1.0 Executive Summary

The Orin Group, LLC. (The Orin Group) has been retained by **CW Capital** to conduct a Phase I Environmental Site Assessment (ESA) in conformance with ASTM Practice E 1527-05, Standard Practice for Environmental Site Assessments. The subject property is located at 5060 Montclair Plaza Lane, San Bernardino County, Montclair, California 91763. The objective of this assessment is to determine the presence or absence of Recognized Environmental Conditions (RECs), as defined in ASTM 1527-05. There are no exceptions or deletions from the ASTM Practice E 1527-05.

1.1 Description of Subject Property

The subject property consists of a parcel of land that is approximately 78.0 acres in size. The property consists of a two-story retail shopping mall, Montclair Plaza and surrounding buildings. The buildings were constructed in 1968 (renovated in 1997) and the total area is approximately 875,085 square feet. The buildings are steel frame and masonry block construction. The roofing systems are flat and covered with build-up asphalt. The foundations appear to consist of a reinforced-concrete slab on grade. The surrounding grounds consist of asphalt-paved driveways and parking areas, concrete parking structure, cast in place concrete sidewalks and landscaped areas. The property's interior consists of painted gypsum board walls. Ceilings consist of acoustic ceiling tile and gypsum board and the floors were concrete with carpet and floor tile. Immediately surrounding the property to the north and west is residential and commercial property, to the south is I-10 and to the east is Central and commercial property.

1.2 Data Gaps

The Orin Group did not identify any significant data gaps, as defined by ASTM that affected the ability to identify RECs in connection with the property.

1.3 Findings and Observations

This assessment has revealed no evidence of RECs in connection with the subject property except the following:

Montclair Plaza, subject property, is listed on the HAZNET and RCRA-SQG databases for disposing of asbestos-containing waste. No violations were reported for this site. This will have no likely impact on the future use of the subject property.

There were current indications of petroleum products located on the subject property. Two 50-gallon diesel ASTs were noted for the emergency generators for the Montclair Plaza. Also, waste oil and new oil containers were noted in Goodyear Car Service. No signs of leaks were noted. The storage of these materials appeared to be satisfactory.

An asbestos survey was beyond the scope of this assessment. However, based on date of construction, 1968, there is a possibility that asbestos containing building materials (ACBMs) are located on the property. The property contained wallboard, joint compound, vinyl flooring and mastic.

A lead-based paint survey was beyond the scope of this assessment. Based on the age of the building, 1968, it is possible that lead-based paint is located on the property.

1.4 Recommendations

It is recommended that federal, state and local asbestos and lead-based paint regulations be reviewed for compliance prior to any renovation or demolition activities.

Based on the scope of work performed for this assessment, it is The Orin Group's professional opinion that no RECs have been identified in connection with the subject property that would warrant further environmental study (Phase II) at this time.

2.0 Introduction

2.1 Purpose

The purpose of this Phase I Environmental Site Assessment (ESA) was to identify the presence or absence of Recognized Environmental Conditions (RECs) associated with the subject property.

2.2 Scope of Services

This assessment was performed in general accordance with the scope of services outlined in the American Society for Testing and Materials (ASTM) E 1527-05, Standard Practice for Environmental Site Assessments. There are no exceptions or deletions from the ASTM Practice E 1527-05. The services performed by The Orin Group for this Phase I Environmental Site Assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by firms similar to The Orin Group, LLC which are currently providing similar services. The scope of this assessment includes the following:

- A review of relevant and readily available public records including federal and state environmental databases, local regulatory agency records, historical maps and/or aerial photographs, relevant publications, maps, and demographic information;
- A walking visual inspection of the site and any buildings at the site, and driving reconnaissance of the neighboring properties;
- Interviews with persons who have relevant knowledge of the current and past uses of or environmental conditions at the site (or portions thereof) and/or the surrounding properties;
- Review of relevant documents and information provided by the current owner(s) of the site.

2.3 Significant Assumptions

Any assumptions in this report were not considered as having significant impact of the determination of Recognized Environmental Conditions (RECs) associated with the subject property.

