Re: CITADEL Project No. 0611.1049.0 Phase I Environmental Site Assessment Report Pietersma Site 7233 Eucalyptus Avenue Ontario, California 91762

Dear Mr. Chute:

Enclosed please find Citadel Environmental Services, Inc.'s Phase I Environmental Site Assessment Report for the above-referenced location.

The Phase I Environmental Site Assessment Report was conducted for LIT Industrial, LP c/o Environmental Asset Services, Inc., in accordance with Citadel's Proposal 0611.1049.P, dated February 9, 2017, and a mutually agreed upon scope of work.

If after your review, you have any questions or require additional information, please do not hesitate to telephone me at the Citadel Office in Glendale at (818) 246-2707.

Sincerely, CITADEL ENVIRONMENTAL SERVICES, INC.

Mark Drollinger, M.Eng., CSP, CHMM, EiT Principal, Engineering and Environmental Sciences

Citadel Environmental Services, Inc. (Citadel) was contracted by LIT Industrial, LP (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 7233 Eucalyptus Avenue located in Ontario, San Bernardino County, California; hereinafter referred to as the "Site."

Current Use

According to the County of San Bernardino Assessor's Parcel Maps, the Site is comprised of 11 parcels, encompassing approximately 84.1 acres of land. The parcels are legally identified by the Assessor's Parcel Numbers (APNs) 1054-011-01, -02, and -04; APNs 1054-021-01 and -02; APNs 1054-271-01, -02, and -03; and APNs 1054-281-01, -02, and -03.

The northeast and north-center portions of the Site consist of a single-family residential structure and a manufactured home structure along Eucalyptus with a dairy barn located between the two residences, one storage structure, approximately 10 hay/feed storage barns/sheds, and approximately 21 sheds associated with the corrals for the housing of the cattle. The south portion of the Site consists of a retention pond of 106,000 square feet. The remaining areas of the Site appear as irrigated cropland. Berms are located along the perimeter of the Site. At the time of the Site reconnaissance, the Site was occupied by Legend Dairy Farms.

The retention ponds collect surface wastes from across the Site, as well as provide a potential dumping area for other dairy and animal-related wastes.

Equipment throughout the Site include one potable water well; aboveground storage tanks (ASTs) for storage of diesel, grain/feed, water, and fresh milk; milking machines and pumping system; air compressors, cooling equipment; boilers; and pole-mounted transformers. In general, the Site appeared to be well maintained and the building and grounds appeared to be in fair to good condition with the exception of some staining observed in the dirt layer below two of the ASTs; and heavy staining of the concrete floor by the compressors. The staining is likely limited to the concrete floor; no cracks were observed on the surface floor.

Historical Use

A review of historical sources showed that the Site was generally undeveloped as early as 1902. The Site appeared to be used for agricultural purposes as early as 1938. A small structure, likely a residence or farm-related, appeared to be developed in the northwest portion of the Site along Eucalyptus Avenue by 1975. The northeast portion of the Site appeared developed with the existing residences, dairy barn, storage structures, and approximately eight sheds associated with corrals by 1985. Pooled water also appeared in the location of the existing retention pond in the southwest portion of the Site. The expansion of the corrals and retention pond to their current configurations appeared completed by 2010. In addition, the small structure located in the northwest portion of the Site appeared to have been removed by 2010.

Environmental Database Listings

The Site was identified on the following environmental databases: WDS, FINDS, ECHO, EMI, and San Bern. Co. Permit.

The Site was identified on the Facility Index System/Facility Registry System (FINDS) database and Enforcement and Compliance History Information (ECHO) databases. FINDS contains facility information and "pointers" to other sources that contain more detail and ECHO provides integrated compliance and enforcement information. The Site was identified on these databases due to the following references:

Swager & Sons Dairy #2

- California Enviroview California Integrated Water Quality System (CIWQS) for confined animal feeding operation
- Legend Dairy Farm #1

- National Pollutant Discharge Elimination System (NPDES) Compliance Information System (ICIS) for concentrated animal feeding operation
- California Enviroview California Environmental Reporting System (CERS) for being a Risk Management Plan (RMP) reporter
- o Emission Inventory System (see below)
- Integrated Compliance Information System formal enforcement action in 2007. According to information

The Site was identified on the Waste Discharge System (WDS) database as an agricultural facility with designated/influent or solid wastes that pose a significant threat to water quality (dairy waste ponds). The Site was also identified on the Emissions Inventory (EMI) Data between 2006 and 2015 for the following various emissions reported in tons per year:

	Total Organic Hydrocarbon Gases	Reactive Organic Gases	Carbon Monoxide Emissions	Oxides of Nitrogen	Oxides of Sulfur	Particulate Matter	Particulate Matter of 10 Micrometers and Smaller
2006	9.38	6.55	0.004	0.016	0	3.47	1.7
2007	9.38	6.55	0.004	0.016	0	3.47	1.7
2008	17.29	12.08	0	0	0	3.41	1.67
2009	18.49	12.92	0	0	0	3.69	1.81
2010	18.49	12.92	0	0	0	3.7	1.81
2011	18.49	12.92	0	0	0	3.7	1.81
2012	18.49	12.92	0	0	0	3.7	1.81
2013	18.04	12.92	0	0	0	3.7	1.81
2014	151.04	12.08	0	0	0	3.7	1.78
2015	114.94	9.19	0	0	0	3.7	1.78

These listings are not considered to represent a significant environmental concern.

Citadel reviewed information provided by Environmental Data Resources, Inc. (EDR) regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, no historical releases of petroleum products from a LUST occurred within 0.25-mile and upgradient of the Site. There are no properties within 0.125-mile and upgradient or cross-gradient of the Site that are listed on the Historical Gas Station and Dry Cleaners databases. However, the Chino Airport property is located south of the Site and was identified as occupied by Flite Craft from as early as 1986 as an aircraft and heavy equipment repair services. This property will be discussed below.

Regulatory Agencies

The GeoTracker Database is the California State Water Resources Control Board's (SWRCB) Internet-accessible database system used by the SWRCB, regional boards, and local agencies to track and archive compliance data from authorized or unauthorized discharges of waste to land, or unauthorized releases of hazardous substances from underground storage tanks. The Site was not identified in the database. According to Geotracker, the nearest Cleanup Program Site (CPS) is the Chino Airport (Airport), located at 7000 Merrill Avenue, located south of the Site. The primary chemicals of concern (COCs) in the groundwater at this CPS include trichloroethene (TCE); 1,2,3-trichloropropane (1,2,3-TCP); cis-1,2-dichloroethane; and 1,1-dichloroethene.

According to the Semiannual Groundwater Monitoring Report, dated January 31, 2018, and prepared by Tetra Tech, portions of the Airport have functioned as an airfield since the early 1940s. Since 1960, the County of San Bernardino has operated the Airport as a public airport for commercial, industrial, and general aviation use. Past and present uses include a flight academy; aircraft sales and storage; modification of military aircraft; various manufacturing; crop dusting;

aircraft restoration; maintenance repair shops; aircraft painting, stripping, and washing; fire retardant chemical mixing and loading; US Forest Service aircraft maintenance and operations; and aircraft museums. According to the report, three areas of concern (AOCs) were identified. These AOCs are located approximately 725 feet south of the Site; and 0.24 mile and 0.37 mile east-southeast of the Site. Based on the drawing depicting the TCE and 1,2,3-TCP groundwater plumes, the TCE plume is approximately 320 feet south of the Site. The nearest monitoring well, CAMW1, is located approximately 200 feet east-southeast of the Site and designated as an upgradient background well. Local groundwater flow direction was estimated toward the southeast. According to the report, no COCs have been detected in the background well to date. Based on the reviewed data, this CPS is not expected to be a significant environmental concern to the Site.

RECOGNIZED ENVIRONMENTAL CONDITIONS

According to American Society for Testing and Materials (ASTM) Standard of Practice E1527-13, recognized environmental conditions (REC) fall under three specific categories when evaluating a site or properties within the site vicinity. These categories are defined below.

A recognized environmental condition, or REC, means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A controlled recognized environmental condition, or CREC, is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

An historical recognized environmental condition, or HREC, is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Based on our review of these databases, reported off-Site release incidents that would represent RECs in connection with the Site or a source of a release that would be likely to contribute to a VEC were not identified. During the Site reconnaissance, three 300-gallon diesel ASTs were

observed at the Site. The elevated ASTs were located on asphalt surface with an upper dirt layer. No secondary containment was observed under the ASTs. Some staining was observed in the dirt layer below two of the ASTs. No information was available to allow a determination for when the ASTs were installed, and since the dairy farm has been in operation since at least the 1980s, the observed staining by the ASTs represent a REC. However, the staining would likely be localized to this area. In addition, heavy staining of the concrete floor by the compressors was observed. The staining is likely limited to the concrete floor; no cracks were observed on the surface floor. Citadel recommends the removal of the ASTs prior to Site development and preparing a soil management plan to manage the stained soils during redevelopment.

The retention ponds collect surface wastes from across the Site, as well as provide a potential dumping area for other dairy and animal-related wastes. Due to the potential for chemical constituents to accumulate in the ponds and become trapped in the sediment, Citadel recommends conducting a limited subsurface assessment of the sediments aft the ponds have been drained to evaluate the sediments for chemical risks to human health and the environment.

Citadel also observed one potable groundwater well near the northeast corner of the Site. Citadel recommends that the well be abandoned and removed prior to Site development.

NON-ASTM SCOPE CONSIDERATIONS

The current Site buildings were constructed prior to bans using asbestos-containing building materials (ACBMs) and polychlorinated biphenyls (PCBs) in electrical equipment came into effect in 1989 and 1978, respectively. No testing is known to have been performed to evaluate for the presence of ACBMs or PCBs at the Site.

The California Bureau of Mines and Geology and California Department of Public Health (CADPH) participated in the United States EPA's State Radon Survey, a Federal survey to measure levels of potential indoor radon in all states. Based on the results of this survey, CADPH predicted that approximately 0.5% of homes in Region 9 would have radon concentrations over the EPA action level of 4.0 picoCuries per liter (pCi/L). Region 9 includes Arizona, California Hawaii, Nevada, Pacific Islands, and 148 Tribal Nations.

The Federal EPA Radon Zone for San Bernardino County is Zone 2, which indicates an average indoor concentration greater than or equal to 2.0 pCi/L of air and less than or equal to 4.0 pCi/L. In a survey, 14 tests were conducted within the 91710 zip code for the presence of radon. Of these, none was found to contain radon in excess of the EPA's action level of 4.0 pCi/L.

The historic and current use of the Site as a dairy-production farm may produce methane gas in the subsurface from animal wastes. Methane gas is a simple asphyxiant and when allowed to accumulate, can be explosive.

One potable well was observed on-Site. Per FEMA Flood Insurance Rate Map No. number 06071C9335H, the Site and adjacent properties are located within areas in which flood hazards are undetermined but possible (Zone D). According to the NWI database, wetland areas are located within the Site.

ESA SHELF LIFE

Date of ESA Report: March 15, 2018

Date of Site Inspection: February 21, 2018

Date Interview was performed: February 21, 2018

Date Records Review was performed: February 21 and 26, 2018, and March 15, 2018

Date Lien Search was performed: March 1, 2018

1.0 INTRODUCTION

Citadel Environmental Services, Inc. (Citadel) was contracted by LIT Industrial, LP (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 7233 Eucalyptus Avenue in Ontario, San Bernardino County, California; hereinafter referred to as the "Site."

