Franklin School Project

Mitigated School - Construction Health Risk Assumptions

Source Name	Description
Haul1A	Haul Route: Copeland from Site to Meade
HaulB	Haul Route: Copeland from Meade Ave to El Cajon Blvd
HaulC	Haul Route: El Cajon Blvd from Site to I-15
Haul2A	Haul Route: Maede form Site to Copeland
MOD	Modernization activities for Buildings 01-01, 02-02, and 02-03
NB1	New Building Demolition and Grading areas
NB2	Building Construction and Architectural Coating Areas
NB3	Paving areas

Construction activities can occur between 7 am and 7 pm Monday through Friday.

Receptor Designations

Residential #43 to 806

RES50 #1 to 272 - Residential receptors with 50 meter spacing

RES10 #273 to #806 - Residential receptors with 10 meter spacing

School

LL #807 to 820 - Onsite receptrs for the library and LLC building - Impacted by all phases

02-02 #821 to 835 - Onsite receptors for building 02-02. Impacted by all but 1/3 of Modernization.

01-01 #836 to 850 - Onsite receptors for building 01-01. Impacted by all but 1/3 of Modernization.

02-03 #851 to 865 - Onsite receptors for building 02-03. Impacted by all but 1/3 of Modernization.

Port #866 to 872 - Onsite receptors for portable buildings. Impacts vary by building

School receptors: Risk for onsite receptors is determined by conservately assuming that all onsite receptors are exposed for the duration of the construction project. However, because modernization requires painting and repairs to classrooms, it is anticipated that students sould be located in the portable classrooms during the time the reparis to their classrooms are occurring. As the portable classrooms are located on the other side of the campus from the new building construction (greatest risk source) risk to students would be similar or lower at the portable classrooms than they would in the library or building 02-03. Also, as a conservative estimate of onsite risk, the Assembly and Administrative building (building 02-03) is evaluated as if it were regular classrooms.

 **Model Is Setup For Calculation of Average CONCentration Values.

   --  DEPOSITION LOGIC  --
 **NO GAS DEPOSITION Data Provided.
 **NO PARTICLE DEPOSITION Data Provided.
 **Model Uses NO DRY DEPLETION.  DRYDPLT  =  F
 **Model Uses NO WET DEPLETION.  WETDPLT  =  F

 **Model Uses URBAN Dispersion Algorithm for the SBL for   142 Source(s),
   for Total of    1 Urban Area(s):
   Urban Population =   3337685.0 ;  Urban Roughness Length =  1.000 m

 **Model Uses Regulatory DEFAULT Options:
         1. Stack-tip Downwash.
         2. Model Accounts for ELEVated Terrain Effects.
         3. Use Calms Processing Routine.
         4. Use Missing Data Processing Routine.
         5. No Exponential Decay.
         6. Urban Roughness Length of 1.0 Meter Assumed.

 **Other Options Specified:
         CCVR_Sub - Meteorological data includes CCVR substitutions
         TEMP_Sub - Meteorological data includes TEMP substitutions

 **Model Assumes No FLAGPOLE Receptor Heights.

 **The User Specified a Pollutant Type of:  PM_10

 **Model Calculates ANNUAL Averages Only

 **This Run Includes:    142 Source(s);       9 Source Group(s); and     872 Receptor(s)

                with:      0 POINT(s), including
                           0 POINTCAP(s) and      0 POINTHOR(s)
                 and:    142 VOLUME source(s)
                 and:      0 AREA type source(s)
                 and:      0 LINE source(s)
                 and:      0 OPENPIT source(s)
                 and:      0 BUOYANT LINE source(s) with      0 line(s)

 **Model Set To Continue RUNning After the Setup Testing.

 **The AERMET Input Meteorological Data Version Date:  14134

 **Output Options Selected:
          Model Outputs Tables of ANNUAL Averages by Receptor
          Model Outputs External File(s) of High Values for Plotting (PLOTFILE Keyword)
          Model Outputs Separate Summary File of High Ranked Values (SUMMFILE Keyword)

 **NOTE:  The Following Flags May Appear Following CONC Values:  c for Calm Hours
                                                                 m for Missing Hours
                                                                 b for Both Calm and Missing Hours

 **Misc. Inputs:  Base Elev. for Pot. Temp. Profile (m MSL) =     4.60 ;  Decay Coef. =    0.000     ;  Rot. Angle =
0.0
                  Emission Units = GRAMS/SEC                                ;  Emission Rate Unit Factor =   0.10000E+07
                  Output Units   = MICROGRAMS/M**3

 **Approximate Storage Requirements of Model =      3.9 MB of RAM.

 **Input Runstream File:          aermod.inp
 **Output Print File:             aermod.out

 **Detailed Error/Message File:   Franklin School.err
 **File for Summary of Results:   Franklin School.sum

ESA

BENJAMIN FRANKLIN ELEMENTARY SCHOOL WHOLE SITE MODERNIZATION PROJECT

Historic Resources Assessment

Prepared for / Submitted to:
San Diego Unified School District
Facilities Planning and Construction
4860 Ruffner Street
San Diego, CA 92111

Project Manager:
Joel Levanetz, M.A., Historic Resources Manager

Report Authors:
Alison Garcia Kellar, M.S., Senior Architectural Historian and
Hanna Winzenried, M.A., and Millie Mujica, M.A., architectural historians

Project Location:
4481 Copeland Avenue, San Diego, CA 92116
La Mesa (CA) USGS 7.5-minute Topographic Quad
Township 16 South, Range 2 West, Section 29
Assessor Parcel Number: 4710-210-300
Acreage: 4.0 acres

Prepared by:

OUR COMMITMENT TO SUSTAINABILITY | ESA helps a variety of public and private sector clients plan and prepare for climate change and emerging regulations that limit GHG emissions. ESA is a registered assessor with the California Climate Action Registry, a Climate Leader, and founding reporter for the Climate Registry. ESA is also a corporate member of the U.S. Green Building Council and the Business Council on Climate Change (BC3). Internally, ESA has adopted a Sustainability Vision and Policy Statement and a plan to reduce waste and energy within our operations. This document was produced using recycled paper.

TABLE OF CONTENTS

Benjamin Franklin Elementary School Whole Site Modernization Project – Historic Resources Assessment

Page

Executive Summary **1**

Introduction **2**
- Location 2
- Research and Field Methodology 2

Historic Context **5**
- The Development of Kensington 5
- San Diego Unified School District 8
- Benjamin Franklin Elementary School Establishment and Construction History 10
- Frank W. Stevenson 21
- Samuel Wood Hamill 21
- Moderne Style (1930-1945) & Streamline Moderne (1925-1950) 22
- Mid-Century Modern Style (1945-1960) & Contemporary Style (1955-1965) 24

Regulatory Framework **24**
- Federal 25
- State 26

Archival Research **29**
- South Central Coastal Information Center Records Search 29
- Previous Evaluations of Benjamin Franklin Elementary School 31

BENJAMIN FRANKLIN ELEMENTARY SCHOOL WHOLE SITE MODERNIZATION PROJECT

Historic Resources Assessment

Executive Summary

Environmental Science Associates (ESA) has been retained by the San Diego Unified School District (or "District") to prepare a Historic Resources Assessment (Report) for the proposed Benjamin Franklin Elementary School Whole Site Modernization Project ("Project" or "Proposed Project"). The District is proposing to make interior and exterior improvements to the buildings and campus grounds of Benjamin Franklin Elementary School ("Franklin ES or "campus"), including the repair, replacement, and modernization of facilities at the campus. This would include the modernization of Buildings 01-01, 02-02, and 02-03, which would include the repair of interior and exterior features, restroom renovation, a new public address system, and as-needed replacement/repair of doors, windows, and plumbing systems. Buildings 04-05 and 05-06 would be demolished. Further work would also include the repair of sidewalks and access ramps, and security fence modifications and additions. The focus of this Report is to identify and evaluate historic resources located on the Benjamin Franklin Elementary School campus. The campus is located at 4481 Copeland Avenue, within the City of San Diego (City), San Diego County (County), California on assessor parcel number (APN) 4710-210-300. The District is the lead agency pursuant to the California Environmental Quality Act (CEQA).

ESA evaluated Franklin ES for potential eligibility for listing in the National Register of Historic Places (National Register) and California Register of Historical Resources (California Register) as a historic district. Because the District is the lead agency, the local designation programs are not applicable and therefore Franklin ES was not evaluated against the City's Historical Resources Register criteria. As a result of ESA's research and survey investigations, Franklin ES is recommended eligible as a historic district under California Register Criterion 1 and 3. Franklin ES is associated with the construction of residential suburbs in the Kensington neighborhood due to the population boom associated with the thriving San Diego Naval Station and defense industry during World War II that made a significant contribution to the broad patterns of development at the local level. Further, Franklin ES is eligible as an example of an expanding elementary school campus reflective of evolving Modernist principles as designed by notable San Diego architects Frank W. Stevenson and Samuel Wood Hamill. Based upon this significance finding, a period of significance has been identified as 1933, when the first permanent building was constructed on campus, to 1950 when Building 05-06 was constructed, completing the expansion of the school to support the booming population in the Kensington community after World War II.

The following buildings constructed during the period of significance contribute to the eligibility of Franklin ES as a historic district under California Register Criteria 1 and 3: Buildings 01-01, 02-02, 02-03, 04-05, and 05-06, and are considered contributors to the Franklin ES historic district. Therefore, the contributing buildings comprising Franklin ES are assigned a California Historic Resources Status Codes of 3CD, "appears eligible for the California Register as a contributor to a CR eligible district through survey evaluation." Due to the proposed demolition of Buildings 04-05 and 05-06, mitigation is recommended to ensure the protection of the historic integrity of the remaining contributing buildings at the campus property.

Lastly, none of the buildings on campus appear to rise to the threshold of individual distinction to be individually eligible for the National Register or California Register on their own historical or architectural merits.

Introduction

ESA has been retained by the District to prepare a Historic Resources Assessment (Report) for the Proposed Project. The 4.00-acre campus is presently developed with the buildings and grounds of Franklin ES, a part of the District. The District is proposing to make interior and exterior improvements to the buildings and campus grounds of Franklin ES, including the repair, replacement, and modernization of facilities at the campus. The focus of this Report is to identify and evaluate potential historic resources located on the campus, to evaluate proposed changes to the property under CEQA and the Secretary of the Interior's Standards for Rehabilitation, and propose recommendation to the proposed design for compliance.

Location

The 4.00-acre Franklin ES is located in the City of San Diego (City) in the Kensington neighborhood as shown in **Figure 1**, *Regional Location*. The boundaries of Franklin ES are shown in **Figure 2**, *Aerial Photograph of Franklin ES and Vicinity*. The northern boundary of the campus is Monroe Avenue; the irregular eastern boundary is Van Dyke Avenue, the southern border is Meade Avenue; and the western boundary is Copeland Avenue. The campus is depicted on the United States Geological Survey (USGS) 2015 7.5' La Jolla topographic quadrangle map. Primary regional access is provided by California Interstate 15 (I-15), which runs north-south, accessible from Adams Avenue approximately 0.6 miles to the northwest of the campus.

Research and Field Methodology

Professionals involved in the preparation of this report are as follows: Joel Levanetz, M.A., provided senior technical and compliance oversight; and report authors were Alison Garcia Kellar, M.S., senior architectural historian, Hanna Winzenried, M.A., and Millie Mujica, M.A., architectural historians. Each of these contributing authors meet the *Secretary of the Interior's Professional Qualification Standards* in history, architectural history, or historic architecture. Ms. Garcia authored the report under the direction of Mr. Levanetz. Professional qualifications are provided in **Appendix A**.

The following tasks were performed:

- A pedestrian survey and digital photography was undertaken on March 9, 2019 to document the existing conditions of the campus and the surrounding vicinity.
- Site-specific research on the campus was conducted utilizing building permits, Sanborn Fire Insurance maps (Sanborn maps), *San Diego Union*, *San Diego Tribune*, and *Evening Tribune* at the University of California San Diego Geisel Library, Ancestry.com, Newspapers.com, and other published sources. Research was conducted at the San Diego History Center in Balboa Park.
- Review and analysis of ordinances, statutes, regulations, bulletins, and technical materials relating to federal and state, designation assessment processes, and related programs.
- Completion of a historic resource assessment of the potential historic resource based upon criteria used by the National Register and the California Register.
- A character-defining features analysis was conducted and provided to the architects to inform design development. A site plan and project description for the Proposed Project were reviewed, and input was provided regarding conformance with the Secretary of the Interior's Standards for Rehabilitation.
- A concept plan review for compliance with the CEQA Guidelines Section15064.5, for conformance with the Standards.

Historic Context

This thematic historic context presents the history of the region and Franklin ES, and was developed to document and support the identification and evaluation of historic architectural resources. Research indicates Franklin ES is associated with the following historical and architectural themes: (1) The Development of Kensington, (2) San Diego Unified School District, and (3) Franklin ES. Additionally, Report the Streamline Moderne and Mid-Century Modern architectural styles are represented, as are the architects responsible for designing the buildings at the Franklin ES campus, Frank W. Stevenson and Samuel Wood Hamill. Campus configuration and construction history is shown in **Figure 3**, *Site Map*.

The Development of Kensington

The map of Kensington Park was filed in 1910, with lot improvements commencing shortly thereafter. Construction was restricted to residential buildings only, with requirements on minimum construction spending. Craftsman style residences were the first buildings erected in Kensington Park, utilizing locally sourced building material. By the 1920s the dominant Craftsman architectural style was falling out of favor. With the residential-only restrictions on construction, there were no areas for local commerce in Kensington during this period.[1]

ESA

With the onset of World War I, Kensington experienced a decline in construction due to material and manpower shortages. This resulted in the construction of only a few residences between 1914 and 1921, and remaining unbuilt lots were transferred to the Kensington Park Land Company. By the 1920 census, Kensington's first decade of existence was comprised of solidly middle-class residents.[2]

Immediately following World War I, the nation experienced a homeownership campaign, which was evident in the Kensington-area once postwar building resumed:

> *Expansion in the first part of the 1920s was to the east of Kensington Park, with Kensington Annex and Talmadge Park Unit No. 1 and Unit No. 2 mapped. The promotion of Talmadge Park was undertaken by Hollywood and Los Angeles businessmen. Developer Roy C. Lichty teamed with investors including Metro-Goldwyn-Mayer executive Louis B. Mayer and theater owner Sid Grauman to promote the "Movie Girl Subdivision," named because of its marketing and investment association with Hollywood silent film stars and sisters Norma, Constance, and Natalie Talmadge. […]*
>
> *To the immediate north of Kensington Park, the development of Kensington Manor Unit No. 1 commenced in 1925. This time, the dominant architectural style was to be Spanish Colonial Revival, popularized by the architecture of the Panama-California Exposition in Balboa Park. The Kensington Park Land Company teamed with architects and builders from Pasadena to promote and develop Kensington Manor, and the streets were laid out to follow the contours of the surrounding canyons.*[3]

The neighborhood continued to further expand in the 1930s with the opening of the Kensington Heights subdivision. Developers George Forbes, and the David-Baker Company of Pasadena created a commercial center around this area, once the deed restriction expired in 1926 to allow for commercial development in Kensington. Several residences along Adams Avenue were moved or repurposed to make way for commercial enterprises including shops and gas stations. In 1929, the first buildings, temporary wood portables, began Franklin ES on the corner of Monroe Avenue and Copeland Avenue. A small branch library was constructed at the city's newly deeded Pleasure Park. Despite this momentum, the Great Depression halted further development, leaving many empty lots throughout the neighborhood.[4]

Construction in Kensington resumed by the early 1940s following the end of the Great Depression. Open lots were improved with more modest homes, many featuring traditional Colonial details in favor of the more elaborate Spanish and Tudor styles of the 1920s. Several Streamline Modern residences were constructed in the later 1930s and early 1940s. World War II further transformed Kensington with a large influx of servicemen and women from around the country moving to local military bases within close proximity to the neighborhood. While construction slowed due to a shortage of able-bodied workers, rental tenants including soldiers

3 Ibid.
4 Ibid., 41.

and contractors moved in. Some residents even converted their detached garages into small apartments in order to accommodate those recently arrived. Franklin ES had a victory garden and ongoing bond drives during this time.[5]

After the end of the war, many of those who had moved to San Diego for war efforts decided to stay permanently. Kensington in particular became home to several military leaders, and bus service began to operate in the area shortly after. As was common across the nation, San Diego's economy boomed as a result of the war's end, allowing for an increase in home prices and the final development of remaining empty lots. San Diego's economy continued to thrive in the post-war era, and many veterans permanently settled in Kensington, raising families in the baby boom. Kensington Park became a part of the city in 1953. Restrictions on building styles in Kensington ended and infill construction included a variety of Colonial, Minimal Traditional, and Ranch styles.[6]

With the 1960s development of the Mission Valley Shopping Center, local businesses suffered closure, with many empty storefronts prompting a shift in the commercial tenant base that moved in. Plans to complete the connection of Interstate 15 and Interstate 805 freeways through a portion of Kensington took nearly 30 years to implement. During this time, houses in the proposed freeway path lost value and were abandoned and/or neglected. Entire blocks of single-family homes were moved or demolished to accommodate a six-lane freeway.[7]

San Diego Unified School District

Public education in the City of San Diego originates in 1850, when the Common Council appropriated funds for a school room in the sheriff's house. The origins of what would become the District, however, lie in School District No. 1, which was established on July 1, 1854. In 1865, the city erected the Little Green School on Mason Street, shortly followed by a new two-story school in the same location in 1872.[8] The first high school began in 1888 with the opening of Russ School. Russ School became San Diego High School in 1903, and in 1906 a new San Diego High School was constructed. This would be the only high school until the opening of La Jolla Junior-Senior High School in 1922. The school population expanded nearly 500%, from 3,000 to 14,275 students between 1900 and 1922, leading to the construction of sixteen new elementary schools in that time period, as well as San Diego's second high school (La Jolla) and first two junior high schools (Memorial and Theodore Roosevelt).[9]

The onset of the Great Depression saw financial difficulties for San Diego schools. High unemployment led to a shrinking tax base, which in turn led to decreased budgets for schools. This translated to increased class sizes and lower teacher salaries, but began to change with

8 San Diego Unified School District, *100 Years of Public Education in San Diego: July 1, 1854 to June 30, 1954* (San Diego: San Diego Unified School District, 1954), 3.

9 Tim Yates, *Modern San Diego Public School Development* (ICF for San Diego Unified School District, 2015), 1.

federal aid from the Roosevelt Administration's New Deal economic program.[10] By 1940, the District had expanded to thirty-eight elementary schools, five junior high schools, two junior-senior high schools, three high schools, a day and evening junior college, a continuation school, and a vocational school.[11]

This increase in school construction was further accelerated with the boom in wartime industry and military enrollment associated with World War II. Defense workers from across the country flooded into San Diego along with their children, who put a strain on San Diego's school system. The federal government under the Lanham Act of 1940 built housing for the workers and their families, and thirteen schools for their children.[12] During this time of immense growth, San Diego's population was 203,341 in 1940 which grew to 334,387 by 1950. Bonds issued in 1946, 1950, and 1953 funded new schools and paid for improvements to existing ones.[13] Yet even with the construction of new permanent school complexes and new buildings at older campuses, the District continued to rely on portable classrooms to accommodate the growing student population as evidenced at Franklin ES throughout its existence.

School building campuses designed during the Great Depression and World War II periods typically consisted of multiple buildings, some which were predominantly one-story and elongated in plan, with auditorium-cafeteria volumes that were taller in height than the rest of the structure. All buildings of this type appear to have been designed with interior circulation corridors and classroom entries.[14] Following World War II:

> *… the school site dominated by a large monumental building would become a symbol of the past. Provided with larger school sites in new suburban subdivisions, and committed to exploring Modernist indoor outdoor design principles, post-war school planners and architects would increasingly eliminate interior circulation corridors, spread out the school plan across a larger area, multiply the number of buildings, and treat the growing interstitial areas between buildings as integral elements of the educational built environment requiring careful attention to landscaping.*[15]

After the war, San Diego school architects quickly intermingled International style with newer architectural idioms to produce designs for schools that were considered to be "Mid-Century Modern." New San Diego-area schools designed in this post-war period were generally reflective of architectural trends, however, larger school sites in suburban areas allowed for a more in-depth application of indoor-outdoor design principles that older urbanized school sites could not support. While it was more common that this relationship between the inside and outside was more heavily exercised at building sites of the post-war era, a few innovative Modernist architects began to explore this approach prior to the war.[16] Designing in a Modernist idiom, notable

architect Samuel Hamill established himself as a Modernist designer prior to the war, and continued to design Modernist commissions during the post war construction boom.[17]

Benjamin Franklin Elementary School Establishment and Construction History

By 1920, the area surrounding the future Franklin ES site was undeveloped, while individual lots had been subdivided. Development immediately adjacent to the future Franklin ES site included a conglomeration of automobile garages, single family dwellings, and storage buildings, in what appears to have been a homestead on a large parcel of land (**Figure 4**). While the subject site remained undeveloped, surrounding smaller neighborhood parcels were developed sporadically, with one-story single family residences. Shortly deed restrictions on solely residential development within Kensington were lifted, at the end of a period of rapid neighborhood development due to the onset of the Great Depression. In 1929, the campus began with temporary wood portables at the site which were moved from adjacent Birney Elementary School.[18]

18 Wallace, Wallace and McCann, *San Diego's Kensington*, 77.

Local architects were asked to submit tentative sketches for the design of the first permanent building at the site in the summer of 1933.[19] Prominent local San Diego architect Frank W. Stevenson was soon after named as the architect for the proposed addition to the Franklin ES. Stevenson was to, "draw plans for a six-room addition to cost not more than $20,000."[20] His architectural plans for a "one-story six-room earthquake-proof structure" were accepted by the Board of Education (Board) that December.[21] Sealed bids were advertised for the school soon after, then closed due to non-conformance of prevailing wages for lath and plasterers.[22] Bids for a contractor to perform the work were again advertised the following month, with the lowest bid awarded to local contractors Calland and Eden. The accepted bid of $30,378 provided estimates for alternate configuration schemes, which won the contract as chosen by the Board. Alternative selections as chosen by the Board included the addition of linoleum floors, using hard cement instead of certain tile wainscoting, and acoustic plaster ceilings.[23]

Plot plans created in 1933 for Building 01-01 (prior to its construction) depict six existing (at the time) wood buildings including a two-room classroom building, three three-room classroom buildings, a kindergarten classroom building, and a house that accommodated two classrooms (**Figure 6**). Two of the three-room classroom buildings sat where the present day Classroom Building 02-02 presently sits, while the reaming wood buildings sat in the present-day baseball field, and playground areas.

