EXECUTIVE SUMMARY

DMG was authorized by City of San Juan Capistrano to conduct a Phase I Environmental Site Assessment (ESA) of the Lower Rosan Ranch Undeveloped Land located at the NEC of Stone Hill Drive and San Juan Creek in the City of San Juan Capistrano, Orange County, California 92675 ("the Site").

DMG has conducted this Phase I ESA in general accordance with the scope and limitations of American Society of Testing and Materials (ASTM) E 1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" and the United States Environmental Protection Agency (EPA) Standards and Practices for All Appropriate Inquiries (AAI) as codified in Title 40, Code of Federal Regulations, Part 312 (40 CFR Part 312). There are no exceptions to, or deletions from the ASTM E 1527-13 and EPA AAI standard practice and authorized Scope of Services.

This Executive Summary presents the key findings of this assessment based on information and data available to DMG during performance of this project. The Executive Summary also presents Conclusions and Recommendations, which are based on the conditions existing at the time of the assessment. Detailed information regarding these findings is provided in the corresponding sections of the text of the report. The report should be read in its entirety to obtain a more complete understanding of the information provided.

The Site is currently identified by the City of San Juan Capistrano as Lower Rosan Ranch Undeveloped Land consisting of five parcels approximately 15 acres gross. The Site is further described by the Orange County Office of the Assessor by Assessor's Parcel numbers (APNs): 121-253-13 (1.51 acres); 121-253-15 (0.50 acres); 121-240-39 (6.0 acres); 121-240-73 (5.49 acres); and a portion of 121-240-78 (1.54 acres).

Currently the Site is being used for vehicle storage by nearby auto dealerships. The Site surface is mostly uncovered except for sparse native brush and trees. Chain link fencing

surrounds the vehicle storage area that is situated on an uplifted area approximately in the center portion of the Site. The Site is bordered on the east by OCTA Metrolink railroad and beyond is multiple auto dealerships, on the north by a community of mobile homes, on the west by channelized San Juan Creek and on the south by Stonehill Drive. Vehicular access to the Site is from the south along Stonehill Drive.

Based upon evidence obtained by DMG from available aerial photographs, building permit records and the Users Questionnaire, the Site appeared to be unimproved vacant land as early as 1938. The 1938 through 2005 aerial photographs depicted the site area as vacant land not used for any discernible purpose. The review of aerial photographs from 2009 through 2012 appeared to show objects near the south end of the Site that resembled vehicles. Currently the Site is unimproved and the center portion used by nearby auto dealerships to store vehicles within a fenced area. Overall, historic uses of the Site are not expected to have resulted in the potential for current impacts to the Site subsurface.

Based upon evidence obtained by DMG from aerial photographs and the inspection of the surrounding properties, the adjacent properties were undeveloped land not used for any discernible purpose as early as 1938. Review of the 1967aerial photograph depicted the San Juan Creek adjacent to the Site on west channelized with concrete lining. The 1977 aerial photograph depicted the current Capistrano Valley Mobile Estates developed on the adjacent north property and the 1994 aerial photograph depicted Stonehill Drive constructed along the southern boundary of the Site. Currently the Site is bordered on the east by OCTA Metrolink railroad. Aerial photographs from 2005 through 2012 depicted multiple auto dealerships established east of the Site beyond the rail road. Based on information discussed, historic uses of the surrounding properties are not expected to have resulted in the potential for current impact to the Site subsurface.

A soil vapor survey was not conducted as a part of the Scope of Work. Based on current available research and observations made during the Site investigation, no chemicals/solvents or petroleum products were identified on the Site and past operations did not indicate the usage of such volatile constituents. No off-site sources were identified that had the potential of impact the Site. Therefore, the presence of VOCs is not expected and vapor intrusion from petro chemicals and solvents is unlikely.

A review of the Flood Insurance Rate Maps, published by the Federal Emergency Management Agency (FEMA), was performed. According to FEMA Map 06059C0506J, dated 12/3/2009, the Site is located in Zone AO. Zone AO is the flood insurance rate zone that corresponds to the areas of 1-percent shallow flooding (usually sheet flow on sloping terrain) where average depths are between 1 and 3 feet. Average flood depths derived from the detailed hydraulic analyses are shown within this zone. In addition, alluvial fan flood hazards are shown as Zone AO on the Flood Insurance Rate Map. Mandatory flood insurance purchase requirements apply, which are areas located outside of the 100 and 500 year floodplain.

According to the EDR report, the Site was not identified on any Federal regulatory database. Four RCRA-SQG sites were identified within the respected ASTM radii of the Site. The four RCRA-SQG sites were identified as: Weseloh & Sons Chevrolet (with a street address of 33633 Camino Capistrano); Weseloh Honda (with a street address of 33555 Camino Capistrano); Dick Simon Marine (with a street address of 25802 Victoria Blvd); and Capistrano Nissan (with a street address of 33375 Camino Capistrano). The RCRA-SQG database merely includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. All four sites are listed in the EDR report with a status of "no violations found". According to the EDR report, the Site address was not identified on any state regulatory database. Records indicated that a NPDES (stormwater) permit was issued to the Site on 5/23/2006 and appeared to be related to some type of construction by San Juan Capistrano Redevelopment. No additional information was provided.

One ENVIROSTOR, five LUST, three UST, one SWEEPS, one CA FID UST, one Historical UST, three Historic CORTESE, seven AST, one SLIC, sites were identified within the respected ASTM radii of the Site.

The ENVIROSTOR site is identified in the EDR report as Price Club #429 (with a street address of 33961 Doheny Park Road). The facility is approximately 0.322 mi SSE and cross-gradient of the Site with respect to groundwater flow direction. Three of the LUST sites are listed in the EDR report with a status of "case closed". The remaining LUST site is identified as Mobil Service (with a street address of 33571 Del Obisbo Street). The facility is located approximately 0.372 mi west of the Site and down-gradient with respect to groundwater flow direction.

