Continued from page 1:								

Purpose and Need:

The purpose of the proposed project is to obtain geologic data to determine if the project location is appropriate for a retaining wall related to a future permanent restoration project. The project is needed because the Department does not have any data relating to the geological condition of the underlying rock and bedrock.

Construction Activities:

- Geotech core drilling (4"-6" up to 100' deep)
- Standard T-13 Lane Closure (State Route 70 to remain open)

Staging Areas:

Construction activities would occur within the roadway of State Route 70 or within the associated shoulder area. Activities would remain within Caltrans right-of-way and off-site staging would not be required.

Disposal/Borrow Areas:

Excess drilling waste is stored in sealed containers and transported to a licensed waste disposal facility. All holes will be properly sealed with grout in accordance with all applicable state, federal, and local water quality laws. No borrow needed.

Right-of-Way/Utilities:

Project will not require additional right-of-way or utility relocation.

Consultation/Coordination:

This project falls Under Stipulation VII of the Programmatic Agreement of Section 106 of the National Historic Preservation Act. This undertaking is a "screened undertaking" as class 29 of the MOU. Accordingly, this undertaking is exempt from further review or consultation.

Coordination with regulatory agencies has been conducted through database searches.

Permits:

No regulatory agency permits are required for this project.