This first permanent building designed specifically for Franklin ES, Classroom Building 01-01 fronting Copeland Avenue, was completed by the fall of 1934 (**Figure 5**). Newspaper articles from the time touted the new building being "the first new 'earthquake proof' unit of a permanent group of buildings for the Benjamin Franklin School." [24] Construction costs were $33,000.[25]

Original building plans show the building's entry points were at either end of the building, north and south. In plan, a double-loaded corridor housed three classrooms to either side. Single multilite wood doors, with operable transoms above fed from the classrooms and onto the corridor. Toward the rear of each classroom is a 'cloak room' and a 'workroom' (**Figure 6).** The cloak room featured coat shelves and hooks, with built-in cupboards, and the workroom features a worktable with sink and small cabinetry, and additional cubicles. Classrooms had slate black boards with chalk troughs, open book recessed shelves, and a teacher's wardrobe with shelves and coat hooks (**Figures 7 and 8**).

Figure 8
Children in Franklin ES Building 01-01 shortly after construction, 1934

Five years after the construction of the initial permanent building, the Board authorized a $292,000 school building program for the 1939-1940 school year. This funding was authorized just one month before the beginning of World War II. The construction of six additional classrooms and an administrative unit and auditorium at Franklin ES were considered to be chief items as part of this program. [26] As part of the site preparations for the new buildings at the site, an alleyway at the property was to be closed off in order to provide additional land for new structures.[27] Additional land surrounding the campus was to be purchased for $10,000 for the school's expansion.[28]

The Streamline Moderne-designed administrative and assembly addition (Building 02-03) and the second bank of classrooms (Building 02-02) were designed by prominent San Diego architect Samuel Wood Hamill. By the fall of 1939, these two new buildings were under construction. According to a *San Diego Union* newspaper article, "One of the new buildings will consist of six classrooms; the other one will have a new auditorium, cafeteria, office, nurses' room, and a teachers' rest room in it. There will then be two wooden, and three concrete buildings in the school." [29] While construction of these two additional buildings was underway, school principal Louise E. Weller set up her office in a camper trailer.[30]

Construction continued through the fall of the following year, 1940 (**Figure 9**).[31] Building 02-03 was largely completed by mid-December, and dedicated in May of 1941.[32] The building included several Streamline Moderne features at the exterior, and enclosed Building 01-01 to the north with a shared interior corridor (**Figures 10 and 11**). The plot plan developed as part of the 1940 construction work depicts that several of the wood portable buildings from the 1933 set of drawings were still extant by this time (**Figure 12**). It is unclear when these buildings were demolished. Other original features from this time included a sand blasted pair of wood doors with a Benjamin-Franklin motif, and classrooms with entry spaces and workspaces replete with built-in cabinetry (**Figures 13 and 14**).

Figure 14
Detail of plan for typical classroom configuration at Building 02-02 designed by Samuel Hamill, 1933

Due to the continued increase in school enrollment, likely because of the United States' entry into World War II and the influx of new families to the area, designs for an additional bank of classrooms were developed. By the fall of 1947, the Board set out an advertisement to receive sealed bids for "furnishing all labor, material, equipment, transportation and services for alterations and additions to Benjamin Franklin Elementary school."[33] Architect Samuel W. Hamill again designed this addition to the campus, a bank of classrooms (Building 04-05) extending east along Monroe Avenue (**Figure 15**). By October of 1947, the Board of Education had accepted the construction costs for the proposed classroom wing addition at the campus.[34] The stand-alone addition was constructed sometime between 1948 and 1951. Improvements as part of this work included a curvilinear covered walkway which connected to the new bank of classrooms, including boy's and girl's restrooms and a storage room. Organized horizontally, four classrooms lead onto a covered walkway. Classrooms included built-in cabinetry including shelves, drawers, and overhead cabinets. This addition similarly included built-in cabinetry as the previous addition designed by Hamill, with small tiled pool adorned with a metal figurine at the easternmost kindergarten classroom.

As enrollment continued to grow, in 1951 Samuel Hamill also designed the smaller kindergarten classroom addition, Building 05-06, connecting to the previous addition at the southeast. In 1953, the kitchen area was remodeled which involved new equipment and a reconfiguration of the space and some of the walls. A Sanborn map created in 1959 shows the campus with one auxiliary building to the south of Building 02-02 (**Figure 16**). Two new portables were constructed in 1960. Playground improvements in 1963 included the demolition of adjacent buildings at the south of the parcel, and the relocation of existing portables in addition to regrading, new fencing and recreational play equipment. Two additional portables were constructed in 1967 and 1968, respectively.

An outdoor recessed concrete 'lunch court' was constructed adjacent to original Building 01-01 in 1973. Site modifications continued in the 1980s including new gates and fencing, a new baseball field and baseball diamond with a new backstop, and new playground equipment. Piping for water was replaced during this period. Aerial photos taken between 1980 and 1989 indicate that the majority of the south and east portions of the parcel was developed for recreational use during this time. In the 1990s, two portables were added, and in 1998 several were renovated. Aerial maps indicate that the two large portable structures were constructed or relocated to their current location between 1996 and 2002. In 2001, a permanent shade structure was constructed at the lunch court. ADA ramps were added to the campus, and all permanent buildings received electrical upgrades.

Figure 16
Sanborn Map with subject property outlined in red, 1959

More recent modernization efforts in 2007 included the demolition of existing portables and the construction of a new library building (Building 06-07) and corresponding landscaping (**Figure 17**). A curb cut was inserted along the west elevation to allow for a pickup/drop-off area. The restrooms were upgraded, and new stairs at the auditorium were included. Electrical lifts were inserted into Building 02-03; with one at the auditorium and two at the corridor hallway. More recent upgrades included an electrical display adhered to the west elevation of Building 01-01 at the pickup/drop-off area in 2017, and the installation of HVAC systems throughout all permanent buildings in 2018. Currently, the fields at the southern end of the campus operate as a City Park in a joint-use agreement between the City and the District.[35]

Frank W. Stevenson

Architect Frank W. Stevenson designed the first permanent building (Building 01-01) at the Franklin ES campus in 1933. Stevenson was born on August 15, 1892 in Indiana, and studied architecture at the University of Michigan.[36] He then studied architecture at the Beaux Arts Atelier in Indianapolis, Indiana and worked for the Indiana firm of McGaw and Stevenson for two years following graduation.[37] Stevenson received his certificate to practice architecture in California in 1924 where he went on to join the San Diego firm of Rogers and Stevenson, Architects for nearly two years.[38] He continued to work in San Diego as the chief draftsman for Clarence Martindale and Company, Architects for the next three years.[39]

Stevenson was an active architect in San Diego from the 1920s through the 1950s and is considered a master architect in the city. Notable works include the Armed Services YMCA (1924), the Medico-Dental Building (1927) considered to be San Diego's first high rise, the Downtown YWCA (1926), and other schools for District including the John Adams Elementary School. It appears that Stevenson had established his own firm by the time he designed the early building for Franklin ES in 1933. Stevenson was a founding member of the San Diego chapter of the American Institute of Architects, and was one of the original lifetime members of the San Diego Club.[40] Stevenson passed away in 1968 in San Diego.

Samuel Wood Hamill

Architect Samuel Wood Hamill designed the second bank of classrooms (Building 02-02) and the administration and assembly building (Building 02-03) in 1941. He later designed two further additions including Buildings 04-05 and 05-06. Hamill was born on April 27, 1903 in Globe, Arizona and moved with his family to San Diego in 1909. While in high school, Hamill took a drafting class taught by prominent California architect Lilian Rice who would become his mentor.[41] Hamill went on to graduate with a degree in architecture in 1927 from the University of California Berkeley and went on to work for the San Diego firm of Requa and Jackson where Rice also worked before starting her own practice. Hamill was entrusted with the residential designs at the firm, known for their application of the "Southern Californian," or Mediterranean, style. In 1931, he became partner of the notable San Diego firm of Requa and Jackson.[42] In 1935, Hamill was one of four local architects hired to design the highly visible Works Progress Administration-sponsored San Diego City and County Administration Building and was elected as chief supervisory architect.[43] Constructed in 1936, the administration building is still known today as the "jewel on the [San Diego] bay."[44] Hamill became the principal architect of Requa

and Jackson when firm founders retired. It is around this time that Hamill designed the Streamline Moderne addition to Franklin ES. Seven years later, he designed the elongated classroom addition (Building 04-05) and in 1947, another smaller addition (Building 05-06). Both of these later additions were markedly different than the 1933 addition, reflective of a change in his style as his career evolved. Other modernist Hamill-designed buildings included such notable extant buildings such as the Veteran's War Memorial Building in Balboa Park (1950). Hamill was also recognized as an influential civic leader and helped found several organizations such as the Committee of 100 and the San Diegans, Inc. The San Diegans, Inc. was formed to save downtown San Diego, commissioning an economic study to identify the problems of the downtown area leading to blight and vacancy. As a result of the San Diegan's involvement, a large redevelopment effort ensued in the 1960s, spurred by the City's completion of a General Plan.[45] As a result, Hamill designed the extant Civic Center and Community Concourse in downtown San Diego in 1964. He is considered a master architect in San Diego and served as the president of American Institute of Architects for three terms and was elevated to a fellow of the organization in 1957. He retired in 1968 and passed away in 1989.[46]

Moderne Style (1930-1945) & Streamline Moderne (1925-1950)

The Moderne style was popular during the Great Depression as developed by government relief projects. During this period the government created jobs for architects, designers, and builders by putting them to work, creating hundreds of government and civic buildings, including post offices, train stations, public schools, museums, bridges, and dams throughout the United States. Moderne structures reflected a greater use of conservative and classical elements and had a distinct monumental feel to them. The Moderne style was characterized by board-form or smooth concrete exteriors; schools were typically flat-roofed, although occasionally some had gabled or hipped tile roofs; they were generally symmetrical; mostly with horizontal emphasis; piers and pilasters, often fluted or reeded, provided architectural order, dividing structural bays and separating recessed window channels; shallow relief panels and interior murals were often incorporated; rounded and bullnosed corners or other curved elements were characteristic; and Art Deco motifs such as chevrons gave the schools a stylized appearance.

Portions of the Franklin ES campus were designed in the Moderne Style, which focused on horizontal emphasis and "dispenses with explicit ornamental references to earlier forms of architecture." Further, buildings in this style incorporated asymmetrical massing, flat roofs, smooth wall surfaces, curving corners, glass-block windows, steel-framed windows, and horizontal string courses. As an example, Kit Carson Elementary School was also a Moderne style school in San Diego (**Figure 18**). The building incorporated a curved wall with glass block windows, sculptural panels, exterior fluting, and rectangular banks of windows. Schools from this time period were typically designed with interior circulation corridors and classroom entries. The typical school plans were for one-story, elongated buildings and an auditorium-cafeteria built

[45] Heritage Architecture & Planning, *San Diego Modernism Historic Context Statement*, City of San Diego, 2007, 54.

[46] Historical Resources Board, 12.

higher than the classrooms. Kit Carson Elementary School's U-shaped plan, two-story height, and prominent sculptural panels helped the building retain the "civic monumental character" of earlier large school buildings.[47]

Franklin Elementary School Project / 160537.11

Figure 18
Kit Carson Elementary School, 1943

Also referred to as the Streamline Moderne style, as noted in the *San Diego Modernism Historic Context Statement*:

> *Starting in the early 1930's Art Moderne or Streamline Moderne architecture overtook Art Deco as its simplified forms and minimal ornament expressed frugal depression times. In contrast to the highly ornamented buildings of the Art Deco style, Moderne structures were characteristically smooth walled and asymmetrical, with little unnecessary ornamentation and simple aerodynamic curves of concrete, plaster and glass block. Streamline Moderne architecture was heavily influenced by Cubism and the Modern movement that were developing in Europe in the 1930's. In addition, the style was influenced by industrialization, machines, and formed metal elements including airplanes, trains, and boats. Architecture began to reinterpret these aerodynamic elements and take on their forms and details. In San Diego, examples of Streamline Moderne architecture occur as single-lot development by property owners who were interested in a modern aesthetic and are somewhat rare, especially in comparison to the Minimal Traditional style.*[48]
>
> *Influenced by the Cubism and Modern movements in Europe, Moderne structures were characteristically smooth walled and asymmetrical, with little unnecessary ornamentation and simple aerodynamic curves of concrete, plaster and glass block. The popularization of this new modern style was reinforced by the government during the depression as government funded New Deal projects such as the 1936-38 San Diego Civic Center (now the County Administration Center) adopted the style as the embodiment of government efficiency. This new*

> *Streamline style was a stark contrast to the lavishly ornamented Art Deco and Period Revival buildings of the pre-Depression years which had come to represent government waste and excess. Examples of the Streamline Moderne style can be found on almost every building type including commercial, multi-family residential apartments, and some single family residences.*[49]

Primary character defining features of this style included: flat roofs with coping, asymmetrical facade, horizontal massing and emphasis, smooth stucco finish, horizontal accents or "speedlines."

Mid-Century Modern Style (1945-1960) & Contemporary Style (1955-1965)

The Modern San Diego Public School Development historic context indicates that Mid-Century Modern style in San Diego was characterized by an emphasis on indoor-outdoor design, which was a result of an intermingling of the International Style with newer architectural trends. After World War II, new suburban subdivisions provided large sites for schools and architects would spread out many buildings across the site, with an emphasis on indoor-outdoor design.[50] Circulation was through open-air corridors covered by eave overhangs and sheltering canopies. Landscaping between buildings and along circulation paths became an important design element.[51]

The Mid-Century Modern Style or Contemporary Style was a later, mainstream evolution of the International Style which drew off of world-wide architectural trends of the 1920s and 30s that were reflective for formative decades of Modernism prior to World War II. In San Diego, iterations of the International Style appeared later, with most examples constructed after 1935. Here, the style is characterized by the rejection of applied ornament, including low horizontal massing, horizontal bands of flush windows, and ribbons of steel frame windows.[52]

Further to this, the *San Diego Modernism Historic Context Statement* identifies the Contemporary style as, "Buildings in these areas exemplify the style with long horizontal massing, extensive use of glass windows to open the interior space as to the street, updated Moderne elements such as "eyebrow" overhangs, and minimal architectural details on the facade."[53]

Regulatory Framework

Historical resources fall within the jurisdiction of the federal, state, and local designation programs. Federal laws provide the framework for the identification, and in certain instances, protection of historical resources. Additionally, state and local jurisdictions play active roles in the identification, documentation, and protection of such resources within their communities. The National Historic Preservation Act (NHPA) of 1966, as amended and the California Public

Resources Code (PRC), Section 5024.1, are the primary federal and state laws and regulations governing the evaluation and significance of historical resources of national, state, regional, and local importance. Descriptions of these relevant laws and regulations are presented below. Because the District is the lead agency, the local designation programs are not applicable and therefore Franklin ES was not evaluated against the City's Historical Resources Register criteria.

Federal

National Historic Preservation Act of 1966

The principal federal law addressing historic properties is the National Historic Preservation Act (NHPA), as amended (54 United States Code of Laws [USC] 300101 et seq.), and its implementing regulations (36 CFR Part 800). Section 106 requires a federal agency with jurisdiction over a proposed federal action (referred to as an "undertaking" under the NHPA) to take into account the effects of the undertaking on historic properties, and to provide the Advisory Council on Historic Preservation (ACHP) an opportunity to comment on the undertaking.

The term "historic properties" refers to "any prehistoric or historic district, site, building, structure, or object included in, or eligible for inclusion in, the National Register" (36 CFR Part 800.16(*l*)(1)). The implementing regulations (36 CFR Part 800) describe the process for identifying and evaluating historic properties, assessing the potential adverse effects of federal undertakings on historic properties, and seeking to develop measures to avoid, minimize, or mitigate adverse effects. The Section 106 process does not require the preservation of historic properties; instead, it is a procedural requirement mandating that federal agencies take into account effects to historic properties from an undertaking prior to approval.

The steps of the Section 106 process are accomplished through consultation with the State Historic Preservation Officer (SHPO), federally-recognized Indian tribes, local governments, and other interested parties. The goal of consultation is to identify potentially affected historic properties, assess effects to such properties, and seek ways to avoid, minimize, or mitigate any adverse effects on such properties. The agency also must provide an opportunity for public involvement (36 CFR 800.1(a)). Consultation with Indian tribes regarding issues related to Section 106 and other authorities (such as NEPA and Executive Order No. 13007) must recognize the government-to-government relationship between the Federal government and Indian tribes, as set forth in Executive Order 13175, 65 FR 87249 (Nov. 9, 2000), and Presidential Memorandum of Nov. 5, 2009.

National Register of Historic Places

The National Register was established by the NHPA of 1966, as "an authoritative guide to be used by federal, State, and local governments, private groups and citizens to identify the Nation's historic resources and to indicate what properties should be considered for protection from destruction or impairment" (36 CFR 60.2) (U.S. Department of the Interior, 2002). The National Register recognizes a broad range of cultural resources that are significant at the national, state, and local levels and can include districts, buildings, structures, objects, prehistoric archaeological sites, historic-period archaeological sites, traditional cultural properties, and cultural landscapes.

As noted above, a resource that is listed in or eligible for listing in the National Register is considered "historic property" under Section 106 of the NHPA.

To be eligible for listing in the National Register, a property must be significant in American history, architecture, archaeology, engineering, or culture. Properties of potential significance must meet one or more of the following four established criteria:

A. Are associated with events that have made a significant contribution to the broad patterns of our history;

B. Are associated with the lives of persons significant in our past;

C. Embody the distinctive characteristics of a type, period, or method of construction or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or

D. Have yielded, or may be likely to yield, information important in prehistory or history.

In addition to meeting one or more of the criteria of significance, a property must have integrity. Integrity is defined as "the ability of a property to convey its significance" (U.S. Department of the Interior, 2002). The National Register recognizes seven qualities that, in various combinations, define integrity. The seven factors that define integrity are location, design, setting, materials, workmanship, feeling, and association. To retain historic integrity a property must possess several, and usually most, of these seven aspects. Thus, the retention of the specific aspects of integrity is paramount for a property to convey its significance.

Ordinarily religious properties, moved properties, birthplaces or graves, cemeteries, reconstructed properties, commemorative properties, and properties that have achieved significance within the past 50 years are not considered eligible for the National Register unless they meet at least one of the four significance criteria listed above, one of the Criteria Considerations (A-G), in addition to meeting at least one of the and possessing integrity (U.S. Department of the Interior, 2002).

State

California Environmental Quality Act

CEQA is the principal statute governing environmental review of projects occurring in the state and is codified at Public Resources Code (PRC) Section 21000 et seq. CEQA requires lead agencies to determine if a proposed project would have a significant effect on the environment, including significant effects on historical or unique archaeological resources. Under CEQA (Section 21084.1), a project that may cause a substantial adverse change in the significance of an historical resource is a project that may have a significant effect on the environment.

The *CEQA Guidelines* (Title 14 California Code of Regulations [CCR] Section 15064.5) recognize that historical resources include: (1) a resource listed in, or determined to be eligible by the State Historical Resources Commission, for listing in the California Register of Historical Resources (California Register); (2) a resource included in a local register of historical resources, as defined in PRC Section 5020.1(k) or identified as significant in a historical resource survey meeting the requirements of PRC Section 5024.1(g); and (3) any object, building, structure, site,

area, place, record, or manuscript which a lead agency determines to be historically significant or significant in the architectural, engineering, scientific, economic, agricultural, educational, social, political, military, or cultural annals of California by the lead agency, provided the lead agency's determination is supported by substantial evidence in light of the whole record. The fact that a resource does not meet the three criteria outlined above does not preclude the lead agency from determining that the resource may be an historical resource as defined in PRC Sections 5020.1(j) or 5024.1.

If a lead agency determines that an archaeological site is a historical resource, the provisions of Section 21084.1 of CEQA and Section 15064.5 of the *CEQA Guidelines* apply. If an archaeological site does not meet the criteria for a historical resource contained in the *CEQA Guidelines*, then the site may be treated in accordance with the provisions of Section 21083, which is as a unique archaeological resource. As defined in Section 21083.2 of CEQA a "unique" archaeological resource is an archaeological artifact, object, or site, about which it can be clearly demonstrated that without merely adding to the current body of knowledge, there is a high probability that it meets any of the following criteria:

- Contains information needed to answer important scientific research questions and there is a demonstrable public interest in that information;
- Has a special and particular quality such as being the oldest of its type or the best available example of its type; or,
- Is directly associated with a scientifically recognized important prehistoric or historic event or person.

If an archaeological site meets the criteria for a unique archaeological resource as defined in Section 21083.2, then the site is to be treated in accordance with the provisions of Section 21083.2, which state that if the lead agency determines that a project would have a significant effect on unique archaeological resources, the lead agency may require reasonable efforts be made to permit any or all of these resources to be preserved in place (Section 21083.1(a)). If preservation in place is not feasible, mitigation measures shall be required. The *CEQA Guidelines* note that if an archaeological resource is neither a unique archaeological nor a historical resource, the effects of the project on those resources shall not be considered a significant effect on the environment (*CEQA Guidelines* Section 15064.5(c)(4)).

A significant effect under CEQA would occur if a project results in a substantial adverse change in the significance of a historical resource as defined in *CEQA Guidelines* Section 15064.5(a). Substantial adverse change is defined as "physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of a historical resource would be materially impaired" (*CEQA Guidelines* Section 15064.5(b)(1)). According to *CEQA Guidelines* Section 15064.5(b)(2), the significance of a historical resource is materially impaired when a project demolishes or materially alters in an adverse manner those physical characteristics that:

A. Convey its historical significance and that justify its inclusion in, or eligibility for, inclusion in the California Register; or

B. Account for its inclusion in a local register of historical resources pursuant to section 5020.1(k) of the Public Resources Code or its identification in a historical resources survey meeting the requirements of section 5024.1(g) of the Public Resources Code, unless the public agency reviewing the effects of the project establishes by a preponderance of evidence that the resource is not historically or culturally significant; or

C. Convey its historical significance and that justify its eligibility for inclusion in the California Register as determined by a Lead Agency for purposes of CEQA.