2.4 Limitations and Exceptions

The Orin Group has prepared this Phase I ESA report using reasonable efforts to identify recognized environmental conditions (RECs) associated with hazardous substances or petroleum products at the property. It is expressly understood that the undersigned has not conducted any detailed engineering studies of the integrity of the facilities or properties, nor has he/she performed any invasive tests to determine the presence of toxic, carcinogenic or safety/health hazardous materials. Client recognizes that subsurface conditions or other field conditions may vary from those encountered at locations where The Orin Group makes samplings, surveys or other observations and that the data interpretations and recommendations by The Orin Group are based solely on information available to The Orin Group. The statements set forth in this report are based solely on his/her visual observations and interviews with individuals and governmental agencies believed to be informed and knowledgeable. The nature of this survey is necessarily limited in scope and therefore, is not in a position to assure any party that all problems have been identified. The statements set forth in this assessment are not to be construed as a guarantee or warranty. An independent data research company provided the government agency database referenced in this report. Information on surrounding area properties was requested for approximate minimum search distances and is assumed to be correct and complete unless contradicted by The Orin Group's observations.

2.5 Special Terms and Conditions (User Reliance)

This report is for the use and benefit of, and may be relied upon by, CW Capital, and any of its affiliates, and third parties authorized by CW Capital and The Orin Group, including the lender(s) in connection with a secured financing of the property, and their respective successors and assigns.

3.0 Subject Property Description

3.1 Site Description

The subject property consists of a parcel of land that is approximately 78.0 acres in size. The property consists of a two-story retail shopping mall, Montclair Plaza and surrounding buildings. The buildings were constructed in 1968 (renovated in 1997) and the total area is approximately 875,085 square feet. The buildings are steel frame and masonry block construction. The roofing systems are flat and covered with build-up asphalt. The foundations appear to consist of a reinforced-concrete slab on grade. The surrounding grounds consist of asphalt-paved driveways and parking areas, concrete parking structure, cast in place concrete sidewalks and landscaped areas. The property's interior consists of painted gypsum board walls. Ceilings consist of acoustic ceiling tile and gypsum board and the floors were concrete with carpet and floor tile. Immediately surrounding the property to the north and west is residential and commercial property, to the south is I-10 and to the east is Central and commercial property.

3.1.1 Tax Lot Designation

1008-181-05

3.1.2 Legal Description

Not available

3.2 Site and Vicinity Characteristics

3.2.1 Geology

The subject property is situated above Cenozoic-age bedrock. The system unit is Quaternary and the series unit is Quaternary. The code unit is Q. The soil on-site belongs to the Tujunga series, which is characterized as gravely loamy sand that is somewhat excessively drained. The elevation of the subject property is 1,131 feet AMSL.

3.3 Past Uses of the Property

According to a review of aerial photographs obtained from EDR, Inc., the subject property has been used as a retail mall since 1968. Prior to its current use, the subject property was undeveloped land.

3.4 Current Uses of Adjoining Properties

North of property – Moreno Street & residential and commercial property

East of property – Central Avenue and commercial property

South of property – Interstate 10

West of property – Monte Vista Avenue & commercial and residential property

3.5 Title Records

Based on historical data reviewed and limited information provided in the title search, it is The Orin Group's opinion that a full title search would not have provided any significant additional information.

4.0 User Provided Information

4.1 Prior Environmental Assessments

No prior environmental assessments were provided to The Orin Group for review.

4.2 Environmental Liens or Activity and Use Limitations (AULs)

Property manager provided no information regarding property environmental liens or activity and use limitations.

4.3 Specialized Knowledge or Experience

Property manager provided no specialized knowledge regarding recognized environmental conditions associated with the subject property.

4.4 Commonly Known or Reasonably Ascertainable Information

No information was provided regarding any commonly known or reasonably ascertainable information within the local community that is material to RECs in connection with the property. The Orin Group researched online sources for any obvious or commonly known and reasonably ascertainable information regarding the subject property. No information was identified that is material to RECs in connection with the property.