The potential for environmental impact to the Site from any of the off-site facilities listed in the EDR reports appear to be low due distance from the Site, status of the case, remedial efforts being directed by a regulatory agency, and/or potential responsible parties have been identified.

Recognized Environmental Conditions and Other Findings

The following Recognized Environmental Condition was identified during the course of this assessment:

None

<u>Data Gaps</u>

The following data gaps were identified during this assessment:

None

Other Compliance-Related Observations:

• During the Site visit, no evidence of compliance-related concerns was observed.

DMG has performed a Phase I ESA for the Lower Rosan Ranch Unimproved Land located at the NEC of Stonehill Drive and the San Juan Creek in the City of San Juan Capistrano, Orange County, California 92675 (the Site) in conformance with the scope and limitations of ASTM E 1527-13 Standard Practices. Any exceptions to or deletions from this practice are described in Section 4.1 of this report. Specifically, the following RECs and *de-minimis* environmental concern, and associated recommendation designed to address them have been identified:

None

Recommendations

Based on the findings of this Phase I Environmental Site Assessment, DMG recommends the following:

• No further assessment is warranted at this time.

1.0 **PROJECT DESCRIPTION**

1.1 Site Description

Site Address	The Site is currently identified by the City of San Juan Capistrano as Lower Rosan Ranch Undeveloped Land. The Site is further described by the Orange County Office of the Assessor by Assessor's Parcel Numbers (APN) 121-253-13, and 15; 121-240-39, 73 and 76.
Topographic Location (Lat./Long.)	33.4756010 - 33° 28' 32.16'' (Latitude – North) 117.6779550 - 117° 40' 40.63'' (Longitude – West)
Tenant Description	Currently the Site is unimproved vacant land. However, the site is currently being used as a vehicle storage yard for adjacent auto dealerships.
Site Acreage, Building(s) Description	The site contains a gross total of approximately 15 acres of undeveloped land that includes five parcels identified with assessor's parcel numbers (APNs): 121-253-13 (1.51 acres); 121-253-15 (0.50 acres); 121-240-39 (6.0 acres); 121-240-73 (5.49 acres); and a portion of 121-240-78 (1.54 acres).
Site Exterior	The Site surface is mostly uncovered except for sparse native brush and trees. Chain link fencing surrounds the vehicle storage area located approximately in the center portion of the Site. The Site is bordered on the east by OCTA Metrolink railroad and beyond is auto dealerships; on the north by a community of mobile homes, on the west by San Juan Creek and on the south by Stonehill Drive. Vehicular access to the Site is from the south along Stonehill Drive.

A copy of a portion of the topographic map of the area with the Site location marked is included as Figure 1.

1.2 Purpose

The purpose of this Phase I ESA was to identify the potential for *recognized environmental conditions* (REC's) to exist at the Site. The term recognized environmental conditions means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include *de minimis* conditions that generally do not represent a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

Controlled Recognized Environmental Conditions (CREC's) are defined as hazardous substance releases that have been partially addressed through remediation, but where some contamination remains in place under certain risk-based restrictions or conditions (e.g., engineering or institutional controls).

Historical Recognized Environmental Conditions (HREC's) are limited to include only past releases that have been addressed to unrestricted residential use.

DMG understands this Phase I ESA is also being completed for purposes of qualifying for Landowner Liability Protections (LLPs) under CERCLA / to CERCLA unless otherwise so stated in this report.

Environmental issues or concerns at a property that are outside the scope of ASTM E 1527-13 that parties may wish to assess in connection with commercial real estate transactions include, but are not limited to the following: asbestos-containing materials, radon, lead-based paint, lead in soil, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, worker and public health and safety issues, ecological resources, endangered species, indoor and outdoor air quality, and high voltage power lines electric and magnetic fields (EMF). These items, unless requested by the client or as deemed relevant to a Site on a case-specific basis, are not included in Phase I ESA.

1.3 Reliance

The Services performed hereunder (including the reports prepared by DMG) are for the use and benefit of the City of San Juan Capistrano, their affiliates, agents and advisors, initial and subsequent holders from time to time of any debt and/or debt securities secured, directly or indirectly, by any participation interest in any such debt, any indenture trustee, servicer or other agent acting on behalf of such holders of such debt and/or debt securities; any rating agencies; and the institutional provider(s) from time to time of any liquidity facility or credit support for such financings, and their respective successors and assigns.

1.4 Scope of Services

DMG's Scope of Services for this Phase I ESA conforms with the American Society for Testing and Materials (ASTM) due diligence standards detailed in the ASTM E 1527-13 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" and the United States Environmental Protection Agency (EPA) Standards and Practices for All Appropriate Inquiries as codified in Title 40, Code of Federal Regulations, Part 312 (40 CFR Part 312). Services provided for this project included:

- A review of readily available topographic, geologic, and hydrogeologic information pertaining to the Site and surrounding area;
- A review of readily available information regarding historical land use activities at the Site, and interviews with people that have knowledge regarding the past or present uses of the Site, and with present and past owners, operators, and occupants of the Site, where feasible;
- A reconnaissance of the Site to visually and physically observe the Site for evidence of potential recognized environmental conditions;
- A limited review of federal, State, and local regulatory information records for reported potential environmental hazards on or in the vicinity of the Site; and
- Review of previous environmental reports, if available.

Sampling or analytical testing was not conducted as part of this Phase I ESA. This Phase I ESA does not constitute a regulatory compliance audit of the Site; however, any obvious issues of noncompliance are noted in the report. Copies of resumes of DMG staff involved in the preparation of this report are included as Appendix A.

1.5 User's Responsibilities & Obligations

It is the responsibility of the User to review title and judicial records for environmental liens and activity and use limitations (AULs) pertaining to the property. The City of San Juan Capistrano was provided a User Questionnaire to complete, about the existence of environmental liens

encumbering the Site property and specialized knowledge and experience or actual knowledge that was material to REC, CREC or HREC's in connection to the Site and adjoining properties. The questionnaire was not provided back to DMG for review.

