

# Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Deer Creek DCID Dam Fish Passage Project

Lead Agency: Deer Creek Irrigation District

Contact Name: Mr. John Edson

Email: john@edsonappraisals.com

Phone Number: (530) 865-5607

Project Location: Vina, CA

*City*

Tehama County

*County*

Project Description (Proposed actions, location, and/or consequences):

A roughened rock ramp will be constructed beginning 50 feet downstream of the front face of the existing Deer Creek Irrigation District (DCID) dam in Deer Creek. The roughened ramp will extend 215 feet downstream at a roughly two percent slope. The ramp will include a 75-foot wide typical section that provides sufficient flow depth to meet the fish passage criteria while maintaining adequate upstream water surface elevations to send the appropriate flow down the irrigation diversion canal. The existing earthen irrigation diversion canal will be regraded and concrete lined for a total of 1,250 feet with a 0.15 percent slope downstream of the fish screens. The existing fish screen bay will be reconfigured to account for the irrigation diversion canal modifications including updating the head gate, fish screens, and the juvenile fish bypass pipe.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potentially significant project impacts have been identified as related to biological resources, hazards and hazardous materials, cultural resources, hydrology and water quality, air quality / greenhouse gas emissions, soils, geology, and minerals. These potentially significant project impacts will be reduced to a level of less-than-significant through adherence to established best management practices (BMPs) and implementation of mitigation measures. The mitigation measures described in the MND and EA/IS will be implemented as part of the project to avoid or minimize potential environmental impacts. Implementation of these mitigation measures would reduce the potential environmental impacts of the proposed project to a less-than-significant level.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None.

Provide a list of the responsible or trustee agencies for the project.

Trustee Agencies:  
California Department of Fish and Wildlife

Responsible Agencies:  
National Marine Fisheries Service  
State Water Resources Control Board  
Regional Water Quality Control Board  
Central Valley Flood Protection Board  
Tehama County Air Pollution Control District  
U.S. Army Corps of Engineers