In general, a project that complies with the Secretary of the Interior's Standards (Weeks and Grimer, 1995) is considered to have mitigated its impacts to historical resources to a less-than-significant level (*CEQA Guidelines* Section 15064.5(b)(3)).

California Register of Historical Resources

The California Register is "an authoritative listing and guide to be used by State and local agencies, private groups, and citizens in identifying the existing historical resources of the State and to indicate which resources deserve to be protected, to the extent prudent and feasible, from substantial adverse change" (PRC Section 5024.1[a]). The criteria for eligibility for the California Register are based upon National Register criteria (PRC Section 5024.1[b]). Certain resources are determined by the statute to be automatically included in the California Register, including California properties formally determined eligible for, or listed in, the National Register.

To be eligible for the California Register, a prehistoric or historic-period property must be significant at the local, state, and/or federal level under one or more of the following four criteria:

1. Is associated with events that have made a significant contribution to the broad patterns of California's history and cultural heritage;
2. Is associated with the lives of persons important in our past;
3. Embodies the distinctive characteristics of a type, period, region, or method of construction, or represents the work of an important creative individual, or possesses high artistic values; or
4. Has yielded, or may be likely to yield, information important in prehistory or history.

A resource eligible for the California Register must meet one of the criteria of significance described above, and retain enough of its historic character or appearance (integrity) to be recognizable as a historical resource and to convey the reason for its significance. It is possible that a historic resource may not retain sufficient integrity to meet the criteria for listing in the National Register, but it may still be eligible for listing in the California Register.

Additionally, the California Register consists of resources that are listed automatically and those that must be nominated through an application and public hearing process. The California Register automatically includes the following:

- California properties listed on the National Register and those formally determined eligible for the National Register;
- California Registered Historical Landmarks from No. 770 onward; and,

- Those California Points of Historical Interest that have been evaluated by the OHP and have been recommended to the State Historical Commission for inclusion on the California Register.

Other resources that may be nominated to the California Register include:

- Historical resources with a significance rating of Category 3 through 5 (those properties identified as eligible for listing in the National Register, the California Register, and/or a local jurisdiction register);
- Individual historical resources;
- Historical resources contributing to historic districts; and,
- Historical resources designated or listed as local landmarks, or designated under any local ordinance, such as an historic preservation overlay zone.

Archival Research

South Central Coastal Information Center Records Search

A cultural resources records search was conducted at the South Coastal Information Center (SCIC) at San Diego State University on March 6, 2019. The records search included the Franklin ES campus and a 0.5-mile radius. The SCIC houses the pertinent archaeological and historic site and survey information necessary to determine whether cultural resources are known to exist within the project area. The records search included a review of all recorded historic built environment sites and the California Historical Resources Information System (CHRIS), which includes the National Register, the California Register, California Historical Landmarks, California Points of Historical Interest, and various local historical registers. ESA also reviewed the City of San Diego's inventory of historic properties (San Diego Register of Designated Historical Resources).

The results of the records search indicate 11 buildings and one archeological resource appear to be within a half-mile radius of Franklin ES, which are presented in **Table 1**. Due to the sensitive nature of archaeological resources, locational information is not disclosed within the body of this document. This information is included in Confidential Appendix C. Based on a pedestrian survey, none of the identified historic built environment resources are located within the vicinity of the campus or have either direct or indirect views of Franklin ES.

TABLE 1
HISTORICAL RESOURCES LOCATED WITHIN A QUARTER-MILE RADIUS OF FRANKLIN ES

Name	Address	Description	CHR Status Code	Date	Distance from Project Site	View of Project Site
4394 42nd Street, San Diego (P-37-035643)	4394 42nd Street, San Diego	One-story Craftsman style single-family residence with detached, associated one-story automobile garage.	Ineligible	5/2015	0.08-miles	No View

Previous Evaluations of Benjamin Franklin Elementary School

Franklin ES has not been previously evaluated. The property it is not listed in the State of California Historic Resources Inventory (HRI) for the City of San Diego. Franklin ES is not listed in the National or California Registers, or locally designated as a San Diego Historical Resource. The campus does not appear to be situated in a designated historic district, but Franklin ES does appear to fall within the boundary of a potential historic district as identified on the 1996 "Historical Greater Mid-City San Diego Preservation Strategy Report."[54] Resources in the Kensington/Talmadge neighborhood that were constructed prior to 1945 were surveyed as part of the Potential Kensington Historic District. However, Franklin ES was not included or identified as a resource as part of this survey which was comprised largely of Kensington residences constructed between the 1910s and 1940s, a religious building constructed in 1947/1966, a commercial building constructed in the 1930s, and a Mission revival duplex without an assigned date.

Additional Research

Additional site-specific research was conducted on Franklin ES utilizing the following sources: City directories, plans and aerial photographs, historical photographs and articles from the San Diego History Center, historical *San Diego Union*, *San Diego Tribune*, and *Evening Tribune* at the University of California San Diego Geisel Library, San Diego Central Library, San Diego County Assessor website, and other published sources.

Historic maps and aerial photographs were examined to provide historical information about Franklin ES and the land uses surrounding the campus. Historic aerial photographs taken in 1953, 1964, 1966, 1980, and 1989 were examined, as were Sanborn Maps from 1920, 1950 and 1956.

Original architectural drawings obtained from the District provide a construction history of Franklin ES from 1933 to 2018 and were essential in preparing the construction history context for Franklin ES. A summary of the early architectural drawings on file at the District are compiled in Table 2 below. There were no building permits available for the campus. The earliest

[54] Milford Wayne Donaldson, "Historical Greater Mid-City San Diego Preservation Strategy Report," City of San Diego Planning Department, 1996.

plan on file dated to 1933, with the design of the first permanent building at the school campus, Classroom Building 01-01, which was built the following year.

TABLE 2
BENJAMIN FRANKLIN ELEMENTARY SCHOOL ARCHITECTURAL DRAWINGS

Date	Project/Application #	Architect/Engineer	Description
12/04/1933	79	Frank W. Stevenson	Classroom Building 01-01 constructed, six-classrooms with boy's and girl's restrooms

03/04/1940	3218	Sam W. Hamill	Assembly and Administration Building 02-03 constructed, administrative functions including principal's office, nurse's office, and a clerk/secretary area. Assembly with stage, cafeteria, and kitchen.
08/05/1947	5261	Sam W. Hamill	Classroom Building 04-05 constructed, four-classrooms with boy's and girl's restrooms
08/28/1951	9386	Sam W. Hamill	Kindergarten Classroom Building 05-06, single classroom building with two smaller restrooms

Architectural Resources Survey

A historic architectural resources survey of the Franklin ES was conducted by architectural historian Alison Garcia Kellar, M.S., on March 8, 2019. Detailed notes and digital photographs were taken and the survey work utilized the survey methodology of the State Office of Historic Preservation (OHP). Franklin ES was documented on California Department of Parks and Recreation (DPR) 523 form (**Appendix B**).

Description of Surveyed Resources

Franklin ES consists of five buildings and two portable structures clustered toward the northwest corner of a roughly L-shaped parcel. The eastern portion of the parcel includes raised garden beds, a pagoda, freestanding playground structures, and storage sheds. A large freestanding shade structure with corresponding ADA ramps and asphalt-paved basketball courts sit toward the central portion of the parcel. The southern portion of the parcel includes a baseball diamond with grassy field and large freestanding playground structured, which are accessible to the public. The classroom and administrative buildings line Monroe and Copeland Avenues, forming an L-shape in plan. A flagpole sits near the intersection of these two buildings, along Copeland Avenue. The library building sits toward the center of the plan, with two portable structures to the east. Much of the parcel surrounding play areas is paved in asphalt, while walkways are paved in concrete. A metal fence with various access points encloses the eastern and southern portions of the property, and extends partially along the western portion as well. A vehicular curb cut along Copeland Avenue serves as a pickup/drop off area for cars. Palm trees and swaths of grass line the western Copeland Avenue sidewalk.

Classroom Building 01-01, Assembly and Administration Building 02-03, and Classroom Building 02-02

Classroom Building 01-01 (1934), Assembly and Administration Building 02-03 (1941), and Classroom Building 02-02 (1941), are interconnected arranged in an L-shape configuration, abutting Copeland Avenue at the west and Monroe Avenue at the north (**Figures 19, 20, and 21**). There is landscaping along the north and west extents that includes grass, shrubbery, and mature trees. A sidewalk runs along these elevations. At the south and east elevations of this assembly of buildings, covered walkways lead to a covered lunch structure, with ADA ramps, concrete stairs, and other paved walkways and play areas. Vegetation toward the center of the property includes grass and mature trees.

Classroom Building 01-01

Constructed in 1934, Classroom Building 01-01 is a one-story, rectangular plan building covered by a flat roof. It is articulated in a vernacular, minimal traditional style (**Figure 22**). The reinforced concrete walls are covered by plaster with a horizontal string course and chevron coping at the upper portion of the exterior walls. The building is asymmetrically organized on its east and west elevations, while the south elevation is symmetrical (**Figure 23**). The north elevation is enclosed by Building 02-03 which was constructed in 1941. Entrance into Building 01-01 is through a set of concrete steps in a centralized shared hallway with Building 02-03 (**Figure 24**). Three bays of 7-1/6 steel frame windows articulate the three classrooms at both the east and west elevations, with each assembly punctuated by an air-conditioning unit. A concrete niche is located at the southern portion of the west elevation.

Two smaller pairs of 1/3 steel frame window assemblies sit at the southern elevation located at the boys and girl's restrooms. Secondary access to the building is through a breezeway between Building 01-01 and Building 02-02. The west elevation faces the campus play area and includes additional building access via an ADA ramp. The window configuration at the east elevation mirrors that of the west elevation.

SOURCE : ESA, 2019

Figure 24
Building 01-01 south elevation (left) and east elevation (right)

The original north elevation of Building 01-01 is visible from the corner at Building 02-03 (**Figure 25**). The building features a double-loaded corridor with three classrooms to either side (**Figure 26**). Two skylights with evidence of brackets to hold glass below punctuate the ceiling and roofline along the corridor. The corridor features two children's drinking fountains with decorative teal-colored tile surrounds, with four blue decorative accent tiles with a floral motif. Original wood shelving with brackets for coat hanging line either side of the corridor. Two single multilite wood doors with operable 2/3 lite transoms lead from each classroom onto the corridor. Additional 2/3 lite operable windows punctuate classrooms along the corridor at regular intervals.

Toward the rear of each classroom is a 'cloak room' and a 'workroom' (**Figure 27 and 28**). The cloak room features original coat shelves and hooks with built-in cupboards, and the workroom includes a worktable with sink and small cabinetry and additional cubicles (**Figure 29**). Additional extant built-in features include open recessed shelving and a teacher's wardrobe cabinet with shelves and coat hooks. The rooms include combination carpet and composition floor tiles as flooring material.

The boy's and girl's restroom sit at the southern extent of Building 01-01, at the east and west, respectively. The boy's restroom includes urinals and stalls, while the girl's restroom includes two banks of stalls, one of which appears to be original to the building (**Figure 30**). Both bathrooms have mirrors and low large contemporary sinks. Each have plaster walls and tile flooring.

Assembly and Administrative Building 02-03

The Assembly and Administrative Building 02-03 was constructed in 1941. Attached to the existing Classroom Building 01-01, the building extends along the northwestern corner of the subject parcel to the east. The interior corridor between Building 02-03 and Building 01-01 forms the building's facade and main entrance, along the west elevation at Copeland Avenue (**Figure 31**). Here, a volume rises from a centralized corridor that matches in height with adjacent Building 01-01. An overhang surmounts the entrance which is comprised of a pair of 2/4 fixed lite transoms each with a set of double doors with single lites below. Further north from this main entrance, a smaller one-story volume comprising the administrative portion projects slightly west with curving corners. Each curved corner along the west elevation is anchored by a glass block window assembly with corresponding 1/6 steel frame windows (**Figure 32**). An additional pair of 1/6 steel frame windows sits centered in this west elevation. A band of ribbed coping follows the curve of the walls toward its upper limit from this portion of the west elevation onto the north elevation. Curved concrete planters correspond with the building's curved walls, flank either side of the entryway.

SOURCE : ESA, 2019

Figure 32
Detail of curved glass block corner and multilite windows along west facade of Building 02-03, facing southeast

The north elevation varies in height, with a one-story administrative portion at the western end, a centralized double-height auditorium, and a one-story cafeteria and kitchen at the eastern extent (**Figure 33**). The grade rises going further east along this elevation. Three 1/6 steel frame windows with a single door surmounted by a transom comprise the administrative portion of the north elevation. The auditorium appears to have once been symmetrical in its configuration, and now features 5-1/4 steel frame windows and what appears to be four enclosed former window openings above. The upper portion of this fenestration band aligns with the upper portion of the adjacent one-story administration part of the building. A pair of wood doors with a sand-blasted motif commemorating Benjamin Franklin sits centered in the auditorium volume of the elevation. A pair of fluted poured-in place concrete reliefs are surmounted by a curved banded awning that projects from the elevation. A chevron band of coping sits immediately above the doorway, which sits below a shallow relief panel indicating "BENJAMIN FRANKLIN SCHOOL" (**Figure 34**). Extending further east, a one-story projection houses the school's cafeteria and kitchen. A grouping of three 1/6 steel framed windows sits adjacent to a pair of double doors accessible by a set of concrete steps with a landing and metal hand rails. Further east in the cafeteria sit a pair of 1/4 lite steel framed windows. All portions of Building 02-03 have flat roofs, while the kitchen, located at the easternmost extent, features a slight flat roofed overhang. Here, a single door sits higher in the elevation, with a pair of 1/2 transom lites of different sizes.

The east elevation is largely unarticulated except for the kitchen projection. A projecting overhang covering a walkway extends the length of the building's south elevation, accessible through a set of concrete steps with a metal handrail (**Figure 35**). Single doors lead off of this walkway to girl's and boy's restrooms, followed by pairs of double doors with transoms and interspersed multilite window assemblies leading to the cafeteria. Beyond this, access to the auditorium is through a pair of double doors. Above the overhang, sit a band of 5-1/4 steel framed windows, which mirror those on the north elevation.

Figure 35
South elevation at Building 02-03, looking northwest

At the interior, a central corridor connects Building 01-01 to Building 02-03 (**Figures 36 and 37**). The school's administrative functions comprise the northeastern portion of the building, which include the principal's office, a nurse's office, and a parent room, all of which are carpeted. Individual restrooms sit within the nurse's office, principal's office and parent room, which are all tiled. The principal's office and parent room both feature the curved glass block windows. This portion of the building includes skylights, and some doors feature single lite operable transom windows at the interior (**Figure 38**). The clerk/reception area includes original built-in mailboxes and cabinetry (**Figures 39 and 40**). Storage spaces, and the clerk/reception area sit immediately off of the hallway accessible through a pair of multilite doors with corresponding transoms above.

The hallway features curved walls which mimic those at the exterior, and laminate flooring. ADA lifts offer access to the varying levels in this hallway. A set of stairs with metal handrails leads from the hallway to the original entrance of Building 01-01.

A raised stage space with wood flooring and storage is accessible from the central hallway or from a set of steps within the auditorium space. The auditorium features some fluted concrete detailing similar to that found at the entryway to the space (**Figure 41**). The auditorium shares a movable wall with the cafeteria, both of which are accessible from the outside covered walkway at the south elevation of Building 02-03. The auditorium features carpeted floor, while the cafeteria has composite tile flooring.

Classroom Building 02-02

Classroom Building 02-02 is a one-story, rectangular plan building covered by a flat roof (**Figure 42**). It is articulated in a vernacular style, likely designed to match existing Building 01-01, in its massing, materials, and height. The reinforced concrete walls are covered by plaster. The building is A-symmetrically organized on its east and west elevations, while the north and south elevations are symmetrical. Bands of multi-lite steel framed windows articulate the three classrooms on either end of the building, similar in size and configuration as those at Building 01-01. Access to the building is through a breezeway between Building 02-02 and Building 01-01, leading to a north facing pair of multilite doors with a surmounting transom (**Figure 43**). The southern elevation is symmetrical in configuration with three pairs of doors with multilite transoms above (**Figure 44**).

The building similarly features a double-loaded corridor, with three classrooms to either side of the bisecting hallway (**Figure 45**). Each of the six classrooms is accessible via 3/3 multilite doors with 3/2 operable transom windows. Two skylights similarly punctuate the building at the central hallway. The built-in cabinetry and 'entry' and 'work spaces' in Building 02-02 differ from those in Building 01-01 in their layout and configuration (**Figure 46**). Cabinetry, drawers, cubbies, coat hooks, and built in book shelves are all similarly present here.

Boy's and girl's restrooms are located at the southern portion of the building, each with an entry vestibule and an additional door. The girl's restroom has several bathroom stalls, and the boy's restroom has both urinals and stalls. Each have tile at the walls and floor. Both bathrooms have mirrors and low large contemporary sinks.

Classroom Building 04-05

Classroom Building 04-05 is an L shaped one-story tall building covered by a flat roof and with stucco walls and was not designed in a particular architectural style. It is located on the northeast corner of the lot and is oriented south towards the rest of the school campus, and connects to Building 02-03 by a curved covered walkway (**Figure 47**). The interior consists of two first grade class rooms and two kindergarten classrooms, bathrooms, and storage. All of the windows are aluminum and the doors are metal with metal frames.

The south (main) façade faces towards the rest of campus. There is a grouping of six steel frame windows. There is a classroom door with an aluminum sash window to the left with two windows above **(Figure 48)**. From there the building turns south towards Building 05-06. It has groupings of aluminum clearstory windows above the canopy covering the walkway **(Figure 47)**. A portion of the north façade can be seen to the east of Building 05-06 where there are three aluminum windows. The west (side) elevation has a grouping of six aluminum sash windows and a door. To the south of the door is an aluminum sash window and there are smaller aluminum sash windows above the door and window. The single door sits below a metal projecting awning at the east elevation **(Figure 49)**. The north (rear) elevation fronts Monroe Avenue. On the west side there is a grouping of three aluminum sash windows, a door to the west, three groupings of six aluminum sash windows then two aluminum sash windows on the far east side **(Figure 50)**. The interior includes built-in woodwork and a 'pool' fountain with a metal frog spigot, now enclosed **(Figures 51** through **53)**.

Kindergarten Classroom Building 05-06

Building 05-06 is a single-story rectangular building with stucco siding and a flat roof. It contains a kindergarten classroom that faces the rest of campus. It is partially attached to Building 04-05 to the north. All of the windows are aluminum and the doors are metal. They have metal frames.

The main south (main) facade is asymmetrical in configuration with a projecting metal awning across the entire façade. There is a door with a transom above it and a bank of seven aluminum windows. A concrete ramp leads from the east to the entrance door with planters along the bottom of the south façade. The west (side) elevation has a tall parapet and two small aluminum sash windows **(Figure 54)**. The north (rear) elevation abuts with Building 04-05 to the east. There is a grouping of three aluminum sash windows and an additional door with concrete ramp at the south facade. The parapet continues around the north elevation **(Figure 55)**. There is an additional entrance on the east (side) elevation under a shed roof. There is a metal door with a pair of aluminum sash windows on either side and a transom above it **(Figure 56)**. There is built-in wood work including cabinetry at the interior **(Figures 57** through **59)**.

The post-modern library (Building 06-07) constructed in 2007 was not reviewed as part of this historic evaluation to its construction date beyond the period of significance.

Eligibility Assessment

In order to qualify for eligibility, Franklin ES must possess significance under one or more of the applicable National Register and California Register criteria and retain sufficient integrity to convey its historical significance.

Significance Evaluation

ESA evaluated Franklin ES for potential eligibility for listing in the National Register and California Register as a historic district. Franklin ES was evaluated against the following historical and architectural themes: The Development of Kensington, the San Diego Unified School District, and Franklin ES; Streamline Moderne and Mid-Century Modern architectural styles; and the associated architects.

Criterion A/1: Events

Franklin ES was constructed as San Diego's Kensington neighborhood developed. In 1926, a deed restriction that only allowed for residential construction in the neighborhood was lifted, which would allow for civic and commercial buildings to be constructed in the area. Three years later the first portables were moved to the site as Franklin ES began. By 1933 the surrounding neighborhood was experiencing heavy development, as the first permanent building was constructed on the campus. By 1941, at the onset of World War II, the campus expanded with more classrooms, and administrative, assembly, and cafeteria facilities, during a time of rapid population growth in San Diego due to war support efforts. The campus also expanded as the District acquired more land. By the war's end, in 1947 and 1950 the campus was expanded yet again which was consistent with the baby boom and related post-war development.

The Lanham Act of 1940 authorized 11 new elementary schools in San Diego, however no evidence was uncovered to suggest that Franklin ES was among these schools, nor that any part of the campus was undertaken as part of a WPA project, despite the construction dates.

The campus appears to be eligible for listing under California Register Criterion 1 for eligibility related to historic patterns of development in the Kensington, San Diego neighborhood, as part of broader development patterns in California's history. The campus does not appear to rise to a level of significance necessary for eligibility on the National Register of Historic Places as a historic district.

Criterion B/2: Significant Persons

Franklin ES does not appear to satisfy National Register Criterion B or California Register Criterion 2 for eligibility related to a historic personage. Franklin ES is not identified with the productive life of significant individual District teachers, principals, administrators, students, or any other persons important in our past.

Criterion C/3: Design/Construction

Franklin ES is a conglomeration of several different building campaigns, each stylistically reflective of the era in which it was built. The earliest building, Building 01-01 is a simplified

example of a Moderne Style building, and Building 02-02 is similarly reflective of this style. Built at the same time as Building 02-02, Building 02-03 is more strongly aligned with the Moderne style in San Diego, as it displays several of the character-defining features of this style. These three building comprised the original core of the campus, all constructed leading up to World War II. Related site features constructed during this period include the flagpole, and trees and landscaping along Copeland Avenue.

Immediately after the war, Buildings 04-05 and Building 05-06 were constructed, in 1947 and 1950, respectively. These later buildings were articulated in a more vernacular version of the Mid-Century Modern Style or Contemporary Style, terms which are used interchangeably in the literature related to buildings of this era constructed in San Diego.

