Subject: **Hazardous Materials Technical Study**
3917 Long Beach Boulevard
Long Beach, California

Dear Mr. Koontz:

This report presents the findings of a Hazardous Materials Technical Study completed by Rincon Consultants, Inc. for the property located at 3917 Long Beach Boulevard in Long Beach, California (subject property). This technical study was performed in accordance with our revised proposal dated October 18, 2019. The accompanying report presents our findings and provides an opinion as to the presence of Environmental Conditions with the potential to impact the proposed project.

Thank you for selecting Rincon for this project. If you have any questions, or if we can be of any future assistance, please contact us.

Sincerely,
Rincon Consultants, Inc.

Meghan Hearne
Environmental Scientist/Project Manager

Appendix A Asbestos, Lead, and Fungal Investigation Reports
Appendix B Regulatory Records Search
Appendix C Historical Research Documentation

1 Introduction

It is our understanding that the proposed project involves demolition of the onsite, city-owned Fire Station No. 9 located at 3917 Long Beach Boulevard in Long Beach, California (subject property, Figures 1 and 2). The project will also include the installation of a temporary/modular structure that would operate onsite for approximately five years.

The following sections present our findings and provide our opinion as to the presence of Environmental Conditions with the potential to impact the project.

1.1 Purpose

The City of Long Beach Development Services has requested this Hazardous Materials Technical Study (Study) and will use the information for the purposes of evaluating the subject property for redevelopment. The purpose of this Study is to provide a preliminary evaluation of the potential for environmental effects from hazardous materials and hazardous wastes for the project as a result of past or current activities in the area. Our report documents properties of potential environmental concern within the project area and vicinity, which have or may have been impacted by hazardous materials or wastes and identifies environmental concerns that have the potential to impact the demolition or construction of the proposed project.

1.2 Scope of Services

The scope of services conducted during this Study is outlined below:

- Performed a reconnaissance of the subject property to identify obvious indicators of the existence of hazardous materials.
- Observed adjacent or nearby properties from public thoroughfares in an attempt to see if such properties are likely to use, store, generate, or dispose of hazardous materials.
- Obtained and reviewed an environmental records database search to obtain information about the potential for hazardous materials to exist at the subject property or at properties located in the vicinity of the subject property.
- Reviewed online files for the subject property and immediately adjacent properties as identified in the database report, as applicable.
- Reviewed the current United States Geological Survey (USGS) topographic map to obtain information about the subject property and regional topography and uses of the subject property and surrounding sites.
- Reviewed additional pertinent record sources (e.g., California Division of Oil, Gas, and Geothermal Resources records, online databases of hazardous substance release sites), as necessary, to identify the presence of Recognized Environmental Conditions (RECs) at the subject property.
- Reviewed the California Regional Water Quality Control Board (RWQCB) 2019 statewide polyfluoroalkyl substances (PFAS) Investigation online Public Map Viewer regarding current PFAS orders at any facilities located in the vicinity of the subject property.

- Reviewed reasonably ascertainable historical resources (e.g., aerial photographs, topographic maps, city directories) to assess the historical land use of the subject property and adjacent properties.

1.3 Significant Assumptions, Limitations, Deviations, Exceptions, Special Terms, and Conditions

This work is intended to adhere to good commercial, customary, and generally accepted environmental investigation practices for similar investigations conducted at this time and in this geographic area. No guarantee or warranties, expressed or implied, are provided. The findings and opinions conveyed in this report are based on findings derived from a site reconnaissance, review of an environmental database report and specified regulatory records and historical sources. This report is not intended as a comprehensive site characterization and should not be construed as such. Standard data sources relied upon during the completion of these types of reports may vary with regard to accuracy and completeness. Although Rincon believes the data sources are reasonably reliable, Rincon cannot and does not guarantee the authenticity or reliability of the data sources it has used. Additionally, pursuant to our contract, the data sources reviewed included only those that are practically reviewable without the need for extraordinary research.