1.1 PURPOSE

The purpose of the Phase I ESA was to review past and present land use practices and to evaluate the presence, or likely presence, of any hazardous substances or petroleum products that have been discharged into the property's structure, ground, groundwater, or surface water. This qualitative assessment was accomplished by review of current and readily available information regarding past and current land use for indications of the manufacture, generation, use, storage and/or disposal of hazardous substances at the Site. A Site visit was also conducted to observe existing Site conditions. This report provides the results of the Phase I ESA performed.

1.2 INVOLVED PARTIES

The involved party(s) in this study, to the best of our knowledge, is LIT Industrial, LP.

Citadel understands that this Phase I ESA is being requested in conjunction with due diligence activities by LIT Industrial, LP. Citadel recognizes that this report is to be used exclusively by LIT Industrial, LP and its lenders, and assigns. It is a report upon which LIT Industrial, LP and its lenders, and assigns, can rely.

This assessment and report were prepared on behalf of and for the exclusive use of LIT Industrial, LP, their lenders, and assigns solely for its use and reliance, subject to the terms and conditions agreed upon between Citadel and the Client.

1.3 SCOPE OF SERVICES

This Phase I ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-13 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The scope of services for this assessment consisted of the following:

- Δ Performed a Site inspection to verify current Site conditions, and check for visible evidence of previously disposed and/or currently present hazardous waste, surface contamination, underground and above ground storage tanks (USTs/ASTs), suspect polychlorinated biphenyls (PCBs), and other potential environmental hazards.
- Δ Conducted a visual survey of the adjacent properties and the immediate vicinity to determine if any nearby sites posed a significant environmental threat to the Site.
- A Reviewed currently and readily available documents, including maps, aerial photographs, governmental databases of known hazardous waste sites and underground tanks, other consultant reports (if any), fire insurance maps, and other accessible records.

- Δ Reviewed results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.
- Δ Consulted with appropriate governmental agencies having jurisdiction relative to the past history of the property, complaints or incidents in the immediate area, and permits that may have been issued.
- Δ Prepared a Phase I report, inclusive of our findings and recommendations, with applicable illustrations and documentation.

The scope of services outlined above is generally considered sufficient to properly assess the Site based on the data search, reasonably ascertainable documents, and Site inspection.

2.0 GENERAL SITE CHARACTERISTICS

2.1 LOCATION

The rectangular-shaped Site is located approximately 2.8 mile south of the State Route 60 (SR 60) Freeway, locally referred to as the Pomona Freeway; and 2.4 mile northwest of the State Route 71 (SR 71) Freeway, locally referred to as the Chino Valley Freeway. The Site is bounded by Eucalyptus Avenue to the north; a dairy farm to the east; Merrill Avenue to the south; and Euclid Avenue to the west. The general Site vicinity is occupied by dairy farms and agricultural properties. Chino Airport is located southwest of the Site.

According to the U.S. Geological Survey (USGS) Prado Dam Quadrangle (7.5 Minute Series), dated 2012, the Site is at an elevation of approximately 649 feet above mean sea level (AMSL) and appears to slope to the south. The Site is located at approximate coordinates of 33° 59′ 12.17″ North Latitude and 117° 38′ 51.50″ West Longitude.

A Site Location Map identified as Figure 1 is included in Appendix A.

2.2 SITE DESCRIPTION

According to the County of San Bernardino Assessor's Parcel Maps, the Site is comprised of 11 parcels, encompassing approximately 84.1 acres of land. The parcels are legally identified by the Assessor's Parcel Numbers (APNs) 1054-011-01, -02, and -04; APNs 1054-021-01 and -02; APNs 1054-271-01, -02, and -03; and APNs 1054-281-01, -02, and -03.

The northeast and north-center portions of the Site consist of a single-family residential structure and a manufactured home structure along Eucalyptus with a dairy barn located between the two residences, one storage structure, approximately 10 hay/feed storage barns/sheds, and approximately 21 sheds associated with the corrals for the housing of the cattle. The south portion of the Site consists of a retention pond of 106,000 square feet. The remaining areas of the Site appear as irrigated cropland. Berms are located along the perimeter of the Site. At the time of the Site reconnaissance, the Site was occupied by Legend Dairy Farms.

The retention ponds collect surface wastes from across the Site, as well as provide a potential dumping area for other dairy and animal-related wastes.

Equipment throughout the Site include one potable water well; aboveground storage tanks (ASTs) for storage of diesel, grain/feed, water, and fresh milk; milking machines and pumping system; air compressors, cooling equipment; boilers; and pole-mounted transformers. In general, the Site appeared to be well maintained and the building and grounds appeared to be in fair to good condition with the exception of some staining observed in the dirt layer below two of the ASTs; and heavy staining of the concrete floor by the compressors. The staining is likely limited to the concrete floor; no cracks were observed on the surface floor.

A Site Location Map and Site Plan are included as Figures 1 and 2, respectively in Appendix A. Select photographs of the Site and near vicinity is included as Appendix B.

2.3 ADJACENT PROPERTIES

Direction from Site	Address – Tenant/Use
North	No address – Garden; further north is a residence at 14437 Euclid Avenue 7280 Eucalyptus Avenue – Dairy farm with residences
East	7417 Eucalyptus Avenue – Dairy farm with residences
South	No address – Undeveloped/irrigated land with various hangars associated with the Chino Airport further south/southeast
West	Various addresses – Large development of residential townhomes No address – undeveloped land associated with the California Institute for Men, State Prison

The immediately surrounding properties of the Site consist of the following:

2.4 UTILITIES

Electrical service is supplied to the Site by Southern California Edison. Natural gas is supplied to the Site by The Gas Company. General rubbish (non-hazardous) is removed from the Site on a regular basis by a contracted waste hauler.

3.0 ENVIRONMENTAL SETTING

3.1 PHYSICAL SITE CHARACTERISTICS

Based upon the National Geodetic Vertical Datum (NGVD) of 1929, the Site is at an elevation of approximately 649 feet AMSL. Regional topography in the area of the Site appears to slope to the south.

3.2 GEOLOGIC CONDITIONS AND SOILS

The Site is mapped on the geologic map of the Yorba Linda and Prado Dam quadrangles, California (Dibblee and Ehrenspeck, 2001) as Holocene aged surficial sediments (Qa) described as undissected alluvial gravel, sand, and silt of valleys and floodplains. The United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) National Cooperative Soil Survey identifies the Site soils as Chino series, described as silt loam and somewhat poorly drained with moderate infiltration rates.

3.3 GROUNDWATER/HYDROGEOLOGICAL CONDITIONS

The Site is located in the Upper Santa Ana Valley Groundwater Basin, Chino Subbasin (No. 8-2.01) as determined by the Department of Water (DWP, 2004). The subbasin is bounded by the impermeable rocks of the San Gabriel Mountains and the Cucamonga fault to the north; the Rialto-Colton fault to the east; the contact with impermeable rocks forming the Jurupa Mountains and low divides connecting the exposures to the southeast; the contact with impermeable rocks of the Puente Hills and the Chino fault to the south; and the San Jose fault to the west. San Antonio Creek and Cucamonga Creek drain the surface of the subbasin southward to join Santa Ana River.

The water-bearing units include the alluvial-fan deposits from the Holocene age and the interfingering finer, alluvial-fan deposits and coarser, fluvial deposits from the Pleistocene age. Groundwater recharge occurs by direct infiltration or precipitation on the subbasin floor, by infiltration of surface flow, and by underflow of groundwater from adjacent basins. The five recharge facilities include Deer Creek, Day Creek, East Etiwanda, San Sevaine, and Victoria.

Citadel reviewed the Geotracker database of sites that have had releases of fuels, solvents, or other material into the soil and groundwater to obtain information regarding depth to first ground water in the Site vicinity. This database is maintained by the California Regional Water Quality Control Board. Information was obtained from this database for the Chino Airport, located at 7000 Merrill Avenue, approximately 55 feet south-southwest of the Site. According to the Semiannual Groundwater Monitoring Report, Summer and Fall 2017, prepared by Tetra Tech and dated January 2018, depth to groundwater at the nearest monitoring, CAMW1, located approximately 200 feet east-southeast of the Site was estimated at 62.32 feet below ground surface (bgs). Local groundwater flow direction was estimated toward the southeast.

3.4 WETLANDS AND FLOOD ZONE

Citadel reviewed information for the presence of wetlands and flood zone areas at the Site and within ½-mile from the Site. Information from the National Wetlands Inventory (NWI) database is provided by the United States Fish and Wildlife Service, and Flood Insurance Rate Map (FIRM) is published by the Federal Emergency Management Agency (FEMA).

Based on information obtained and reviewed by Citadel:

- According to the NWI database, wetland areas are located within the Site and include the following:
 - Freshwater pond of 0.94 acre located in the northeast corner of the south portion of the Site (where the retention pond is located). The identified wetland is classified as PUBFx, which is described as a Palustrine System and Unconsolidated Bottom Class that is semipermanently flooded and excavated.
 - Freshwater pond of 0.3 acre located in the northeast corner of the south portion of the Site (where the retention pond is located). The identified wetland is classified as PUSCx, which is described as a Palustrine System and Unconsolidated Shore Class that is seasonally flooded and excavated.
 - Freshwater emergent wetlands of 0.26 and 0.51 acres located near the northeast corner of the south portion of the Site (where the retention pond is located). The identified wetland is classified as PEM1Cx, which is described as a Palustrine System, Emergent Class, and Persistent Subclass that is seasonally flooded and excavated.
- Per FEMA Flood Insurance Rate Map No. number 06071C9335H, the Site and adjacent properties are located within areas in which flood hazards are undetermined but possible (Zone D).

4.0 SITE RECONNAISSANCE

Citadel representative Ms. Roopal Jani conducted the Phase I ESA reconnaissance on February 21, 2018. Ms. Jani met on-site with Mr. Ron Pietersma, the owner of the Site. The Site reconnaissance consisted of an inspection of the Site and a perimeter survey of the surrounding properties. Ms. Shirley Lee served as the Project Manager and prepared this Phase I ESA. Mr. Mark Drollinger reviewed this Phase I ESA. Findings from the Site inspection, research and perimeter survey are presented below.

4.1 ON-SITE STORAGE TANKS

No current underground storage of hazardous materials was identified during the Site reconnaissance or reported to have been historically present on the Site. The following ASTs were observed:

- > Three approximately 300-gallon diesel elevated ASTs to fuel tractors;
- One 500-gallon AST used for the storage of molasses (reportedly empty);
- Two tanks for storing grain/feed
- > Pressure tank and fresh water reservoir associated with the water well
- Tank for storing fresh milk

At the time of the Site reconnaissance, the elevated ASTs were located on an asphalt surface with an upper dirt layer. No secondary containment was observed under the ASTs. Some staining was observed in the dirt layer below two of the ASTs.

4.2 IDENTIFIED HAZARDOUS MATERIALS

Citadel inspected the Site for current chemical and hazardous waste storage and handling practices. Citadel observed limited quantities of hazardous materials are used throughout the Site for equipment and building maintenance purposes. In addition to the limited quantities of hazardous materials used for equipment and building maintenance, the following hazardous materials were observed at the dairy barn:

- > Two 55-gallon drum of acid CIP cleaner
- Two 55-gallon drums of Multi-Chlor, disinfectant
- One 55-gallon drum of Valiant Teat Dip

The hazardous materials observed at the Site are not expected to represent a significant environmental concern.

4.3 ASBESTOS CONTAINING MATERIALS

The EPA issued a final rule under Section 6 of Toxic Substances Control Act (TSCA) banning most asbestos-containing building materials (ACBMs) in 1989. The ban on ACBMs was vacated in 1991 allowing some building materials to continue to contain asbestos. The applicability of the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP, 40 CFR Chapter 61, Subpart M) apply to the owner or operator of a facility where an inspection for the presence of asbestos-containing materials (ACM), including Category I (asbestos containing packings, gaskets, resilient floor coverings and asphalt roofing products), and Category II (all remaining types of non-friable asbestos containing material not included in Category I that when dry, cannot be crumbled,

pulverized or reduced to powder by hand pressure), non-friable ACM must occur prior to the commencement of demolition or renovation activities.