Moderne/Streamline Modern Style character-defining features present at the earliest buildings, Building 01-01, Building 02-03, and Building 02-02 include:

- Flat roof with coping
- Asymmetrical facade
- Horizontal massing and emphasis
- Smooth stucco exterior finish
- "Speedline" horizontal accents
- Curved building corners
- Corner windows
- Glass block

Mid-Century Modern/Contemporary Style character-defining features present at the post-World War II buildings; Building 04-05, and Building 05-06, include:

- Lack of applied ornament
- Eave overhangs and sheltering canopies
- Low horizontal massing
- Horizontal bands of flush windows
- Ribbons of steel frame windows

A full list of character-defining features is included in the Character-Defining Features section below. Further to this, all five of the original buildings on the Franklin ES campus are associated with master San Diego architects. The first building constructed in 1934, Building 01-01, by Frank W. Stevenson, who was an active architect in San Diego between the 1920s through the 1950s. His prominent works include the Medico-Dental Building in Downtown San Diego and the Grande Colonial Hotel in La Jolla. Master San Diego architect Samuel Wood Hamill was known for his prominent works in southern California, with many extant projects in San Diego. Hamill was one of four local architects hired to design the highly visible Works Progress Administration-sponsored San Diego City and County Administration Building. The County

Administration Building was constructed in 1936 with Beaux-Arts, Spanish Revival, and Streamline Moderne influences. Shortly after the County Administration Building was constructed, his first two buildings for the Franklin ES were constructed. Hamill's style evolved as the times changed, as was common for architects practicing in this era. Following World War II, he designed the later two additions to Franklin ES, Buildings 04-05 and 05-06, constructed in 1947 and 1950, respectively. During this time Hamill designed the Veteran's War Memorial Building in Balboa Park (1950), in a modern style vastly differing than that of the administration building of the 1930s. Hamill was heavily involved with the San Diegans, Inc. organization which formed to address the blight in downtown San Diego. His efforts ultimately resulted in the City's completion of a General Plan, which began redevelopment efforts in the area. Afterwards, Hamill designed the notable Civic Center and Community Concourse in downtown in 1964. Hamill's hand in the design of the Franklin ES campus building over the course of roughly 10 years reflects his evolving design aesthetic, constructed intermittently among some of his most high-profile civic commissions.

Together, these five buildings and their related site features (Buildings 01-01, 02-02, 02-03, 04-05, and 05-06) appear to be eligible as a historic district under California Register Criterion 3, as being reflective of distinctive San Diego public school architecture from the depression era up through the end of World War II articulated in both the Moderne and Mid-Century Styles and for a strong association with two prominent San Diego master architects. When viewed together, the Franklin ES campus is reflective of design trends and changes over a period of 16-years as the property morphed to accommodate an influx of young students in the area. As a result of this, the Franklin ES campus has a period of significance which ranges from the construction of the first permanent building in 1934, up through the construction of the last permanent building after World War II in 1951. The former playground area of this time period (1934-1951) was located at the present-day location of the Library building and lunch pavilion.

Individually, the buildings lack distinction to be listed on the National Register of Historic Places or the California Register of Historic Resources as individually eligible resources under the design criterion. When viewed collectively as a campus however, the five public school buildings are reflective of evolving tastes in Modernism as designed by master San Diego architects. These five buildings represent the distinguishable architectural identity of Franklin ES from 1933 to 1951 that would otherwise individually would lack distinction.

Criterion D/4: Data Potential

Franklin ES is not likely to yield any information important to prehistory or history. Therefore, Franklin ES does not meet the above criterion.

Integrity Analysis

The National Register and California Register recognizes a property's integrity through seven aspects or qualities: location, design, setting, materials, workmanship, feeling, and association. Eligible properties should retain several, if not most, of these aspects. Both registers require that a resource retain sufficient integrity to convey its significance, and the property must retain the essential physical features that enable it to convey its historical identity. Integrity is based on

significance and understanding why a property is important. National Register Bulletin 15 states that "only after significance is fully established can you proceed to the issue of integrity" (U.S. Department of the Interior 2002). Franklin ES has been identified as a historic district significant under California Register Criteria 1 for its historical association with the development of the residential Kensington suburb prior to and after World War II. The school campus has also been identified as a historic district under the National Register Criteria C and California Register Criteria 3 for its embodiment of both streamline versions of Moderne and Mid-Century architecture as applied to a public elementary school campus, and for its association with master San Diego Architects Frank W. Stevenson and Samuel Wood Hamill. Based upon these significance findings, a period of significance has been identified as 1934 to 1951, when the first permanent building was constructed, through the construction of the last building in the post-war era.

The grouping of five buildings in an L-shape configuration along Copeland and Monroe Avenues remains the same, and the property has not been relocated. The property retains integrity of location. The school continues to express the aesthetic and historic feeling of a combination Moderne and Mid-Century Modern campus, constructed in various campaigns spanning from 1934 through to 1950, including its lunch area and large play areas. The buildings have undergone minor upgrades, per requirements for compliance with safety and access over time, including concrete ramps, lifts, replacements of surface materials that have outlived their reasonable service life, as would be expected with high-wear environments, and the installation of HVAC. These modifications have not altered the design of the buildings, and as a result, the buildings retain a high level of integrity for their original simple workmanship and materials as evidenced in the remaining built-in cabinetry, original windows, wood doors, interior skylights and operable transoms, and overall building massing, footprint, and configuration.

A review of the original plans for each of the eligible buildings confirms that much of the original designs remain intact, with modifications as mentioned above, that have not affected circulation or usage over time. As such, the property retains integrity of design. The property retains its integrity of association, as Franklin ES still operates as an elementary school, as it has since its construction. The property retains historic integrity of location. feeling, material, workmanship an association.

While the library building and later wood portable buildings were constructed on the campus after 1950, these structures do not overwhelm the campus and its historic one story buildings, however, they do sit toward the center of the property in the former location of different temporary portables and play area overtime. The property retains ample play areas despite this, and continues to have plantings along Copeland and Meade Avenues, as were present during the period of significance. Further, the property's boundaries have remained the same since its period of significance. In summation, the property retains marginal historic integrity for its setting. In summary, Franklin ES Buildings 01-01, 02-02, 02-03, 04-05, and 05-06 and its surrounding campus retains historic integrity for its location, design, workmanship, materials and association, and marginal integrity for its historic setting. As a result, the campus retains historic integrity.

Analysis of Project Impacts

Project Description

ESA's qualified architectural historians reviewed a preliminary Project demolition plan for the Proposed Project entitled *Demolition Plan* and dated January 15, 2019, prepared by the District. The Project plan is included in **Appendix D.**

The Proposed Project would repair, renovate, and revitalize the existing Franklin Elementary School. Improvements would include the demolition of Buildings 04-05, 05-06, and two existing portables in the northern portion of the Project Site and the construction of a new two-story 25,200 square feet building in its place. The new building would include twelve classrooms and a new cafeteria.

The campus retains substantial original interior features that date back to their period of construction. The Proposed Project would modernize Buildings 01-01, 02-02, and 02-03, which would include repairing interior and exterior finishes, replacing doors and windows as needed, renovating restrooms, adding a new public address system, and repairing and replacing deteriorating plumbing as necessary.

Improvements would also include repairing sidewalks and ramps, modifying the existing security fence, and installing additional security fencing. During construction, temporary portable classrooms would be added to the Project Site to accommodate students while the new classroom building is being constructed.[55]

Methods

The methodology utilized in this analysis generally follows National Park Service's (NPS) guidance provided in Preservation Brief 17, Architectural Character: Identifying the Visual Aspects of Historic Buildings as an Aid to Their Preservation, which primarily applies to application of the Standards although the classification methods discussed are pertinent for this analysis. According to the NPS, "character refers to all those visual aspects and physical features that comprise the appearance of every historic building. Character-defining elements include the overall shape of the building, its materials, craftsmanship, decorative details, interior spaces and features, as well as the various aspects of its site and environment."

Significant primary character-defining features are the most important with regard to determining the integrity and eligibility of a historical resource. These significant primary character-defining features should be retained and preserved, and alterations should be avoided. Contributing character-defining features are secondary and tertiary features that taken together with the primary features convey a property's significance as a historical resource. They should be preserved to the greatest extent feasible and rehabilitated as appropriate; however, more flexibility is given to these features. Alterations to some contributing features may not adversely impact the property's significance. Non-contributing features are later additions or alterations

[55] Email correspondence with Paul Garcia, Facilities Development CEQA Coordinator, San Diego Unified School District, April 17, 2019.

that do not detract substantially from the integrity or significance of a resource and their removal does not adversely impact the property.

Character-Defining Features

Buildings 01-01 and 02-02

Exterior character-defining features at Buildings 01-01 and 02-02 include:

- Flat roof with coping
- Horizontal massing and emphasis
- Original location of skylights in the double loaded corridor
- Steel frame windows
- Smooth stucco finish
- Monolithic massing
- 3 bays at each of the east and west elevations
- Chevron/zigzag motif at the top

Interior character-defining features at Buildings 01-01 and 02-02 include:

- Double-loaded corridor
- 6-room configuration with 2-doors with operable transoms above
- Built-in cabinetry at the workspace, entry space, and classroom space includes shelving, cubbies, drawers
- Location of chalkboards or bulletin boards
- Coat hooks mounted on wood both in the classrooms and in the hallways
- Porcelain water fountain with tile niche surround

Building 02-03

Exterior character-defining features at Building 02-03 include:

- Flat roof with coping
- Asymmetrical facade
- Horizontal massing and emphasis
- Smooth stucco finish
- Copeland Avenue entrance to the auditorium with Benjamin Franklin sand-blasted motif, with semi-circular overhang, and flanked fluted concrete columns
- The curved glass block windows at the former nurse's and principal's offices

- Franklin Elementary School signage and corresponding overhang above main entrance
- "Speedline" horizontal accents
- Glass block corner windows
- Curved building corners

Interior character-defining features at Building 02-03 include:

- Curved wall configuration in the corridor
- Transom lights over double doors
- Location of steps to stage
- Wood stage and flanking concrete fluted columns
- Staircase leading up toward Building 01-01
- Built-in cabinetry and mailboxes

Buildings 04-05 and 05-06

Exterior character-defining features of Buildings 04-05 and 05-06 include:

- Lack of applied ornament
- Eave overhangs and sheltering canopies
- Low horizontal massing
- Horizontal bands of flush windows
- Ribbons of steel frame windows

Interior character-defining features of Buildings 04-05 and 05-06 include:

- Built-in cabinetry at the workspace, entry space, and classroom space includes shelving, cubbies, drawers
- Location of chalkboards or bulletin boards

Site Features

Character-defining features of the Franklin ES site include:

- Flagpole along Copeland Avenue
- Palm tree and landscaping along Building 01-01 and Building 02-03 at CopelandAvenue

Impacts Analysis

Would the project cause a substantial adverse change in significance of a historical resource as defined in State CEQA §15064.5?

Less Than Significant Impact after Mitigation. The Franklin ES campus was identified as potentially eligible for listing in the California Register as a historic district for its association with events that have made contributions to the broad patterns of California and San Diego's history and cultural heritage, as well as for its architectural merit and association with two prominent San Diego architects. Therefore, the five buildings that comprise the eligible historic district are collectively considered to be a potential historic resource pursuant to CEQA. The physical description and construction history of the campus are described above. Buildings 01-01, 02-02, and 02-03 were designed in the Moderne/Streamline Modern style. Their character-defining features include: a flat roof with coping, horizontal massing and emphasis, smooth stucco exterior finish, curved building corners, and "speedline" horizontal accents. Building 04-05 and 05-06 were designed in the Mid-Century Modern/Contemporary Style. Their character-defining features include: a lack of applied ornament, eave overhangs, low horizontal massing, and ribbons of steel frame windows. Together this grouping is eligible for its association with the development of the Kensington neighborhood in San Diego, and as an example of an expanding elementary school campus reflective of evolving Modernist principles as designed by notable San Diego architects Frank W. Stevenson and Samuel Wood Hamill.

As mentioned in the above section, the modifications to the potential historic resource would include the repair, replacement and modernization of facilities at the campus, including work to Buildings 01-01, 02-02, and 02-03. Proposed work would also include the demolition of Buildings 04-05 and 05-06 in order to make space to construct a new classroom building. Further work will include the repair of sidewalks and access ramps, and security fence modifications and additions.

While the detailed design for the new classroom building has not yet been established, if it is carefully and deliberately designed to be compatible with the remaining historic district, and if the remaining buildings are to receive rehabilitation treatments to retain their character-defining features both at the interior and exterior according to the mitigation measures, the Project would conform to the Standards, as described in the review presented below. Thus, direct and indirect impacts to the subject property would be less than significant. While the Franklin ES campus would lose two of the contributing buildings that comprise the potential Franklin ES historic district (Buildings 04-05 and 05-06), the remaining Buildings 01-01, 02-02, and 02-03, if retained relatively intact, would still collectively retain sufficient historic significance to convey their association for eligibility as a historic district. Therefore, after the mitigation the Proposed Project would have no adverse impact on historic resources because the eligibility of the historic resource as a district would be retained after Project completion.

Secretary of the Interior's Standards Review

Under CEQA, a project generally would need to conform to *The Secretary of the Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving, Rehabilitating, Restoring, and Reconstructing, Historic Buildings* or *The Secretary of the Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings* (the Standards) to be considered as mitigated to a level of less than a significant impact on the historic resource.[56] The Proposed Project entails a district that is considered historically significant due to its association with events that have made contributions to the broad patterns of California's and San Diego's history and architectural merit. Therefore, pursuant to CEQA, the Proposed Project needs to be evaluated for its conformance with the Standards.

As previously described earlier in this report, the subject property contains a collection of historic-period educational buildings that comprise a historic district that is considered to be a potential historical resource for the purposes of CEQA. At this stage, the plans for the proposed modifications at Franklin ES and the addition of a new classroom building remain conceptual and further refinements have not yet been established. This project review will focus more generally on the proposed project description.

Standard 1*: A property will be used as it was historically or be given a new use that requires minimal change to its distinctive materials, features, spaces and spatial relationships.*

> The subject property would continue to operate as an elementary school as part of the Project, and as such fully conforms with Standard 1.

Standard 2*: The historic character of a property will be retained and preserved. The removal of distinctive materials or alteration of features, spaces and spatial relationships that characterize a property will be avoided.*

> The Project would retain and rehabilitate Buildings 01-01, 02-02, and 02-03, and would demolish Buildings 04-05 and 05-06. The Project would substantially conform to Standard 2 because the exterior and interior features at the remaining Buildings 01-01, 02-02, and 02-03 would remain intact and preserved. The Project would not fully conform to Standard 2 because of the demolition of two contributing buildings to the proposed historic district.

Standard 3*: Each property will be recognized as a physical record of its time, place and use. Changes that create a false sense of historical development, such as adding conjectural features or elements from other historic properties, will not be undertaken.*

> The Project would include the construction of a new classroom building, adjacent to existing Building 02-03, and remaining buildings would be rehabilitated. Due to the current state of early design development, the design for a new classroom building as part

[56] California Environmental Quality Act, 15064.5 (3).

of the Project cannot be evaluated at this point in time for its ability to meet Standard 3. Preservation recommendations are included to address Standard 3 conformance.

Standard 4*: Changes to a property that have acquired historic significance in their own right will be retained and preserved.*

The Project would retain and preserve two early additions to the campus, Buildings 02-02 and 02-03, which acquired historic significance for their association with the developing neighborhood of Kensington and the need to accommodate an influx of students, and for association with prominent San Diego architects Stevenson and Hamill. As such the Project would substantially conform with Standard 4, however, with the demolition of contributing Buildings 04-05 and 05-06, constructed in the post-World War II era, the Project would not fully conform with Standard 4.

Standard 5*: Distinctive materials, features, finishes, and construction techniques or examples of craftsmanship that characterize a property will be preserved.*

As the Project is in early stages of design development, the preservation of distinctive feature, finishes, or construction techniques to be performed on Buildings 01-01, 02-02, and 02-03 cannot be evaluated at this time. Preservation recommendation are included to address Standard 5 conformance.

Standard 6*: Deteriorated historic features will be repaired rather than replaced. Where the severity of deterioration requires replacement of a distinctive feature, the new feature will match the old in design, color, texture and, where possible, materials. Replacement of missing features will be substantiated by documentary and physical evidence.*

As the Project is in early stages of design development, deteriorated historic features to be repaired or replaced at Buildings 01-01, 02-02, and 02-03 have not yet been determined. Preservation recommendation are included to address Standard 6 conformance.

Standard 7*: Chemical or physical treatments, if appropriate, will be undertaken using the gentlest means possible. Treatments that cause damage to historic materials will not be used.*

The Proposed Project is currently at the early design development phase; therefore, no specifications for the Project have yet been developed, and it is not possible to determine whether any chemical or physical treatments would be proposed for the remaining contributing buildings or, if specified, they will represent the gentlest means possible.[57]

[57] Applicable National Park Service Preservation Briefs related to treatment of historic properties include but are not limited to*: Brief 6: Dangers of Abrasive Cleaning to Historic Buildings*. All fifty briefs are available at: https://www.nps.gov/tps/how-to-preserve/briefs.htm.

Therefore, the Project cannot be evaluated at this time for its ability to meet Standard 7. Preservation recommendations are included to address Standard 7 conformance.

Standard 8*: Archeological resources will be protected and preserved in place. If such resources must be disturbed, mitigation measures will be undertaken.*

Ground disturbing activity that would occur under the Proposed Project would involve excavation in the northeast portion of the parcel. Please see Appendix C for archeological records related to this campus. While most of the Project Site has been impacted by previous construction, proposed activities may impact previously undisturbed ground. These actions have the potential to encounter previously unidentified, buried archaeological deposits. As such, implementation of the Proposed Project could cause a substantial adverse change in the significance of an archaeological resource, if resources are found during construction, and therefore mitigation would be required. As further detailed below, mitigation measures would include retaining a qualified archaeologist to evaluate unanticipated discoveries. With implementation of mitigation measures the Project would fully conform to Standard 8.

Standard 9*: New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.*

The new addition as part of the Project will involve the construction of a two-story stand-alone classroom building to the northeast portion of the Franklin ES campus along Monroe Avenue. Further details of the design for the new classroom building have not yet been determined, and as a result the Project cannot be fully evaluated for conformance with Standard 9. Preservation recommendations are included to address conformance with Standard 9.

Standard 10*: New additions and adjacent or related new construction will be undertaken in such a manner that, if removed in the future, the essential form and integrity of the historic property and its environment would be unimpaired.*

If the proposed new classroom building is to be demolished in the future, it will not further impact the remaining potential historic district. Therefore, the Project would conform to Standard 10.

Impact Analysis Conclusion and Recommendations

As Project design specifics are, as of yet, unknown, measures are provided below to work with the District in an effort to mitigate potential impacts to the historic district to a level of less than significant. The following general recommendations are provided to guide the design process for more full Project compliance with the Standards:

- *Standard 3*: Do not apply conjectural features from the existing or demolished buildings, or explicitly design a new structure to appear to be constructed in the mid-century Moderne style.
- *Standard 5:* See character-defining features list for exterior and interior character-defining features that convey examples of period craftsmanship that should largely be preserved in order to conform with Standard 5. Work should be compliant with the *Secretary of the Interior's Standards for the Treatment of Historic Properties* and *Preservation Brief 18: Rehabilitating Interior in Historic Buildings: Identifying and Preserving Character-Defining Elements*.
- *Standard 6*: See documentation above for reference when determining which character-defining features will be repaired, and which will be replaced-in kind.
- *Standard 7:* Utilize the gentlest means of cleaning on historic materials, as to not cause damage to historic materials. See *Brief 6: Dangers of Abrasive Cleaning to Historic Buildings* for reference.
- *Standard 9:* The design of the new classroom building should be designed in such a way that it will differentiate from the existing structures while being compatible with historic materials and features in their size, scale, and proportion. This may include an explicit setback from the remaining Building 02-03, a reference to particular design elements present at the extant or demolished buildings, or a nod to design details of the mid-century era. Materiality and color compatibility should be considered, as should the relationship of the new classroom building to the remainder of the Franklin ES site.

Designing the Project in this way would ensure the protection of the historic integrity of the property and its surrounding environment.

Findings and Conclusions

Historic Resource Evaluation Findings

ESA evaluated Franklin ES for potential eligibility for listing in the National Register and California Register as a historic district.

The five earliest buildings comprising Franklin ES (Buildings 01-01, 02-02, 02-03, 04-05, and 05-06) were constructed as San Diego's Kensington neighborhood developed which paralleled an important early growth pattern for the burgeoning city. In 1926, a deed restriction that only allowed for residential construction in Kensington was lifted, which allowed for civic and commercial buildings to be constructed in the area. Three years later the first portables were moved to the largely vacant site as Franklin ES began. By 1934 the surrounding neighborhood was experiencing heavy development upon the construction of several Kensington subdivisions when the first permanent building was constructed on the campus. Despite this momentum, the Great Depression halted further development, leaving many empty lots throughout the neighborhood. Construction in Kensington resumed by the early 1940s following the end of the Great Depression. By 1941, the campus expanded with more classrooms, and administrative, assembly, and cafeteria facilities during a time of rapid population growth in San Diego due to World War II support efforts. By the war's end, in 1947 and 1950 the campus was further expanded which was consistent with the baby boom and related post-war development of the surrounding area. In this, the 5 buildings that comprise the Franklin ES were constructed and

expanded over time to educate the rising number of school-aged children in the Kensington-area during a period of rapid growth due to the development of the Kensington neighborhoods, onset of World War II and related war efforts, and the eventual post-war baby boom – each of which resulted in an increase of families with young children in the area. As associated with a pattern of development significant to regional and local history, these 5 buildings collectively appear to be eligible as a historic district in the California Register under Criterion 1. This development, however, does not appear to rise to a level of significance necessary to warrant the district eligible for listing on the National Register under Criterion A, as the property does not appear to be associated with a larger New Deal economic program, nor did the board patterns of development make a significant contribution to American history.