Rincon has not found evidence that hazardous materials or petroleum products exist at the subject property at levels likely to warrant mitigation. However, lead, asbestos, and mold investigations have previously been conducted onsite and both lead based paint and mold is known to be or have been present in the building. Copies of the reports were provided to Rincon and are included in Appendix A.

Rincon does not under any circumstances warrant or guarantee that not finding evidence of hazardous materials or petroleum products means that hazardous materials or petroleum products do not exist on the subject property. Additional research, including surface or subsurface sampling and analysis, can reduce Client's risks, but no techniques commonly employed can eliminate these risks altogether.

1.4 Project Description

It is our understanding that the proposed project involves demolition of the onsite, city-owned Fire Station No. 9. The station appears to be eligible for designation as a Long Beach Historic Landmark but has been closed due to mold in the building.

The project also involves installation of a temporary/modular structure that would operate on-site for approximately five years while a larger permanent replacement structure is built offsite. The location of the replacement structure has not yet been identified and is not a part of this project.

1.5 Site Description

Location

The project site is located at 3917 Long Beach Boulevard in the City of Long Beach and is identified as Assessor Parcel Number (APN) 7139-013-900 (Figures 2 and 3). The site is owned by the City of Long Beach and encompasses approximately 5,800 square-feet, or 0.13-acre. The site is bound by Long Beach Boulevard on the east and North Virginia Road to the west and is regionally accessible

from Long Beach Freeway (Interstate 710, or I-710) and San Diego Freeway (Interstate 405, or I-405). The site was developed in 1938 as Fire Station No. 9, which is two-and-a-half stories in height and an irregular rectangle structure. Figure 1 shows the location of the project site in the region. **Error! Reference source not found.** Figures 2 and 3 show the subject property in its neighborhood context.

Current Land Use Designation and Zoning

The project site is designated as Major Commercial Corridor by the City's General Plan and zoned CCA (Community Automobile-Oriented District). Uses permitted in the CCA District include retail and service uses for an entire community. The property was constructed in 1938 as the second Fire Station No. 9, as the first had been demolished as a result of an earthquake in 1933.

Subject Property and Vicinity General Characteristics

The site is located on the triangular block bounded by East Marshall Place on the north, Long Beach Boulevard on the east, and North Virginia Road to the west. Surrounding land uses consist of commercial buildings to the north, east, and south, and single- and multi-family residences to the north, east, south, and west. Oakwood Academy private school is located approximately 750 feet southeast of the site along Long Beach Boulevard.

2 Records Review

2.1 Physical Setting Sources

Topography

The current USGS topographic map for the Long Beach Quadrangle (1981), the subject property is situated at an elevation of approximately 110 feet above mean sea level. The site is located on a terrace and local topography is generally flat.

Geology and Hydrogeology

According to the California Geological Survey (CGS), *California Geomorphic Provinces, Note 36*[1], the subject property is located within the Peninsular Ranges Geomorphic Province. The Peninsular Ranges are a series of ranges separated by northwest trending valleys, subparallel to faults branching from the San Andreas Fault. The trend of topography is similar to the Coast Ranges, but the geology is more similar to the Sierra Nevada, with granitic rock intruding the older metamorphic rocks. The Peninsular Ranges extend into lower California and are bounded on the east by the Colorado Desert. The Los Angeles Basin and the island group (Santa Catalina, Santa Barbara, and the distinctly terraced San Clemente and San Nicolas islands), together with the surrounding continental shelf (cut by deep submarine fault troughs), are included in this province.

Site Geology

According to the California Division of Mines and Geology, Geologic Map of California: Long Beach sheet (1962), the subject property is underlain by Quaternary non-marine terrace deposits (Qt).

Regional Groundwater Occurrence and Quality

The subject property is located within the Coastal Plain of Los Angeles County groundwater basin.