Based on the construction date for the Site buildings, asbestos-containing building materials (ACBMs) were likely used in the construction of the Site buildings. A survey for ACMs was not conducted as part of this Phase I ESA.

4.4 LEAD PAINTS

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has greater than or equal to one milligram per square centimeter (mg/cm²) (5,000 microgram per gram (µg/g) or 5,000 parts per million (ppm)) of lead by federal guidelines; state and local definitions may differ from the federal definitions in amounts ranging from 0.5 mg/cm² to 2.0 mg/cm². The US Consumer Product Safety Commission (16 Code of Federal Regulations CFR 1303) banned paint containing more than 0.06% lead for residential use in 1978. Buildings built before 1978 are much more likely to have LBP.

Based on the construction date for the Site buildings, lead-based paints were unlikely used within the Site buildings. A survey for lead containing materials was not conducted as part of this Phase I ESA.

4.5 POLYCHLORINATED BIPHENYLS

Typical sources of polychlorinated biphenyls (PCBs) include electrical transformer cooling oils, fluorescent light fixture ballasts and hydraulic oil. In 1976, the U.S. EPA banned the manufacture and sale of PCB-containing transformers. Prior to this date, transformers were frequently filled with a dielectric fluid containing PCB-laden oil. By 1985, the US EPA required that commercial property owners with transformers containing more than 500 parts per million (ppm) PCBs must register the transformer with the local fire department, provide exterior labeling, and remove combustible materials within 16 feet (40 Code of Federal Regulations 761.30: "Fire Rule").

Three pole-mounted transformers were observed along Eucalyptus Avenue, just north of the dairy barn. No staining or leaks were observed from the transformers.

4.6 RADIOACTIVE MAN-MADE MATERIALS

Many public and private office buildings in the United States have self-luminescent tritium exit signs that contain radioactive materials. Equipment that may contain minute amounts of radioactive material were not observed at the Site.

4.7 PITS, PONDS, AND LAGOONS

No pits or lagoons were visually observed during the Site reconnaissance or reported to be historically present at the Site. A retention pond was observed south of the corrals (northeast corner of the south portion of the Site). Trenches on the Site are part of the storm surface diversion and rinse water impoundment basins. These collection basins accept surface flows with sediment, manure and feed. The ponded water is then allowed to evaporate.

Floor drains were observed in the cow washing and milking area located at the dairy barn. Wastewater is transported from drains via pipes to the retention pond located south of the corrals.

4.8 SEPTIC TANKS AND CESSPOOLS

No cesspools were visually observed during the Site reconnaissance or reported to have been historically present on the Site.

4.9 WELLS, CISTERNS AND SUMPS

No cisterns or sumps were visually observed during the Site reconnaissance or reported to have been historically present on the Site. One water well was observed at the Site. According to Mr. Pietersma, the water well provides drinking water to the cattle. The water well is not expected to represent a significant environmental concern.

4.10 WASTEWATER INTERCEPTORS / GREASE INTERCEPTORS

No wastewater or grease interceptors were visually observed during the Site reconnaissance or reported to have been historically present on the Site.

4.11 DRINKING WATER

The on-Site water well is used to supply drinking water for the cattle. Reclaimed water from the City of Ontario is used for on-Site irrigation.

4.12 RADON

The California Bureau of Mines and Geology and California Department of Public Health (CDPH) participated in the United States EPA's State Radon Survey, a Federal survey to measure levels of potential indoor radon in all states. Based on the results of this survey, CADPH predicted that approximately 0.5% of homes in Region 9 would have radon concentrations over the EPA action level of 4.0 picoCuries per liter (pCi/L). Region 9 includes Arizona, California Hawaii, Nevada, Pacific Islands, and 148 Tribal Nations.

The Federal EPA Radon Zone for San Bernardino County is Zone 2, which indicates an average indoor concentration greater than or equal to 2.0 pCi/L of air and less than or equal to 4.0 pCi/L. In a survey, 14 tests were conducted within the 91710 zip code for the presence of radon. Of these, none was found to contain radon in excess of the EPA's action level of 4.0 pCi/L.

Site-specific radon values were not available and were not a part of this ASTM Phase I ESA.

5.0 SITE HISTORY

The purpose of the records review is to obtain and review reasonably ascertainable/standard sources that will help identify any recognized environmental conditions in connection with the property. Reasonably ascertainable records from standard sources is (1) information that is publicly available, (2) information that is obtainable from its source within reasonable time and cost constraints, and (3) information that is practically reviewable.

Reasonable time and cost means that the information will be provided by the source within 20 calendar days of receiving a written, telephone, or in-person request at no more than a nominal

cost intended to cover the source's cost of retrieving and duplicating the information. Information that can only be reviewed by a visit to the source is reasonably ascertainable if the visit is permitted by the source within 20 days of request.

To investigate the history of the Site, Citadel reviewed select historic aerial photographs, building permits, city directories, and Sanborn Fire Insurance Maps provided by Environmental Data Resources Inc. (EDR). In addition, Citadel reviewed client-supplied information, and oil and gas maps, and Citadel interviewed selected individuals regarding historic Site use. Citadel's reviews of these reports and interviews are discussed below.

5.1 HISTORICAL AERIAL PHOTOGRAPHS

Historical aerial photographs of the Site and vicinity were obtained from EDR to ascertain historical land uses and to identify any evidence of hazardous material generation or storage. Thirteen aerial photographs dating from 1938 to 2012 were reviewed. Below are brief descriptions of observations made from the aerial photographs of the Site and vicinity.

1938, 1946, 1948, and 1953 Aerial Photographs

The Site appears agricultural with an unimproved road meandering in the center of the Site, traversing in an east-west trajectory. Eucalyptus Avenue, Euclid Avenue, and Merrill Avenue appear developed north, west, and south of the Site, respectively. Properties north of the Site appear generally agricultural/undeveloped with the exception of several small structures in the current location of a single-family residence and dairy barn; and several structures, likely residences and/or farm-related, further north. Properties to the east, south, and west appear generally undeveloped.

By 1946, the road at the Site does not appear as apparent; and the properties south of the Site appear developed with rows of structures, likely hangars, along with a large exterior plane storage/parking area. By 1948, the exterior plane storage/parking area appears vacant.

<u>1959 Aerial Photograph</u>

The Site appears agricultural and relatively unchanged. Additional structures appear developed at the properties north of the Site, similar to its current structures. The remaining nearby properties appear relatively unchanged.

1966 Aerial Photograph

The Site and nearby properties appear relatively unchanged with the exception of the development of the property southwest of the Site, which is currently occupied by the California Institution for Men, State Prison Chino.

<u>1975 Aerial Photograph</u>

A small structure, likely a residence or farm-related, appears developed in the northwest portion of the Site along Eucalyptus Avenue. The remaining areas of the Site and nearby properties appear relatively unchanged with the exception of the removal of several hangars at the properties south/southeast of the Site.

1985 and 1987 Aerial Photographs

The northeast portion of the Site appears developed with the existing residences, dairy barn, storage structures, and approximately eight sheds associated with corrals. Pooled water appears in the location of the existing retention pond in the southwest portion of the Site, just south of the corrals. The remaining portions of the Site appear relatively unchanged. Additional sheds for corrals appear developed at the dairy farm north of the Site. The property east of the Site appears developed with the existing dairy farm. The remaining nearby properties appear relatively unchanged.

1990 and 1994 Aerial Photographs

The Site appears relatively unchanged. The property north of the Site (and west of the dairy farm) appears developed with five storage structures. Additional structures appear to have been removed at the properties south/southeast of the Site. The remaining nearby properties appear relatively unchanged.

By 1994, the property north of the Site appears agricultural with an area covered with tarps.

2006, 2010, and 2014 Aerial Photographs

The Site appears relatively unchanged with the exception of the expansion of corrals, which were completed by 2010, along with the expansion of the retention pond. In addition, the small structure located in the northwest portion of the Site along Eucalyptus Avenue appears to have been removed by 2010. Nearby properties appear relatively unchanged with the exception of the development of an unimproved road along the east boundary of the Site by 2010.

Copies of the Aerial Photographs provided by EDR can be found in Appendix C.

5.2 HISTORIC BUILDING PERMITS

EDR provides a listing of building permits for the Site and adjoining properties, if available. Permit information was not available. Citadel contacted the City of Ontario to review building permits. According to the City of Ontario, no permits were associated with the Site address.

A copy of the EDR Building Permit Report is included as Appendix D.

5.3 HISTORICAL FIRE INSURANCE MAPS

Citadel requested that EDR review its collection of Sanborn Fire Insurance Maps for potential coverage of the Site and vicinity. Sanborn Map coverage was not available for the Site. A copy of the EDR Sanborn Map Report is included as Appendix E.

5.4 CITY PARCEL PROFILE REPORT

A parcel profile report was not available for the Site.

5.5 HISTORICAL CITY DIRECTORIES

City directories were researched by EDR to identify previous Site tenants and/or neighboring properties with a potential for hazardous materials generation and/or storage. EDR researched

city directory listings from 1922 through 2010 (non-inclusive) and provided their search results to Citadel for review. Information obtained from the city directories indicates that the Site address was occupied by the following:

Dates(s)	Occupant Listed
1980	Norman Van Wyhe
2003, 2008	Dan Swager

The adjacent properties were occupied by the following:

Dates(s)	Occupant Listed					
	7278 Eucalyptus Avenue – North of Site					
1970	Phil Douma					
1980	O.D. Guess					
1985	Larry Guess					
1990	Diana Guess					
2003	Not listed					
2008	Not listed					
	7280 Eucalyptus Avenue – North of Site					
1985	Orville Guess					
2008	Eddie Lugo					
2010	Inland Station Investments LLC					
	14411 Euclid Avenue – North of Site					
2008	Chino Airport, Chino Valley Truck Wash Inc.					

A copy of the EDR City Directory Abstract is included as Appendix F.

5.6 CLIENT-SUPPLIED ENVIRONMENTAL INFORMATION

Citadel was not provided with any previous environmental documents.

5.7 HISTORICAL TOPOGRAPHIC MAPS

Historical topographic maps were provided by EDR in order to identify natural features and changes in development over a long period of time. The topographic maps provide the user with a regional view of changes to the Site and vicinity that other historical databases such as aerial photographs may not provide. EDR provided topographic maps dating from 1902 through 2012 (non-inclusive) for review.

<u>1902 (Corona) Topographic Map</u>

A road also appears developed on-Site, traversing in a northwest-southeast trajectory. Eucalyptus Avenue, Euclid Avenue, and Merrill Avenue appears developed north, west, and south of the Site, respectively. An unidentified road also appears developed east of the Site. Nearby properties appear generally undeveloped with the exception of several small structures developed north of the Site along Euclid Avenue.

1933 (Prado) and 1941 (Prado) Topographic Maps

The on-Site road appears to have been removed. The road along the east boundary of the Site is no longer shown. The remaining portions of the Site and nearby properties appear relatively unchanged.

1942 (Corona) and 1947 (Corona) Topographic Maps

The Site appears relatively unchanged. Additional structures appear at the properties north of the Site. The remaining nearby properties appear relatively unchanged.

1949 (Prado Dam) and 1950 (Prado Dam) Topographic Maps

The Site and the adjoining property east of the Site appear relatively unchanged. The properties south and southwest of the Site appears to be occupied by Cal-Aero Primary School and Cal-Aero Flight Academy (deactivated). Properties north of the Site appear developed with small structures along the streets. Properties west and southwest of the Site appears relatively unchanged with the exception that the properties appear to be occupied by the California Institute for Men.