When viewed together, the Franklin ES campus is reflective of design trends and changes over a 16-years period as the property morphed to accommodate an influx of young students in the area. As a result of this, the Franklin ES campus has a period of significance which ranges from the construction of the first permanent building in 1934, up through the construction of the last permanent building after World War II in 1951. Together, these 5 buildings appear to be eligible as a historic district under California Register Criterion 3, as being reflective of distinctive a multiple-building San Diego public school campus. Constructed from the depression-era up through the end of World War II, the campus is articulated in evolving Moderne and Mid-Century Styles that are reflective of Modernist indoor-outdoor school planning principles of the era. Further, the property conveys a strong association with two prominent San Diego master architects, Frank W. Stevenson and Samuel Wood Hamill. Both architects achieved distinction in San Diego for commissions articulated in period styles, which shifted toward modern designs during Franklin ES' periods of construction. Stevenson and Hamill's designs of buildings at this public school campus are notable within their larger prolific bodies of work for their streamlined application of contemporary design motifs to a multi-building elementary school campus. As such, the 5 early buildings comprising Franklin ES (Buildings 01-01, 02-02, 02-03, 04-05, and 05-06) appear eligible as a historic district under on the California Register under Criterion 3 for the campus embodiment of distinctive characteristics of a period, and as works of two San Diego Master architects. The property's design, stylistic articulation, and association with local designers does not appear to rise to a necessary threshold of significance which would render it eligible for listing on the National Register under Criterion C.

The property retains historic integrity of design, association, location, feeling, material, workmanship, and retains marginal historic integrity for its setting. In summary, Franklin ES Buildings 01-01, 02-02, 02-02, 04-05, and 05-06 and its surrounding campus retains historic integrity for its location, design, workmanship, materials, feeling, and association, and marginal historic integrity for its modified setting. As a result, the property retains overall historic integrity.

Lastly, none of the buildings on campus appear to rise to the threshold of individual distinction to be individually eligible for the National Register of Historic Places or California Register of Historic Resources on their own historical or architectural merits.

Impacts Analysis Findings and Recommendations

Given the determination of eligibility concluded as a result of the study presented above, and in consideration of the evolution of the conceptual design being formulated for the Project implementation, the following measures would be required to mitigate impacts to historical resources to a level of less than significant for purposes of CEQA. In addition, due to the potential to encounter previously unidentified, buried archaeological deposits, mitigation has been included to reduce impacts to archaeological resources, per Standard 8 above. Should close collaboration between the design team and ESA be instituted in following the measures outlined below, it is anticipated that the project would not result in significant impacts in accordance with CEQA.

MM 1: Prior to the issuance of a building permit for the subject property, a recordation document shall be prepared in accordance with Historic American Buildings Survey (HABS) Level III requirements for the eligible buildings within the identified historic district. The recordation document shall be prepared by a qualified architectural historian or historic preservation professional who satisfies the Secretary of the Interior's Professional Qualification Standards for Architectural History pursuant to 36 CFR 61. This document shall include a historical narrative on the architectural and historical importance of the building and its contributions to the history of the area and educational institutions. The document shall also record the existing appearance of the buildings in professional large format photographs. The buildings' exteriors, representative interior spaces, character-defining features, as well as the property setting and contextual views will be documented. All documentation components shall be completed in accordance with the Secretary of the Interior's Standards and Guidelines for Architectural and Engineering Documentation (HABS/HAER standards). Copies of the completed report will be distributed to the South Coastal Information Center (SCIC) at the California State University – San Diego.

The report shall record the history of the subject property and its physical condition, both historic and current, through site plans, historic maps, and photographs, as well as current photographs, written data, and text. The documentation will be organized in the HABS/HAER "short form" format to include the following sections: name, location, significance, description, history, sources, historians, project information, sketch map, and index of photographs. Selected photographic copies or original photographic prints (pursuant to HABS/HAER guidelines) of historic images showing the subject property and original surroundings will be included.

MM 2: Prior to the start of construction, a Qualified Preservation Professional shall be retained to develop a plan of action for avoidance and protection of historic materials in coordination. The plan shall include at a minimum:

1. Notation of the building/structure/feature on construction plans.
2. Pre-construction survey to document the existing physical condition of the building/structure/feature.
3. Procedures and timing for the placement and removal of a protective barrier(s), such as protective wood boards, bracing or framing to protect fragile fenestration and other exposed architecture features and materials, protective fencing and/or concrete or water-filled plastic K-rails around each retained building/structure/feature.

4. Monitoring of the installation and removal of protective barriers by the Qualified Preservation Professional, or his or her designee.
5. Monitoring of the condition of the building/structure/feature at regular intervals during the duration of demolition and construction including vibration monitoring.
6. Post-construction survey to document the condition of the building/structure/feature after completion of the Project.
7. Preparation of a technical memorandum documenting the pre-construction and post-construction conditions of the historic materials and resource in compliance with protective measures outlined in this mitigation measure.

The plan shall comply with the Secretary of the Interior's Standards for the Treatment of Historic Properties and shall be memorialized in a technical memorandum, which shall be submitted to District for review and approval. The final approved plan shall be submitted to the District no later than 30 days prior to the start of construction including any staging or demolition activities. The plan shall be provided to each construction manager/foreman at the project kick-off meeting for each phase of work. The technical memorandum documenting the pre-construction and post-construction conditions shall be submitted to the District within 30 days of completion of the Project and removal of the protective barriers.

In addition, prior to the start of construction, the District shall inform construction personnel of the location and significance of the historic materials/resource, and of the avoidance and protective measures that shall be implemented. If work crews are phased, the District shall ensure that each crew is provided with this information.

MM 3: The District shall retain a qualified preservation consultant, meeting the Secretary of the Interior's Professional Qualifications Standards for History, Architectural History, or Architecture, pursuant to 36 CFR 61 and who has at least 10 years of experience in design review and collaboration applying the Standards (Qualified Preservation Professional) to review the final plans for all new proposed construction to ensure conformance with the Secretary of the Interior's Standards for Rehabilitation (Standards) for the remaining portions of the historic district. The Qualified Preservation Professional shall address the compatibility of the new construction with adjacent historical resources in relation to Standards 9 and 10 (related and adjacent new construction).

The Qualified Preservation Professional shall prepare a Secretary of the Interior's Standards Preservation and Plan Review Report, documenting conformance with the Standards for the remaining portions of the historic district. The Qualified Preservation Professional shall submit a draft report to the District within 30 days of completion of the draft design plans, and shall make any recommendations necessary to bring the design into conformance with the Standards. The Qualified Preservation Professional shall review the final design plans and prepare a final report documenting conformance with the Standards, which shall be submitted to the District no less than 30 days prior to the commencement of construction. The final plan review shall be submitted to the District along with the final plan set prior to project approval.

MM 4: Retention of Qualified Archaeologist. Prior to the start of any ground disturbing activities, a qualified archaeologist, defined as an archaeologist meeting the Secretary of the Interior's Standards for professional archaeology (U.S. Department of the Interior 2008) shall be retained by District to carry out all mitigation measures related to cultural resources.

MM 5: Cultural Resources Sensitivity Training. Prior to start of any ground-disturbing activities, the qualified archaeologist shall conduct cultural resources sensitivity training for all construction personnel associated with the Project. Construction personnel shall be informed of the types of cultural resources that may be encountered during construction, and of the proper procedures to be enacted in the event of an inadvertent discovery of archaeological resources or human remains. District shall ensure that construction personnel are made available for and attend the training and retain documentation demonstrating attendance.

MM 6: Unanticipated Discoveries. In the event of the unanticipated discovery of non-prehistoric archaeological materials, all work shall immediately cease in the area (within approximately 100 feet) of the discovery until it can be evaluated by the qualified archaeologist. Construction shall not resume until the qualified archaeologist has conferred with District, and if necessary, the appropriate Native American representatives for prehistoric resources, on the significance of the resource.

If it is determined that the discovered archaeological resource constitutes a historical resource or a unique archaeological resource under CEQA, avoidance and preservation in place is the preferred manner of mitigation. Preservation in place may be accomplished by, but is not limited to, avoidance, incorporating the resource into open space, capping, or deeding the site into a permanent conservation easement. In the event that preservation in place is demonstrated to be infeasible and data recovery through excavation is the only feasible mitigation available, an Archaeological Resources Treatment Plan shall be prepared and implemented by the qualified archaeologist in consultation with District that provides for the adequate recovery of the scientifically consequential information contained in the archaeological resource. The qualified archaeologist and District shall consult with appropriate Native American representatives in determining treatment for prehistoric or Native American resources to ensure cultural values ascribed to the resource, beyond those that are scientifically important, are considered.

Mr. Levanetz is a Secretary of Interior Professional Qualified Archaeologist, Historian and Architectural Historian. Mr. Levanetz has 15 years of experience specializing in projects involving cultural and historic resource assessments, Historic American Building Survey (HABS)/Historic American Engineering Record (HAER)/Historic American Landscape Survey (HALS) documentation, and DPR 523 series form preparation.

Mr. Levanetz has overseen projects that range in scale and complexity. As project manager, Mr. Levanetz has coordinated surveys, supervised staff and subcontractors, provided quality control for data collection and technical report writing, interacted with regulatory agency personnel, maintained client communications, tracked budgets, met crucial project deadlines and established strong networks through business development.

Mr. Levanetz has a detailed understanding of relevant regulations and ordinances that affect cultural resources and historic properties, such as Sections 106 and 110 of National Historic Preservation Act (NHPA), the National Environmental Protection Act (NEPA), the California Environmental Quality Act (CEQA), and the Secretary of Interior Standards for the Treatment of Historic Properties. He has completed numerous impacts assessments and determinations of eligibility across a range of administrative levels including local, state, and National Register of Historic Places (NRHP). Among the agencies served by Mr. Levanetz are the California Department of Transportation (Caltrans), Federal Rail Administration (FRA), California High Speed Rail Authority, Federal Highway Administration, Department of Defense (DOD), Federal Emergency Management Agency (FEMA), Bureau of Land Management (BLM), National Park Service (NPS), California Energy Commission (CEC), Federal Communications Commission (FCC), Federal Aviation Administration (FAA), Department of Housing and Urban Development (HUD) and the General Services Administration (GSA).

Albert Binder Travel Fellowship, 2012 and 2013

PennDesign Departmental Grant, 2011-2013

Alison is a senior architectural historian with 7 years of professional and academic experience with a background in historic preservation, design, and museum collections. Her work with historic resources and cultural heritage in California has included managing and authoring historic resource assessments, National Register Nominations, historic structure reports, feasibility studies, Federal Historic Preservation Tax Credit applications, in addition to extensive archival research and resource documentation. Alison utilizes an understanding of preservation design and historic interiors to inform impacts analyses of proposed development and recommendations for adaptive reuse.

Relevant Experience

Historic Resource Evaluation for Golden Gate Village, Marin City, CA. *Architectural Historian.*
The highly-intact Golden Gate Village low-income housing complex was constructed in 1958. The complex was constructed to house many of the former Marinship workers and their families, as by mid-century the temporary Marinship housing in this location had severely deteriorated. Designed by prominent mid-century designers including architects Aaron G. Green and John Carl Warnecke, and landscape architect Lawrence Halprin, the property today serves as an example of an integrated, well-designed community complex, that included towers built into a Marin hillside, with 1-and 2-story buildings, and landscaped areas oriented around a master plan. The property is significant for its association as a product of post-WWII urban development in Northern California, and for association with its prominent mid-century designers. Alison performed the site visit, documenting the property with photography and detailed notes, and conducted research through various local and private archival repositories, newspaper articles, architectural plan analysis, and interviews. She produced the report narrative and historic evaluation for the property. The property is currently listed on the National Register of Historic Places.

Historic Structure Report for McDonnell Hall, Our Lady of Guadalupe Chapel, San Jose, CA. *Architectural Historian.*
Constructed as a parish church in 1914, the building moved to its current location in 1953. Here, the building served as a newly formed Catholic Mission, the Center of Our Lady of Guadalupe. The property at this location is strongly associated with budding civil rights activist and labor rights leader Cesar Chavez, in addition to associative significance with ethnic Mexican migrant labor and labor organizing efforts, and the Mexican American civil rights movement of the mid-20th century. Alison assisted with the research, production, design recommendations, and quality control for the project. Design recommendations included in the report involved bringing the building back to its original appearance during its period of significance, which required a meticulous analysis of the building's historic

integrity. The property today is listed as a National Historic Landmark.

Preservation Consulting, Historic YMCA Hotel in the Embarcadero, San Francisco, CA. *Architectural Historian, Project Manager.*
Built in the early 20th century, the building was formerly a YMCA hotel used by young navy men and is currently a hotel along the waterfront with an adjacent YMCA recreational center. The hotel was proposing modifications which included rehabilitation work and reconfiguring the interior lobby space. Alison researched and documented how the interior had evolved over time by reviewing old plans, still shots from movies filmed on-location, post cards, and by reviewing the existing fabric. She developed narrative for the construction chronology with a focus on the building's public spaces at the interior, overseeing the entire production of the report. She identified extant character defining features, creating recommendations to update the client's proposed plans which included acceptable sensitive modifications to historic features and recommendations for potential future demolition.

Historic American Building Survey for Lockheed Missiles and Space, Sunnyvale, CA. *Architectural Historian, Project Manager.*
The Lockheed Martin Space Systems Company had an important association with the development of the defense industry and advanced communications systems in the San Francisco Bay Area. Large-scale technological contributions to defense-related pursuits were achieved here through aerospace manufacturing, research, and development. Subject buildings documented for this project were utilitarian, constructed using concrete tilt-up construction and were representative of industrial buildings developed for sensitive defense purposed of the era. Alison conducted the site visit, coordinated professional photography, and conducted extensive archival research to create the narrative for the HABS documentation in accordance with National Park Service standards. She assisted in providing the client with mitigation measures beyond building demolition, and coordinated with local, State, and Federal agencies throughout the project development and submission process.

Historic Preservation Consulting for the Palo Alto History Museum, Palo Alto, CA. *Architectural Historian.*
The Roth Building was the original location of the Palo Alto Medical Foundation. The former medical building is undergoing a conversion into a local history museum with gallery space, interpretive areas, and archival and study rooms. Alison assisted with secondary research efforts of both the medical foundation and the building, upon modifications to the museum's scope of work. This work helped ongoing efforts to determine the extent of the effect that proposed changes would have on the building's historic integrity. She conducted a Part 2 Federal historic rehabilitation tax credit application review which included recommendation to best comply with the Secretary of the Interior's Standards for Historic Preservation.

Delta Feasibility Study for three historic resources, Walnut Grove, CA.
Architectural Historian, Project Manager.
Three heritage buildings were identified for feasibility studies, including the adaptive reuse of a historic church for artist live/work, including performance and gallery space; the adaptive reuse of a schoolhouse into a community center; and the construction of an outdoor park to commemorate Asian American Heritage. These studies included a preliminary project description, market demand analysis, conceptual plan, cost estimate, potential partnerships and funding, and actions needed for public and private partners to implement the projects. Serving as the project manager and primary author, Alison coordinated site visits to the property and served as the day-to-day contact for the team of sub consultants. She undertook research efforts for the three properties, including extensive primary source documentation, and assisted with the creation of architectural recommendations for rehabilitation.

Historic Resource Evaluation and Preservation Consulting for the Half Moon Bay Barn and Jail Museum, Half Moon Bay, CA. *Architectural Historian.*
The City of Half Moon Bay was working with a local historical society to implement a history museum at the site of its early 20th century jail and adjacent barn. Alison conducted an in-depth evaluation of the property's development as the first portion of the work. She reviewed the proposed plans for buildings and site modifications to accommodate gallery space, offices, and archival storage. Coordinating with project architects, she assisted with the creation of recommendations for the proposed work to best comply with the Secretary of the Interior's Standards for Rehabilitation.

Previous Work Experience

Garavaglia Architecture, Inc. *Senior Architectural Historian and Project Manager.*
Alison was responsible for coordinating the firm's preservation studio projects, ranging between 10 and 20 active projects at any given time. She oversaw more than 50 projects from start to finish, managing client relationships and project timelines. Alison strategized with principal daily to define project goals and improve internal high standards of studio contracts and participated in proposal development, project scoping, planning, budgeting, and facilitated communication through all phases of the work. Alison collaborated with the architectural studio to: identify preservation-related issues and constraints, craft rehabilitation recommendations, design sensitive mitigation solutions for new development within historic buildings and districts, and justify approved preservation design solutions with the goal of minimizing adverse effects on the historic resource.

Hanna Winzenried

Architectural Historian

Hanna is an architectural historian with 3 years of academic and professional experience performing building conservation, historic research, and field surveys and conducting plan reviews for conformance with local regulations and ordinances. Prior to joining ESA, she has 1.5 years of experience with the City of Los Angeles, Department of Planning, in the Office of Historic Resources Historic Preservation Overlay Zones (HPOZ) Unit. Her experience and education both in California and abroad have given her a wide set of interdisciplinary skills, including strong technical and research skills.

Relevant Experience

9120 W. Olympic Boulevard Preliminary Assessment and Character Defining Features Analysis for the Harkham Hillel Hebrew Academy, Beverly Hills, CA. *Contributor.* ESA prepared a Phase I Historic Resources Assessment for the modernist educational building at 9120 W. Olympic Boulevard. The purpose of the report is to identify and evaluate potential historic resources. The subject property was built in 1963 as the largest Jewish day school. It was built in the Modernist architectural style by the renowned architect Sydney Eisenshtate. The Academy enrollment has outgrown the existing space, and the school is looking for a way to expand its square footage. Hanna performed research and prepared of the reports.

Universal Hilton Environmental Impacts Report and Historic Resources Technical Report for 555 W Universal Terrace Parkway, Los Angeles, CA. *Contributor.* ESA prepared an Environmental Impacts Report including a Historic Resources Technical Report. The Universal Hilton Hotel was designed by master architect, William L. Pereira in 1983 in the postmodern style. The hotel was designed to accommodate visitors to the Universal Theme Parks. The hotel management wants to expand the number of rooms by building a large addition. Hanna performed research and assisted in the preparation of the report.

361 Myrtle Street Peer Review Letter for the residence at 361 Myrtle Street, Glendale, CA. *Contributor.* ESA prepared a peer review letter to conduct a peer review of previous historic resource evaluations and analyze potential cumulative impacts of the demolition for the property at 361 Myrtle Street. Previous evaluations and the impact of demolishing the residence were reviewed and analyzed. Hanna performed research and assisted with the preparation of the report.

Nestor Way Affordable Housing Project Historical Resources Technical Report, San Diego, CA. *Contributor.* ESA prepared a Historical Resources Technical Report for 1120 and 1130 Nestor Way on behalf of the Federal Housing Administration. The site is improved with a Methodist church built in 1896 in the Gothic Revival architectural style and multiple ancillary buildings. The City of San

Diego is planning on constructing permanent supportive housing containing 100 units, consisting of multi-family affordable housing for formerly homeless seniors 55 years of age and older. Hanna performed research and assisted with the preparation of the reports.

Nelles School Site Redevelopment, Whittier, CA. *Contributor.* ESA oversaw the documentation and architectural salvage of the Fred C. Nelles School. Brookfield Residential plans on redeveloping the whole site into a residential neighborhood while maintaining four historically significant structures. Hanna helped draft a documentation and architectural features salvage plan according to the character defining features list and oversaw the deconstruction of the other school buildings to ensure the architectural features were salvaged correctly.

Riverside Cement Company, Crestmore Plant HAER, Jurupa Valley, CA. *Contributor.* ESA prepared two Historic American Engineering Records for the Crestmore Plant for the White Cement Mill and for the Stock House. The Riverside Cement Company, Crestmore Plant was a former cement plant that was initially constructed in 1909, although went through multiple periods of alteration. Developers proposed an industrial and open space development at the facility. Hanna helped drafts HAERs which had to be made as a mitigating measure for deconstruction of the historically eligible buildings, the White Cement Mill and the Stock House.

Previous Work Experience

Department of City Planning, City of Los Angeles. *Student, Professional Worker.* Hanna assisted HPOZ staff with client walk-ins, which included conducting design review, drafting casework letters/certificates, and performing public outreach/presentations regarding adoption of HPOZs. She conducted field surveys of several HPOZs, using photography and making note of historical elements. She corrected technical elements on databases of HPOZ properties and research historical patterns of neighborhood growth. Hanna also communicated with project applicants to improve their projects' conformance with preservation guidelines.

Museum of Peoples and Cultures, Brigham Young University. *Collections Manager.* Hanna made an itinerary of the entire Brigham Young University (BYU) ethnographic collection. Hanna designed and implemented a social media marketing campaign. She took pictures of 400 objects for the digital collection. She helped develop a new way to house kachina dolls and Polynesian necklaces. She cataloged 25 objects in a collection and housed them for storage.

History Department, Brigham Young University. *Intern.* As part of her duties as an intern, Hanna cataloged and transcribed historic letters to and from Senator Bancroft found in the BYU digital collections. Hanna also created a marketing plan to raise campus awareness for "Europe in a Nutshell" and helped to inaugurate the international event with prominent world leaders.

***P3a. Description:** (Describe resource and its major elements. Include design, materials, condition, alterations, size, setting, and boundaries)

Franklin Elementary School consists of five buildings and two portable structures clustered toward the northwest corner of a roughly L-shaped parcel. The eastern portion of the parcel includes raised garden beds, a pagoda, freestanding playground structures, and storage sheds. A large freestanding shade structure with corresponding ADA ramps and asphalt-paved basketball courts sit toward the central portion of the parcel. The southern portion of the parcel includes a baseball diamond with grassy field and large freestanding playground structured, which are accessible to the public. The classroom and administrative buildings line Monroe and Copeland Avenues, forming an L-shape in plan. A flagpole sits near the intersection of these two buildings, along Copeland Avenue. The library building sits toward the center of the plan, with two portable structures to the east. Much of the parcel surrounding play areas is paved in asphalt, while walkways are paved in concrete. A metal fence with various access points encloses the eastern and southern portions of the property, and extends partially along the western portion as well. [See Continuation Sheets]

Page 2 **of** 30 ***NRHP Status Code** 3CD
***Resource Name or # (Assigned by recorder)** Benjamin Franklin Elementary School Historic District
D1. Historic Name: Benjamin Franklin Elementary School D2. Common Name: Franklin ES

***D3. Detailed Description** (Discuss overall coherence of the district, its setting, visual characteristics, and minor features. List all elements of district.):

By 1920, the area surrounding the future Franklin ES site was undeveloped, while individual lots had been subdivided. Development immediately adjacent to the future Franklin ES site included a conglomeration of automobile garages, single family dwellings, and storage buildings, in what appears to have been a homestead on a large parcel of land. While the subject site remained undeveloped, surrounding smaller neighborhood parcels were developed sporadically, with one-story single family residences at this time. The Franklin ES began in 1929, shortly deed restrictions on solely residential development within Kensington were lifted, at the end of a period of rapid neighborhood development due to the onset of the Great Depression. [See Continuation Sheets]

***D4. Boundary Description** (Describe limits of district and attach map showing boundary and district elements.):

Located in the Kensington neighborhood of San Diego, the 4.00-acre parcel that comprises the Franklin ES campus is irregular in shape and bound to the north by Monroe Avenue, to the east by Van Dyke Avenue, to the south by Meade Avenue, and to the west by Copeland Avenue. The contributing buildings sit in the northern portion of the campus parcel.

