ACCESS AGREEMENT SHORT FORM

File Number:

I, the the undersigned, have been granted access to historical resources information on file at the Northwest Information Center of the California Historical Resources Information System.

I understand that any CHRIS Confidential Information I receive shall not be disclosed to individuals who do not qualify for access to such information, as specified in Section III(A-E) of the CHRIS Information Center Rules of Operation Manual, or in publicly distributed documents without written consent of the Information Center Coordinator.

I agree to submit historical Resource Records and Reports based in part on the CHRIS information released under this Access Agreement to the Information Center within sixty (60) calendar days of completion.

I agree to pay for CHRIS services provided under this Access Agreement within sixty (60) calendar days of receipt of billing.

I understand that failure to comply with this Access Agreement shall be grounds for denial of access to CHRIS Information.

Rebecca Fleischer
Circlepoint
200 Webster Street, Suite 200
Oakland, CA 94607

Re: Record search results for the proposed Brisbane Guadalupe Channel Erosion Control Project, Brisbane, CA.

Project Description: The City of Brisbane plans to implement erosion control measures between Bayshore Boulevard near Valley Drive and the Machinery Road Bridge to prevent deterioration of the channel banks. The project would involve removing existing vegetation surrounding the channel and installing a pervious cellular system (Geoweb) designed to stabilize soil. The Geoweb will be placed on top of a geotextile above the native soils of grading and secured to the Guadalupe Channel's banks using anchors.

Dear Ms. Rebecca Fleischer:

Per your request received by our office on August 22, 2018, a records search was conducted for the above referenced project by reviewing pertinent Northwest Information Center (NWIC) base maps that reference cultural resources records and reports, historic-period maps, and literature for San Mateo County. Please note that use of the term cultural resources includes both archaeological resources and historical buildings and/or structures.

Review of this information indicates that there has been three cultural resource studies that include portions of the Brisbane Guadalupe Channel Erosion Control project area. Study # 35247 (Busby 2004) covers approximately 25% of the project area. Study # 27930 (Brown et al 2003) covers approximately 10% of the project area, and Study # 3075 (Hall 1979) covers approximately 100% of the Brisbane Guadalupe Channel Erosion Control project area. This project area contains no recorded archaeological resources. The State Office of Historic Preservation Historic Property Directory (OHP HPD) (which includes listings of the California Register of Historical Resources, California State Historical Landmarks, California State Points of Historical Interest, and the National Register of Historic Places) lists no recorded buildings or structures within or adjacent to

the proposed project area. In addition to these inventories, the NWIC base maps show no recorded buildings or structures within the proposed project area.

At the time of Euroamerican contact the Native Americans that lived in the area were speakers of the Ramaytush language, part of the Costanoan language family (Levy 1978: 485). There are no Native American resources in or adjacent to the proposed project area referenced in the ethnographic literature.

Based on an evaluation of the environmental setting and features associated with known sites, Native American resources in this part of San Mateo County have been found in areas marginal to the San Francisco Bayshore and inland near creeks, as well as upland areas. The Brisbane Guadalupe Channel Erosion Control project area contains an area of artificial fill and bay mud located within former bay waters located approximately one hundred forty meters east of the historic margins of the bayshore. Given the dissimilarity of one or more of these environmental factors, there is a low potential for unrecorded Native American resources in the proposed Brisbane Guadalupe Channel Erosion Control project area.

Review of historical literature and maps indicated the possibility of historic-period activity within the project area. The 1939 San Mateo USGS 15-minute topographic quadrangle depicts a building within the Brisbane Guadalupe Channel Erosion Control project area. With this in mind, there is a moderate potential for unrecorded historic-period archaeological resources in the proposed Brisbane Guadalupe Channel Erosion Control project area.

The 1956 (photorevised 1980) San Francisco South USGS 7.5-minute topographic quadrangle fails to depict any buildings or structures within the Brisbane Guadalupe Channel Erosion Control project area; therefore, there is a low possibility of identifying any buildings or structures 45 years or older within the project area.

RECOMMENDATIONS:

1) Due to the negative findings of the previous studies (Busby 2004, Brown et al 2003, Hall 1979) that included the area of historic sensitivity, there is a low possibility of identifying Native American and a low possibility of finding historic-period archaeological resources and further study is not recommended at this time.

2) If archaeological resources are encountered **during construction**, work should be temporarily halted in the vicinity of the discovered materials and workers should avoid altering the materials and their context until a qualified professional archaeologist has evaluated the situation and provided appropriate recommendations. Project personnel should not collect cultural resources. Native American resources include chert or obsidian flakes, projectile points, mortars, and pestles; and dark friable soil containing shell and bone dietary debris, heat-affected rock, or human burials. Historic-period resources include stone or adobe foundations or walls; structures and remains with square nails; and refuse deposits or bottle dumps, often located in old wells or privies.

3) It is recommended that any identified cultural resources be recorded on DPR 523 historic resource recordation forms, available online from the Office of Historic Preservation's website: http://ohp.parks.ca.gov/default.asp?page_id=1069

4) We recommend the lead agency contact the local Native American tribe(s) regarding traditional, cultural, and religious heritage values. For a complete listing of tribes in the vicinity of the project, please contact the Native American Heritage Commission at 916/373-3710.

5) If the proposed project area contains buildings or structures that meet the minimum age requirement, prior to commencement of project activities, it is recommended that this resource be assessed by a professional familiar with the architecture and history of San Mateo County. Please refer to the list of consultants who meet the Secretary of Interior's Standards at <http://www.chrisinfo.org>.

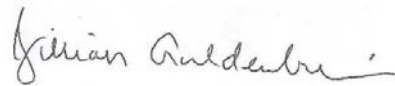

6) Review for possible historic-period buildings or structures has included only those sources listed in the attached bibliography and should not be considered comprehensive.

Due to processing delays and other factors, not all of the historical resource reports and resource records that have been submitted to the Office of Historic Preservation are available via this records search. Additional information may be available through the federal, state, and local agencies that produced or paid for historical resource management work in the search area. Additionally, Native American tribes have historical resource information not in the California Historical Resources Information System (CHRIS) Inventory, and you should contact the California Native American Heritage Commission for information on local/regional tribal contacts.

The California Office of Historic Preservation (OHP) contracts with the California Historical Resources Information System's (CHRIS) regional Information Centers (ICs) to maintain information in the CHRIS inventory and make it available to local, state, and federal agencies, cultural resource professionals, Native American tribes, researchers, and the public. Recommendations made by IC coordinators or their staff regarding the interpretation and application of this information are advisory only. Such recommendations do not necessarily represent the evaluation or opinion of the State Historic Preservation Officer in carrying out the OHP's regulatory authority under federal and state law.

Thank you for using our services. Please contact this office if you have any questions, (707) 588-8455.

Sincerely,

A handwritten signature in cursive script that reads "Jillian Guldenbrein". The signature is written in black ink on a white background.