1.6 Data Gap and Data Failure

According to ASTM E 1527-13, data gaps occur when the Environmental Professional is unable to obtain information required, despite good faith efforts to gather such information. Data failure is one type of data gap. According to ASTM E 1527-13 "data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met". Pursuant to ASTM Standards, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier.

The following data gaps were identified during this assessment:

None

2.0 HYDROGEOLOGIC SETTING

Readily available hydrogeologic information was reviewed to evaluate surface and subsurface characteristics in the vicinity of the Site. This section summarizes the results of the hydrogeologic evaluation. Information reviewed for this project is listed in the Reference Section.

2.1 Geologic Setting

Topographic Site Elevation

Published geologic information indicates the following:

Surficial Materials According to geologic map of the Dana Point (San Juan Capistrano) Quadrangle information system (GIS) technology, The bedrock in the quadrangle consists of Tertiary marine and non-marine sedimentary strata ranging in age from late Eocene through Pliocene. These units are chiefly composed of sandstone, siltstone, and breccias.

~24 feet above mean sea level (MSL)

First Bedrock Beneath the Site, Physiographic Province / Geologic Age The City of San Juan Capistrano is part of the California Coastal Plain along the southwesterly edge of the Los Angeles basin adjacent to the Pacific Ocean. Physiographically, the Coastal Plain is dominated by a deep structural depression containing a thick accumulation of fresh water-bearing interbedded marine and continental sand, silt and clay deposits. The Orange County Coastal Plain is bounded by consolidated rocks exposed on the north in the Puente and Chino Hills, on east in the Santa Ana Mountains, and on the south in the San Joaquin Hills, and by the Pacific Ocean on the southwest and by a low topographic divide approximated by the Orange County – Los Angeles County line on the northwest.

Estimated depth to Bedrock beneath Site The bedrock is largely west striking, moderate to steeply northeast dipping with localized moderate southwest dip. At present, the bedrock formations are greater than 45 feet below the ground surface.

2.2 Area Hydrogeology

Published hydrogeologic maps indicate the following:

Depth to groundwater beneath Site	Depth to groundwater was measured at ranges from 6 to more than 40 feet below surface grade (bsg) (<i>California Geologic</i> <i>Survey, 2002</i>). Due to the coastal location of the Site, groundwater levels at the site can be expected to vary in response to tidal fluctuations.
Regional groundwater flow direction	Groundwater flow direction in the area of the Site is generally west-southwestward towards the Pacific Ocean.
Sole source aquifer (if present)	N/A

(Groundwater flow direction is estimated based on a review of published maps. Site specific groundwater flow conditions may be impacted by a variety of factors including, but not limited to, local topography, geologic anomalies, utilities, nearby wells or sumps, and local drainage patterns. Site specific groundwater information would require a groundwater investigation, which is beyond the scope of this Phase I ESA).

2.3 Records of Water Wells

According to the EDR Report, there is six state groundwater wells located within a one-mile radius of the Site. Depth to groundwater was not reported. Groundwater flow direction was estimated to be west-southwest towards the Pacific Ocean.

2.4 Hydrologic & Topographic Conditions

Based upon a review of the United States Geological Survey 7.5 Minute Topographic Map for Dana Point (San Juan Capistrano) (USGS, 1975), the Site is at an elevation of approximately 24 feet above MSL with surface topography sloping towards the West.

2.5 Flood Zone Information

A review of the Flood Insurance Rate Maps, published by the Federal Emergency Management Agency (FEMA), was performed. According to FEMA Map 06059C0506J, dated 12/3/2009, the Site is located in Zone AO. Zone AO is the flood insurance rate zone that corresponds to the areas of 1-percent shallow flooding (usually sheet flow on sloping terrain) where average depths are between 1 and 3 feet. Average flood depths derived from the detailed hydraulic analyses are shown within this zone. In addition, alluvial fan flood hazards are shown as Zone AO on the Flood Insurance Rate Map. Mandatory flood insurance purchase requirements apply, which are areas located outside of the 100 and 500 year floodplain.

3.0 HISTORICAL LAND USE REVIEW

Readily available historical information was reviewed to evaluate the previous uses of the Site, and previous uses of properties in the vicinity of the Site. This section summarizes the results of the historical evaluation. Information reviewed for this project is listed in the Reference Section.

3.1 Site Use Summary

Based upon evidence obtained by DMG from available aerial photographs, building permit records and the Users Questionnaire, the Site appeared to be unimproved vacant land as early as 1938. The 1938 through 2005 aerial photographs depicted the site area as vacant land not used for any discernible purpose. The review of aerial photographs from 2009 through 2012 appeared to show objects near the south end of the Site that resembled vehicles. Currently the Site is unimproved and the center portion used by nearby auto dealerships to store vehicle within a fenced area. Overall, historic uses of the Site are not expected to have resulted in the potential for current impacts to the Site subsurface.

Based upon evidence obtained by DMG from aerial photographs and the inspection of the surrounding properties, the adjacent properties were undeveloped land not used for any discernible purpose as early as 1938. Review of the 1967aerial photograph depicted the San Juan Creek adjacent to the Site on west channelized with concrete lining. The 1977 aerial photograph depicted the current Capistrano Valley Mobile Estates developed on the adjacent north property and the 1994 aerial photograph depicted Stonehill Drive constructed along the southern boundary of the Site. Currently the Site is bordered on the east by OCTA Metrolink railroad. Aerial photographs from 2005 through 2012 depicted multiple auto dealerships established east of the Site beyond the rail road. Based on information discussed, historic uses of the surrounding properties are not expected to have resulted in the potential for current impact to the Site subsurface.

3.2 Sanborn Fire Insurance Maps

Fire insurance maps were created for insurance underwriters and often contain information regarding the uses of individual structures, and the locations of fuel and/or chemical storage tanks which may have been on a particular property. Review of the EDR fire insurance map collection indicated that no Sanborn Maps have been prepared for the Site area.