[See Figure 25 in Continuation Sheets for map with boundary and district elements]

***D5. Boundary Justification:**

Extents of parcel owned by San Diego Unified School District.

D6. Significance: Theme Neighborhood Development, San Diego Unified School District, Streamline Moderne Style, Mid-Century Modern Style **Area** Kensington, San Diego
Period of Significance 1934-1951 **Applicable Criteria** 1, 3
(Discuss district's importance in terms of its historical context as defined by theme, period of significance, and geographic scope. Also address the integrity of the district as a whole.)

Franklin ES is recommended eligible as a historic district under California Register Criterion 1 and 3. Franklin ES is associated with the construction of residential suburbs in the Kensington neighborhood due to the population boom associated with the thriving San Diego Naval Station and defense industry during World War II that made a significant contribution to the broad patterns of development at the local level. Further, Franklin ES is eligible as an example of an expanding elementary school campus reflective of evolving Modernist principles as designed by notable San Diego architects Frank W. Stevenson and Samuel Wood Hamill. Based upon this significance finding, a period of significance has been identified as 1933, when the first permanent building was constructed on campus, to 1950 when Building 05-06 was constructed, completing the expansion of the school to support the booming population in the Kensington community after World War II. [See Continuation Sheets]

***D7. References** (Give full citations including the names and addresses of any informants, where possible.):

[See Continuation Sheets]

***D8. Evaluator:** Alison Garcia Kellar, ESA **Date:** April 2019

Affiliation and Address:
Environmental Science Associates, 550 W. C Street, Ste. 750, San Diego, CA 92101

***P3a. Description (continued)**:

A vehicular curb cut along Copeland Avenue serves as a pickup/drop off area for cars. Palm trees and swaths of grass line the western Copeland Avenue sidewalk.

Classroom Building 01-01, Assembly and Administration Building 02-03, and Classroom Building 02-02
Classroom Building 01-01 (1934), Assembly and Administration Building 02-03 (1941), and Classroom Building 02-02 (1941), are interconnected arranged in an L-shape configuration, abutting Copeland Avenue at the west and Monroe Avenue at the north (**Figures 1, 2, and 3**). There is landscaping along the north and west extents that includes grass, shrubbery, and mature trees. A sidewalk runs along these elevations. At the south and east elevations of this assembly of buildings, covered walkways lead to a covered lunch structure, with ADA ramps, concrete stairs, and other paved walkways and play areas. Vegetation toward the center of the property includes grass and mature trees.

Building 02-03 (left), Building 01-01 (center), and Building 02-02 (right) at intersection of Copeland Avenue and Monroe Avenue, looking southeast

Figure 2
Building 02-03 (left), Building 01-01 (center), and Building 02-02 (right) at east facade elevation location, looking east

Figure 3
Building 01-01 (left) and Building 02-02 (right), looking northeast

Classroom Building 01-01

Constructed in 1934, Classroom Building 01-01 is a one-story, rectangular plan building covered by a flat roof. It is articulated in a vernacular, minimal traditional style (**Figure 4**). The reinforced concrete walls are covered by plaster with a horizontal string course and chevron coping at the upper portion of the exterior walls. The building is asymmetrically organized on its east and west elevations, while the south elevation is symmetrical (**Figure 5**). The north elevation is enclosed by Building 02-03 which was constructed in 1941. Entrance into Building 01-01 is through a set of concrete steps in a centralized shared hallway with Building 02-03 (**Figure 6**). Three bays of 7-1/6 steel frame windows articulate the three classrooms at both the east and west elevations, with each assembly punctuated by an air-conditioning unit. A concrete niche is located at the southern portion of the west elevation.

Two smaller pairs of 1/3 steel frame window assemblies sit at the southern elevation located at the boys and girl's restrooms. Secondary access to the building is through a breezeway between Building 01-01 and Building 02-02. The west elevation faces the campus play area and includes additional building access via an ADA ramp. The window configuration at the east elevation mirrors that of the west elevation.

Figure 4
Building 01-01 west elevation, looking southeast

Figure 5
Building 01-01 west elevation, looking northeast

Figure 6
Building 01-01 south elevation (left) and east elevation (right)

The original north elevation of Building 01-01 is visible from the corner at Building 02-03 (**Figure 7**). The building features a double-loaded corridor with three classrooms to either side (**Figure 8**). Two skylights with evidence of brackets to hold glass below punctuate the ceiling and roofline along the corridor. The corridor features two children's drinking fountains with decorative teal-colored tile surrounds, with four blue decorative accent tiles with a floral motif. Original wood shelving with brackets for coat hanging line

either side of the corridor. Two single multilite wood doors with operable 2/3 lite transoms lead from each classroom onto the corridor. Additional 2/3 lite operable windows punctuate classrooms along the corridor at regular intervals.

Toward the rear of each classroom is a ‘cloak room’ and a ‘workroom’. The cloak room features original coat shelves and hooks with built-in cupboards, and the workroom includes a worktable with sink and small cabinetry and additional cubicles. Additional extant built-in features include open recessed shelving and a teacher’s wardrobe cabinet with shelves and coat hooks. The rooms include combination carpet and composition floor tiles as flooring material.

The boy’s and girl’s restroom sit at the southern extent of Building 01-01, at the east and west, respectively. The boy’s restroom includes urinals and stalls, while the girl’s restroom includes two banks of stalls, one of which appears to be original to the building. Both bathrooms have mirrors and low large contemporary sinks. Each have plaster walls and tile flooring.

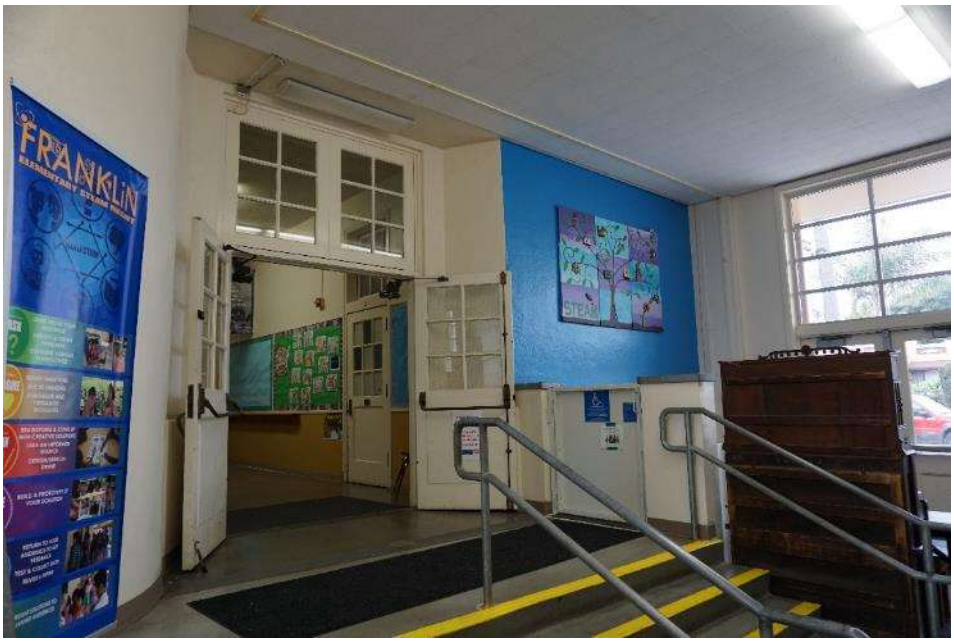

Figure 7
Building 02-03 corridor with entrance to Building 01-01

Figure 8
Building 01-01 double loaded corridor, looking south with original drinking fountain

Assembly and Administrative Building 02-03

The Assembly and Administrative Building 02-03 was constructed in 1941. Attached to the existing Classroom Building 01-01, the building extends along the northwestern corner of the subject parcel to the east. The interior corridor between Building 02-03 and Building 01-01 forms the building's facade and main entrance, along the west elevation at Copeland Avenue (**Figure 9**). Here, a volume rises from a centralized corridor that matches in height with adjacent Building 01-01. An overhang surmounts the entrance which is comprised of a pair of 2/4 fixed lite transoms each with a set of double doors with single lites below. Further north from this main entrance, a smaller one-story volume comprising the administrative portion projects slightly west with curving corners. Each curved corner along the west elevation is anchored by a glass block window assembly with corresponding 1/6 steel frame windows (**Figure 10**). An additional pair of 1/6 steel frame windows sits centered in this west elevation. A band of ribbed coping follows the curve of the walls toward its upper limit from this portion of the west elevation onto the north elevation. Curved concrete planters correspond with the building's curved walls, flank either side of the entryway.

The north elevation varies in height, with a one-story administrative portion at the western end, a centralized double-height auditorium, and a one-story cafeteria and kitchen at the eastern extent (**Figure 11**). The grade rises going further east along this elevation. Three 1/6 steel frame windows with a single door surmounted by a transom comprise the administrative portion of the north elevation. The auditorium appears to have once been symmetrical in its configuration, and now features 5-1/4 steel frame windows and what appears to be four enclosed former window openings above. The upper portion of this fenestration band aligns with the upper portion of the adjacent one-story administration part of the building. A pair of wood doors with a sand-blasted motif commemorating Benjamin Franklin sits centered in the auditorium volume of the elevation. A pair of fluted poured-in place concrete reliefs are surmounted by a curved banded awning that projects from the elevation. A chevron band of coping sits immediately above the doorway, which sits below a shallow relief panel indicating "BENJAMIN FRANKLIN SCHOOL" (**Figure 12**). Extending further east, a one-story projection houses the school's cafeteria and kitchen. A grouping of three 1/6 steel framed windows sits adjacent to a pair of double doors accessible by a set of concrete steps with a landing and metal hand rails. Further east in the cafeteria sit a pair of 1/4 lite steel framed windows. All portions of Building 02-03 have flat roofs, while the kitchen, located at the easternmost extent, features a slight flat roofed overhang. Here, a single door sits higher in the elevation, with a pair of 1/2 transom lites of different sizes.

The east elevation is largely unarticulated except for the kitchen projection. A projecting overhang covering a walkway extends the length of the building's south elevation, accessible through a set of concrete steps with a metal handrail. Single doors lead off of this walkway to girl's and boy's restrooms, followed by pairs of double doors with transoms and interspersed multilite window assemblies leading to the cafeteria. Beyond this, access to the auditorium is through a pair of double doors. Above the overhang, sit a band of 5-1/4 steel framed windows, which mirror those on the north elevation.

Figure 9
Building 02-03 at west facade with entryway corridor and curved walls with glass block, facing northeast

Figure 10
Detail of curved glass block corner and multilite windows along west facade of Building 02-03, facing southeast

Figure 11
North elevation of Building 02-03 with cafeteria (left) and auditorium (right), looking southwest

Figure 12
Detail of auditorium entrance at north elevation of Building 02-03, looking southeast

At the interior, a central corridor connects Building 01-01 to Building 02-03 **(Figure 13)**. The school's administrative functions comprise the northeastern portion of the building, which include the principal's office, a nurse's office, and a parent room, all of which are carpeted. Individual restrooms sit within the nurse's office, principal's office and parent room, which are all tiled. The principal's office and parent room both feature the curved glass block windows. This portion of the building includes skylights, and some doors feature single lite operable transom windows at the interior. The clerk/reception area includes

original built-in mailboxes and cabinetry). Storage spaces, and the clerk/reception area sit immediately off of the hallway accessible through a pair of multilite doors with corresponding transoms above.

The hallway features curved walls which mimic those at the exterior, and laminate flooring. ADA lifts offer access to the varying levels in this hallway. A set of stairs with metal handrails leads from the hallway to the original entrance of Building 01-01.

A raised stage space with wood flooring and storage is accessible from the central hallway or from a set of steps within the auditorium space. The auditorium features some fluted concrete detailing similar to that found at the entryway to the space. The auditorium shares a movable wall with the cafeteria, both of which are accessible from the outside covered walkway at the south elevation of Building 02-03. The auditorium features carpeted floor, while the cafeteria has composite tile flooring.

Figure 13
Building 02-03 corridor looking toward reception area, southeast view

Classroom Building 02-02

Classroom Building 02-02 is a one-story, rectangular plan building covered by a flat roof (**Figure 14**). It is articulated in a vernacular style, likely designed to match existing Building 01-01, in its massing, materials, and height. The reinforced concrete walls are covered by plaster. The building is A-symmetrically organized on its east and west elevations, while the north and south elevations are symmetrical. Bands of multi-lite steel framed windows articulate the three classrooms on either end of the building, similar in size and configuration as those at Building 01-01. Access to the building is through a breezeway between Building 02-02 and Building 01-01, leading to a north facing pair of multilite doors with a surmounting transom (**Figure 15**). The southern elevation is symmetrical in configuration with three pairs of doors with multilite transoms above (**Figure 16**).

The building similarly features a double-loaded corridor, with three classrooms to either side of the bisecting hallway. Each of the six classrooms is accessible via 3/3 multilite doors with 3/2 operable transom windows. Two skylights similarly punctuate the building at the central hallway. The built-in

cabinetry and ‘entry’ and ‘work spaces’ in Building 02-02 differ from those in Building 01-01 in their layout and configuration. Cabinetry, drawers, cubbies, coat hooks, and built in book shelves are all similarly present here.

Boy’s and girl’s restrooms are located at the southern portion of the building, each with an entry vestibule and an additional door. The girl’s restroom has several bathroom stalls, and the boy’s restroom has both urinals and stalls. Each have tile at the walls and floor. Both bathrooms have mirrors and low large contemporary sinks.

Figure 14

Figure 15
Building 02-03 east elevation (left) and north elevation (right), with connecting breezeway at right, looking southwest

Figure 16
Building 02-03 south elevation (left) and east elevation (right), looking northwest

Classroom Building 04-05

Classroom Building 04-05 is an L shaped one-story tall building covered by a flat roof and with stucco walls and was not designed in a particular architectural style. It is located on the northeast corner of the lot and is oriented south towards the rest of the school campus, and connects to Building 02-03 by a curved covered walkway (**Figure 17**). The interior consists of two first grade class rooms and two kindergarten classrooms, bathrooms, and storage. All of the windows are aluminum and the doors are metal with metal frames.

The south (main) façade faces towards the rest of campus. There is a grouping of six steel frame windows. There is a classroom door with an aluminum sash window to the left with two windows above **(Figure 18)**. From there the building turns south towards Building 05-06. It has groupings of aluminum clearstory windows above the canopy covering the walkway **(Figure 17)**. A portion of the north façade can be seen to the east of Building 05-06 where there are three aluminum windows. The west (side) elevation has a grouping of six aluminum sash windows and a door. To the south of the door is an aluminum sash window and there are smaller aluminum sash windows above the door and window. The single door sits below a metal projecting awning at the east elevation **(Figure 19)**. The north (rear) elevation fronts Monroe Avenue. On the west side there is a grouping of three aluminum sash windows, a door to the west, three groupings of six aluminum sash windows then two aluminum sash windows on the far east side **(Figure 20)**.

Figure 17

Building 05-06 (left) and Building 04-05 (right), looking northwest

Figure 19
East elevation of Building 04-05, looking west

Figure 20
Building 04-05 north elevation, looking southwest

Kindergarten Classroom Building 05-06

Building 05-06 is a single-story rectangular building with stucco siding and a flat roof. It contains a kindergarten classroom that faces the rest of campus. It is partially attached to Building 04-05 to the north. All of the windows are aluminum and the doors are metal. They have metal frames.

The main south (main) facade is asymmetrical in configuration with a projecting metal awning across the entire façade. There is a door with a transom above it and a bank of seven aluminum windows. A concrete ramp leads from the east to the entrance door with planters along the bottom of the south façade. The west (side) elevation has a tall parapet and two small aluminum sash windows **(Figure 21)**. The north (rear) elevation abuts with Building 04-05 to the east. There is a grouping of three aluminum sash windows and an additional door with concrete ramp at the south facade. The parapet continues around the north elevation **(Figure 22)**. There is an additional entrance on the east (side) elevation under a shed roof. There is a metal door with a pair of aluminum sash windows on either side and a transom above it **(Figure 23)**.

The post-modern library (Building 06-07) constructed in 2007 was not reviewed as part of this historic evaluation to its construction date beyond the period of significance.

Site plan with construction history

***D3 Detailed Description (continued):**

The campus began with temporary wood portables at the site which were moved from adjacent Birney Elementary School.[1]

Local architects were asked to submit tentative sketches for the design of the first permanent building at the site in the summer of 1933.[2] Prominent local San Diego architect Frank W. Stevenson was soon after named as the architect for the proposed addition to the Franklin ES. Stevenson was to, "draw plans for a six-room addition to cost not more than $20,000."[3] His architectural plans for a "one-story six-room earthquake-proof structure" were accepted by the Board of Education that December.[4] Sealed bids were advertised for the school soon after, then closed due to non-conformance of prevailing wages for lath and plasterers.[5] Bids for a contractor to perform the work were again advertised the following month, with the lowest bid awarded to local contractors Calland and Eden. The accepted bid of $30,378 provided estimates for alternate configuration schemes, which won the contract as chosen by the Board. Alternative selections as chosen by the Board included the addition of linoleum floors, using hard cement instead of certain tile wainscoting, and acoustic plaster ceilings.[6]

Plot plans created in 1933 for Building 01-01 (prior to its construction) depict six existing (at the time) wood buildings including a two-room classroom building, three three-room classroom buildings, a kindergarten classroom building, and a house that accommodated two classrooms. Two of the three-room classroom buildings sat where the present day Classroom Building 02-02 presently sits, while the reaming wood buildings sat in the present-day baseball field, and playground areas.

This first permanent building at Franklin ES, Classroom Building 01-01, was completed by the fall of 1934. Newspaper articles from the time touted the new building being "the first new 'earthquake proof' unit of a permanent group of buildings for the Benjamin Franklin School." [7] Construction costs were $33,000.[8]

Original building plans show the building's entry points were at either end of the building, north and south. In plan, a double-loaded corridor housed three classrooms to either side. Single multilite wood doors, with operable transoms above fed from the classrooms and onto the corridor. Toward the rear of each classroom is a 'cloak room' and a 'workroom.' The cloak room featured coat shelves and hooks, with built-in cupboards, and the workroom features a worktable with sink and small cabinetry, and additional cubicles. Classrooms had slate black boards with chalk troughs, open book recessed shelves, and a teacher's wardrobe with shelves and coat hooks.

Five years after the construction of the initial permanent building, the Board of Education authorized a $292,000 school building program for the 1939-1940 school year. This funding was authorized just one

month before the beginning of World War II. The construction of six additional classrooms and an administrative unit and auditorium at Franklin ES were considered to be chief items as part of this program. [9] As part of the site preparations for the new buildings at the site, an alleyway at the property was to be closed off in order to provide additional land for new structures.[10] Additional land surrounding the campus was to be purchased for $10,000 for the school's expansion.[11]

The Streamline Moderne-designed administrative and assembly addition (Building 02-03) and the second bank of classrooms (Building 02-02) were designed by prominent San Diego architect Samuel Wood Hamill. By the fall of 1939, these two new buildings were under construction. According to a *San Diego Union* newspaper article, "One of the new buildings will consist of six classrooms; the other one will have a new auditorium, cafeteria, office, nurses' room, and a teachers' rest room in it. There will then be two wooden, and three concrete buildings in the school." [12] While construction of these two additional buildings was underway, school principal Louise E. Weller set up her office in a camper trailer.[13]

Construction continued through the fall of the following year, 1940.[14] The administration and assembly building was largely completed by mid-December, and dedicated in May of 1941.[15] The building included several Streamline Moderne features at the exterior, and enclosed Building 01-01 to the north with a shared interior corridor. The plot plan developed as part of the 1940 construction work depicts that several of the wood portable buildings from the 1933 set of drawings were still extant by this time. It is unclear when these buildings were demolished. Other original features from this time included a sand blasted pair of wood doors with a Benjamin-Franklin motif, and classrooms with entry spaces and workspaces replete with built-in cabinetry.

Due to the continued increase in school enrollment, likely because of the United States' entry into World War II and the influx of new families to the area, designs for an additional bank of classrooms were developed. By the fall of 1947, the Board of Education set out an advertisement to receive sealed bids for "furnishing all labor, material, equipment, transportation and services for alterations and additions to Benjamin Franklin Elementary school."[16] Architect Samuel W. Hamill again designed this addition to the campus, a bank of classrooms (Building 04-05) extending east along Monroe Avenue. By October of 1947, the Board of Education had accepted the construction costs for the proposed classroom wing addition at the campus.[17] The stand-alone addition was constructed sometime between 1948 and 1951. Improvements as part of this work included a curvilinear covered walkway which connected to the new bank of classrooms, including boy's and girl's restrooms and a storage room. Organized horizontally, four classrooms lead onto a covered walkway. Classrooms included built-in cabinetry including shelves, drawers, and overhead cabinets. This addition similarly included built-in cabinetry as the previous addition

designed by Hamill, with small tiled pool adorned with a metal figurine at the easternmost kindergarten classroom.

As enrollment continued to grow, in 1951 Samuel Hamill also designed the smaller kindergarten classroom addition, Building 05-06, connecting to the previous addition at the southeast. In 1953, the kitchen area was remodeled which involved new equipment and a reconfiguration of the space and some of the walls. A Sanborn map created in 1959 shows the campus with one auxiliary building to the south of Building 02-02. Two new portables were constructed in 1960. Playground improvements in 1963 included the demolition of adjacent buildings at the south of the parcel, and the relocation of existing portables in addition to regrading, new fencing and recreational play equipment. Two additional portables were constructed in 1967 and 1968, respectively.

An outdoor recessed concrete ‘lunch court’ was constructed adjacent to original Building 01-01 in 1973. Site modifications continued in the 1980s including new gates and fencing, a new baseball field and baseball diamond with a new backstop, and new playground equipment. Piping for water was replaced during this period. Aerial photos taken between 1980 and 1989 indicate that the majority of the south and east portions of the parcel was developed for recreational use during this time. In the 1990s, two portables were added, and in 1998 several were renovated. Aerial maps indicate that the two large portable structures were constructed or relocated to their current location between 1996 and 2002. In 2001, a permanent shade structure was constructed at the lunch court. ADA ramps were added to the campus, and all permanent buildings received electrical upgrades.