1973 (Prado Dam) Topographic Map

The Site and the adjoining property east of the Site appear relatively unchanged. Additional structures appear developed at the properties north of the Site. Properties south of the Site now appears as part of the Chino Airport; an area marked for sewage disposal appears developed approximately 0.65 mile south of the Site. A well appears developed just south of Merrill Avenue; an additional well appears developed in the southwest corner of Eucalyptus Avenue and Euclid Avenue. The California Institute for Men appears developed with the current prison-related structures southwest of the Site.

<u>1981 (Prado Dam) Topographic Map</u>

The Site appears developed with one small structure in the northwest portion of the Site, along Eucalyptus Avenue. The adjoining property east of the Site appears developed with the current dairy farm-related structures. Properties north, west, southwest, and south appear relatively unchanged.

2012 (Prado Dam) Topographic Map

Structures are not featured on this map. However, properties west of the Site appears developed with the current streets indicating the development of the current residential neighborhood.

Copies of the historical topographic maps provided by EDR are included as Appendix H.

5.8 HISTORIC OIL AND GAS MAPS

Citadel reviewed information available on-line through the California Department of Conservation's website. The Division of Oil, Gas & Geothermal Resources (DOGGR) Online Mapping System (DOMS) shows that there are no oil wells within a two-mile radius of the Site.

5.9 INTERVIEWS

Citadel interviewed Mr. Ron Pietersma, the owner of the Site, during the Site reconnaissance. MR. Pietersma was not aware of any historic or current environmental concerns or hazards at the Site.

5.10 ENVIRONMENTAL LIEN

Citadel contracted with EDR to perform an Environmental Lien Search for the Site. The Environmental Lien Search report reviewed did not identify any current environmental liens or other activity and use limitations (AULs) for the Site. Two deeds, dated May 31, 2013, were included in the report. The deed (for APNs 1054-011-01, -02, and -04; 1054-021-01 and -02; 1054-271-02; and 1054-281-02 and -03) granted the title from Albers Realty Investment Company, LP to Ronald C. Pietersma and Kristine B. Pietersma, as Trustees of the Ronald and Kristine Pietersma Family Trust. The deed (for APNs 1054-271-01 and -03; and 1054-281-01) granted the title from Ronald C. Pietersma and Kristine B. Pietersma to Ronald C. Pietersma and Kristine B. Pietersma Family Trust.

A copy of the environmental lien and AUL search will be found in Appendix I.

5.11 SUMMARY OF SITE HISTORY

A review of historical sources showed that the Site was generally undeveloped as early as 1902. The Site appeared to be used for agricultural purposes as early as 1938. A small structure, likely a residence or farm-related, appeared to be developed in the northwest portion of the Site along Eucalyptus Avenue by 1975. The northeast portion of the Site appeared developed with the existing residences, dairy barn, storage structures, and approximately eight sheds associated with corrals by 1985. Pooled water also appeared in the location of the existing retention pond in the southwest portion of the Site. The expansion of the corrals and retention pond to their current configurations appeared completed by 2010. In addition, the small structure located in the northwest portion of the Site appeared to have been removed by 2010.

The properties north of the Site appeared generally agricultural/undeveloped with the exception of several small structures in the current location of a single-family residence and dairy barn; and several structures, likely residences and/or farm-related, further north by 1938. Additional sheds for corrals appeared developed at the dairy farm north of the Site by 1985. The property west of the dairy farm appeared developed with five storage structures by 1990. By 1994, this property appeared agricultural with an area covered with tarps. The property east of the Site was generally agricultural/undeveloped until at least 1985 with the development of the current dairy farm. The properties west of the Site was generally agricultural/undeveloped until between 2014 and 2016 with the development of the current residential neighborhood.

Properties south of the Site appeared developed with hangars along with a large exterior plane storage/parking area by 1946—these were likely occupied by Cal-Aero Primary School and Cal-Aero Flight Academy. By 1973, this area was occupied as part of the Chino Airport. Several of the hangars were demolished by 1975.

6.0 REGULATORY AGENCY REVIEW

6.1 DATABASE REVIEW

As part of the Phase I ESA, Citadel utilized EDR of Milford, Connecticut, as an information source for regulatory agency database records.

The following summary of the database information is divided into two columns. The first column lists sites as identified and located by EDR within the specified distance of the Site. The second column lists orphan sites, which could not be located by EDR due to incomplete and/or inaccurate address information included in the USEPA/state databases, which Citadel identified as potentially lying within the search distance.

Although locations of the orphan sites are frequently unknown, Citadel attempts to evaluate the potential adverse environmental impact that these facilities may have on the Site. This evaluation consists of reviewing street names in an effort to learn whether the street on which the Site is located lies within the search distance of the subject property, a drive-by view of surrounding properties during the Site visit, and evaluating the Site type and information provided by government agencies. The orphan sites included in the following table are those Citadel identified as potentially located within the identified search distance.

Database	Radius	No. of Plottable Sites	Orphan
National Priorities List	1 mile	0	0
RCRA Corrective Action Treatment/Storage/Disposal (TSD) Facilities (CORRACTS)	1 mile	0	0
Delisted National Priorities List	1 mile	0	0
CERCLIS Sites	½ mile	2	0
CERCLIS No Further Remedial Action Planned (NFRAP) Sites	½ mile	0	0
RCRA Non-Corrective Action TSD Facilities	½ mile	0	0
State/Tribal Voluntary Cleanup Sites	½ mile	0	0
State/Tribal Leaking Registered Storage Tank Sites	½ mile	8	2
State/Tribal Brownfield Sites/CERCLIS Equivalent	1 mile	3	0
Historic CORTESE List	½ mile	3	1
State/Tribal Solid Waste Landfill Sites/Facilities	½ mile	1	0
Federal/State/Tribal Engineering Controls Registries	½ mile	0	0
Federal/State/Tribal Institutional Controls Registries	½ mile	0	0
RCRA Large Quantity Generators	1⁄4 mile	0	0
RCRA Small Quantity Generators	1⁄4 mile	2	0
RCRA Non Generators	¼ mile	1	0

Database	Radius	No. of Plottable Sites	Orphan
State/Tribal Registered Storage Tank Sites	¼ mile	3	0
HIST UST	¼ mile	6	0
CA FID UST	1⁄4 mile	3	0
SWEEPS UST	1⁄4 mile	4	0
Facility Index System (FINDS)	0.001 mile	3	0
HAZNET	0.001 mile	0	0

A listing of facilities at the Site and adjoining properties of the Site is included in the following table. A brief discussion of select facilities and their database listings are included following the table. The full report provided by EDR and reviewed by Citadel can be found in Appendix J.

EDR Listing of Site and Adjoining Properties ¹								
Facility Name Facility Address Distance From Site Database Reference								
Swager & Sons Dairy #2	7233 Eucalyptus Avenue	Target Property	WDS; FINDS					
Legend Dairy Farm #1	7233 Eucalyptus Avenue	Target Property	FINDS; ECHO; San Bern. Co. Permit					
Legend Dairy Farm	7233 Eucalyptus Avenue	Target Property	EMI; FINDS					

The Site was identified on the following environmental databases: WDS, FINDS, ECHO, EMI, and San Bern. Co. Permit.

The Site was identified on the Facility Index System/Facility Registry System (FINDS) database and Enforcement and Compliance History Information (ECHO) databases. FINDS contains facility information and "pointers" to other sources that contain more detail and ECHO provides integrated compliance and enforcement information. The Site was identified on these databases due to the following references:

- Swager & Sons Dairy #2
 - California Enviroview California Integrated Water Quality System (CIWQS) for confined animal feeding operation
- Legend Dairy Farm #1
 - National Pollutant Discharge Elimination System (NPDES) Compliance Information System (ICIS) for concentrated animal feeding operation
 - California Enviroview California Environmental Reporting System (CERS) for being a Risk Management Plan (RMP) reporter
 - o Emission Inventory System (see below)
 - Integrated Compliance Information System formal enforcement action in 2007. According to information

The Site was identified on the Waste Discharge System (WDS) database as an agricultural facility with designated/influent or solid wastes that pose a significant threat to water quality (dairy waste

¹ Distance and direction from Site assigned by EDR. Actual distance and direction from the Site boundary may vary.

ponds). The Site was also identified on the Emissions Inventory (EMI) Data between 2006 and 2015 for the following various emissions reported in tons per year:

	Total Organic Hydrocarbon Gases	Reactive Organic Gases	Carbon Monoxide Emissions	Oxides of Nitrogen	Oxides of Sulfur	Particulate Matter	Particulate Matter of 10 Micrometers and Smaller
2006	9.38	6.55	0.004	0.016	0	3.47	1.7
2007	9.38	6.55	0.004	0.016	0	3.47	1.7
2008	17.29	12.08	0	0	0	3.41	1.67
2009	18.49	12.92	0	0	0	3.69	1.81
2010	18.49	12.92	0	0	0	3.7	1.81
2011	18.49	12.92	0	0	0	3.7	1.81
2012	18.49	12.92	0	0	0	3.7	1.81
2013	18.04	12.92	0	0	0	3.7	1.81
2014	151.04	12.08	0	0	0	3.7	1.78
2015	114.94	9.19	0	0	0	3.7	1.78

These listings are not considered to represent a significant environmental concern.

EDR identified nine orphan sites in its report and includes two listing in the LUST database; one listing in the HIST CORTESE database (Hazardous Waste and Substances Site List); and six listings on the Clandestine Drug Labs (CDLs) database. The Site was not identified as an orphan site.

Maps showing the location of these facilities and additional information are provided in the Government Records Report in Appendix J.

6.2 VAPOR ENCROACHMENT CONDITION

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or likely presence of chemicals of concern vapors in the subsurface of the target property (TP) caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be ruled out. Tier 2 has two data collective components: non-invasive and invasive.

Tier 1 screening begins with the default area of concern (AOC) defined by the approximate minimum search distances adjusted as appropriate for local conditions, and then determining if known or suspected contaminated properties with contaminants of concern (COCs) exist within the established AOC. The default AOC is one third of a mile around the TP for COCs and one-tenth of a mile for petroleum hydrocarbon COCs. The AOC is measured from the TP boundary to a contaminated property with known or suspected COC contamination of soil or groundwater or both. The default AOC may be expanded or reduced by the environmental professional (adjusted AOC) using experience and professional judgment, based on factors like groundwater flow direction, subsurface characteristics, surficial features and man-made features.

If groundwater flow direction is known or can be inferred from the Phase I ESA investigation of the TP, the default AOC in the down-gradient direction may be reduced to the area within the critical

distance of 100 feet. The AOC in the cross-gradient direction may also be reduced, depending upon the critical distance and the width of the COC-contaminated plume associated with a known or likely COC-contaminated property located in a cross-gradient direction from the TP. The critical distance is the lineal distance in any direction between the nearest edge of the contaminated plume and the nearest TP boundary, and is equal to 100 feet for COCs or 30 feet for dissolved petroleum hydrocarbon COCs.

For a COC-contaminated property identified in Tier 1 located down-gradient from the TP, it is not necessary to have information on migrating groundwater contaminated plume dimensions as the critical distance is measured from the nearest TP boundary to the source of contamination at the off-site down-gradient property. In this case, the AOC may be reduced to the area within the critical distance.

For a contaminated property identified in Tier 1 located crossgradient from the TP, the AOC will be the area within the critical distance plus one half of a reasonable estimation of the contaminated plume width (at the point nearest the closest TP boundary) that might be associated with the nearby known or suspected COC-contaminated property (that is, the COC-contaminated property where the groundwater contamination originated). The environmental professional's judgment and experience can be used to estimate the width of the COC-contaminated property. If it is not possible to estimate the contaminated plume width, then the AOC cannot be reduced in the cross-gradient direction.