3.3 Aerial Photographs

Aerial photographs for the Site area were available for review at EDR. Photographs for the years, 1938, 1946, 1949, 1952, 1967, 1977, 1989, 1990, 1994, 2005, 2009, 2010 and 2012 were reviewed for this Phase I ESA (Copies of selected photographs are included in Appendix C).

West	No change	

No previous uses indicative of environmentally suspect practices or activities were identified at the surrounding properties. The current general area surrounding the site is developed for residential, municipal drainage and auto dealerships. (Refer to Section 3.1).

3.4 City Directories

City Directories provide listings, arranged by street address, of facilities for the year the directory was published. DMG requested a City Directory Abstract Report from EDR for review of listings for the Site and properties in the vicinity of the Site. No specific City Directory listings were available for the Site.

3.5.4 Other State and Local Environmental Records Sources

California Environmental Protection Agency, Department of Toxic Substances Control (DTSC)

According to the DTSC's EnviroStor website, <u>http://www.envirostor.dtsc.ca.gov/public</u>, the DTSC has no records for the Site address or adjacent site addresses.

Regional Water Quality Control Board (RWQCB)

According to the RWQCB's GeoTracker website, <u>http://www.geotracker.swrcb.ca.gov</u>, the RWQCB has no records for the Site address.

South Coast Air Quality Management District (SCAQMD)

According to the SCAQMD website, <u>http://www.aqmd.gov</u>, the SCAQMD has no records for the Site address or parcel numbers.

Department of Oil, Gas, and Geothermal Resources (DOGGR)

DOGGR maps concerning the subject property and nearby properties were reviewed online at <u>http://maps.conservation.ca.gov/doms/doms-app.html</u>. DOGGR Online Mapping System (DOMS) maps contain information regarding oil and gas development. According to the DOMS, there are no oil or gas wells on the Site. Four oil or gas wells are located within a one-mile radius of the Site.

3.6 Interviews

No interviews were available during this investigation.

3.7 Previous Reports and Proceedings

No prior investigation reports were provided to DMG.

3.8 Chain of Title Search

A Preliminary Report, dated August 1, 2016, was prepared by First American Title Company, which indicated the title to be vested in SAN JUAN CAPISTRANO COMMUNITY REDEVELOPMENT AGENCY, A CALIFORNIA MUNICIPAL AGENCY, AS TO PARCELS 1 AND 2; AND SAN JUAN CAPISTRANO COMMUNITY REDEVELOPMENT AGENCY, A PUBLIC BODY CORPORATE AND POLITIC, AS TO PARCELS 3, 4 AND 5. (A copy of the title report is included in Appendix F).

4.0 SITE RECONNAISSANCE

Mr. Paul Dubone of DMG conducted a reconnaissance of the Site on October 6, 2016 to identify potential recognized environmental conditions in connection with the Site. A diagram of the Site is attached as Figure 2. Selected photographs taken during the Site reconnaissance are included as Appendix E.

The Site is currently unimproved land consisting of a gross total approximately 15 acres. A chain-linked fenced center portion of the land is currently being used for vehicle storage by nearby auto dealerships. No visual evidence was observed during the site investigation that current or past use of the Site had the potential for environmental impact to the subsurface.

4.1 Site Access and Limitations

DMG accessed the Site and visually and physically observed 100% of the land and periphery of the Site. DMG also observed all exterior areas and property boundaries. Weather conditions at the time of the reconnaissance were sunny with temperatures in the 95-100 degrees Fahrenheit range.

4.2 Current Operations/Tenants

Currently the Site is unoccupied and not used for any purpose except vehicle storage.

4.3 On Site Characteristics

During the Site visit, no apparent sludge ponds, monitoring wells, underground storage tanks, or hazardous conditions were noted. Overall, the uses of the Site have a low potential for current impact to the Site subsurface.

4.4 Utilities / Building Systems

The following utilities are provided to the Site:

UTILITY SERVICE	PROVIDER	UTILITY SERVICE	PROVIDER
Potable water	N/A	Sewer	N/A
Natural gas	N/A	Electricity	N/A

No evidence of potable drinking water wells, septic, sumps, or lift stations were observed on the Site. According to the City of San Juan Capistrano's 2016 Annual Water Quality Report, the drinking water supply at the Site is in compliance with the EPA's drinking water quality standards. DMG noted no strong, pungent, or noxious odors during the Site visit. No evidence of fueling facilities was observed on the Site.

4.5 Chemical Use and Storage

No chemical storage and/or hazardous materials identified by visual observation were observed during the Site investigation. No indications of spills, leaks, overflows, or potential routes of entry to the subsurface were observed that would impact the subsurface.

No reportable quantities of hazardous substances or materials were identified pursuant to 40 CFR 116 and 40 CFR 300 are currently located on the Site. No obvious indications of distressed vegetation, hazardous waste generation, storage or disposal were noted on the Site.

4.6 Waste Generation / Storage / Disposal

No waste generation, storage, and disposal practices were identified by visual observations by DMG at the Site. No indications of spills, leaks, overflows, or potential routes of entry to the subsurface were observed that would impact the subsurface.

4.7 Potential Polychlorinated Biphenyls-Containing Equipment

No PCB-containing equipment was identified by visual observation during the Site investigation.

4.8 Storage Tanks / Drums

No aboveground storage tanks or evidence of underground storage tanks, such as fill pipes/ports or vent pipes, were observed on the Site.

4.9 Asbestos-Containing Materials

The Site is unimproved land. An asbestos-containing materials (ACM) survey was not requested as part of the Scope of Work. Asbestos is not considered to be an environmental concern for the Site.

4.10 Lead-Based Paint

The Site is unimproved land. A lead-based paint (LBP) and lead in soil survey was not requested as part of the Scope of Work. Lead-based paint is not considered to be an environmental concern for the Site.

4.11 Radon

According to the EDR report, the Site is located in Zone 3 of the EPA's radon designation categories. Zone 3 indicates that the expected radon concentration of the Site is less than 2.0 picoCuries per Liter (pCi/L) of air. The EPA action level for radon is 4.0 pCi/L.