4.5 Owner, Property Manager, and Occupant Information

Property manager provided specific information identifying the property occupant as the Montclair Plaza.

4.6 Reason for Performing Phase I ESA

The reason for conducting this Phase I ESA is part of the commercial real estate due diligence process.

5.0 Records Review

5.1 Standard Environmental Record Sources

Relevant, readily available and practically reviewable documents, records, and other information were obtained and reviewed as part of this Phase I ESA. This chapter provides a list of sources of information and supporting documents.

Federal Source Records and Information

- EDR federal environmental record databases search report prepared for The Orin Group.
- U.S. Geological Survey (USGS), topographic maps of Ontario, California 7.5-minute series quadrangle.

State of California Source Records and Information

- EDR state environmental record databases search report prepared for The Orin Group.
- Records maintained by the State of California; Water Resources Control Board; online database accessed at: <http://www.geotracker.waterboards.ca.gov/>

Local (County and Municipal) Records and Information

- San Bernardino County Auditor's Office, auditor's cards, parcel maps, and tax maps of the subject property and vicinity.
- San Bernardino County Recorder's Office, property transfer records for the site.
- San Bernardino Fire Department
- Historical aerial photographs of the subject property and vicinity obtained from EDR, Inc.
- Historical Sanborn Fire Insurance map search of the subject property and vicinity obtained from EDR, Inc.
- Historical city directories of the subject property and vicinity obtained from the San Bernardino County Public Library

5.2 EDR Federal and State Database Records

The Orin Group engaged EDR Corporation to scan both federal and state environmental record databases and provide a summary of facilities that are identified on any of the lists searched.

The federal databases searched, and specified search radii, are as follows:

| Federal Database | Specified Search Radii | No. Of Sites Identified |
|---|-------------------------------|--------------------------------|
| National Priorities List (NPL) | 1.0 mile | 0 |
| Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) List | 0.5 mile | 0 |
| CERCLIS No Further Remedial Action Planned (NFRAP) List | 0.25 mile | 0 |
| Corrective Action Report (CORRACTS) | 1.0 mile | 0 |
| RCRA generators lists | 0.25 mile | 2 |
| RCRA Nongenerator lists | 0.25 mile | 0 |

The state databases searched, and the specified search radii, are as follows:

| State Database | Specified Search Radii | No. Of Sites Identified |
|--|-------------------------------|--------------------------------|
| State Landfill and/or Solid Waste Facility | 0.5 mile | 0 |
| State Registered Underground Storage Tanks/ Aboveground Storage Tanks (UST's/AST's) list | 0.25 mile | 0 |
| Leaking Underground Storage Tank (LUST) | 0.5 mile | 5 |
| Notify 65 | 1.0 mile | 3 |
| Envirostor | 1.0 mile | 2 |
| CA FID UST | 0.25 mile | 0 |
| Historical UST | 0.25 mile | 0 |
| Statewide Environmental Evaluation & Planning System (SWEEPS UST) | 0.25 mile | 0 |
| Historical Cortese | 0.5 mile | 4 |
| Drycleaners | 0.25 mile | 1 |
| San Bern. Co. Permit | 0.25 mile | 5 |
| HAZNET | TP | 1 |
| VCP | 0.5 mile | 1 |

According to the EDR search report, the subject property was identified on two databases listed in the EDR search report.

- Montclair Plaza, subject property, is listed on the HAZNET and RCRA-SQG databases for disposing of asbestos-containing waste. No violations were reported for this site. This will have no likely impact on the future use of the subject property.
- Kits Camera 1 Hour #62/Ritz Camera, approximately 560 feet northwest of the subject property, is listed on RCRA-SQG and San Bern. Co Permit databases with no violations. Based on regulatory status, this is not considered a REC to the subject property.
- Lens Crafters#622, approximately 742 feet northeast of the subject property, is listed on San Bern. Co Permit database. Based on regulatory status, this is not considered a REC to the subject property.
- Romano's Macaroni Grill, approximately 766 feet northwest of the subject property, is listed on San Bern. Co Permit database. Based on regulatory status, this is not considered a REC to the subject property.
- Exxon Service Station 3532, approximately 928 feet northeast of the subject property, is listed on HIST CORTESE and LUST databases. The LUST case was closed on 6/28/88 Based on regulatory status and responsible party, this is not considered a REC to the subject property.
- Montclair Plaza Cleaners, approximately 1181 feet northeast of the subject property, is listed on HAZNET and DRYCLEANERS databases. The LUST case was closed on 6/28/88 Based on regulatory status and responsible party, this is not considered a REC to the subject property.
- Based on the distance from subject property, status, location and identified willing responsible parties for remaining sites identified in the EDR database, none are considered RECs to the subject property.