During the preparation of this Study, we reviewed the California State Water Resources Control Board's (SWRCB's) online GeoTracker database to determine groundwater flow direction in the vicinity of the subject property. According to the *Underground Storage Tank Low Risk Closure Review Form* for the Unocal #2033 (Former) located at 4155 Long Beach Boulevard, Long Beach, depth to water ranged from 34.28 feet below ground surface (bgs) to 45.35 feet bgs. Flow direction was reported as to the south. This site is located roughly 1,500 feet to the north of the subject property.

2.2 Standard Environmental Record Sources

Environmental Data Resources, Inc. (EDR) was contracted to provide a database search of public lists of sites that generate, store, treat or dispose of hazardous materials or sites for which a release or incident has occurred. The EDR search was conducted for the subject property and included data from surrounding sites within specified radii of the property. A copy of the EDR report is included as

[1] https://www.conservation.ca.gov/cgs/Documents/Publications/Note_36.pdf

Appendix B. As shown on the attached EDR report, federal, state and county lists were reviewed as part of the research effort. Please refer to Appendix B for a complete listing of sites reported by EDR and a description of the databases reviewed.

The Map Findings Summary, included in the EDR report, provides a summary of the databases searched, the number of reported facilities within the search radii, and whether the facility is located onsite or adjacent to the subject property. The following information is based on our review of the Map Findings Summary and the information contained in the EDR report.

Subject Property

The subject property was listed on the following databases (as defined in Appendix B page 26):

- **1x Fire Station #9 – 3917 Long Beach Boulevard:** Hazardous Materials (HAZNET) and Underground Storage Tank (UST)

Regulatory agency files reviewed for the subject property are discussed in the Additional Environmental Record Sources section of this report.

Offsite Properties

Offsite properties listed by EDR fall under two general categories of databases: those reporting unauthorized releases of hazardous substances (e.g., Leaking Underground Storage Tank [LUST], National Priority List [a.k.a. Superfund sites], and corrective action facilities), and databases of businesses permitted to use hazardous materials or generate hazardous wastes, for which an unauthorized release has not been reported to a regulatory agency.

Rincon reviewed the EDR Radius Map and select detailed listings to evaluate their potential to impact the subject property, based on the following factors:

- Reported distance of the facility from the subject property
- The nature of the database on which the facility is listed, and/or whether the facility was listed on a database reporting unauthorized releases of hazardous materials, petroleum products, or hazardous wastes
- Reported case type (e.g., soil only, failed underground storage tank [UST] test only)
- Reported substance released (e.g., chlorinated solvents, gasoline, metals)
- Reported regulatory agency status (e.g., case closed, “no further action”)
- Location of the facility with respect to the reported groundwater flow direction (discussed in the Geology and Hydrogeology section of this report)

Facilities/properties that were interpreted by Rincon to be of potential environmental concern to the subject property, based on one or more of the factors listed above, are summarized in Table 1. Contamination migration pathways in soil, groundwater, and soil vapor were considered in our analysis of offsite properties of potential environmental concern.

Orphan Listings

EDR reported 13 orphan or unmapped site listings, which EDR is unable to plot due to insufficient address information. Based on Rincon’s review of the limited address information, these listings are not expected to impact the subject property.

Table 1 EDR Listing Summary of Select Sites Within One-Eighth Mile of the Subject Property