Citadel reviewed information provided by EDR regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, no historical releases of petroleum products from a LUST occurred within 0.25-mile and upgradient of the Site. There are no properties within 0.125-mile and upgradient or cross-gradient of the Site that are listed on the Historical Gas Station and Dry Cleaners databases. However, the Chino Airport property is located south of the Site and was identified as occupied by Flite Craft from as early as 1986 as an aircraft and heavy equipment repair services. This property will be further discussed in Section 6.3.

The historic and current use of the Site as a dairy-production farm may produce methane gas in the subsurface from animal wastes. Methane gas is a simple asphyxiant and when allowed to accumulate, can be explosive.

A copy of the vapor encroachment screen provided by EDR is included as Appendix K.

6.3 REGULATORY AGENCIES

Local and state agencies, such as environmental health departments, fire prevention bureaus, and building and planning departments are contacted to identify any current or previous reports of hazardous materials use, storage, and/or unauthorized releases that may have impacted the Site.

BUILDING DEPARTMENT

Citadel contacted the City of Ontario Building Department for information regarding the Site in order to identify historical tenants and property use. According to the City of Ontario, no permits were associated with the Site address.

FIRE DEPARTMENT

0611.1049.0_Phase_I_ESA_MD

Citadel submitted a records request to the San Bernardino County Fire Department (SBCFD) for information regarding the Site to identify historical tenants and property use. Citadel reviewed available data at the SBCFD. According to the documents reviewed, Swager & Son's Dairy #2 occupied the Site as a dairy barn and was replaced by Legend Dairy #1 in 2007. An inspection report, dated April 24, 2007, for Legend Dairy #1 indicated several violations including hazardous material handler permit not being current; no Hazardous Materials Business Plan (HMBP); and contaminated containers not properly managed. A Certificate of Compliance was issued on May 26, 2007.

According to a CUPA Compliance Inspection Report regarding an inspection dated April 22, 2016, a violation was issued for the failure to update the Hazardous Materials Business Plan (HMBP) and failure to submit an amendment to the inventory form within 30 days of change. A Certificate of Compliance was issued on May 6, 2016.

Annual permits for handling hazardous materials were issued from 2007 to 2014.

AIR QUALITY MANAGEMENT DISTRICT

Citadel reviewed information available on-line through the South Coast Air Quality Management District's Facility Information Detail (FIND) database. The Site was identified on the database as Legend Dairy Farms (Facility ID 145351)

- An active permit, issued in March 2007, to operate a confined animal feed operation consisting of milk cows and dry cows; milking parlor; scrape type manure handling system; open corrals; 17 storage ponds; manure stock piles; feed storage commodity barns; and mixer feed wagon.
- An inactive permit, issued in April 2007, to operate diesel fueled emergency generator.
- An inactive permit, issued in April 2007, to operate a confined animal feed facility consisting of milking cows and dry cows; milking parlor; scrape type manure handling system; open corrals; in-corral mounds; manure stock piles; one storage pond; feed storage commodity barns; mixer feed wagon; long hay; and milk barn hay.
- An active permit, issued in September 2008, to operate a confined animal feed facility consisting of milking cows and dry cows; milking parlor; scrape type manure handling system; open corrals; in-corral mounds; manure stock piles; one storage pond; feed storage commodity barns; mixer feed wagon; long hay; and milk barn hay.
- No notices of violation or to comply were reported.

REGIONAL WATER QUALITY CONTROL BOARD

The GeoTracker Database is the California State Water Resources Control Board's (SWRCB) Internet-accessible database system used by the SWRCB, regional boards, and local agencies to track and archive compliance data from authorized or unauthorized discharges of waste to land, or unauthorized releases of hazardous substances from underground storage tanks. The Site was not identified in the database. According to Geotracker, the nearest Cleanup Program Site (CPS) is the Chino Airport (Airport), located at 7000 Merrill Avenue, located south of the Site. The primary chemicals of concern (COCs) in the groundwater at this CPS include trichloroethene (TCE); 1,2,3-trichloropropane (1,2,3-TCP); cis-1,2-dichloroethane; and 1,1-dichloroethene.

According to the Semiannual Groundwater Monitoring Report, dated January 31, 2018, and prepared by Tetra Tech, portions of the Airport have functioned as an airfield since the early 1940s. Since the 1960, the County of San Bernardino has operated the Airport as a public airport for commercial, industrial, and general aviation use. Past and present uses include a flight academy;

aircraft sales and storage; modification of military aircraft; various manufacturing; crop dusting; aircraft restoration; maintenance repair shops; aircraft painting, stripping, and washing; fire retardant chemical mixing and loading; US Forest Service aircraft maintenance and operations; and aircraft museums. According to the report, three areas of concern (AOCs) were identified. These AOCs are located approximately 725 feet south of the Site; and 0.24 mile and 0.37 mile east-southeast of the Site. Based on the drawing depicting the TCE and 1,2,3-TCP groundwater plumes, the TCE plume is approximately 320 feet south of the Site. The nearest monitoring well, CAMW1, is located approximately 200 feet east-southeast of the Site and designated as an upgradient background well. Local groundwater flow direction was estimated toward the southeast. According to the report, no COCs have been detected in the background well to date. Based on the reviewed data, this CPS is not expected to be a significant environmental concern to the Site.

Santa Ana Regional Water Control Board

Citadel also submitted a records request to the Santa Ana Regional Water Control Board (SARWQCB) for information regarding the Site to identify historical tenant and property use. Citadel reviewed available data at the SARWQCB's office. An Engineering Waste Management Plan (EWMP), dated June 2006, and prepared by Sierra Engineering Services, provided information on dairy operations, animal population and wastewater management at the Site. According to the EWMP, wastewater generated on-Site is associated with the washing of the milking cows and cleaning of the milk barn. The wastewater is directed toward the sump by gravity flow and delivered by a pump for the irrigation of the cropland and storage in the ponds situated in the southeast portion of the Site. In addition to the irrigated cropland area, a large pasture area prevents runoff from the Site. The wastewater and stormwater runoff from the corrals are discharged by gravity in the pond located on the south side of the corrals. Sierra Engineering Services prepared a letter to the SARWQCB indicating that the completion of the enlargement of the containment pond, and the construction of the concrete spillway and the berms along the Site boundary.

7.0 DATA GAPS

A data gap is a lack of or inability to obtain information despite good faith efforts to gather such information. A data failure is a failure to achieve the historical research objectives even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful.

The following data gaps have been identified during the course of this investigation:

Additional governmental agencies that are not included in the Government Records report may maintain information regarding environmental conditions at the Site and nearby facilities.

With regard to these data gaps, Citadel believes that the most significant potential sources for onsite contamination have been identified by other means during the current investigation.

8.0 FINDINGS

Citadel Environmental Services, Inc. (Citadel) was contracted by LIT Industrial, LP (Client) to perform a Phase I Environmental Site Assessment (Phase I ESA) of the property located at 7233

Eucalyptus Avenue located in Ontario, San Bernardino County, California; hereinafter referred to as the "Site."

Current Use

According to the County of San Bernardino Assessor's Parcel Maps, the Site is comprised of 11 parcels, encompassing approximately 84.1 acres of land. The parcels are legally identified by the Assessor's Parcel Numbers (APNs) 1054-011-01, -02, and -04; APNs 1054-021-01 and -02; APNs 1054-271-01, -02, and -03; and APNs 1054-281-01, -02, and -03.

The northeast and north-center portions of the Site consist of a single-family residential structure and a manufactured home structure along Eucalyptus with a dairy barn located between the two residences, one storage structure, approximately 10 hay/feed storage barns/sheds, and approximately 21 sheds associated with the corrals for the housing of the cattle. The south portion of the Site consists of a retention pond of 106,000 square feet. The remaining areas of the Site appear as irrigated cropland. Berms are located along the perimeter of the Site. At the time of the Site reconnaissance, the Site was occupied by Legend Dairy Farms.

The retention ponds collect surface wastes from across the Site, as well as provide a potential dumping area for other dairy and animal-related wastes.

The historic and current use of the Site as a dairy-production farm may produce methane gas in the subsurface from animal wastes. Methane gas is a simple asphyxiant and when allowed to accumulate, can be explosive.

Equipment throughout the Site include one potable water well; aboveground storage tanks (ASTs) for storage of diesel, grain/feed, water, and fresh milk; milking machines and pumping system; air compressors, cooling equipment; boilers; and pole-mounted transformers. In general, the Site appeared to be well maintained and the building and grounds appeared to be in fair to good condition with the exception of some staining observed in the dirt layer below two of the ASTs; and heavy staining of the concrete floor by the compressors. The staining is likely limited to the concrete floor; no cracks were observed on the surface floor.

Historical Use

A review of historical sources showed that the Site was generally undeveloped as early as 1902. The Site appeared to be used for agricultural purposes as early as 1938. A small structure, likely a residence or farm-related, appeared to be developed in the northwest portion of the Site along Eucalyptus Avenue by 1975. The northeast portion of the Site appeared developed with the existing residences, dairy barn, storage structures, and approximately eight sheds associated with corrals by 1985. Pooled water also appeared in the location of the existing retention pond in the southwest portion of the Site. The expansion of the corrals and retention pond to their current configurations appeared completed by 2010. In addition, the small structure located in the northwest portion of the Site appeared to have been removed by 2010.

Environmental Database Listings

The Site was identified on the following environmental databases: WDS, FINDS, ECHO, EMI, and San Bern. Co. Permit.

The Site was identified on the Facility Index System/Facility Registry System (FINDS) database and Enforcement and Compliance History Information (ECHO) databases. FINDS contains facility

information and "pointers" to other sources that contain more detail and ECHO provides integrated compliance and enforcement information. The Site was identified on these databases due to the following references:

- Swager & Sons Dairy #2
 - California Enviroview California Integrated Water Quality System (CIWQS) for confined animal feeding operation
- Legend Dairy Farm #1
 - National Pollutant Discharge Elimination System (NPDES) Compliance Information System (ICIS) for concentrated animal feeding operation
 - California Enviroview California Environmental Reporting System (CERS) for being a Risk Management Plan (RMP) reporter
 - o Emission Inventory System (see below)
 - Integrated Compliance Information System formal enforcement action in 2007. According to information

The Site was identified on the Waste Discharge System (WDS) database as an agricultural facility with designated/influent or solid wastes that pose a significant threat to water quality (dairy waste ponds). The Site was also identified on the Emissions Inventory (EMI) Data between 2006 and 2015 for the following various emissions reported in tons per year:

	Total Organic Hydrocarbon Gases	Reactive Organic Gases	Carbon Monoxide Emissions	Oxides of Nitrogen	Oxides of Sulfur	Particulate Matter	Particulate Matter of 10 Micrometers and Smaller
2006	9.38	6.55	0.004	0.016	0	3.47	1.7
2007	9.38	6.55	0.004	0.016	0	3.47	1.7
2008	17.29	12.08	0	0	0	3.41	1.67
2009	18.49	12.92	0	0	0	3.69	1.81
2010	18.49	12.92	0	0	0	3.7	1.81
2011	18.49	12.92	0	0	0	3.7	1.81
2012	18.49	12.92	0	0	0	3.7	1.81
2013	18.04	12.92	0	0	0	3.7	1.81
2014	151.04	12.08	0	0	0	3.7	1.78
2015	114.94	9.19	0	0	0	3.7	1.78

These listings are not considered to represent a significant environmental concern.

