## Naval Air Station North Island Airport Land Use Compatibility Plan

## **Project Description**

The Naval Air Station North Island (NASNI) Airport Land Use Compatibility Plan (ALUCP) has been prepared by the San Diego County Regional Airport Authority (SDCRAA or Airport Authority), acting in its capacity as the County Airport Land Use Commission (ALUC). The ALUCP would serve as the primary tool for the ALUC in reviewing proposed land developments in the NASNI environs for compatibility with military aviation operations. The ALUCP is also intended to assist local agencies (the cities of Coronado, Chula Vista, Imperial Beach, National City, San Diego, the San Diego Unified Port District of San Diego and the County of San Diego) in preparing or amending land use plans and regulations as well as in the review of proposed land use projects within their jurisdiction.

As required by state law, 1 the draft ALUCP will be consistent with the safety and noise standards in the 2011 Air Installations Compatible Use Zones (AICUZ) study, prepared by the United States Navy for NASNI. The draft ALUCP will provide airport land use compatibility policies pertaining to four airport-related compatibility factors: 1) noise, 2) safety, 3) airspace protection, and 4) overflight. The policies of the draft ALUCP would apply only to off-base land uses on non-federal lands as the ALUC does not have jurisdiction over federal property, nor does the ALUC have any authority over aviation operations.

The draft NASNI ALUCP is intended to promote compatibility between NASNI and future land uses for the protection of public health, safety, and welfare in areas around the Airport, to the extent that these areas are not already devoted to incompatible uses. The goals of the ALUCP policies are to:

- 1. Promote the compatibility of land uses within noise contours by:
  - a) Limiting new noise-sensitive development within the 65 decibel (dB) Community Noise Equivalent Level (CNEL) and higher noise contours to avoid an increase in existing land use incompatibility;
  - b) Ensuring that any new noise-sensitive development within the 65 dB CNEL and higher noise contours meets interior sound level standards.
- 2. Protect public safety by:
  - a) Limiting new risk-sensitive land uses within safety zones;
  - b) Avoiding an increase in existing land use incompatibility within the safety zones.
- 3. Protect NASNI airspace and the safety of flight by:
  - a) Limiting the height of new structures and objects within the airspace protection boundary per FAA standards;
  - b) Limiting potential hazards to flight within the airspace protection boundary.
- Promote awareness to prospective buyers of new housing of the potential effects of aircraft overflights within the AIA.

California Public Utilities Code, Section 21675(b).
