Project Location:

<u>Waterways:</u> Wildcat Creek, San Pablo Creek, Rheem Creek, San Pablo Bay <u>Railways:</u> Amtrak Railway, Bay Area Rapid Transit (BART), BNSF Railway, Union Pacific <u>Schools:</u> Verde Elementary, Lake Elementary, Middle College High School, Highland Elementary, Salesian College Preparatory, Ford Elementary, Chavez Elementary, Grant Elementary, El Nuevo Mundo-National, Peres Elementary, Lighthouse Montessori School, Elim Christian School, Lincoln Elementary, Nystrom Elementary

Project Description:

The Fred Jackson Way First Mile/Last Mile Connection Project proposes to construct complete street improvements and streetscape enhancements along Fred Jackson Way, between Grove Avenue and Brookside Drive (Project). The Project is located in North Richmond, and unincorporated area of Contra Costa County. The purpose of the Project is to improve facilities and connectivity for pedestrians and bicyclists.

Currently, from Grove Avenue to Wildcat Creek, there are substandard sidewalks with utility poles blocking pedestrian access. Pedestrians often walk on the street as a result. In this area, there are parks, a school, bus stops, and other community gathering places that would be better served with improved sidewalks. From Wildcat Creek to Brookside Drive, there are no sidewalks or bike lanes, and the proposed pedestrian path and bike lane would improve facilities along this route.

In the southern segment of the Project stretching from Grove Avenue to Wildcat Creek Bridge (0.3 miles) on each side of the street, the sidewalk will be widened to widths varying between 7 feet and 9 feet into the existing roadway which currently has width to accommodate the widened sidewalk. Additional work within the paved roadway will include potential resurfacing and restriping to include buffered bike lanes. Other modifications may include bulb-outs, street trees and Green Infrastructure Facilities.

In the northern segment of the Project from Wildcat Creek to Brookside Drive (0.3 miles), the Project will construct a five-foot wide pedestrian path on the east side of the roadway. The section between Da Villa and Brookside Drive will include pavement widening and restriping to incorporate the new pedestrian path and new buffered bike lanes on both sides of the roadway. The Project will continue the pedestrian pathway via a separated pedestrian path between Pittsburg Avenue and Brookside Drive. The proposed pedestrian path will require right-of-way acquisition. It is expected that a few non-native trees will be removed. Potential tree removal includes but is not limited to two eucalyptus trees, and is not to exceed 16 trees. No structural modifications will be made to the bridge at Wildcat Creek, but the striping will be modified to narrow vehicle-travel lanes to accommodate bike lanes.

Both segments will include drainage modifications, ADA compliant curb ramps and possible utility relocations/adjustments. Tree and vegetation trimming may be necessary throughout the Project area. One lane will be open during construction activities. Standard lane closures and traffic control will be utilized during construction. No traffic detours are necessary. Project construction is anticipated to begin in May of 2021 and take approximately three months to complete.