Citadel reviewed information provided by Environmental Data Resources, Inc. (EDR) regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, no historical releases of petroleum products from a LUST occurred within 0.25-mile and upgradient of the Site. There are no properties within 0.125-mile and upgradient of the Site that are listed on the Historical Gas Station and Dry Cleaners databases. However, the Chino Airport property is located south of the Site and was identified as occupied by Flite Craft from as early as 1986 as an aircraft and heavy equipment repair services. This property will be discussed below.

Regulatory Agencies

The GeoTracker Database is the California State Water Resources Control Board's (SWRCB) Internet-accessible database system used by the SWRCB, regional boards, and local agencies to track and archive compliance data from authorized or unauthorized discharges of waste to land, or unauthorized releases of hazardous substances from underground storage tanks. The Site was

not identified in the database. According to Geotracker, the nearest Cleanup Program Site (CPS) is the Chino Airport (Airport), located at 7000 Merrill Avenue, located south of the Site. The primary chemicals of concern (COCs) in the groundwater at this CPS include trichloroethene (TCE); 1,2,3-trichloropropane (1,2,3-TCP); cis-1,2-dichloroethane; and 1,1-dichloroethene.

According to the Semiannual Groundwater Monitoring Report, dated January 31, 2018, and prepared by Tetra Tech, portions of the Airport have functioned as an airfield since the early 1940s. Since the 1960, the County of San Bernardino has operated the Airport as a public airport for commercial, industrial, and general aviation use. Past and present uses include a flight academy; aircraft sales and storage; modification of military aircraft; various manufacturing; crop dusting; aircraft restoration; maintenance repair shops; aircraft painting, stripping, and washing; fire retardant chemical mixing and loading; US Forest Service aircraft maintenance and operations; and aircraft museums. According to the report, three areas of concern (AOCs) were identified. These AOCs are located approximately 725 feet south of the Site; and 0.24 mile and 0.37 mile eastsoutheast of the Site. Based on the drawing depicting the TCE and 1,2,3-TCP groundwater plumes, the TCE plume is approximately 320 feet south of the Site. The nearest monitoring well, CAMW1, is located approximately 200 feet east-southeast of the Site and designated as an upgradient background well. Local groundwater flow direction was estimated toward the southeast. According to the report, no COCs have been detected in the background well to date. Based on the reviewed data, this CPS is not expected to be a significant environmental concern to the Site.

9.0 CONCLUSIONS AND RECOMMENDATIONS

According to ASTM Standard of Practice E1527-13, recognized environmental conditions (REC) fall under three specific categories when evaluating a site or properties within the site vicinity. These categories are defined below.

A recognized environmental condition, or REC, means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

A controlled recognized environmental condition, or CREC, is a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

An historical recognized environmental condition, or HREC, is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

According to ASTM E2600-15, the goal of conducting a vapor encroachment screening on a parcel of property is to identify a vapor encroachment condition (VEC), which is the presence or

likely presence of chemicals of concern vapors in the subsurface of the target property caused by the release of vapors from contaminated soil or groundwater or both either on or near the target property as identified by Tier 1 or Tier 2 procedures. The purpose of Tier 1 is to conduct a screen using Phase I ESA-type information to determine if a VEC exists at the target property. If the Tier 1 screen cannot rule out the possibility of a VEC existing at the target property, then a Tier 2 screen can be conducted. Tier 2 applies numeric screening criteria to existing or newly collected soil, soil gas, and/or groundwater testing results to evaluate whether or not a VEC can be rules out. Tier 2 has two data collective components: non-invasive and invasive.

Based on our review of these databases, reported off-Site release incidents that would represent RECs in connection with the Site or a source of a release that would be likely to contribute to a VEC were not identified. During the Site reconnaissance, three 300-gallon diesel ASTs were observed at the Site. The elevated ASTs were located on asphalt surface with an upper dirt layer. No secondary containment was observed under the ASTs. Some staining was observed in the dirt layer below two of the ASTs. At this point, it is unclear when the ASTs were installed and since the dairy farm has been in operation since at least the 1980s, the observed staining by the ASTs represent a REC. However, the staining would likely be localized to this area. In addition, heavy staining of the concrete floor by the compressors was observed. The staining is likely limited to the concrete floor; no cracks were observed on the surface floor. Citadel recommends the removal of the ASTs prior to Site development and preparing a soil management plan to manage the stained soils during redevelopment.

The historic and current use of the Site as a dairy-production farm may produce methane gas in the subsurface from animal wastes. Methane gas is a simple asphyxiant and when allowed to accumulate, can be explosive. Citadel recommends to conduct a subsurface assessment for the presence of methane.

The retention ponds collect surface wastes from across the Site, as well as provide a potential dumping area for other dairy and animal-related wastes. Due to the potential for chemical constituents to accumulate in the ponds and become trapped in the sediment, Citadel recommends conducting a limited subsurface assessment of the sediments aft the ponds have been drained to evaluate the sediments for chemical risks to human health and the environment.

Citadel also observed one potable groundwater well near the northeast corner of the Site. Citadel recommends that the well be abandoned and removed prior to Site development.

The current Site buildings were constructed prior to bans using asbestos-containing building materials (ACBMs) and polychlorinated biphenyls (PCBs) in electrical equipment came into effect in 1989 and 1978, respectively. No testing is known to have been performed to evaluate for the presence of ACBMs or PCBs at the Site.

Prior to renovation or demolition of building components, particularly roofing materials, Citadel recommends that the Client perform a survey for ACBMs prior to renovation or demolition activities. Such surveys should be performed to identify if ACBMs are present and to ensure proper handling and disposal.

10.0 LIMITATIONS

The information and opinions rendered in this report are exclusively for use by the Client. Citadel Environmental Services, Inc. will not distribute this report without the Client's written consent, except as may be required by law or court order. The recommendations expressed in this report

took into consideration the purpose and scope of this limited assignment. We accept responsibility for the competent performance of our duties in executing the assignment and preparing this report in accordance with the normal standards of our profession, but disclaim any responsibility for consequential damages resulting from inaccuracies in information provided by the Client, federal, state, county, or local regulatory agencies.

12.0 PROFESSIONAL CERTIFICATION

Citadel has completed a Phase I Environmental Site Assessment (ESA) of the property located at 7233 Eucalyptus Avenue in Ontario, San Bernardino County, California. The Phase I ESA was performed at the Clients request in accordance with the American Society for Testing and Materials (ASTM) Standard of Practice E1527-2013 and the standards of care and diligence normally practiced by recognized consulting firms in performing services of a similar nature.

The independent conclusions represent our professional judgment based on information and data available to Citadel during the course of this project. Information regarding historical and present operations, conditions and test data provided by the Client or their representative, is assumed to be correct and complete. The conclusions presented by this Phase I ESA are based on information provided to Citadel and from observations and perceived conditions existing on the date of the site reconnaissance.

In expressing the opinions stated in this report, Citadel has exercised the degree of skill and care ordinarily exercised by a reasonable prudent environmental professional. Documentation provided by the Client, Client-designated representatives, interested third-parties, or from the public domain, and referenced in preparation of the Phase I ESA report, have been assimilated with the understanding that Citadel assumes no responsibility or liability for their accuracy.

Roopal Jani

Staff Geologist, Environmental Geology and Engineering

EXPERIENCE

Ms. Jani's experience is in the fields of environmental remediation, geology, and geochemistry. She has previously worked at the Pacific Northwest National Laboratory (PNNL), as a Research Associate, and at Louis Berger NY, as a Junior Hydrogeologist. At PNNL, Ms. Jani was involved in the development of reactive gas-based remediation methods for contaminated soils at the Hanford Site in Washington. While at Louis Berger, Ms. Jani was involved in groundwater remediation and monitoring projects for Superfund sites in New York (Newtown Creek) and New Jersey (Cornell-Dubilier Electronics). Ms. Jani has experience working with geochemical analysis techniques like Inductively Coupled Plasma Mass Spectrometry (ICP-MS), and X-Ray Diffraction (XRD), sampling techniques for groundwater, soil and soil vapor, designing laboratory scale experiments, and preparing technical documents and proposals. Ms. Jani's graduate thesis research focused on the electrochemical and biochemical characterization of the microbial species Shewanella oneidensis, with applications in bioremediation and fundamental evolutionary geology.

ROLE

As Staff Geologist, Ms. Jani's primary responsibility is to assist Senior Operations in the direction, organization, control, and completion of Environmental Geology and Engineering-related projects awarded to Citadel. Her unique experience and skills will significantly enhance the capabilities of the Environmental Geology and Engineering group at Citadel.

EDUCATION

Ms. Jani holds a Master of Science degree in Geology from the University of Wyoming, as well as Bachelor and Master of Science degrees in Geology from the University of Pune (India). Her professional certifications include OSHA's 40 Hour HAZWOPER and NSC's First Aid/Adult CPR/AED.

Director of Environmental Geology & Engineering

EXPERIENCE

With over **30 years** of experience in environmental engineering, compliance, permitting and management projects, Mr. Drollinger has a strong working knowledge of EPA, DTSC, AQMD/APCD, OSHA and DOT regulations; and with local agencies, fire departments and public works. Mr. Drollinger has provided environmental engineering, assessment and compliance, safety management, and engineering construction management services on numerous projects for the US Navy, Veterans Administration, US Department of Agriculture, Cal Trans, EPA and numerous private projects throughout the western United States. In addition, Mr. Drollinger has developed and implemented programs to train managers and staff in storm water and NPDES compliance, soil and groundwater sample collection and data interpretation, Hazcomm, IIPP, and safe-work practices such as identifying and handling hazardous materials, fall protection, confined space, traffic control, LO/TO and ergonomics; and has conducted environmental and permitting audits of facilities including health and safety assessments.

ROLE

As Director of Environmental Geology & Engineering, Mr. Drollinger's primary responsibility includes developing and implementing health and safety protocols; safety training of management, staff and subcontractor personnel; establishing and managing budgets and personnel; negotiating with local, regional, state, and federal agencies; litigation support; and coordinating tasks with multi-discipline project teams.

Mr. Drollinger works closely with, and often develops protocols for conducting assessments related to Environmentally Regulated Materials Management (ERM), Industrial Hygiene (IH), and Occupational Safety and Training (OST) departments.

EDUCATION

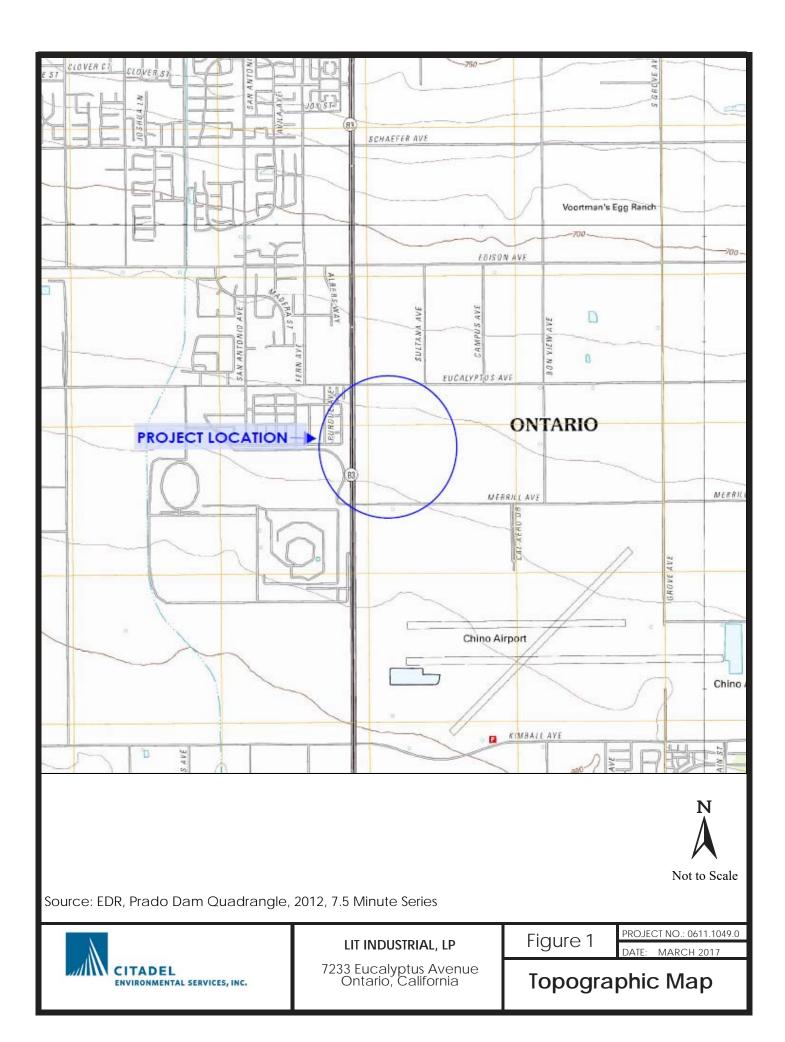

Mr. Drollinger has a B.S. in Applied and Natural Sciences from the University of Alabama, and a M.Eng. in Advanced Safety Engineering and Management, University of Alabama, Birmingham.