A copy of the database search, supplied by EDR, is included in Appendix E.

5.3 Additional Environmental Record Sources

The Orin Group contacted the following local agencies for information regarding any hazardous materials response incidents, chemical emergencies, or notices of environmental violations at the subject property.

5.3.1 Petroleum Storage Tank Division

The Orin Group reviewed the California State Water Resources Control Board online underground and leaking storage tank database. There were no records of underground storage tanks on the subject property. The California State Water Resources Control Board can be reached at (916) 341-5752.

5.3.2 Fire Department

The Orin Group requested information pertaining to records of underground storage tanks for the subject property. The Orin Group has not received a response as of the writing of this report. San Bernardino Fire Department can be reached at (909) 384-5286.

5.3.3. San Bernardino County Clerk

ASTM 1527-05 does not impose a duty upon the environmental professional to undertake a review of recorded land title records and judicial records for environmental liens. ASTM 1527-05 places such responsibilities upon the User. It is The Orin Group's understanding that the lender will engage a title company or title professional to undertake a review of reasonably ascertainable recorded land title records and lien records for environmental liens or activity and use limitations currently recorded against or relating to the property. Per the lenders scope of work, The Orin Group will not specifically be required to conduct a lien search unless requested. The Orin Group, however, researched information pertaining to any environmental liens or Activity and Use Limitations (AULs) on the subject property. No records of environmental liens were identified. If information related to liens or AULs is discovered during the standard Phase I process by The Orin Group, it will be documented in the Phase I report.

5.4 Historic Use Information of the Property

5.4.1 Aerial Photographs

According to a review of aerial photographs obtained from EDR, Inc., the subject property has been used as a retail mall since 1968. Prior to its current use, the subject property was undeveloped land.

Aerial Photo Review

| Year Subject | Property 5060 Montclair Plaza Lane | Adjoining Properties |
|--------------|---------------------------------------|-----------------------------|
| 1953 | Vacant land | Vacant land |
| 1968 | Montclair Plaza | Commercial/Residential/!-10 |
| 1977 | Montclair Plaza | Commercial/Residential/!-10 |
| 1990 | Montclair Plaza | Commercial/Residential/!-10 |
| 1994 | Montclair Plaza | Commercial/Residential/!-10 |
| 2002 | Montclair Plaza | Commercial/Residential/!-10 |
| 2005 | Montclair Plaza | Commercial/Residential/!-10 |

5.4.2 City Directories

According to historical city directories, the subject property was used as a retail mall since 1968.

5.4.3 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps for the subject property were unavailable.

6.0 Site Reconnaissance

6.1 Methodology and Limiting Conditions

On June 15th, 2010, The Orin Group's inspector Chad Dale performed a walking inspection of the subject property. The Orin Group inspected the subject property and sites located within the government records search requirements of ASTM Standard Practice for Environmental Site Assessments, E 1527-05. The Orin Group, LLC was accompanied by a representative of the subject property. The weather conditions were sunny and warm. Access was provided to all exterior areas of the property and a representative sample of the interior areas.

6.2 General Site Setting

The subject property is located at 5060 Montclair Plaza Lane, San Bernardino County, Montclair, California 91763. Based on the NAD 83 coordinate data (34° 5' 12.8" N, 117° 41' 38.4" W) the subject property is located in the USGS Ontario, CA Quad. Regionally, groundwater flows in a southwestern direction. The subject property is located 1,131 feet above mean sea level.

