Franklin School Project

Unmitigated School - Construction Health Risk Assumptions

Source Name	Description
Haul1A	Haul Route: Copeland from Site to Meade
HaulB	Haul Route: Copeland from Meade Ave to El Cajon Blvd
HaulC	Haul Route: El Cajon Blvd from Site to I-15
Haul2A	Haul Route: Maede form Site to Copeland
MOD	Modernization activities for Buildings 01-01, 02-02, and 02-03
NB1	New Building Demolition and Grading areas
NB2	Building Construction and Architectural Coating Areas
NB3	Paving areas

Construction activities can occur between 7 am and 7 pm Monday through Friday.

Receptor Designations

Residential #43 to 806

RES50 #1 to 272 - Residential receptors with 50 meter spacing

RES10 #273 to #806 - Residential receptors with 10 meter spacing

School

LL #807 to 820 - Onsite receptrs for the library and LLC building - Impacted by all phases

02-02 #821 to 835 - Onsite receptors for building 02-02. Impacted by all but 1/3 of Modernization.

01-01 #836 to 850 - Onsite receptors for building 01-01. Impacted by all but 1/3 of Modernization.

02-03 #851 to 865 - Onsite receptors for building 02-03. Impacted by all but 1/3 of Modernization.

Port #866 to 872 - Onsite receptors for portable buildings. Impacts vary by building

School receptors: Risk for onsite receptors is determined by conservately assuming that all onsite receptors are exposed for the duration of the construction project. However, because modernization requires painting and repairs to classrooms, it is anticipated that students sould be located in the portable classrooms during the time the reparis to their classrooms are occurring. As the portable classrooms are located on the other side of the campus from the new building construction (greatest risk source) risk to students would be similar or lower at the portable classrooms than they would in the library or building 02-03. Also, as a conservative estimate of onsite risk, the Assembly and Administrative building (building 02-03) is evaluated as if it were regular classrooms.

Franklin School Project

Mitigated Residential - Construction Health Risk Assumptions

Source Name	Description
Haul1A	Haul Route: Copeland from Site to Meade
HaulB	Haul Route: Copeland from Meade Ave to El Cajon Blvd
HaulC	Haul Route: El Cajon Blvd from Site to I-15
Haul2A	Haul Route: Maede form Site to Copeland
MOD	Modernization activities for Buildings 01-01, 02-02, and 02-03
NB1	New Building Demolition and Grading areas
NB2	Building Construction and Architectural Coating Areas
NB3	Paving areas

Construction activities can occur between 7 am and 7 pm Monday through Friday.

Receptor Designations

Residential #43 to 806

RES50 #1 to 272 - Residential receptors with 50 meter spacing

RES10 #273 to #806 - Residential receptors with 10 meter spacing

School

LL #807 to 820 - Onsite receptrs for the library and LLC building - Impacted by all phases

02-02 #821 to 835 - Onsite receptors for building 02-02. Impacted by all but 1/3 of Modernization.

01-01 #836 to 850 - Onsite receptors for building 01-01. Impacted by all but 1/3 of Modernization.

02-03 #851 to 865 - Onsite receptors for building 02-03. Impacted by all but 1/3 of Modernization.

Port #866 to 872 - Onsite receptors for portable buildings. Impacts vary by building

School receptors: Risk for onsite receptors is determined by conservately assuming that all onsite receptors are exposed for the duration of the construction project. However, because modernization requires painting and repairs to classrooms, it is anticipated that students sould be located in the portable classrooms during the time the reparis to their classrooms are occurring. As the portable classrooms are located on the other side of the campus from the new building construction (greatest risk source) risk to students would be similar or lower at the portable classrooms than they would in the library or building 02-03. Also, as a conservative estimate of onsite risk, the Assembly and Administrative building (building 02-03) is evaluated as if it were regular classrooms.
