Project Description: (please use a separate page if necessary)

The proposed project would involve the demolition of the current two span, 23-foot, two-lane Keyes Road Bridge over the TID Ceres Main Canal and associated roadway approaches and replacement with a new concrete bridge in the same location. The proposed bridge would have an overall width of approximately 44 feet accommodating two 12-foot-wide lanes, two eight-foot-wide shoulders, and Caltrans standard vehicular barriers. This would result in an increase of approximately four feet on each side of the existing bridge alignment. The new bridge would provide the same number of existing travel lanes as the County does not have plans to widen the Keyes Road corridor. The replacement bridge would be designed to meet the roadway requirements in the American Association of State Highway and Transportation Officials (AASHTO) Green Book as well as the County's Standard Specifications and Drawings for a two-lane major collector (rural). The proposed project would increase the load limit of the bridge, improve safety for motorists and minimize vehicular accidents.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