Mr. Drollinger is also a certifying board member of the American Council of Accredited Certifications (formerly known as the American Indoor Air Quality Council), and is a member of the American Society of Safety Engineers, Board of Certified Safety Professionals, Institute of Hazardous Materials Management, Institute of Industrial Engineers and International Facilities Management Association.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Citadel Environmental Services on Feb 20, 2018.

TARGET PROPERTY

7233 Eucalyptus Avenue Chino, CA 91710

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

GLOSSARY

General Building Department concepts

- ICC: The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections): This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- Jurisdiction: This is the geographic area representing the properties over which a Permitting Authority has
 responsibility.
- GC: General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- Sub: Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- Journeymen: Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- HVAC (Mechanical, Heating & Air companies): HVAC = Heating, Ventilation, and Air Conditioning.
- ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release): Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other commons reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- "Pull" a permit: To obtain and pay for a building permit.
- CBO: Chief Building Official
- Planning Department: The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- Zoning Department: The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- Zoning District: A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- PIN (TMS, GIS ID, Parcel#): Property Identification Number and Tax Map System number.
- State Card (Business license): A license card issued to a contractor to conduct business.
- Building Inspector (Inspector): The inspector is a building department employee that inspects building construction for compliance to codes.
- C.O.: Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.
- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000 Permit Type: Bldg -New Permit Number: 10100000405 Status: Valuation: \$1,000,000.00 Contractor Company: OWNER-BUILDER Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Citadel Environmental Services were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Citadel Environmental Services were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- · search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050 with any guestions or comments.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/11/2017 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

CHINO AIRPORT NAPALM	7000 MERRILL AVENUE	SE 1/4 - 1/2 (0.355 mi.)	J41	57

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/30/2017 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

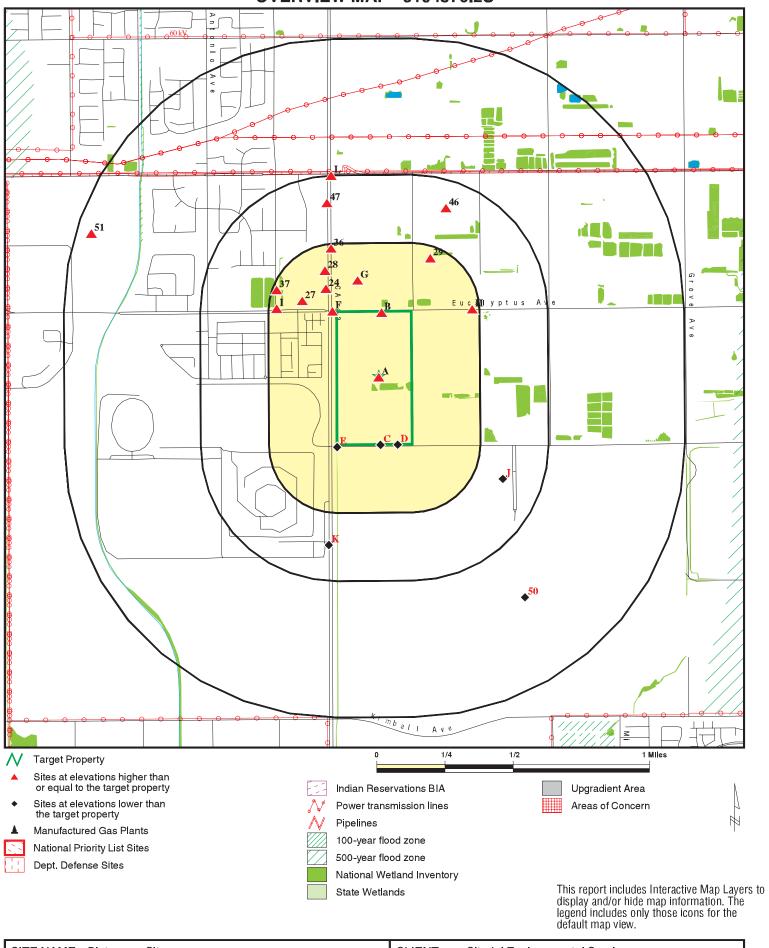

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Environmental Interest/Information System AIR EMISSIONS CLASSIFICATION UNKNOWN

> US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Int	erest/Information System California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.	
	RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Title:	Oral Communication on 05/08/2008 for Lack of BMPs and Housekeep
Description:	There are still 55-gal drums, partially filled with mix
	fluids (waste oils, waste detergents, and unknown fluid),
	two 5,500-gal totes filled with waste oil, without
	secondary containment nor under cover. Waste water from the
	washing areas collected along the south side of the
	property, pooling all the way to the front side of the
	property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Lead Agency: SANTA ANA RWQCB (REGION 8) Lead Agency Case Number: Not reported 33.9771752582545 -117.647438049316 Longitude: Case Type: Cleanup Program Site Case Worker: PAH Local Agency: Not reported **RB** Case Number: Not reported File Location: **Regional Board** Potential Media Affected: Soil Potential Contaminants of Concern: Benzene, Toluene, Xylene, Other Petroleum In the afternoon of July 22, 2010, three buried drums were discovered Site History: during trenching for installation of a storm drain pipeline for a new facility for SCE. Additional drums were discovered during the response activities. By sunset, eight buried drums had been removed from the excavation. The drums did not have lids and contained soil that had been placed on top of other materials. The contents of the drums were field tested using a HazCat chemical identification kit, and determined to be a non-explosive, flammable, non-corrosive, organic resin-type material. The eight drums were placed in a roll-off bin. Two more drums were visible in the excavation, but were left in place due to limited remaining daylight. Samples were collected of the soil, the material in the drums, and the liquid in one of the drums. The samples were delivered to Microbac Laboratory in Riverside, and analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), total petroleum hydrocarbons (TPH) carbon range, polynuclear aromatic hydrocarbons (PAHs), CAM17 metals, and flashpoint (only the liquid sample). The analytical results indicated that high concentrations of benzene were present in all of the samples. Also detected were toluene, ethylbenzene, xylene, styrene, 1,2,4-trimethylbenzene, and naphthalene. On July 28, 2010, a geophysical survey was conducted in an effort to locate any additional buried drums. During the survey, several areas to the east and west of the original excavation were marked as possible targets for further investigation. Excavation and removal of additional drums was conducted between August 16 and August 25, 2010. A total of 51 drums, several aluminum canisters and pieces of wood were removed from the excavation and placed in roll-off-bins. Excavated soil was stockpiled and covered with plastic sheeting. Additional soil was excavated from beneath the drums, placed in stockpiles and covered. The resulting excavation measured approximately 100 feet from east to west and 20 feet from north to south. The bottom of the excavation varied from 10 to 15 feet below ground surface. Patricia Hannon of Board Staff observed the collection of the final confirmation soil samples on August 26, 2010. Staff from the U.S. EPA and the California Department of Toxic Substances Control were also present. The samples were submitted to a California certified laboratory for analysis as per the TCRAP. The analytical results for the soil samples showed only very low concentrations of benzene (<1 to 1.28 micrograms/kilogram (a%g/kg)), ethylbenzene (<1 to 2.24 a%g/kg), xylene (<1 to 28.8 a%g/kg), 1,3,5 trimethylbenzene (<5 to 55.4 a%g/kg), naphthalene (<5 to 10.9 a%g/kg), TPH gasoline range (<1 to 4.71 milligrams/kilogram (mg/kg)), TPH diesel range <1 to 123 mg/kg, and TPH motor oil range (<1 to 355 mg/kg).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/11/2017 Date Data Arrived at EDR: 12/22/2017 Date Made Active in Reports: 01/05/2018 Number of Days to Update: 14 Source: EPA Telephone: N/A Last EDR Contact: 02/06/2018 Next Scheduled EDR Contact: 04/16/2018 Data Release Frequency: Quarterly

NPL Site Boundaries

EPA Region 5 Telephone 312-886-6686

EPA Region 10 Telephone 206-553-8665

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991 Date Data Arrived at EDR: 02/02/1994 Date Made Active in Reports: 03/30/1994 Number of Days to Update: 56 Source: EPA Telephone: 202-564-4267 Last EDR Contact: 08/15/2011 Next Scheduled EDR Contact: 11/28/2011 Data Release Frequency: No Update Planned

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017 Date Data Arrived at EDR: 12/22/2017 Date Made Active in Reports: 01/05/2018 Number of Days to Update: 14 Source: EPA Telephone: N/A Last EDR Contact: 02/06/2018 Next Scheduled EDR Contact: 04/16/2018 Data Release Frequency: Quarterly

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 01/05/2018
Number of Days to Update: 92	Next Scheduled EDR Contact: 04/16/2018

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/11/2017 Date Data Arrived at EDR: 12/22/2017 Date Made Active in Reports: 01/12/2018 Number of Days to Update: 21 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 02/06/2018 Next Scheduled EDR Contact: 04/30/2018 Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/11/2017 Date Data Arrived at EDR: 12/22/2017 Date Made Active in Reports: 01/12/2018 Number of Days to Update: 21 Source: EPA Telephone: 800-424-9346 Last EDR Contact: 02/06/2018 Next Scheduled EDR Contact: 04/30/2018 Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/26/2017	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/11/2017 Date Data Arrived at EDR: 12/26/2017 Date Made Active in Reports: 02/09/2018 Number of Days to Update: 45 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 01/19/2018 Next Scheduled EDR Contact: 04/09/2018 Data Release Frequency: Quarterly

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017 Date Data Arrived at EDR: 12/26/2017 Date Made Active in Reports: 02/09/2018 Number of Days to Update: 45 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 01/19/2018 Next Scheduled EDR Contact: 04/09/2018 Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/11/2017 Date Data Arrived at EDR: 12/26/2017 Date Made Active in Reports: 02/09/2018 Number of Days to Update: 45 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 01/19/2018 Next Scheduled EDR Contact: 04/09/2018 Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017 Date Data Arrived at EDR: 12/26/2017 Date Made Active in Reports: 02/09/2018 Number of Days to Update: 45 Source: Environmental Protection Agency Telephone: (415) 495-8895 Last EDR Contact: 01/19/2018 Next Scheduled EDR Contact: 04/09/2018 Data Release Frequency: Quarterly