6.3 Exterior and Interior Observations

6.3.1 Petroleum Products

There were current indications of petroleum products located on the subject property. Two 50-gallon diesel ASTs were noted for the emergency generators for the Montclair Plaza. Also, waste oil and new oil containers were noted in Goodyear Car Service. No signs of leaks were noted. The storage of these materials appeared to be satisfactory.

6.3.2 Hazardous Materials

No significant use of hazardous substances is known to occur at the property. Limited amounts of cleaning supplies, maintenance materials and paints are present, but are used in small quantities consistent with similar types of businesses. The storage of these materials appeared to be satisfactory.

6.3.3 Drums or Containers

There were current indications of drums and containers located on the subject property. Waste oil and new oil containers were noted in Goodyear Car Service. No signs of leaks were noted. The storage of these materials appeared to be satisfactory.

- 6.3.4 Underground Storage Tanks (UST's)/Aboveground Storage Tanks (AST's)**
The Orin Group reviewed the California State Water Resources Control Board online underground and leaking storage tank database. There were no records of underground storage tanks on the subject property. Two 50-gallon diesel ASTs were noted for the emergency generators for the Montclair Plaza. Also, waste oil and new oil containers were noted in Goodyear Car Service. No signs of leaks were noted. The storage of these materials appeared to be satisfactory.
- 6.3.5 Intermodal Shipping Containers**
There were no current indications of intermodal shipping containers at the subject property.
- 6.3.6 Indications of Polychlorinated Biphenyls (PCBs)**
PCB's are associated with electrical transformers and substations. Some fluids contained in transformers (PCB-bearing) have been determined to be carcinogenic. The dielectric fluid in the transformers is a listed hazardous material. Any transformers located on and near this site, belong to the electric company. Because of their ownership, they would be responsible for any release or discharge of PCB laden material from these transformers.
- 6.3.7 Pits, Ponds & Lagoons**
No evidence of pits, ponds and/or lagoons was noted on the subject property.
- 6.3.8 Odors**
No evidence of odors was noted on the subject property.
- 6.3.9 Stained Soil or Pavement**
No evidence of significantly stained soil or pavement was noted on the subject property.
- 6.3.10 Pools of Liquid**
No evidence of pools of liquid was noted on the subject property.
- 6.3.11 Stressed Vegetation**
No evidence of stressed vegetation anticipated to be caused by contamination was noted on the subject property.
- 6.3.12 Solid Waste Disposal**
No evidence of solid waste concerns was noted on the subject property.
- 6.3.13 Medical/biological wastes/ X-ray or other radioactive activities**
No evidence of medical/biological waste or x-ray activities was noted on the subject property.

6.3.14 Drains and Sumps

No drains or sumps not connected to the city sewer were noted on the subject property.

6.3.15 Septic Systems

No septic systems are present on the subject property.

6.3.16 Storm/Waste Water

Wastewater generated at the site is limited to sinks, toilets, etc. and is disposed of via the municipal sewer system. Storm water flows to municipal storm drains located in the paved areas.

6.3.17 Wetlands/Flood Plain

No evidence of wetlands was noted on the subject property. The property is not located in a flood zone.

6.3.18 Wells

No evidence of wells (dry wells, water wells, irrigation wells, injection wells or abandoned wells) was noted on the subject property.

6.3.19 Lead-based Paint

A lead-based paint survey was beyond the scope of this assessment. Based on the age of the building, 1968, it is possible that lead-based paint is located on the property.

6.3.20 Potential Asbestos Containing Building Materials (ACBM's)

An asbestos survey was beyond the scope of this assessment. However, based on date of construction, 1968, there is a possibility that asbestos containing building materials (ACBM) are located on the property. The property contained wallboard, joint compound, vinyl flooring and mastic.

National Emission Standards for Hazardous Air Pollutants (NESHAP) regulations require sampling potential ACBM prior to demolition or extensive renovation, regardless of the date of construction; therefore, if such activities are planned, it may be required to conduct a survey of the entire facility, or that portion slated for renovation or demolition, before initiating such destructive activities. That survey should include an assessment of all subject building materials, including those in areas which are normally inaccessible. Any material found to be ACBM should be handled in accordance with applicable regulations.

