Reasons why project is exempt: Class 1 consists of the operation, repair, maintenance, permitting, leasing, licensing or minor alteration of existing public or private structutres. Bayshore Marina is an existing private marina providing docking facilities to recreational boat owners and guests. Class 1 specifically allows for the restoration or rehabilitation of deteriorated or damaged structures (Section 15301(d)). No environmental impacts will occur during the redecking and replacement of dock equipment. Equipment staging will be done from the land-side parking area and the repairs will not result in the expansion of or change in the existing configuration of the marina. Therefore, the Bayshore Marina redecking project can be considered exempt under a Class 1 Categorical exemption.
