**SUBJECT: Filing of Notice of Determination pursuant to Public Resources Code section 21108**

**State Clearinghouse Number:**

**Project Title:** Santucci Blvd. Segments 1 and 2 (Streambed Alteration Agreement No. 1600-2019-0027-R2)

**Project Location (include county):** The project is located on an unnamed tributary to Curry Creek, in the City of Roseville, County of Placer, State of California; Latitude 38.778243, Longitude -121.399622, and Latitude 38.775282, Longitude -121.400068; in Section 27, Township 11 North, Range 5 East of the Mt. Diablo Meridian, USGS 7.5' quad 'Pleasant Grove'.

**Project Description:** The California Department of Fish and Wildlife (CDFW) has executed Streambed Alteration Agreement number 1600-2019-0027-R2, pursuant to section 1602 of the Fish and Game Code to the project Applicant, Westpark S.V. 400, LLC as represented by Jeff Jones.

The project is limited to the staging and development of a segment of Santucci Boulevard, the installation of stormwater outfalls and the creation of a bio-retention basin with an adjacent water quality swale. The Project is an infrastructure component within the Sierra Vista Specific Plan in western Roseville.

The project as a whole includes two sub-projects consisting of the construction of the road segment, two drainage outfalls, and a retention/infiltration basin and swale.

**Sub-Projects:**

1. **Santucci Boulevard Extension Segments 1 & 2:** Construction of Santucci Boulevard segments 1 & 2 along with associated utilities. The construction consists of the grading and paving of the extension segments, the installation of utilities and the installation of two stormwater outfalls (24" and 60") into the Santucci Boulevard bio-filtration basin. Erosion control measures such as wattles, hydro-seeding and straw with tackifier will be placed to stabilize the site once the grading is completed.
2. **Santucci Boulevard Outfall Swale Connection and Biofiltration Basin:** Installation of a 480-foot-long, 120-foot-wide, 1-foot deep bio-infiltration basin and associated water quality swale. The swale and basin will be excavated with a backhoe and seeded with upland and lowland seed mixes. The basin will capture, treat and filter the low flow stormwater before it enters the intermittent drainage. High flows will be diverted to the water quality swale to slow the flows while the vegetation provides treatment prior to entering the intermittent drainage. A portion (68 sq. ft) of the bank of the intermittent drainage will be excavated to tie in the water quality swale. Rip rap and erosion control blankets will be used to protect the basin spillway during high flow events.

This is to advise that CDFW, acting as a Responsible Agency, approved the above described project on the date signed below and has made the following determinations regarding the project pursuant to California Code of Regulations section 15096, subdivision (i):

- 1. The project  will /  will not have a significant effect on the environment. This determination is limited to effects within CDFW's permitting jurisdiction as a Responsible Agency.
- 2. CDFW considered the environmental impact report prepared by the Lead Agency for this project pursuant to California Code of Regulations section 15096, subdivision (f).
- 3. Mitigation measures  were /  were not made a condition of CDFW's approval of the project.
- 4. A mitigation reporting or monitoring plan  was /  was not adopted by CDFW for this project.
- 5. A statement of overriding considerations  was /  was not adopted by CDFW for this project.
- 6. Findings  were /  were not made by CDFW pursuant to California Code of Regulations section 15091.

The final environmental impact report prepared for the project is available to the general public at the office location listed above for the Lead Agency. CDFW's record of project approval as Responsible Agency is available at CDFW's regional office.