7.0 Interviews

7.1 Interview with Property Manager

A completed questionnaire was not received at the time of this report.

8.0 Findings and Recommendations

8.1 Findings and Observations

This assessment has revealed no evidence of RECs in connection with the subject property except the following:

Montclair Plaza, subject property, is listed on the HAZNET and RCRA-SQG databases for disposing of asbestos-containing waste. No violations were reported for this site. This will have no likely impact on the future use of the subject property.

There were current indications of petroleum products located on the subject property. Two 50-gallon diesel ASTs were noted for the emergency generators for the Montclair Plaza. Also, waste oil and new oil containers were noted in Goodyear Car Service. No signs of leaks were noted. The storage of these materials appeared to be satisfactory.

An asbestos survey was beyond the scope of this assessment. However, based on date of construction, 1968, there is a possibility that asbestos containing building materials (ACBMs) are located on the property. The property contained wallboard, joint compound, vinyl flooring and mastic.

A lead-based paint survey was beyond the scope of this assessment. Based on the age of the building, 1968, it is possible that lead-based paint is located on the property.

8.2 Recommendations

It is recommended that federal, state and local asbestos and lead-based paint regulations be reviewed for compliance prior to any renovation or demolition activities.

Based on the scope of work performed for this assessment, it is The Orin Group's professional opinion that no RECs have been identified in connection with the subject property that would warrant further environmental study (Phase II) at this time.

9.0 Signatures and Certification Statement

9.1 Certification Statement

We certify that to the best of our knowledge and belief:

1. The statement of fact contained in this report is true and correct.
2. The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting condition, and are The Orin Group's unbiased professional analysis, opinion, and conclusions.
3. The Orin Group's compensation is not contingent on an action or event resulting from the analysis, opinions and conclusions developed in this report.
4. We, and other representatives, have made a personal inspection of the property that is the subject of this report.
5. Other consultants provided significant professional assistance to the consultant signing this report.
6. This report is forwarded as an accurate representation of the site condition at the reported point in time to the best of our knowledge.

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

The Orin Group, LLC (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EDR Historical Cleaners..... EDR Proprietary Historic Dry Cleaners

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2010 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 05/11/2010 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 05/05/2010 has revealed that there are 5 LUST sites within approximately 0.5 miles of the target property.

| <u>Equal/Higher Elevation</u> | <u>Address</u> | <u>Direction / Distance</u> | <u>Map ID</u> | <u>Page</u> |

| TOSCO/76 STATION #5263 Status: Completed - Case Closed | 9494 CENTRAL AVE | SSE 1/4 - 1/2 (0.352 mi.) | 13 | 21 |

State and tribal voluntary cleanup sites

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 05/11/2010 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

| <u>Equal/Higher Elevation</u> | <u>Address</u> | <u>Direction / Distance</u> | <u>Map ID</u> | <u>Page</u> |

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Small Quantity Generator

Hazardous Waste Summary:

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D011
Waste name: SILVER

Violation Status: No violations found

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Supplemental Site Investigation Report
Completed Date: 2005-10-28 00:00:00
Comments: On October 28,2005, DTSC issued a no further action letter for the site. The 13.5 acres Site was used as a light commercial property. Characterization to identify Recognized Environmental Concerns (RECs) was conducted under a Voluntary Cleanup Agreement. A site specific health risk assessment concluded that the site does not appear to pose a significant threat to human health or the environment. The property could be rezoned and developed for mixed commercial and residential use.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Voluntary Cleanup Agreement
Completed Date: 2001-02-20 00:00:00
Comments: DTSC entered into a Voluntary Cleanup Agreement (Agreement) with Teachers Insurance and Annuity Association (Proponent). The purpose of this Agreement is for DTSC to review and comment on reports of investigations conducted at the Site. All of these activities were conducted without DTSC oversight. The Proponent seeks to obtain concurrence from DTSC that "No Further Action" is required at the Site. DTSC will determine what additional work, if any, will be required to complete the investigation of the Site.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