Site Name	EDR Site ID	Site Address	Distance from Subject Property	Database Reference	Comments
Subject Property					
1x Fire Station #9	A1, A2	3917 Long Beach Boulevard	Subject Property	HAZNET	HAZENT – Generator of hydrocarbon solvents (benzene, hexane, Stoddard, etc.)
				UST	No other details provided by EDR.
Adjacent Notable Properties					
De Wachter Caroline Mrs.	A3	3931 Long Beach Boulevard	Roughly 100 feet to the north	EDR Hist Cleaner	Clothes Presser and Dyers - 1948
Los Cerritos Cleaners	A7	3937 Long Beach Boulevard	Roughly 100 feet to the north	EDR Hist Cleaner	Cleaners and Dyers - 1963
Frederick Marshall/ Donovan Edwards Ricketts	A4	3925 Long Beach Boulevard	Adjacent to the north	RCRA NonGen/NLR	Facility does not currently generate hazardous waste; No violations noted.
Laughter Service/ McClellan S J	A5, A6, A8	3901 Long Beach Boulevard/3900 Virginia Road	Roughly 150 feet to the south	EDR Hist Auto	Listed as a gasoline service station from 1944 through 1957.
				UST	No other details provided by EDR.
				EDR Hist Auto	Listed as a gasoline service station in 1939.
Ross Nathan MD Inc. DBA/The Hand & Wrist Center/Laser Skin Care Center	A9, A10	3918 Long Beach Boulevard #100	Adjacent to the east, across Long Beach Boulevard	RCRA NonGen/NLR	Facility does not currently generate hazardous waste; is a historical generator of hazardous materials.
				FINDS	No pertinent information provided.
				ECHO	No pertinent information provided.

Site Name	EDR Site ID	Site Address	Distance from Subject Property	Database Reference	Comments
Nearby Release Sites					
Desert Petroleum #210/Gasco Service Station #210/Parks Texaco Service Station/Blockbuster Video/Parks Texaco Service Stations	A11, A12, A13, A14, A15, A16	3910 Long Beach Boulevard	Roughly 175 feet to the south-southeast	**LUST (GeoTracker)**	Release of gasoline to groundwater; case closed in 1996.
				HIST CORTESE	No pertinent information provided.
				CERS	Indicates site was listed as a LUST Cleanup Site.
				SWEEPS UST	Indicates that facility was associated with 7 fuel USTs ranging from 10,000-20,000 gallons.
				HIST UST	Indicates that facility is associated with seven former USTs; closure date not reported.
				CA FID UST	No pertinent information provided.
				EDR Hist Auto	Listed as a gasoline service station from 1952 through 1979
				UST	No other details provided by EDR.
Mobil	B19	3991 Long Beach Boulevard	Roughly 300 feet to the north-northeast	**LUST (GeoTracker)**	Reported release of aviation oil to soil; case closed in 2009.
				HIST CORTESE	No pertinent information provided.
				CERS	Indicates site was listed as a LUST Cleanup Site.

*__Bold__ listings indicate a release database

Regulatory agency information reviewed for the listings in the table above are summarized in the Additional Environmental Record Sources section of this report.

2.3 Additional Environmental Record Sources

Cortese Listings

According to the DTSC EnviroStor online database and the California Environmental Protection Agency (CalEPA) Hazardous Waste and Substance site "Cortese" list, there are no Federal Superfund sites located within one half mile of the subject property.

Review of Agency Files

As a follow-up to the database search, Rincon reviewed regulatory information for facilities within the specified search radii that were interpreted to have the potential to impact the subject property, based on one or more factors previously discussed (e.g., distance, open case status, upgradient location, soil vapor migration).

The following is a summary of our review of regulatory information obtained from review of online sources (e.g., SWRCB GeoTracker database, Department of Toxic Substances Control [DTSC] EnviroStor database, local fire department). No in-person regulatory file reviews were conducted.

Subject Property

The subject property was listed on the following regulatory databases searched by EDR:

- **1x Fire Station #9 – 3917 Long Beach Boulevard.** The subject property was listed in the HAZNET and UST databases searched by EDR. The HAZNET listing indicates that the fire station is a generator of hydrocarbon solvents (benzene, hexane, Stoddard, Etc.) in 1988. Additional information regarding the capacity and contents of the UST were not reported by EDR. Plot plans for the subject property which were issued on December 17, 1937 indicate that a 550-gallon gasoline UST was located on the northwest corner (backside) of the fire station building. A request for UST records was submitted to Ms. Victoria Chavez with the City of Long Beach Health and Human Services Department on October 31, 2019. On November 19, 2019 Ms. Chavez responded that UST files for the site are not available at the Health and Human Services Department and that Rincon should contact Ms. Carmen Piro at the Long Beach Fire Prevention Bureau. On November 20, 2019 Rincon spoke with Ms. Piro who reported the following information regarding the historical UST over the phone:
  - A historical, 550-gallon UST was installed in 1938
  - The tank was slurried in-place in 1988
  - At the time of tank closure, no sampling was conducted

  Because it is reported that the tank was abandoned in place and sampling was not conducted, an abandoned in-place UST may remain onsite and a release of petroleum product may have occurred onsite.

Adjacent Notable Properties

Five adjacent or notable properties were listed in databases searched by EDR. None of the adjacent or notable sites were listed on release databases. However, two sites were reported as EDR Historical Cleaners (Hist Cleaner) and one site was listed as a historical gasoline service station as follows:

- Hist Cleaners - 3931 Long Beach Boulevard (1948) (roughly 115 feet to the north of the subject property)
- Hist Cleaner - 3937 Long Beach Boulevard (1963) (roughly 150 feet to the north of the subject property)
- Hist Auto (1939, 1944, 1948, 1952, 1955, 1957) - 3901 Long Beach Boulevard/3900 Virginia Road (roughly 130 feet to the south of the subject property)

Although the cleaners and historical gasoline service stations are not listed in release databases searched by EDR, both types of facilities are generally associated with the use of hazardous materials such as chlorinated solvents and hydrocarbons.

Nearby Release Sites

Two nearby release sites were reported by EDR as follows:

- **Desert Petroleum #210/Gasco Service Station #210/Parks Texaco Service Station/Blockbuster Video/Parks Texaco Service Stations - 3910 Long Beach Boulevard**. This site is located roughly 175 feet south-southeast of the subject property. According to EDR and GeoTracker, the former gasoline station is associated with a closed unauthorized release case. The cleanup status is listed as "Completed – case closed as of 3/19/1996." The contaminant of concern was reported as gasoline and the media affected was reported as "other groundwater (uses other than drinking water." Case closure documentation was not available for review through GeoTracker. To obtain a copy of the case closure summary and No Further Action letter, Rincon emailed the City of Long Beach caseworker on November 1, 2019 and a response has not yet been received. However, based on the distance of the former release (roughly 175 feet) and the downgradient location of the release site with respect to the subject property, the former Desert Petroleum gasoline station release is not expected to have impacted the subject property.
- **Mobil – 3991 Long Beach Boulevard – 3991 Long Beach Boulevard.** This site is located roughly 300 feet north-northeast of the subject property. According to EDR and GeoTracker, the former gasoline station is associated with a closed unauthorized release case. The cleanup status is listed as "Completed – case closed as of 4/3/2009." The contaminant of concern was reported as "aviation" and the media affected was reported as "soil." Case closure documentation was not available for review through GeoTracker. To obtain a copy of the case closure summary and No Further Action letter, Rincon emailed the City of Long Beach caseworker on November 1, 2019 and a response has not yet been received. However, based on the distance of the former release (roughly 300 feet) and the soil-only nature of the case, the former Mobil release is not expected to have impacted the subject property.

2.4 Asbestos, Lead, and Mold Investigations

In 2001, fire station staff had begun reporting water intrusion in the building, including areas where clothing washing machines are located, drain areas and the vehicle bay. A survey in November 2001and subsequent follow-up fungal survey in December 2001 noted detectable moisture content in the laundry room. The moisture content in the laundry room was registering above 40, when readings above 20 are considered wet. The report recommended several abatement measures to decrease moisture at the project site.

In 2003 an industrial hygiene report was prepared concerning the conditions of the project site and building to investigate reports of fainting/passing out (syncope) and other health related concerns.

