractor to prevent accidents. Use of barricades in lieu of temporary fencing must be approved by the Lodi Unified School District's Project Manager.
- Disposal of tanks and associated plumbing is to follow rules and regulations of the appropriate Fire Department, San Joaquin County Health District, State Department of Health Service and the State Water Resources Control Board.
- 11. The Contractor will be responsible for and shall include in his bid all costs for:
  - a) Removal of content of tanks;
  - b) Disposal of any hazardous wastes that are in the tanks;
  - c) Disposal of tanks;
  - d) Cost of initial test as required by EPA and County specifications;
  - e) Permits required by City of Lodi Building Department and the appropriate local Fire Departments.
  - f) Excavation, backfill, and compact to grade level; -SETE NOTE, HO
    - g) Removal of the pumps and islands (pumps to be given to District) and replacement with black top (to match existing quality and grade) at the Maintenance Yard; and removal of pumps (pumps to be given to District) at Live Oak School.
    - h) Replacement of concrete at Woodbridge;
    - i) Fencing (or barricades with the approval of District) around excavation.

Underground tanks are to be removed from the following sites. For exact locations on sites, see accompanying drawings.

1. MAINTENANCE YARD, 3 S. Pacific Avenue, Lodi, CA

EPA #CAC000001362

1.	Tank Capacity:	10,000 gallons	Previous Contents:	Leaded Fuel
2.	Tank Capacity:	10,000 gallons	Previous Contents:	#2 Diesel
3.	Tank Capacity:		Previous Contents:	Waste oil

All three tanks are of steel construction.

Tank #1 (leaded fuel tank) may have some fuel remaining in tank. Tank #2 (diesel fuel tank) may have some fuel remaining in tank. Tank #3 (waste oil) may have some waste oil and sludge remaining in tank.

Attention: Lori Catulla

Re: Underground Tank Removal at Various Sites (Maintenance Yard (3), Live Oak, Alpine, Houston, Woodbridge & Tokay High

Dear Lori:

Please be advised that the contractor for the above project will be EPECO, Inc., P. O. Box 2076, Stockton, California, 95201; State license number 505704; and license classification is A. The project is expected to start on or before June 15, and be completed by August 29, 1987 (75 days).

Mr. Dave Higley of EPECO, Inc. indicated that he would stop by and give you whatever information you require (ie. method of disposal of residue, how the tanks will be purged, method of disposal or reuse of tanks, and tentative schedule). He also indicated he would give you a copy of the contract and insurance certificate that you require.

If you have any questions, please do not hesitate to call.

Sincerely,

Edna Hunt Construction Project Assistant

#### PHASE I ENVIRONMENTAL SITE ASSESSMENT -OWNER/KEY SITE MANAGER QUESTIONNAIRE 4600 E. ACAMPO ROAD ACAMPO, CALIFORNIA

At the request of Lodi Unified School District, Petralogix Engineering, Inc. is preparing a Phase I Environmental Site Assessment (Phase I ESA) for the above referenced property. Since you are the owner of the property, we ask that you designate someone as the key site manager or "person with the most knowledge of the property" to complete this form. Alternatively, you as the owner can complete it yourself considering that you are the most knowledgeable person. The designated person should complete the following questionnaire and email it to <u>tscheftner@petralogix.com</u>. If you have any questions about this do not hesitate to call us at 209-770-0731.

#### **GENERAL INFORMATION**

1. Current property owner:

4600 Aramo	D Road Acampo 05220
Address	APN 017-310-01
209-331-7475	
Telephone	
7/21/1904	
Year purchased	

#### 2 | Page

2. Previous property owner(s) and contact information (if this is not known please explain why):

Name: Address: NIA Publico always a school

Telephone:

Year purchased:

3. Any other person(s) with historical knowledge of property (if

NIA

Name:

known):

Address:

Telephone:

Relationship to property:

- 4. Please describe current use(s) of property to your best ability (more detail is better which specifies factors about the property's impact form use: Education
- 5. Please describe any other known past use(s) of property, and approximate dates of each use: Education
- 6. Please describe any other relevant historical information in your possession concerning the subject property.

7. Are you aware of any former addresses or previous assessor's parcel numbers (APNs) for the subject property? Include previous addresses/APNs even if subject property was split from a larger parcel. (*If yes, please discuss.*)

Yes

#### PHASE I ENVIRONMENTAL SITE ASSESSMENT - USER QUESTIONNAIRE 4600 E. ACAMPO ROAD ACAMPO, CALIFORNIA

Petralogix Engineering, Inc. is preparing a Phase I Environmental Site Assessment (Phase I ESA) for the above referenced property in order to assess the potential of onsite items which may be considered as Recognized Environmental Condition or Concern (RECs).

A Recognized Environmental Condition or Concern (REC) is one of the terms used to identify environmental liability within the context of a Phase I Environmental Site Assessment. ASTM defines the recognized environmental condition in the E1527-13 standard as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment". De minimis conditions are not recognized environmental conditions.

We ask that you complete the following questionnaire and email it to tscheftner@petralogix.com. We will include this in the Phase I ESA report as an appendix. We appreciate your time and encourage you to call us at 209-770-0731 with any questions about this or any of the items contained with this document.

#### **REQUIRED QUESTIONS**

Please provide the following information to our firm in order to qualify for the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"). Failure to provide this information could result in a determination that "all appropriate inquiry" was not completed. Any information that is falsely recorded, or knowingly is wrong, could also lead to an incomplete defense. For this reason, if an area is unclear or if there is a possibility that further clarification could be presented by another person, then call our firm at 209-770-0731 to discuss.

2	Page		
		Yes No	
1.	Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).		
	Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? (If yes, please discuss and attach any relevant documentation that may aid in determine the extent of this question.)		
		Yes No	
2.	Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).		
	Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? (If yes, please discuss and attach relevant documentation.)		
		Yes No	
3.	Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).		
	As the user of this Environmental Site Assessment do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? ( <i>If yes, please discuss and attach relevant documentation.</i> )		
		Yes No N/A	д
4.	Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).		
	a. Does the purchase price being paid for this property reasonably reflect the fair market value of the property?		Ú
		Yes No N/A	4
	petral	ogix