| | Data Release Frequency: Quarterly |

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

WMUDS/SWAT: Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

| Most Recent Revision: | 1981 |

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

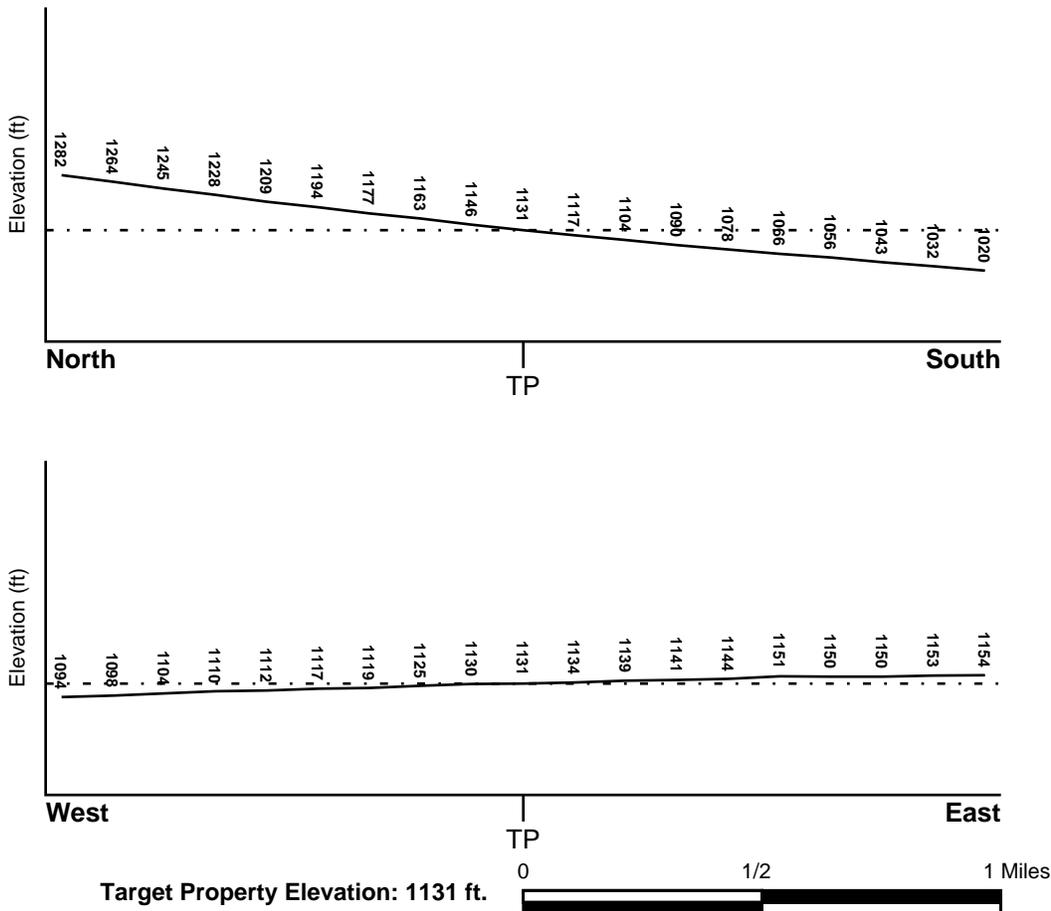

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County
SAN BERNARDINO, CA

FEMA Flood Electronic Data
YES - refer to the Overview Map and Detail Map

Additional Panels in search area: 06037C - FEMA DFIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property
ONTARIO

NWI Electronic Data Coverage
YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION FROM TP</u> | <u>GENERAL DIRECTION GROUNDWATER FLOW</u> |
|---------------|-------------------------|---|
| 11 | 1/2 - 1 Mile SSE | Varies, S&W |

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|---------------------|---|---|--|----------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Saturated hydraulic conductivity micro m/sec | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 35 inches | gravelly loamy sand | Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand. | COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand. | Max: 141 Min: 42 | Max: 7.3 Min: 6.1 |
| 2 | 35 inches | 59 inches | gravelly sand | Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand. | COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand. | Max: 141 Min: 42 | Max: 7.3 Min: 6.1 |

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AREA RADON INFORMATION

Federal EPA Radon Zone for SAN BERNARDINO County: 2

- Note: Zone 1 indoor average level > 4 pCi/L.
 : Zone 2 indoor average level \geq 2 pCi/L and \leq 4 pCi/L.
 : Zone 3 indoor average level < 2 pCi/L.