4.12 Mold

The Site is unimproved land. No microbial growth was observed during the Site investigation.

4.13 Soil Vapor

A soil vapor survey was not conducted as a part of the Scope of Work. According to the EDR VEC report which provides integrated data and efficient analytical tools to help comply with the requirements of ASTM E2600-10, and based on current available research and observations made during the Site investigation, no chemicals/solvents or petroleum products were identified on the Site and past operations did not indicate the usage of such volatile constituents. No off-site sources were identified that had the potential of impact the Site. Therefore, the presence of VOCs is not expected and vapor intrusion from petro chemicals and solvents is unlikely (Refer to Appendix F).

4.14 Dry Cleaners and/or Laundry Facilities

No dry cleaners or laundry facilities are currently located on the Site.

4.15 Potential Additional Unidentified Site Concerns

No potential additional unidentified Site concerns were identified as a result of this Phase I ESA.

4.16 Surrounding Property Observations

General observations of properties adjoining the Site were conducted in conjunction with on-Site observations made October 6, 2016 during DMG's Site reconnaissance and are summarized below.

	SURROUNDING PROPERTY OBSERVATIONS							
Direction	Use	Observed Chemical Use/Storage?						
North	The Site is bordered on the north by a community of mobile homes identified as Capistrano Mobile Estates.	No observable environmental concerns						
South	The Site is bordered on the south by Stonehill Drive.	No observable environmental concerns						
East	The Site is bordered on the east by OCTA Metrolink railroad and beyond is auto dealerships.	No observable environmental concerns						
West	The Site is bordered on the west by the San Juan Creek channelized with concrete lining.	No observable environmental concerns						

Based on information discussed, the current surrounding properties are not expected to have resulted in the potential for current impact to the Site subsurface.

5.0 REGULATORY REVIEW

DMG reviewed regulatory agency database information compiled by the EDR report to help identify recognized environmental conditions in connection with the Site. Unless stated otherwise in this section, the scope of DMG's review is limited to review of the information provided by the EDR report, and does not include review of regulatory agency files pertaining to specific sites that may have been identified. The regulatory review incorporates the Approximate Minimum Search Distances (AMSDs) as set forth by ASTM plus any additional Client-specific required search distances that may exceed the AMSDs or as deemed applicable by DMG.

The EDR report includes an Orphan list of facilities that could not be precisely located due to inadequate address information. DMG reviewed this list and determined where some of these facilities are located relative to the Site. *None of the Orphan listings are located on the Site.* The information was incorporated into the discussion of the appropriate database. Additionally, DMG's field survey verifies the locations of EDR-identified facilities in relation to the Site, and, if necessary, adjusts their distances and directions with respect to their actual locations.

The results of the review for each database are discussed below. Databases with listings identified on or in the area of the Site are discussed separately, outside of the table. The locations for the facilities discussed in this section are shown on the figures in the EDR report, included as Appendix G. A detailed description of each regulatory database searched is included in the EDR Report.

According to the EDR report, the Site was not identified on any Federal regulatory database.

Four RCRA-SQG sites were identified within the respected ASTM radii of the Site. The four RCRA-SQG sites were identified as: Weseloh & Sons Chevrolet (with a street address of 33633 Camino Capistrano); Weseloh Honda (with a street address of 33555 Camino Capistrano); Dick Simon Marine (with a street address of 25802 Victoria Blvd); and Capistrano Nissan (with a street address of 33375 Camino Capistrano). The RCRA-SQG database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. All four sites are listed in the EDR report with a status of "no violations found".

The potential for environmental impact to the Site from the off-site location appear to be low due distance from the Site, status of the case, remedial efforts being directed by a regulatory agency, and/or potential responsible parties have been identified.

According to the EDR report, the Site address was not identified on any state regulatory database. Reports reviewed indicated a NPDES (stormwater) permit was issued to the Site on 5/23/2006 and appeared to be related to some type of construction by San Juan Capistrano Redevelopment. No additional information was provided.

One ENVIROSTOR, five LUST, three UST, one SWEEPS, one CA FID UST, one Historical UST, three Historic CORTESE, seven AST, one SLIC, sites were identified within the respected ASTM radii of the Site.

The ENVIROSTOR site is identified in the EDR report as Price Club #429 (with a street address of 33961 Doheny Park Road). The facility is approximately 0.322 mi SSE and cross-gradient of the Site with respect to groundwater flow direction. Three of the LUST sites are listed in the EDR report with a status of "case closed". The remaining LUST site is identified as Mobil Service (with a street address of 33571 Del Obisbo Street). The facility is located approximately 0.372 mi west of the Site and down-gradient with respect to groundwater flow direction.

The potential for environmental impact to the Site from any of the off-site locations appear to be low due distance from the Site, status of the case, remedial efforts being directed by a regulatory agency, and/or potential responsible parties have been identified.

6.0 FINDINGS/OPINIONS/CONCLUSIONS

The Site is currently identified by the City of San Juan Capistrano as Lower Rosan Ranch Undeveloped Land consisting of five parcels approximately 15 acres gross. The Site is further described by the Orange County Office of the Assessor by Assessor's Parcel numbers (APNs): 121-253-13 (1.51 acres); 121-253-15 (0.50 acres); 121-240-39 (6.0 acres); 121-240-73 (5.49 acres); and a portion of 121-240-78 (1.54 acres).

Currently the Site is being used for vehicle storage by nearby auto dealerships. The Site surface is mostly uncovered except for sparse native brush and trees. Chain link fencing surrounds the vehicle storage area that is situated on an uplifted area approximately in the center portion of the Site. The Site is bordered on the east by OCTA Metrolink railroad and beyond is multiple auto dealerships, on the north by a community of mobile homes, on the west by channelized San Juan Creek and on the south by Stonehill Drive. Vehicular access to the Site is from the south along Stonehill Drive.

