

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: OCWD-43R Monitoring Well Replacement Project

Lead Agency: Orange County Water District

Contact Name: Shawn Nevill, Principal Planner

Email: snevill@ocwd.com Phone Number: 714-378-3256

Project Location: Costa Mesa Orange County
City *County*

Project Description (Proposed actions, location, and/or consequences).

The proposed project involves the construction and operation of a multi-depth monitoring well located on the Orange Coast College (OCC) campus in the City of Costa Mesa, California. The proposed 5-casing nested monitoring well would replace existing well OCWD-M43 that is currently maintained by Orange County Water District (OCWD) within the OCC campus. The purpose of the well is to monitor potential seawater intrusion and groundwater flow beneath the Newport Mesa. The existing monitoring well is located within the planned footprint development of a future student housing construction project and would be removed by OCC as part of a separate student housing project.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Potential for impacts to unknown cultural and tribal cultural resources that could be discovered during ground disturbing activities.

Mitigation measures identified include

- MM CR-1, which would halt construction in the event that sensitive cultural resources are encountered
- MM TCR-1, which would allow for Tribal monitoring of construction activities to a depth of 40 feet below the ground surface.