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/22/2017	Source: Department of the Navy
Date Data Arrived at EDR: 06/13/2017	Telephone: 843-820-7326
Date Made Active in Reports: 09/15/2017	Last EDR Contact: 02/09/2018
Number of Days to Update: 94	Next Scheduled EDR Contact: 05/28/2018
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 11/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/27/2017	Telephone: 703-603-0695
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018
Number of Days to Update: 74	Next Scheduled EDR Contact: 03/12/2018
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/13/2017 Date Data Arrived at EDR: 11/27/2017 Date Made Active in Reports: 02/09/2018 Number of Days to Update: 74 Source: Environmental Protection Agency Telephone: 703-603-0695 Last EDR Contact: 01/19/2018 Next Scheduled EDR Contact: 03/12/2018 Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 09/18/2017 Date Data Arrived at EDR: 09/21/2017 Date Made Active in Reports: 10/13/2017 Number of Days to Update: 22 Source: National Response Center, United States Coast Guard Telephone: 202-267-2180 Last EDR Contact: 01/19/2018 Next Scheduled EDR Contact: 04/09/2018 Data Release Frequency: Quarterly

State- and tribal - equivalent NPL

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 10/30/2017Source: Department of Toxic Substances ControlDate Data Arrived at EDR: 10/31/2017Telephone: 916-323-3400Date Made Active in Reports: 12/15/2017Last EDR Contact: 01/31/2018Number of Days to Update: 45Next Scheduled EDR Contact: 05/14/2018Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 10/30/2017 Date Data Arrived at EDR: 10/31/2017 Date Made Active in Reports: 12/15/2017 Number of Days to Update: 45 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 01/31/2018 Next Scheduled EDR Contact: 05/14/2018 Data Release Frequency: Quarterly

State and tribal landfill and/or solid waste disposal site lists

SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or i nactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 11/13/2017 Date Data Arrived at EDR: 11/14/2017 Date Made Active in Reports: 12/07/2017 Number of Days to Update: 23 Source: Department of Resources Recycling and Recovery Telephone: 916-341-6320 Last EDR Contact: 02/14/2018 Next Scheduled EDR Contact: 05/28/2018 Data Release Frequency: Quarterly

Date of Government Version: 07/27/2015 Date Data Arrived at EDR: 09/29/2015 Date Made Active in Reports: 02/18/2016 Number of Days to Update: 142 Source: EPA, Region 1 Telephone: 617-918-1102 Last EDR Contact: 12/20/2017 Next Scheduled EDR Contact: 04/09/2018 Data Release Frequency: Varies

VCP: Voluntary Cleanup Program Properties

Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

Date of Government Version: 10/30/2017 Date Data Arrived at EDR: 10/31/2017 Date Made Active in Reports: 12/15/2017 Number of Days to Update: 45 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 01/31/2018 Next Scheduled EDR Contact: 05/14/2018 Data Release Frequency: Quarterly

State and tribal Brownfields sites

BROWNFIELDS: Considered Brownfieds Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 12/22/2017 Date Data Arrived at EDR: 12/26/2017 Date Made Active in Reports: 01/31/2018 Number of Days to Update: 36 Source: State Water Resources Control Board Telephone: 916-323-7905 Last EDR Contact: 12/26/2017 Next Scheduled EDR Contact: 04/09/2018 Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 01/19/2018 Date Data Arrived at EDR: 01/19/2018 Date Made Active in Reports: 02/09/2018 Number of Days to Update: 21 Source: Environmental Protection Agency Telephone: 202-566-2777 Last EDR Contact: 01/19/2018 Next Scheduled EDR Contact: 04/02/2018 Data Release Frequency: Semi-Annually

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT: Waste Management Unit Database

Waste Management Unit Database System. WMUDS is used by the State Water Resources Control Board staff and the Regional Water Quality Control Boards for program tracking and inventory of waste management units. WMUDS is composed of the following databases: Facility Information, Scheduled Inspections Information, Waste Management Unit Information, SWAT Program Information, SWAT Report Summary Information, SWAT Report Summary Data, Chapter 15 (formerly Subchapter 15) Information, Chapter 15 Monitoring Parameters, TPCA Program Information, RCRA Program Information, Closure Information, and Interested Parties Information.

	Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 01/09/2018	Source: Drug Enforcement Administration

HIST UST: Hazardous Substance Storage Container Database The Hazardous Substance Storage Container Database is a historical listing of UST sites. Refer to local/county source for current data.

Date of Government Version: 10/15/1990 Date Data Arrived at EDR: 01/25/1991 Date Made Active in Reports: 02/12/1991 Number of Days to Update: 18 Source: State Water Resources Control Board Telephone: 916-341-5851 Last EDR Contact: 07/26/2001 Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

CA FID UST: Facility Inventory Database

The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/1994 Date Data Arrived at EDR: 09/05/1995 Date Made Active in Reports: 09/29/1995 Number of Days to Update: 24 Source: California Environmental Protection Agency Telephone: 916-341-5851 Last EDR Contact: 12/28/1998 Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

Local Land Records

LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 11/30/2017 Date Data Arrived at EDR: 12/01/2017 Date Made Active in Reports: 01/11/2018 Number of Days to Update: 41 Source: Department of Toxic Substances Control Telephone: 916-323-3400 Last EDR Contact: 11/30/2017 Next Scheduled EDR Contact: 03/19/2018 Data Release Frequency: Varies

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 12/11/2017 Date Data Arrived at EDR: 12/22/2017 Date Made Active in Reports: 01/12/2018 Number of Days to Update: 21 Source: Environmental Protection Agency Telephone: 202-564-6023 Last EDR Contact: 02/06/2018 Next Scheduled EDR Contact: 05/21/2018 Data Release Frequency: Semi-Annually

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

US FIN ASSUR: Financial Assurance Information

All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

Date of Government Version: 10/17/2017 Date Data Arrived at EDR: 11/01/2017 Date Made Active in Reports: 12/08/2017 Number of Days to Update: 37 Source: Environmental Protection Agency Telephone: 202-566-1917 Last EDR Contact: 01/19/2018 Next Scheduled EDR Contact: 04/09/2018 Data Release Frequency: Quarterly

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014 Number of Days to Update: 88 Source: Environmental Protection Agency Telephone: 617-520-3000 Last EDR Contact: 01/31/2018 Next Scheduled EDR Contact: 05/21/2018 Data Release Frequency: Quarterly

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A Next Scheduled EDR Contact: N/A Data Release Frequency: Varies

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

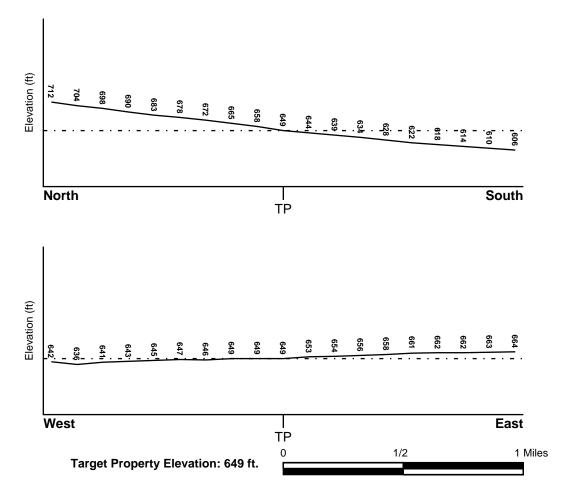

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06071C9335H	FEMA FIRM Flood data
Additional Panels in search area:	FEMA Source Type

NATIONAL WETLAND INVENTORY	NWI Electronic
NWI Quad at Target Property PRADO DAM	Data Coverage YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:			
Search Radius:	1.25 miles		
Status:	Not found		

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID Not Reported LOCATION FROM TP GENERAL DIRECTION GROUNDWATER FLOW

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

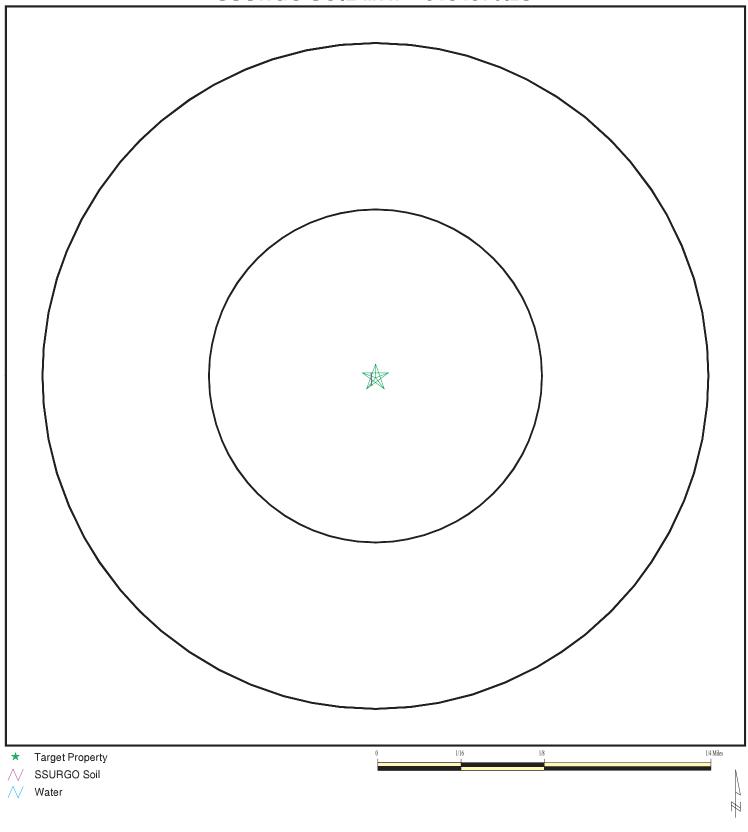

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1	
Soil Component Name:	CHINO
Soil Surface Texture:	silt loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Somewhat poorly drained
Hydric Status: Not hydric	
Corrosion Potential - Uncoated Steel:	High
Depth to Bedrock Min:	> 0 inches
Depth to Watertable Min:	> 0 inches

	Soil Layer Information						
Boundary			Boundary Classificati	fication	Saturated hydraulic		
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	conductivity micro m/sec	
1	0 inches	16 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	16 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA Telephone: 877-336-2627 Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish & Game Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS) Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS) This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database Source: Department of Water Resources Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations Source: Department of Conservation Telephone: 916-323-1779 Oil and Gas well locations in the state.

RADON

State Database: CA Radon Source: Department of Health Services Telephone: 916-324-2208 Radon Database for California

Area Radon Information

Source: USGS Telephone: 703-356-4020 The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones Source: EPA Telephone: 703-356-4020 Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

WDS: Other Ascertainable Records

Facility ID:	Santa Ana River 365716001
Facility Type:	Agricultural - Facility that treats and/or disposes of the wastes associated with confined and concentrated animal feeding, confined animal feeding, confined animal holding, confined and concentrated aquatic animal production facilities, and aquaculture. the treatment and/or disposal of agricultural return water is included in this category.
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number:	CAG018001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion:	8
Facility Telephone:	Not Reported
Facility Contact:	DAN SWAGER
Agency Name:	SWAGER DAN
Agency Address:	7233 EUCALYPTUS AVENUE
Agency City,St,Zip:	CHINO 91710
Agency Contact:	DAN SWAGER
Agency Telephone:	Not Reported
Agency Type:	Private
SIC Code:	241
SIC Code 2:	Not Reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	STORMS
Waste Type2:	Ν
Waste2:	Stormwater Runoff

SWAGER & SONS DAIRY #2, 7233 EUCALYPTUS, CHINO, CA 91710 (Continued)

Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Solid Wastes
Secondary Waste Type:	Nonhazardous Solid Wastes/Influent or Solid Wastes that contain nonhazardous putrescible and non putrescible solid, semisolid, and liquid wastes (E.G., garbage, trash, refuse, paper, demolition and construction wastes, manure, vegetable or animal solid and semisolid waste).
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.