Based upon evidence obtained by DMG from available aerial photographs, building permit records and the Users Questionnaire, the Site appeared to be unimproved vacant land as early as 1938. The 1938 through 2005 aerial photographs depicted the site area as vacant land not used for any discernible purpose. The review of aerial photographs from 2009 through 2012 appeared to show objects near the south end of the Site that resembled vehicles. Currently the Site is unimproved and the center portion used by nearby auto dealerships to store vehicles within a fenced area. Overall, historic uses of the Site are not expected to have resulted in the potential for current impacts to the Site subsurface.

Based upon evidence obtained by DMG from aerial photographs and the inspection of the surrounding properties, the adjacent properties were undeveloped land not used for any discernible purpose as early as 1938. Review of the 1967aerial photograph depicted the San Juan Creek adjacent to the Site on west channelized with concrete lining. The 1977 aerial photograph depicted the current Capistrano Valley Mobile Estates developed on the adjacent north property and the 1994 aerial photograph depicted Stonehill Drive constructed along the southern boundary of the Site. Currently the Site is bordered on the east by OCTA Metrolink railroad. Aerial photographs from 2005 through 2012 depicted multiple auto dealerships established east of the Site beyond the rail road. Based on information discussed, historic uses of the surrounding properties are not expected to have resulted in the potential for current impact to the Site subsurface.

A soil vapor survey was not conducted as a part of the Scope of Work. Based on current available research and observations made during the Site investigation, no chemicals/solvents or petroleum products were identified on the Site and past operations did not indicate the usage of such volatile constituents. No off-site sources were identified that had the potential of impact the Site. Therefore, the presence of VOCs is not expected and vapor intrusion from petro chemicals and solvents is unlikely.

A review of the Flood Insurance Rate Maps, published by the Federal Emergency Management Agency (FEMA), was performed. According to FEMA Map 06059C0506J, dated 12/3/2009, the Site is located in Zone AO. Zone AO is the flood insurance rate zone that corresponds to the areas of 1-percent shallow flooding (usually sheet flow on sloping terrain) where average depths are between 1 and 3 feet. Average flood depths derived from the detailed hydraulic analyses are shown within this zone. In addition, alluvial fan flood hazards are shown as Zone AO on the Flood Insurance Rate Map. Mandatory flood insurance purchase requirements apply, which are areas located outside of the 100 and 500 year floodplain.

According to the EDR report, the Site was not identified on any Federal regulatory database. Four RCRA-SQG sites were identified within the respected ASTM radii of the Site. The four RCRA-SQG sites were identified as: Weseloh & Sons Chevrolet (with a street address of 33633 Camino Capistrano); Weseloh Honda (with a street address of 33555 Camino Capistrano); Dick Simon Marine (with a street address of 25802 Victoria Blvd); and Capistrano Nissan (with a street address of 33375 Camino Capistrano). The RCRA-SQG database merely includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. All four sites are listed in the EDR report with a status of "no violations found".

According to the EDR report, the Site address was not identified on any state regulatory database. Records indicated that a NPDES (stormwater) permit was issued to the Site on 5/23/2006 and appeared to be related to some type of construction by San Juan Capistrano Redevelopment. No additional information was provided.

One ENVIROSTOR, five LUST, three UST, one SWEEPS, one CA FID UST, one Historical UST, three Historic CORTESE, seven AST, one SLIC, sites were identified within the respected ASTM radii of the Site.

The ENVIROSTOR site is identified in the EDR report as Price Club #429 (with a street address of 33961 Doheny Park Road). The facility is approximately 0.322 mi SSE and cross-gradient of the Site with respect to groundwater flow direction. Three of the LUST sites are listed in the EDR report with a status of "case closed". The remaining LUST site is identified as Mobil Service (with a street address of 33571 Del Obisbo Street). The facility is located approximately 0.372 mi west of the Site and down-gradient with respect to groundwater flow direction.

The potential for environmental impact to the Site from any of the off-site facilities listed in the EDR reports appear to be low due distance from the Site, status of the case, remedial efforts being directed by a regulatory agency, and/or potential responsible parties have been identified.

Recognized Environmental Conditions and Other Findings

The following Recognized Environmental Condition was identified during the course of this assessment:

• None

<u>Data Gaps</u>

The following data gaps were identified during this assessment:

None

Other Compliance-Related Observations:

• During the Site visit, no evidence of compliance-related concerns was observed.

DMG has performed a Phase I ESA for the Lower Rosan Ranch Unimproved Land located at the NEC of Stonehill Drive and the San Juan Creek in the City of San Juan Capistrano, Orange County, California 92675 (the Site) in conformance with the scope and limitations of ASTM E 1527-13 Standard Practices. Any exceptions to or deletions from this practice are described in Section 4.1 of this report. Specifically, the following RECs and *de-minimis* environmental concern, and associated recommendation designed to address them have been identified:

None

Recommendations

Based on the findings of this Phase I Environmental Site Assessment, DMG recommends the following:

• No further assessment is warranted at this time.

7.0 STANDARD OF CARE

The services performed by DMG, Inc. on this project have been conducted with that level of care and skill ordinarily exercised by reputable members of the profession, practicing in the same locality, under similar budget and time constraints. We declare that to the best of our knowledge one or more of the parties involved in the preparation of this report meet the definition of environmental professional as to be defined in §312.10 of Title 40, Code of Federal Regulations Part 312 (40 CFR 312) and ASTM 12.13.2. One or more of the parties involved in the preparation of this report have the specific qualifications base on education, training, and experience to assess a property of the nature, history, and setting of the Site. We have developed and performed the all appropriate inquiries in conformance with the standards and practices as set forth in 40 C.F.R. Part 312. No other warranty is expressed or intended.

This report is exclusively for the use and benefit of those listed on the title page of this report and may not be relied upon by any other person or entity without written permission from DMG.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

Commitment

Thank You for your confidence and support. We at First American Title Insurance Company maintain the fundamental principle:

Customer First!

