

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Planada Wastewater Collection System Upgrade

Lead Agency: Planada Community Services District

Contact Name: Daniel Chavez

Email: pcsd103@aol.com

Phone Number: (209) 382-0213

Project Location: Planada, CA

Merced

City

County

Project Description (Proposed actions, location, and/or consequences).

The CSD has proposed sewer line improvements that will address aging infrastructure and prevent unsanitary conditions for the Community and surrounding area (Project). The improvements to the sewer line consist of a combination between the Traditional Method and the Trenchless Methods such as pipe bursting or cured-in-place pipe. Possibly all segments may require replacement or repair, but it is anticipated that only specific segments of the network will need replacement. Most of the repair is anticipated to occur in-ground, which does not necessitate excavation. These portions will be abandoned in-place and capped at both ends, with new pipe installed parallel to the existing pipelines.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Biology - potential effects on special status species: Pre-activity surveys and avoidance.
 Cultural Resources - potential for finds: protocols in event of encountering cultural materials.
 Geology and Soils - potential soil erosion: erosion control plan.
 Hydrology & Water Quality - potential siltation and water quality impacts: SWPPP and NPDES and best practices, grading plan and best practices.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None.

Provide a list of the responsible or trustee agencies for the project.

California State Water Resources Control Board