More recent modernization efforts in 2007 included the demolition of existing portables and the construction of a new library building (Building 06-07) and corresponding landscaping. A curb cut was inserted along the west elevation to allow for a pickup/drop-off area. The restrooms were upgraded, and new stairs at the auditorium were included. Electrical lifts were inserted into Building 02-03; with one at the auditorium and two at the corridor hallway. More recent upgrades included an electrical display adhered to the west elevation of Building 01-01 at the pickup/drop-off area in 2017, and the installation of HVAC systems throughout all permanent buildings in 2018. Currently, the fields at the southern end of the campus operate as a City Park in a joint-use agreement between the City and the District.

*D6. Significance (continued):

The following buildings constructed during the period of significance contribute to the eligibility of Franklin ES as a historic district under California Register Criteria 1 and 3: Buildings 01-01, 02-02, 02-03, 04-05, and 05-06, and are considered contributors to the Franklin ES historic district. Therefore, the contributing buildings comprising Franklin ES are assigned a California Historic Resources Status Codes of 3CS, "appears eligible for the California Register as an individual property through survey evaluation." Due to the proposed demolition of Buildings 04-05 and 05-06, mitigation is recommended to ensure the protection of the historic integrity of the remaining contributing buildings at the campus property.

California Register of Historic Resources Evaluation

Criterion A/1: Events

Franklin ES was constructed as San Diego's Kensington neighborhood developed. In 1926, a deed restriction that only allowed for residential construction in the neighborhood was lifted, which would allow for civic and commercial buildings to be constructed in the area. Three years later the first portables were moved to the site as Franklin ES began. By 1933 the surrounding neighborhood was experiencing heavy development, as the first permanent building was constructed on the campus. By 1941, at the onset of World War II, the campus expanded with more classrooms, and administrative, assembly, and cafeteria facilities, during a time of rapid population growth in San Diego due to war support efforts. The campus property also expanded as the District acquired more land for the campus. By the war's end, in 1947 and 1950 the campus was expanded yet again which was consistent with the baby boom and related post-war development.

The Lanham Act of 1940 authorized 11 new elementary schools in San Diego, however no evidence was uncovered to suggest that Franklin ES was among these schools, nor that any part of the campus was undertaken as part of a WPA project, despite the construction dates.

The property appears to be eligible for listing under California Register Criterion 1 for eligibility related to historic patterns of development in the Kensington, San Diego neighborhood, as part of broader development patterns in California's history. The property does not appear to rise to a level of significance necessary for eligibility on the National Register of Historic Places as a historic district.

Criterion B/2: Significant Persons

Franklin ES does not appear to satisfy National Register Criterion B or California Register Criterion 2 for eligibility related to a historic personage. Franklin ES is not identified with the productive life of significant individual District teachers, principals, administrators, students, or any other persons important in our past.

Criterion C/3: Design/Construction

Franklin ES is a conglomeration of several different building campaigns, each stylistically reflective of the era in which it was built. The earliest building, Building 01-01 is a simplified example of a Moderne Style building, and Building 02-02 is similarly reflective of this style. Built at the same time as Building 02-02,

Building 02-03 is more strongly aligned with the Moderne style in San Diego, as it displays several of the character-defining features of this style. These three building comprised the original core of the campus, all constructed leading up to World War II.

Immediately after the war, Buildings 04-05 and Building 05-06 were constructed, in 1947 and 1950, respectively. These later buildings were articulated in a more vernacular version of the Mid-Century Modern Style or Contemporary Style, terms which are used interchangeably in the literature related to buildings of this era constructed in San Diego.

Moderne/Streamline Modern Style character-defining features present at the earliest buildings, Building 01-01, Building 02-03, and Building 02-02 include:

- Flat roof with coping
- Asymmetrical facade
- Horizontal massing and emphasis
- Smooth stucco exterior finish
- "Speedline" horizontal accents
- Curved building corners
- Corner windows
- Glass block

Mid-Century Modern/Contemporary Style character-defining features present at the post-World War II buildings; Building 04-05, and Building 05-06, include:

- Lack of applied ornament
- Eave overhangs and sheltering canopies
- Low horizontal massing
- Horizontal bands of flush windows
- Ribbons of steel frame windows

A full list of character-defining features is included in the Character-Defining Features section below. Further to this, all five of the original buildings on the Franklin ES campus are associated with master San Diego architects. The first building constructed in 1934, Building 01-01, by Frank W. Stevenson, who was an active architect in San Diego between the 1920s through the 1950s. His prominent works include the Medico-Dental Building in Downtown San Diego and the Grande Colonial Hotel in La Jolla. Master San Diego architect Samuel Wood Hamill was known for his prominent works in southern California, with many extant projects in San Diego. Hamill was one of four local architects hired to design the highly visible Works Progress Administration-sponsored San Diego City and County Administration Building. The County Administration Building, was constructed in 1936 with Beaux-Arts, Spanish Revival, and Streamline Moderne influences. Shortly after, his first two buildings for the Franklin ES were constructed. Hamill's style evolved as the times changes, as was common for architects practicing in this era. Following World War II, he designed the later two additions to Franklin ES, Buildings 04-05 and 05-06, constructed in 1947 and 1950, respectively. During this time Hamill designed the Veteran's War Memorial Building in Balboa Park (1950), in a modern style vastly differing than that of the administration building of the 1930s. Hamill was heavily involved with the San Diegans, Inc. organization which formed to address the blight in downtown San Diego. His efforts ultimately resulted in the City's completion of a General Plan, which began redevelopment efforts in the area. Afterwards, Hamill designed the notable Civic

Center and Community Concourse in downtown in 1964. Hamill's hand in the design of the Franklin ES campus building over the course of roughly 10 years reflects his evolving design aesthetic, constructed intermittently among some of his most high-profile civic commissions.

Together, these five buildings appear to be eligible as a historic district under California Register Criterion 3, as being reflective of distinctive San Diego public school architecture from the depression era up through the end of World War II articulated in both the Moderne and Mid-Century Styles and for a strong association with two prominent San Diego master architects. When viewed together, the Franklin ES campus is reflective of design trends and changes over a period of 16-years as the property morphed to accommodate an influx of young students in the area. As a result of this, the Franklin ES campus has a period of significance which ranges from the construction of the first permanent building in 1934, up through the construction of the last permanent building after World War II in 1951. The former playground area of this time period (1934-1951) was located at the present-day location of the Library building and lunch pavilion.

Individually, the buildings would lack distinction to be listed on the National Register of Historic Places or the California Register of Historic Resources as individually eligible resources under the design criterion. When viewed collectively as a campus, the five public school buildings are reflective of evolving tastes in Modernism as designed by master San Diego architects. These five buildings represent the distinguishable architectural identity of Franklin ES from 1933 to 1951 that would otherwise individually would lack distinction.

Criterion D/4: Data Potential

Franklin ES is not likely to yield any information important to prehistory or history. Therefore, Franklin ES does not meet the above criterion.

Integrity Analysis

The National Register and California Register recognizes a property's integrity through seven aspects or qualities: location, design, setting, materials, workmanship, feeling, and association. Eligible properties should retain several, if not most, of these aspects. Both registers require that a resource retain sufficient integrity to convey its significance, and the property must retain the essential physical features that enable it to convey its historical identity. Integrity is based on significance and understanding why a property is important. National Register Bulletin 15 states that "only after significance is fully established can you proceed to the issue of integrity" (U.S. Department of the Interior 2002). Franklin ES has been identified as a historic district significant under California Register Criteria 1 for its historical association with the development of the residential Kensington suburb prior to and after World War II. The school campus has also been identified as a historic district under the National Register Criteria C and California Register Criteria 3 for its embodiment of both streamline versions of Moderne and Mid-Century architecture as applied to a public elementary school campus, and for its association with master San Diego Architects Frank W. Stevenson and Samuel Wood Hamill. Based upon these significance findings, a period of significance has been identified as 1934 to 1951, when the first permanent building was constructed, through the construction of the last building in the post-war era.

The grouping of five buildings in an L-shape configuration along Copeland and Monroe Avenues remains the same, and the property has not been relocated. The property retains integrity of location. The school continues to express the aesthetic and historic feeling of a combination Moderne and Mid-Century Modern campus, constructed in various campaigns spanning from 1934 through to 1950, including its lunch area and large play areas. The buildings have undergone minor upgrades, per requirements for compliance with safety and access over time, including concrete ramps, lifts, replacements of surface materials that have outlived their reasonable service life, as would be expected with high-wear environments, and the installation of HVAC. These modifications have not altered the design of the buildings, and as a result, the buildings retain a high level of integrity for their original simple workmanship and materials as evidenced in the remaining built-in cabinetry, original windows, wood doors, interior skylights and operable transoms, and overall building massing, footprint, and configuration.

A review of the original plans for each of the eligible buildings confirms that much of the original designs remain intact, with modifications as mentioned above, that have not affected circulation or usage over time. As such, the property retains integrity of design. The property retains its integrity of association, as Franklin ES still operates as an elementary school, as it has since its construction. The property retains historic integrity of location. feeling, material, workmanship an association.

While the library building and later wood portable buildings were constructed on the campus after 1950, these structures do not overwhelm the campus and its historic one story buildings, however, they do sit toward the center of the property in the former location of different temporary portables and play area overtime. The property retains ample play areas despite this, and continues to have plantings along Copeland and Meade Avenues, as were present during the period of significance. Further, the property's boundaries have remained the same since its period of significance. In summation, the property retains marginal historic integrity for its setting. In summary, Franklin ES Buildings 01-01, 02-02, 02-03, 04-05, and 05-06 and its surrounding campus retains historic integrity for its location, design, workmanship, materials and association, and marginal integrity for its historic setting. As a result, the property retains historic integrity.

Conclusion

ESA evaluated Franklin ES for potential eligibility for listing in the National Register and California Register as a historic district.

The five earliest buildings comprising Franklin ES (Buildings 01-01, 02-02, 02-03, 04-05, and 05-06) were constructed as San Diego's Kensington neighborhood developed which paralleled an important early growth pattern for the burgeoning city. In 1926, a deed restriction that only allowed for residential construction in Kensington was lifted, which allowed for civic and commercial buildings to be constructed in the area. Three years later the first portables were moved to the largely vacant site as Franklin ES began. By 1934 the surrounding neighborhood was experiencing heavy development upon the construction of several Kensington subdivisions when the first permanent building was constructed on the campus. Despite this momentum, the Great Depression halted further development, leaving many empty lots throughout the neighborhood. Construction in Kensington resumed by the early 1940s following the end of the Great Depression. By 1941, the campus expanded with more classrooms, and administrative, assembly, and cafeteria facilities during a time of rapid population growth in San Diego due to World War

II support efforts. By the war's end, in 1947 and 1950 the campus was further expanded which was consistent with the baby boom and related post-war development of the surrounding area. In this, the 5 buildings that comprise the Franklin ES were constructed and expanded over time to educate the rising number of school-aged children in the Kensington-area during a period of rapid growth due to the development of the Kensington neighborhoods, onset of World War II and related war efforts, and the eventual post-war baby boom – each of which resulted in an increase of families with young children in the area. As associated with a pattern of development significant to regional and local history, these 5 buildings collectively appear to be eligible as a historic district in the California Register under Criterion 1. This development, however, does not appear to rise to a level of significance necessary to warrant the district eligible for listing on the National Register under Criterion A, as the property does not appear to be associated with a larger New Deal economic program, nor did the board patterns of development make a significant contribution to American history.

When viewed together, the Franklin ES campus is reflective of design trends and changes over a 16-years period as the property morphed to accommodate an influx of young students in the area. As a result of this, the Franklin ES campus has a period of significance which ranges from the construction of the first permanent building in 1934, up through the construction of the last permanent building after World War II in 1951. Together, these 5 buildings appear to be eligible as a historic district under California Register Criterion 3, as being reflective of distinctive a multiple-building San Diego public school campus. Constructed from the depression-era up through the end of World War II, the campus is articulated in evolving Moderne and Mid-Century Styles that are reflective of Modernist indoor-outdoor school planning principles of the era. Further, the property conveys a strong association with two prominent San Diego master architects, Frank W. Stevenson and Samuel Wood Hamill. Both architects achieved distinction in San Diego for commissions articulated in period styles, which shifted toward modern designs during Franklin ES' periods of construction. Stevenson and Hamill's designs of buildings at this public school campus are notable within their larger prolific bodies of work for their streamlined application of contemporary design motifs to a multi-building elementary school campus. As such, the 5 early buildings comprising Franklin ES (Buildings 01-01, 02-02, 02-03, 04-05, and 05-06) appear eligible as a historic district under on the California Register under Criterion 3 for the campus embodiment of distinctive characteristics of a period, and as works of two San Diego Master architects. The property's design, stylistic articulation, and association with local designers does not appear to rise to a necessary threshold of significance which would render it eligible for listing on the National Register under Criterion C.

The property retains historic integrity of design, association, location, feeling, material, workmanship, and retains marginal historic integrity for its setting. In summary, Franklin ES Buildings 01-01, 02-02, 02-02, 04-05, and 05-06 and its surrounding campus retains historic integrity for its location, design, workmanship, materials, feeling, and association, and marginal historic integrity for its modified setting. As a result, the property retains overall historic integrity.

Lastly, none of the buildings on campus appear to rise to the threshold of individual distinction to be individually eligible for the National Register of Historic Places or California Register of Historic Resources on their own historical or architectural merits.

Assumptions

Gasoline

19.6 pounds of CO_2 per gallon of gasoline[7]

0.45 kg = 1 pound

8.89 Kg of CO_2 per gallon of Gasoline

Diesel

22.4 pounds of CO_2 per gallon of diesel fuel[7]

0.45 kg = 1 pound

10.16 Kg of CO_2 per gallon of Gasoline

Construction	diesel	Used for trucks (haul and vendor) and off-road equipment
	gasoline	worker vehicles
Operation	diesel	Majority of trucks and buses
	gasoline	remaining vehicle mix

LCFS & Pavley assumed for on-road vehicles after year 2011

Sources:

Electricity Intensity Factors - California Emissions Estimator Model (CalEEMod).

Estimated construction water use assumed to be generally equivalent to landscape irrigation, based on a factor of 20.94 gallons per year per square foot of

landscaped area within the Los Angeles area (Mediterranean climate), which assumes high water demand landscaping materials and an irrigation system efficiency of 85%.

Factor is therefore (20.94 GAL/SF/year) x (43,560 SF/acre) / (365 days/year) / (0.85) = 2,940 gallons/acre/day, rounded up to 3,000 gallons/acre/day.

(U.S. Department of Energy, Energy Efficiency & Renewable Energy, Federal Energy Management Program. “Guidelines for Estimating Unmetered Landscaping Water Use." July 2010. Page 12, Table 4 - Annual Irrigation Factor – Landscaped Areas with High Water Requirements).

RE: Paleontological Records Search – Benjamin Franklin Elementary School Whole Site Modernization Project (Project No. D160537.12)

Dear Mr. Vader:

This letter presents the results of a paleontological records search conducted for the Benjamin Franklin Elementary School Whole Site Modernization project (Project), located in the southern portion of the Kensington neighborhood within the Mid-City: Kensington-Talmadge community plan area of the City of San Diego, San Diego County, California. The Project site is located at 4481 Copeland Avenue, and is bordered to the west by Copeland Avenue, to the north by Monroe Avenue, to the east by Van Dyke Avenue, and to the south by Meade Avenue.

A review of published geological maps covering the Project site and surrounding area was conducted to determine the specific geologic units underlying the Project site. Each geologic unit was subsequently assigned a paleontological resource sensitivity following City of San Diego guidelines (City of San Diego, 2011). In addition, a search of the paleontological collection records housed at the San Diego Natural History Museum (SDNHM) was conducted in order to determine if any documented fossil collection localities occur at the Project site or within the immediate surrounding area.

Geologic Units Underlying the Project Area

Published geological reports (e.g., Kennedy and Tan, 2008) covering the Project area indicate that the Project site is entirely underlain by early to middle Pleistocene-age very old paralic deposits (broadly equivalent to the Lindavista Formation). This geologic unit and its paleontological sensitivity are summarized below. The SDNHM has 29 recorded fossil localities within one mile of the Project site. Twenty-six of these localities are from the late Pliocene- to early Pleistocene-age San Diego Formation, which is not anticipated to be impacted by construction of the Project. The remaining three localities are from the Lindavista Formation, and are discussed in more detail below.

very old paralic deposits (Lindavista Formation) – The marine and/or non-marine terrace deposits of the early to middle Pleistocene-age (approximately 1.5 to 0.5 million years old) Lindavista Formation are exposed along the upper slopes of the Project site. More specifically, these deposits rest on the Tierra Santa terrace (approximately 930,000 years old) of Kern and Rockwell (1992), and are equivalent to unit 8, very old paralic deposits, of Kennedy and Tan (2008). The SDNHM has three recorded fossil collection localities from the Lindavista Formation within a 1-mile radius of the Project site, which yielded trace fossil burrows, leaf impressions of vascular plants, a ray tooth plate, a partial antler of an artiodactyl, and a whale cervical vertebra. Elsewhere in San Diego County, the Lindavista Formation has produced remains of nearshore marine invertebrates (e.g., clams, scallops, snails, barnacles, and sand dollars), as well as sparse remains of marine vertebrates (e.g., sharks and baleen

whales). Fossils have primarily been recovered from localities in Tierrasanta and Mira Mesa where the Lindavista Formation is assigned a high paleontological sensitivity; elsewhere in San Diego County, including in the vicinity of the Project site, the Lindavista Formation is assigned a moderate paleontological sensitivity.

Summary and Recommendations

The moderate paleontological sensitivity of the Lindavista Formation in San Diego County (Deméré and Walsh, 1993), as well as the presence of fossil collection localities in the vicinity of the Project site, suggests the potential for construction of the proposed Project to result in impacts to paleontological resources. Any proposed excavation activities that extend deep enough to encounter previously undisturbed deposits of this geologic unit have the potential to impact the paleontological resources preserved therein. For these reasons, implementation of a complete paleontological resource mitigation program during ground-disturbing activities is recommended.

The fossil collection locality information contained within this paleontological record search should be considered private and is the sole property of the San Diego Natural History Museum. Any use or reprocessing of information contained within this document beyond the scope of the Benjamin Franklin Elementary School Whole Site Modernization project is prohibited.

If you have any questions concerning these findings please feel free to contact me at 619-255-0321 or kmccomas@sdnhm.org.

Sincerely,

Katie McComas, M.S.
Paleontological Report Writer & GIS Specialist
San Diego Natural History Museum

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Replace Ground Cover

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

3.2 P1 - Add Portable Classrooms - 2021

Unmitigated Construction On-Site

JMR Job #1-11

Mr. Glenn Boogren
SAN DIEGO UNIFIED SCHOOL DISTRICT
4860 Ruffner Street
San Diego, California 92111

PROJECT: Franklin Elementary School

SUBJECT: Summary of Asbestos Containing Materials

Mr. Boogren:

Enclosed is a summary of asbestos containing material at Franklin Elementary School. This summary was compiled from the results of sample analysis as supplied by San Diego Unified School District and samples collected and analyzed by JMR Environmental Services, Inc.

Procedure:

Sample analysis of bulk materials was performed in accordance with procedures described in Appendix A, "Method for the Determination of Asbestiform Minerals in Bulk Insulation Samples", published in 40 CFR Ch. I (1-1-87 Edition), Pt. 763, Subpart F, Ap. A, pages 293-299. This procedure involves examination of the samples with a petrographic microscope utilizing polarized light, a procedure commonly known as polarized light microscopy (PLM).

Dispersion staining is a technique that is used in conjunction with PLM. This technique allows the analyst to measure the refractive index of the fiber by producing colors through the dispersion of refractive index of the fiber as it relates to the dispersion index of the mounting liquid. A more positive identification of asbestos can be made when both PLM and dispersion staining are used.

All results generated via bulk asbestos analysis are reported in terms of approximate percent by volume. The results are presented on the following pages.

SUMMARY OF ASBESTOS CONTAINING MATERIALS AT FRANKLIN ELEMENTARY SCHOOL

JMR Environmental Services, Inc.

SAN DIEGO UNIFIED SCHOOL DISTRICT
Franklin Elementary School
April 30, 1999

ASBESTOS CONTAINING MATERIALS
FRANKLIN ELEMENTARY SCHOOL

100 BUILDING (01-01)

Floor Tile Mastic - Throughout
Spray-On Ceiling Plaster

200 BUILDING (02-02)

9" x 9" Floor Tile - Throughout

300 BUILDING (04-05)

9" x 9" Floor Tile - Throughout
Asbestos Paper - Heater Room
Seam Tape - Heater Room

400 BUILDING (02-03)

Aircell Pipe Insulation - Throughout Attic Space
Aircell Pipe Insulation - Heater Room by Stage
Aircell Pipe Lagging - Supply Room
Mudded Pipe Fittings - Supply Room
Mudded Pipe Fittings - Heater Room

LEAD CONTAINING PAINT INVESTIGATION CONDUCTED AT FRANKLIN ELEMENTARY SAN DIEGO, CALIFORNIA

JMR JOB # 1 - 11

Issued to:
Mr. Glenn Boogren
San Diego Unified School District
4860 Ruffner Street
San Diego, California 92111

April 30, 1999

JMR Environmental Services, Inc.

JMR Environmental Services, Inc.

April 30, 1999
JMR Job #1-11

San Diego Unified School District
Mr. Glenn Boogren
4860 Ruffner Street
San Diego, California, 92111

Mr. Boogren:

An investigation to identify possible Lead Containing Paint was performed by JMR Environmental Services Inc. at Franklin Elementary School, 4481 Copeland Avenue, San Diego, California on April 28, 1999.

The purpose of this survey was to determine the presence of lead on fixed, painted surfaces within the area described above. Many building components at this site appeared to be homogeneous.

Equipment used to perform the survey was an X-Ray Fluorescence (XRF) Scitec Map 4 Spectrum Analyzer. In addition, paint chip samples were collected and analyzed.

This report includes XRF results, paint chip sample lab results, a site plan, a summary of Cal/OSHA's Lead in Construction Standard, and a discussion of survey results and Cal/OSHA compliance recommendations.