First American Title Insurance Company

INFORMATION

The Title Insurance Commitment is a legal contract between you and the company. It is issued to show the basis on which we will issue a Title Insurance Policy to you. The Policy will insure you against certain risks to the land title, subject to the limitations shown in the policy.

The Company will give you a sample of the Policy form, if you ask.

The Commitment is based on the land title as of the Commitment Date. Any changes in the land title or the transaction may affect the Commitment and the Policy.

The Commitment is subject to its Requirements, Exceptions and Conditions.

This information is not part of the title insurance commitment.

CONDITIONS

1. **DEFINITIONS**

(a)"Mortgage" means mortgage, deed of trust or other security instrument.

(b)"Public Records" means title records that give constructive notice of matters affecting the title according to the state law where the land is located.

2. LATER DEFECTS

The Exceptions in Schedule B - Section Two may be amended to show any defects, liens or encumbrances that appear for the first time in the public records or are created or attached between the Commitment Date and the date on which all of the Requirements (a) and (c) of Schedule B - Section One are met. We shall have no liability to you because of this amendment.

3. EXISTING DEFECTS

If any defects, liens or encumbrances existing at Commitment Date are not shown in Schedule B, we may amend Schedule B to show them. If we do amend Schedule B to show these defects, liens or encumbrances, we shall be liable to you according to Paragraph 4 below unless you knew of this information and did not tell us about it in writing.

4. LIMITATION OF OUR LIABILITY

Our only obligation is to issue to you the Policy referred to in this Commitment, when you have met its Requirements. If we have any liability to you for any loss you incur because of an error in this Commitment, our liability will be limited to your actual loss caused by your relying on this Commitment when you acted in good faith to:

comply with the Requirements shown in Schedule B - Section One or

eliminate with our written consent any Exceptions shown in Schedule B - Section Two.

We shall not be liable for more than the Policy Amount shown in Schedule A of this Commitment and our liability is subject to the terms of the Policy form to be issued to you.

5. CLAIMS MUST BE BASED ON THIS COMMITMENT

Any claim, whether or not based on negligence, which you may have against us concerning the title to the land must be based on this commitment and is subject to its terms.

We Are Committed to Safeguarding Customer Information

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our subsidiaries we have adopted this Privacy Policy to govern the use and handling of your personal information.

Applicability

This Privacy Policy governs our use of the information that you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values.

Types of Information

- Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:
 - Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
 - Information about your transactions with us, our affiliated companies, or others; and Information we receive from a consumer reporting agency.

Use of Information

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

Former Customers

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

Confidentiality and Security

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's Fair Information Values. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)

1. CALIFORNIA LAND TITLE ASSOCIATION STANDARD COVERAGE POLICY - 1990 SCHEDULE B

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

- 1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records. Proceedings by a public agency which may result in taxes or assessments, or notice of such proceedings, whether or not shown by the records of such agency or by the public records.
- 2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
- 3. Easements, liens or encumbrances, or claims thereof, which are not shown by the public records.
- 4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
- 5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the public records.

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

(a) Any law, ordinance or governmental regulation (including but not limited to building and zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating to (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
 (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or a notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.

- 2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
- 3. Defects, liens, encumbrances, adverse claims or other matters:

(a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
(b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;

- (c) resulting in no loss or damage to the insured claimant;
- (d) attaching or created subsequent to Date of Policy; or
- (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
- 4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with applicable "doing business" laws of the state in which the land is situated.
- 5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
- 6. Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by their policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

2. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY FORM B - 1970 SCHEDULE OF EXCLUSIONS FROM COVERAGE

- 1. Any law, ordinance or governmental regulation (including but not limited to building and zoning ordinances) restricting or regulating or prohibiting the occupancy, use or enjoyment of the land, or regulating the character, dimensions or location of any improvement now or hereafter erected on the land, or prohibiting a separation in ownership or a reduction in the dimensions of area of the land, or the effect of any violation of any such law, ordinance or governmental regulation.
- 2. Rights of eminent domain or governmental rights of police power unless notice of the exercise of such rights appears in the public records at Date of Policy.
- 3. Defects, liens, encumbrances, adverse claims, or other matters (a) created, suffered, assumed or agreed to by the insured claimant; (b) not known to the Company and not shown by the public records but known to the insured claimant either at Date of Policy or at the date such claimant acquired an estate or interest insured by this policy and not disclosed in writing by the insured claimant to the Company prior to the date such insured claimant became an insured hereunder; (c) resulting in no loss or damage to the insured claimant; (d) attaching or created subsequent to Date of Policy; or (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.

 (c) resulting in no loss or damage to the insured claimant;
 (d) attaching or created subsequent to Date of Policy; or

4.

(e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the estate or interest insured by this policy.

Any claim, which arises out of the transaction vesting in the insured the estate or interest insured by this policy, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that is based on:

(i) the transaction creating the estate or interest insured by this policy being deemed a fraudulent conveyance or fraudulent transfer; or (ii) the transaction creating the estate or interest insured by this policy being deemed a preferential transfer except where the preferential transfer results from the failure:

(a) to timely record the instrument of transfer; or

(b) of such recordation to impart notice to a purchaser for value or a judgment or lien creditor.

9. AMERICAN LAND TITLE ASSOCIATION OWNER'S POLICY - 1992 WITH REGIONAL EXCEPTIONS

When the American Land Title Association policy is used as a Standard Coverage Policy and not as an Extended Coverage Policy the exclusions set forth in paragraph 8 above are used and the following exceptions to coverage appear in the policy.

SCHEDULE B

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of: Part One:

- 1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
- 2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of said land or by making inquiry of persons in possession thereof.
- 3. Easements, claims of easement or encumbrances which are not shown by the public records.
- 4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by public records.
- 5. Unpatented mining claims; reservations or exceptions in patents or in Acts authorizing the issuance thereof; water rights, claims or title to water.
- 6. Any lien, or right to a lien, for services, labor or material theretofore or hereafter furnished, imposed by law and not shown by the public records.

