

Sample Summary for Electronic Document Submittal

15 copies of this document may be included when a Lead Agency is submitting electronic copies of environmental impact reports, negative declarations, mitigated negative declarations, or notices of preparation to the SCH. The SCH will still accept other summaries, such as an EIR summary prepared pursuant to CEQA Guidelines Section 15123, attached to the electronic copies of the document.

Lead Agency: City of Tulelake

Project Title: Tulelake Veteran's Park Expansion Project

Project Location: Tulelake Siskiyou
City *County*

Please provide a Project Description (Proposed Actions, location, and/or consequences).

The City of Tulelake is expanding an existing park (Veteran's Park). The City owns the property that the park is currently on, along with the adjacent parcel. The City will be expanding the park into the adjacent parcel. The scope of work will include: removal of the existing asphalt and concrete, replaced by topsoil to existing grade, the addition of another bathroom to service the bigger park, the construction of an 80 foot, slit face block wall 6 feet high (Memorial Wall) with a metal frame to hold plaques that the City has been storing. The centerpiece will be a Gazebo with benches around it for visitors. The City is working with a local artist to construct an archway at the entrance of the park with the emblems of the 5 branches of the service, along with two benches that look like geese. A sundial will be constructed on the west side of the park. A dog park will be on the right side of the park for visitors that have animals with them. As far as landscaping is concerned, the park will have some new trees added along with non-invasive turf, shrubs, plants, and ground cover. And last, solar lighting will be included in the project. The walkways will be decomposed granite. The parcels together are 0.46 acres.

Please identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Proposed mitigation measures will be put in place for:

Air Quality
 Cultural Resources
 Greenhouse Gas Emissions
 Hazards and Hazardous Materials
 Noise

If applicable, please describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