Lead Standards

Several government agencies have definitions for what amount of lead constitutes paint to be considered "lead-based." The Department of Housing and Urban Development (HUD) has designated the amount to be 1.0 mg/cm^2 or 5000 ppm (parts per million). The HUD regulations are related to potential hazards in the home environment and not to construction activities.

The California Department of Health Services (DHS) has created lead-related regulations that have been adopted into Title 17 of the California Code of Regulations. These regulations also define lead-based paint (LBP) as surface coatings containing lead concentrations of 1.0 mg/m^2 or 5000 ppm. The DHS regulations apply only to lead hazard abatement activities.

The Consumer Product Safety Commission (CPSC) has defined lead-based paint as surface coatings containing lead concentrations greater than 600 ppm. In 1978 the CPSC banned the sale of lead-based paint to consumers and the use of lead-based paint in residences and public buildings.

The Cal-OSHA Lead in Construction Standard (Title 8 CCR Section 1532.1) requires contractors to protect their workers when there is a potential for lead exposure due to the construction activities. Currently, Cal-OSHA has no lead concentration listed where contractors are exempt from Standard 8 CCR 1532.1.

Test Procedures:

Representative fixed, painted, surfaces were tested using the Scitec XRF Map Spectrum Analyzer. Results greater than 1.0 mg/cm^2 are considered to be positive for lead. Paint chip samples are collected from representative components when XRF results are less than 1.0 mg/cm^2 or inconclusive. Paint chip samples are then analyzed in a laboratory using Atomic Absorption Spectrometry (AAS).

XRF assays were performed using the "unlimited" mode. At this setting the XRF continues to assay the substrate until is has determined the painted surface to be either positive or negative with a confidence level of 95%.

XRF assay results are given on the following pages. Positive assay results are shaded.

CAL/OSHA TITLE 8 CCR 1532.1 SUMMARY

A Summary of Cal/OSHA's Lead in Construction Standard
Title 8, CCR Section 1532.1

NOTE: This standard originally became effective on November 4, 1993, shortly after the federal standard (29 CFR 1926.62). California's standard has since been revised, effective march 7, 1997. The revisions are highlighted by underlining and represent the additional requirements in California. A copy of the complete Cal/OSHA standard, in a reformatted, easier-to-read version, is available from Occupational Lead Poisoning Prevention Program at (510) 540-3448. The federal standard is available from Federal OSHA Publications Office at (415) 744-7112.

(a) Scope

This standard covers all construction work where an employee may be exposed to lead, including metallic lead, inorganic lead compounds, and organic lead soaps, but not organic lead compounds.

(b) Definitions

The Action Level (AL) is 30 $\mu g/m^3$ of airborne lead. Having airborne lead concentrations at or above the AL triggers certain health and safety measures described in this standard.

(c) Permissible Exposure Limit

The 8 hour Permissible Exposure Limit (PEL) is 50 $\mu g/m^3$ f airborne lead. If the work day is longer than 8 hours, the PEL is 400/number of hours worked per day. No employee may be exposed to lead at concentrations over the PEL.

(d) Exposure Assessment

Exposure assessment must be performed in all workplaces where employees may be exposed to lead.

(d)(2) Protection of Employees During Assessment of Exposure

Three sets of specified tasks trigger basic protective provisions where lead in present, until the employer performs an employee exposure assessment (exposure assessment is an initial determination via air monitoring, or a previous monitoring of a similar job within the last 12 months.)

For all three sets of tasks, employers are required to provide the following basic protective provisions until air monitoring indicates exposure levels are at or below the PEL:

- ☐ appropriate respiratory protection (type of respirator is specified according to assumed airborne lead level and requirements of Table 1),
- ☐ appropriate personal protective equipment - clean work clothes at least weekly (daily if > 200 $\mu g/m^3$ in air) - such as coveralls, gloves, hats, shoes or disposable shoe coverlets, face shields, vented goggles or other appropriate equipment,
- ☐ change areas with separate storage facilities for work and street clothes - the employer shall assure that employees do not leave the workplace with work clothes or equipment.
- ☐ hand washing facilities - the employer shall assure that employees wash their hands and face at the end of each work-shift
- ☐ biological monitoring, consisting of initial or baseline blood sampling for lead and zinc protoporphyrin(ZPP)
- ☐ training (includes Hazard Communication, respirator and lead training).

Lowest Exposure Trigger Tasks - Assume exposures > 50 and up to 500 $\mu g/m^3$ unless proven otherwise:

- ☐ where lead coatings or paint are present:
  - ☐ manual demolition of structures
  - ☐ manual scraping
  - ☐ manual sanding
  - ☐ heat gun applications
  - ☐ power tool cleaning with dust collection system
- ☐ spray painting with lead
- ☐ any other task where the employer has reason to believe employees may be exposed over the PEL.

Medium Exposure Trigger Tasks - Assume exposures > 500 and up to 2,500 $\mu g/m^3$ unless proven otherwise:

- ☐ use of lead-containing mortar
- ☐ where lead coatings or paint are present
  - ☐ lead burning
  - ☐ rivet busting
  - ☐ power tool cleaning without dust collection systems
  - ☐ cleanup of dry expendable abrasives
  - ☐ abrasive blasting enclosure movement and removal

Highest Exposure Trigger Tasks - Assume exposures > 2,500 $\mu g/m^3$ unless proven otherwise:

- ☐ where lead coatings or paint are present
  - ☐ abrasive blasting
  - ☐ welding
  - ☐ cutting
  - ☐ torch burning

(d) Exposure Assessment

When air monitoring is conducted, the employer shall collect personal samples representative of a full shift including at least one sample for each job classification in each work area either for each shift or for the shift with the highest exposure level. (For the initial determination, the employer may monitor only those employees expected to have the highest exposure levels.)

(d)(3) Basis of Initial Determination

The basis of initial determination, or initial assessment of employee exposure, will be employee exposure monitoring results and relevant considerations (e.g. complaints) with the following two exceptions:

- where the employer has previously monitored for lead exposures and the data were obtained within the past 12 months during similar workplace operations and conditions, the employer may rely on earlier results; or
- where the employer has objective data, demonstrating that a particular product or material containing lead or specific process, operation or activity involving lead cannot result in an employee exposure to lead ≥ the AL during processing, use or handling, the employer may rely upon such data instead of implementing initial monitoring. Objective data confirming that materials or surface coatings contain less than 0.06% (600 ppm) of lead may be used to demonstrate that employee exposure will not exceed the AL, as long as every unique surface or material has been sampled and analyzed.

Note: Objective data is not permitted to be used for exposure assessment in connection with any of the trigger tasks.

(d)(6) Frequency of Exposure Assessment

If the initial determination is < the AL, no further assessment is needed until there has been a change of equipment, process, control, personnel or a new task has been initiated.

If the initial determinations is at or above the AL but at or below the PEL, then monitoring shall be done at least every six months.

If the initial determination is above the PEL, then monitoring shall be done quarterly.

(d)(8) Employee Notification

Within 5 days after completion of the exposure assessment, the employer shall notify each employee in writing of the results which represent that employee's airborne lead exposure.

(e) Methods of Compliance

Exposures over the PEL shall be reduced through engineering, work practice and administrative controls, to the extent feasible. Respirators may be used to supplement other controls.

Prior to the commencement of any job where exposures may reach the PEL, the employer shall establish and implement a written compliance program, describing the lead-emitting activities and the means by which exposures will be controlled.

Where mechanical ventilation is used, the employer shall evaluate the performance as necessary to maintain effectiveness.

(f) Respiratory Protection

Where respirators are used, they shall be selected on the basis of air monitoring results, with the minimum level of respirator as indicated in Table 1 (or, until monitoring results are available, as determined by the task being performed).

Respirators shall be approved by MSHA/NIOSH for protection against lead dust, fume and mist.

Employees assigned to respirator use must receive a medical determination that they are able to wear a respirator and work safely.

Employers shall perform quantitative or qualitative fit testing of respirators at the time of initial fitting, and at least every 6 months thereafter, for employees wearing negative pressure respirators.

If an employee exhibits difficulty breathing with the respirator, the employer shall make available a medical examination to determine whether the employee can wear a respirator safely while performing the work.

Where respirators are used, the employer shall institute a complete, written respiratory protection program that outlines procedures for selection, use, cleaning, storage and maintenance of respirators.

PAPRs (powered air-purifying respirators) must be provided to any employee who requests one, where a PAPR would provide adequate protection as per Table 1.

(g) Protective Work Clothing and Equipment

When an employee is exposed to lead above the PEL (without regard to respirator use), or to lead compounds which may cause irritation, the employer shall provide and assure the employee uses appropriate protective work clothing, such as coveralls or other full-body work clothing, gloves, hats, shoes or shoe coverings, and face shields, goggles or other protective equipment as needed.

Work clothing shall be provided at least weekly for employees exposed over the PEL, except daily for those exposed at levels higher than 200 $\mu g/m^3$.

The employer shall provide for the cleaning or disposal of protective clothing and equipment. Clothing to be laundered must be placed in a closed container, labeled to indicate it contains lead, and the laundered must be notified of the potentially harmful effects of lead exposure.

Cleaning of protective clothing or equipment by blowing, shaking or any other means that disperses lead into the air is prohibited.

(h) Housekeeping

All surfaces shall be maintained as free as practicable of accumulations of lead.

Vacuums equipped with toxic dust-removing HEPA filters are the preferred method of cleaning surfaces where lead accumulates. Other types of vacuums may not be used.

Shoveling, dry or wet sweeping, and brushing may be used only where HEPA vacuuming has been tried and found to be ineffective.

Use of compressed air for cleaning is prohibited, unless there is a ventilation system to capture the dust created by the compressed air.

(i) Hygiene Facilities and Practices

The employer shall assure that all employees exposed to lead > PEL wash their hands and face prior to eating, drinking, smoking or applying cosmetics.

The employer shall provide, for ALL employees exposed to lead, adequate hand washing facilities, and assures (in the absence of shower facilities) that employees wash their hands and face at the end of the work shift.

In areas where employees are exposed to lead > PEL, the employer shall assure that food or beverages are not present or consumed, tobacco products are not present or used and cosmetics are not applied.

Employees exposed to lead > PEL shall be provided with clean change areas with separate storage facilities for work and street clothing, to prevent cross-contamination.

The employer shall assure that employees do not leave the workplace wearing any protective clothing or equipment that was work during the work shift.

Shower facilities, soap and towels shall be provided, where feasible, for employees exposed to lead > PEL, and the employer shall assure that these employees shower a the end of the work shift.

Employees exposed to lead > PEL shall be provided with a clean lunchroom or eating area. The employer shall assure that the lunch area is kept free from lead accumulation and that employees do not enter the lunch area with protective work clothing or equipment that has not been cleaned by vacuuming or other methods that limits dispersion of lead dust.

Employers shall establish regulated areas, where feasible, wherever employees are exposed above the PEL or performing trigger tasks (section (d)(2)). Warning signs shall be posted (section (m)), and access shall be restricted to authorized persons. Appropriate protective equipment shall be provided to and worn by employees and other persons who enter the regulated area.

(j) Medical Surveillance

The employer shall assure that all medical examinations and procedures are performed by or under the supervision of a licensed physician.

The employee has the right to seek a second medical opinion regarding the lead medical evaluation, at the expense of the employer, and if necessary a third physician may be requested to resolve any disagreements between the first two.

Prophylactic chelation, the routine use of chelating drugs to lower blood lead levels (BLL) in persons occupationally exposed to lead is prohibited.

(j)(2) Biological Monitoring

Initial blood sampling and analysis for BLL and zinc protoporphyrin (ZPP) are required for employees performing any of the specified trigger tasks, or for any employee exposed to an air lead level at or above the AL for at least 1 day.

Employees who are or may be exposed at or above the AL for more than 30 days in any consecutive 12 months, must be enrolled in a medical surveillance program, including BLLs and ZPP at least every 2 months for the first 6 months, and every 6 months thereafter.

Any employee with a BLL at or above 40 µg/dl, shall have a BLL and ZPP every two months until two consecutive samples are < 40.

Any employee with a BLL above 50 µg/dl shall receive a follow-up BLL within 2 weeks after the employer receives the results of the first test.

For those employees temporarily removed from their jobs involving lead exposure, a BLL and ZPP must be provided every month during the removal period.

All analysis of blood samples shall be conducted by a laboratory approved by OSHA.

The employer shall notify all employees, in writing, of their blood sampling results within 5 working days after receipt of the results.

(j)(3) Medical Examinations and Consultations

A medical exam shall be provided annually for all employees who had a BLL at or above 40 µg/dl during the preceding 12 months.

A medical exam shall be provided to any employee who reports signs or symptoms related to lead poisoning, desires medical advice regarding the effects of lead exposure on the employee's ability to produce a healthy child, is pregnant, or has difficulty breathing while wearing a respirator.

A medical exam shall be provided as medically appropriate to any employee removed from his/her usual job involving exposure to lead.

A medical exam shall include: detailed work history, with particular attention to past lead exposure; history and physical exam, with particular attention to teeth, gums, hematologic, gastrointestinal, renal, cardiovascular, neurological systems, and pulmonary system if respirators are used; blood pressure measurement; blood sample and analysis including BLL, ZPP, hemoglobin and hematocrit determinations, red cell indices, examination of peripheral smear morphology, blood urea nitrogen, serum creatinine; urinalysis with microscopic examination; pregnancy or male fertility evaluation, if requested by the employee; any other test deemed necessary by the physician.

(k) Medical Removal Protection (MRP)

(k)(1) Temporary Medical Removal and Return

The employer shall remove an employee from work having an exposure to lead at or above the AL on each occasion that a BLL and follow-up test is at or above 50 µg/dl.

An employee who has been removed due to an elevated BLL can return to his/her former job after having two consecutive BLLs at or below 40 µg/dl.

The employer shall remove an employee from work having an exposure to lead at or above the AL on each occasion that a final medical determination results in a medical finding, determination, or opinion that the employee has a detected medical condition which places the employee at increased risk of material impairment to health from exposure to lead.

An employee who has been removed due to a final medical determination can return to his/her former job when a subsequent medical determination indicates he/she no longer has a medical condition which places that employee at increased risk of health impairment from exposure to lead.

(k)(2) Medical Removal Protection (MRP) Benefits

As long as the job the employee was removed from continues, the employer shall provide up to 18 months of MRP benefits on each occasion that an employee is removed from exposure to lead.

MRP benefits means the normal earnings, seniority and other employment rights, and benefits, as though the employee had not been removed from the former job.

(l) Employee Information and Training

The employer shall provide information about lead hazards, according to the Hazard Communication Standard, to all employees exposed to lead.

For all employees exposed to lead at or above the AL on any day, exposed to lead compounds that cause eye or skin irritation, or who perform any of the specified trigger tasks, the employer shall provide initial (pre-placement) training that includes: the content of this standard and appendices; the operations that may cause lead exposure > AL; the purpose, proper selection, fitting, use and limitations of respirators; the purpose and description of the medical surveillance program, including the adverse health effects of lead exposure (especially on reproduction); the engineering controls and work practices relevant to the employee's job assignment; the contents of any compliance plan in effect; the location of regulated areas; the prohibition against routine use of chelation agents; the employee's right of access to records.

For all employees exposed to lead at or above the AL on any day, the above training must be provided annually.

(l)(3) Training and Certification for Residential and Public Buildings

All employees and supervisors who are engaged in lead-related construction in residences or buildings generally accessible to the public, and shown to be exposed to lead at or above the PEL, shall be trained by state-accredited training providers and certified by the California Department of Health Services (CDHS).

(Call 1-800-597-LEAD for information about accredited training providers and CDHS certification.)

(m) Signs

In work areas where employee exposure is >PEL, the employer shall post a warning sign with the words:

WARNING: LEAD WORK AREA
POISON - NO SMOKING OR EATING

(n) Record Keeping

The employer is required to maintain detailed records on exposure assessment, including any objective data used for exemption from air monitoring requirements, medical surveillance and medical removals.

Table 1: Respiratory Protection for Lead Aerosols

	Airborne Lead Concentration	Required Respirator
Lowest exposure trigger tasks	Not > 500 µg/m³ (up to 10 x PEL)	half-mask air purifying with HEPA* filters, or half-mask supplied air in negative pressure mode
	Not > 1,250 µg/m³ (up to 25 x PEL)	loose-fitting or helmet PAPR** with HEPA filters, or supplied air in continuous-supply mode
Medium exposure trigger tasks	Not > 2,500 µg/m³ (up to 50 x PEL)	full-face piece air purifying with HEPA filters, or full-face piece supplies air in demand mode, or half-mask supplied air in continuous-flow mode, or SCBA*** in demand mode
Highest exposure trigger tasks	Not > 50,000 µg/m³ (up to 1,000 x PEL)	half-mask supplied air in positive-pressure mode
	Not > 100,000 µg/m³ (up to 2,000 x PEL)	full-face piece supplied air in positive-pressure mode
	> 100,000 µg/m³ (>2,000 x PEL)	full-face piece SCBA in positive-pressure mode

* HEPA = high efficiency particulate filter that is 99.97% effective against particles 0.3 µm or larger.
** PAPR = powered air-purifying respirator
*** SCBA = self contained breathing apparatus

DISCUSSION

In this summary the tested surfaces are grouped into one of two ranges of lead content. The purpose of this is to categorize the surface lead content as relatively high, mid-ranged, or relatively low. This will help in complying with the Cal/OSHA lead standard as explained later. Furthermore, this categorization identifies which surface coatings HUD, DHS, and CPSC consider to be "lead-based."

Based on XRF and laboratory results, the following surfaces are considered to contain lead concentrations in excess of 1.0 mg/cm^2 or 5000 ppm.

CLASSROOMS 1-6 SITE 100

Interior Walls
Cabinets
Doors
Door Frames
Interior & Exterior Window Components
Baseboards
Exterior Steel Support Poles

CLASSROOMS 7-12 SITE 200

Cal/OSHA Compliance Recommendations

The Cal/OSHA Lead in Construction Standard (Title 8 CCR Section 1532.1) requirements apply to all construction activities where lead is disturbed and a potential for employee exposure exists. Since common lead analysis methods have a minimum detection limit, a painted surface can not be shown by practical means to be completely lead free. In effect, Cal/OSHA's requirements apply to all paint that is disturbed by an employee. Newer paints often contain small amounts of lead (up to 600 ppm is allowed) due to contamination during the manufacturing process.

When any amount of lead is disturbed an employee initial exposure assessment must be performed. If an employer has exposure data (air sample results) from similar workplace operations and conditions within the past 12 months then this data can be used.

If employee exposure data from similar workplace operations are not available then initial air monitoring is required. Several provisions are required during the initial air monitoring including respiratory protection, protective clothing, change areas with storage facilities, hand washing facilities, biological monitoring, and various types of training (see the included summary of Cal/OSHA standard 8 CCR 1532.1).

We recommend initial air monitoring begin in areas where painted surfaces have higher lead concentrations so that the results, if favorable, can apply to other painted surfaces with similar or lower lead concentrations (if the work practices are similar). Favorable results would be those that are below the action level of 30 ug/ m^3.

A bulk sample analysis was performed by JMR Environmental Services Inc. on 05/13/99. Twenty sample(s) submitted and identified by the Client on 05/12/99 from Franklin Elementary.

Project:

The samples described above were analyzed for asbestos content. Results are expressed in approximate percent of each type of asbestos present. Results included in this report are representative of the submitted samples only.

Procedure:

Sample analysis of bulk materials was performed in accordance with procedures described in Appendix A, 'Interim Method for the Determination of Asbestiform Minerals in Bulk Insulation Samples', published in 40 CFR Ch. I (7-1-91 edition) Pt. 763, Subpart F App. A, pages 293 - 299. This procedure involves examination of the samples with a petrographic microscope utilizing polarized light, a procedure commonly known as polarized light microscopy (PLM).

JMR Environmental Services Inc. appreciates the opportunity to provide these services.

This report shall not be reproduced, except in full, without prior authorization by JMR, and shall not be used by client to claim NVLAP or U.S. Government product endorsement.

PROJECT: Franklin Elementary

SUBJECT: Roof Sampling

Mr. Boogren:

At your request roof core sampling was performed by JMR Environmental Services, Inc. at Franklin Elementary. The purpose of this sampling was to determine if asbestos is present in the roofing materials. Layers of roofing were also counted during analysis.

Procedure

Sample analysis of bulk materials was performed in accordance with procedures described in Appendix A, *Interim Method for the Determination of Asbestiform Minerals in Bulk Insulation Samples*, published in 40 CFR Ch. 1 (7-1-91 Edition) Pt. 763; subpart F, app. A, pages 293-299. This procedure involves examination of the samples with a petrographic microscope utilizing polarized light, a procedure commonly known as Polarized Light Microscopy (PLM).

Included are the laboratory results. JMR Environmental Services, Inc. appreciates the opportunity to provide these services.

Sincerely,

Robert Cox, Operations Manager

2. Construction Vibration Calculations

Franklin School

Vibration Level Calculations

Based on Federal Transit Administration, Office of Planning and Environment

N =	1.5

Construction Equipment	Project Equipment	Equipment Peak Particle Velocity @ 25 Feet* (inches/second)	Distance to Receptor for < 0.5 PPV (Feet)	Estimated Velocity Decibels @ Distance** (VdB)	Estimated Peak Particle Velocity @ Distance*** (inches/second)
Unmitigated Vibration Levels					
R1					
Vibratory Roller	Yes	0.210	60	83.0	0.056
Large Bulldozer or Bore/Drill Rig	Yes	0.089	60	75.5	0.024
Loaded Trucks	Yes	0.076	60	74.2	0.020
Jackhammer	Yes	0.035	60	67.4	0.009
Small Bulldozer	Yes	0.003	60	46.1	0.001

Source:

Federal Transit Administration, *Transit Noise and Vibration Impact Assessment Manual,* 2018.

Notes:

* Values taken from Table 7-4.

** Based on the formula VdB = 20 x LOG10 (v/v_{ref}), where v_{ref} is equal to 1×10^{-6} in/sec (see page 111).
The approximate rms vibration velocity level (v) is calculated from PPV using a crest factor of 4 (see page 184).

*** Based on the formula PPV(D) = PPV(25 ft) x $(25/D)^N$, where D is equal to the distance (see page 185).
N = soil type classification factor (typically ranges from 1 to 1.5)

Off-Site Construction Haul Trucks

Equipment	Reference Vibration Levels at 50 ft, in/sec PPV	Estimated Vibration Levels , in/sec PPV	
		20 ft	
Typical Road Surface	0.00565	0.071