ALTA RESIDENTIAL TITLE INSURANCE POLICY (6-1-87) EXCLUSIONS

In addition to the Exceptions in Schedule B, you are not insured against loss, costs, attorneys' fees, and expenses resulting from:

- 1. Governmental police power, and the existence or violation of any law or government regulation. This includes building and zoning ordinances and also laws and regulations concerning:
 - (a) and use
 - (b) improvements on the land
 - (c) and division
 - (d) environmental protection

This exclusion does not apply to violations or the enforcement of these matters which appear in the public records at Policy Date. This exclusion does not limit the zoning coverage described in Items 12 and 13 of Covered Title Risks.

- 2. The right to take the land by condemning it, unless:
 - (a) a notice of exercising the right appears in the public records on the Policy Date

(b) the taking happened prior to the Policy Date and is binding on you if you bought the land without knowing of the taking

- 3. Title Risks:
 - (a) that are created, allowed, or agreed to by you
 - (b) that are known to you, but not to us, on the Policy Date -- unless they appeared in the public records
 - (c) that result in no loss to you
 - (d) that first affect your title after the Policy Date -- this does not limit the labor and material lien coverage in Item 8 of Covered Title Risks
- 4. Failure to pay value for your title.
- 5. Lack of a right:

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in *bold italics* are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 08/01/2016 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

Environmental In	terest/Information System
	California Hazardous Waste Tracking System - Datamart (HWTS-DATAM/ provides California with information on hazardous waste shipments for
	generators, transporters, and treatment, storage, and disposal
	facilities.
	RCRAInfo is a national information system that supports the Resource
	Conservation and Recovery Act (RCRA) program through the tracking of
	events and activities related to facilities that generate, transport,
	and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA
	program staff to track the notification, permit, compliance, and
	corrective action activities required under RCRA.
	UORS (California - Used Oil Recycling System). California Integrated
	Waste Management Board (CIWMB) helps communities establish and pro
	convenient collection opportunities for used oil and used oil filters.

File Location:	All Files are on GeoTracker or in the Local Agency Database
Potential Media Affected:	Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor, Under Investigation
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History:	In January 2015, AEI conducted a Phase I ESA of the entire shopping center where the Site is located. From 1938 until at least 1960 the property was identified to consist of agricultural land. The Site was a former dry cleaning operation from at least 1966 through 2005. At the time of the Phase I, this former dry cleaner tenant suite was occupied by Lighthouse Thrift Store. The use of the Site as a dry cleaner for nearly 40 years was identified by AEI as a Recognized Environmental Condition (REC) and the potential source of vapor phased contamination based on the potential release of dry cleaning solvents, or volatile organic compounds (VOCs) at the Site.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

Date Date Date Nur

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

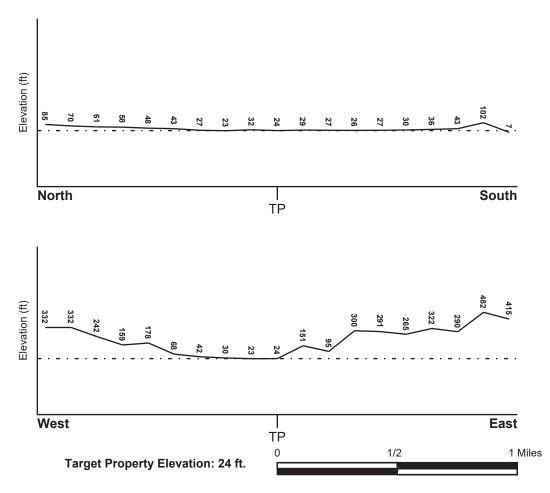

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

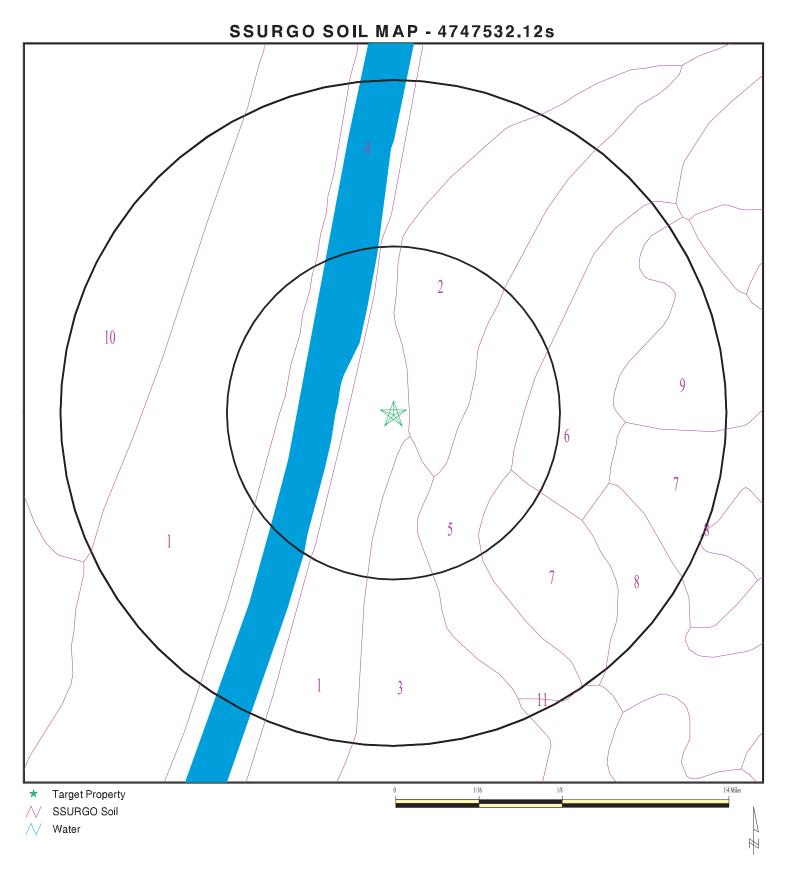

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	METZ
Soil Surface Texture:	loamy sand

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