Federal Area Radon Information for SAN BERNARDINO COUNTY, CA

Number of sites tested: 18

| <u>Area</u> | <u>Average Activity</u> | <u>% <4 pCi/L</u> | <u>% 4-20 pCi/L</u> | <u>% >20 pCi/L</u> |
|-------------------------|-------------------------|----------------------|---------------------|-----------------------|
| Living Area - 1st Floor | 0.678 pCi/L | 100% | 0% | 0% |
| Living Area - 2nd Floor | Not Reported | Not Reported | Not Reported | Not Reported |
| Basement | Not Reported | Not Reported | Not Reported | Not Reported |

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

APPENDIX G

PERSONNEL QUALIFICATIONS

John O. Krusinski

The Orin Group, LLC - President/CEO/Founder 1992-Present

The Orin Group, LLC is an international consulting firm. This firm specializes in providing Environmental consulting, investigation and remediation services, ALTA/ACSM surveys, property condition assessments and zoning services worldwide.

*Developed this company from a business plan to an internationally utilized and respected Company.

- Completed thousands of successful projects nationwide
- Project included:
 - Environmental Phase One Assessments
 - ALTA/ACSM surveys, property condition assessments
 - Zoning
 - Industrial Auditing/Consulting
 - Subsurface Investigations
 - Remediation projects
 - Underground Storage Tank removal and management
 - Spill plan development
 - NEPA surveys and consulting
 - Biological assessments
 - Wetland delineation, mitigation and consulting
 - Project management
 - Site acquisition specialists
 - Construction management
 - Historical surveys and consulting
 - Archeological studies and consulting
 - Hazardous material evaluation and management
 - Asbestos Building inspector/management planner
- “Orin” has quickly become an internationally respected consulting firm
- Progressive background in Operations Management and Human Resources, Sales and Marketing
- Proven business-building and management capabilities. Skilled in designing, implementing and tracking the effectiveness of programs to enhance productivity while motivating employees

- Effective communication with a proven track record in project management, contract negotiation, problem negotiation and creative resolution
- Experienced in diversified environments including consulting, employee negotiation and management to creatively utilize employee skills and abilities
- Created and enforced a national diversity employment program
- Performed continuing research to update policies and procedures
- Promoted company image and established a system of recruitment for all employees
- Designed and implemented all in-house and in-field training
- Employee relations, employment and labor laws in multiple states
- Employees consisted of the following disciplines: Biologists, Geologists, Chemists, Engineers, Environmental Managers, Community Planners, Forestry Specialists, Historical Architects, Archeologists, Historians, Graphic Design Artists, Engineers and Surveyors
- Maintain a national employee pool to fill any project, which often included multi-site, multi-region projects
- Maintain an additional national employee pool consisting of site acquisition managers and construction managers for the telecommunication industry
- Guidance and resolution for employee grievances and complaints
- Multi-million dollar budget development, cash flow coordination, accounts receivable/payable, tax reporting and payroll preparation; proven ability to reduce expenses and streamlining accounting procedures
- Implemented the “*Good enough is never good enough*” service program to improve motivation among consultants while enhancing overall accuracy and client satisfaction levels
- Implemented sales incentive program for maximized goal achievement and increased sales
- Deliver multiple presentations to major clients, designed promotional materials and collaborated on presentation with staff

Origen, LLC - President

Origen, LLC is a biotech company specializing in the real time identification of micro-organisms utilizing liquid crystal technology. The patented technology is a revolutionary approach to detect organisms in real time. Origen is developing the technology for homeland security, military and medical applications.