Although no specific environmental factors were identified to alert the City Safety officer and Occupational Health Officer/Physician (testing authorities) to links regarding the health concerns, the concerns were addressed through ductwork cleaning in the existing building. In early 2008, an Environmental Quality with Evaluation Report was prepared for the project site. The report noted water intrusion and water damage.

In early 2015, an Asbestos, Lead, and Microbiological Survey Findings report was prepared to document a hot water pipe leak in the building. The report noted a few locations where water intrusion was apparent, but the investigation did not find evidence of lead or asbestos. It was noted in a survey of fire department crew members that the station showed visible water damage in the roof, stairwells, kitchen, and gym portions of the building. In fall 2017, an Indoor Air Quality Investigation was prepared for the site. The investigation did not result in finding contaminants at concentrations that would pose increased exposure potential or cause any measurable health risks to occupants of the building. A separate fungal investigation and deep cleaning protocol report was prepared later in the fall of 2017. This report found evidence of mold/fungal spores throughout the testing area, which included the kitchen ceiling, hallways, the kitchen ceiling, attic side, and the exercise room. In addition to these areas, the borescope also determined that there was an area of visible suspect fungal growth present inside of the north wall of room three, on the second floor of the station (determined by the borescope investigation). The report recommended fungal remediation and a deep cleaning to remove thick layers of dust in the building.

Additional asbestos and lead testing were performed in the winter of 2017. The environmental consulting company, Health Science Associates (HSA), collected two bulk paint chips samples from the building. The sample collected from the Kitchen consisted of ceiling paint and the sample collected in the Exercise Room was from a wall. The results indicated that the paint on the Kitchen ceiling was lead-based paint (LBP). HSA recommended that all contractors performing lead related work at this location must be trained, at minimum, in lead safe work practices and perform their work pursuant to all appropriate regulations. LBP project work should be monitored under the direction of a Certified Industrial Hygienist (CIH) who is also a Certified Lead Project Designer. HSA collected eight suspect asbestos samples. None of the plaster or drywall materials sampled were determined to contain asbestos containing materials (ACM).

Additionally, HSA indicated that due to the age of the structure, hidden or unknown suspect ACM, LBP, or other hazardous materials may be uncovered during renovation/maintenance activities. Therefore, all contractors working on the project should be informed of policies with regard to notifying the appropriate building owner/management personnel if previously unidentified suspect hazardous materials are discovered during the project.

Spore sampling was conducted in January 2018 and the sampling results reported fungal spores located throughout the building. The surface and air samples collected in the kitchen and exercise room containments met HSAs post-fungal remediation criterion. However, room three failed the post-fungal remediation criterion and required additional cleaning.

A follow-up report in summer 2018 found that there were three areas that were measured which showed an elevated moisture level using the Tramex moisture meter. These areas were the first-floor bathroom, captain's office, second-floor first bedroom, third bedroom, and bathroom. The report concluded that the findings may have been false positives and recommended follow-up with a different meter which penetrates inside the wood or plaster for confirmation. In fall 2018, a follow-up quarterly report found the elevated moisture levels to be false positive for the three areas reported above and generally more dirt/grime than other areas in the exercise room on top of the vending machine, file cabinet, sills, and TV; the Captains Office, first-floor bathroom, the kitchen,

garage, and the second floor TV room and bedrooms. More surface cleaning was recommended in these rooms.

In January 2019, another follow-up report concluded that the general cleanliness was not impressive. When inspecting horizontal surfaces "whiteglove test," certain areas stood out as having more dirt/grime then others: the exercise room, top of the vending machine and sills, the main hallway picture frames, the captains' office, and the second-floor, the first bedroom and the third bedroom. Additional surface cleaning was recommended in these areas. There were also two areas that were measured which showed visible water leakage, the first-floor sleeping quarters in the third bedroom and the second-floor sleeping quarters in first bedroom. The report noted there were serious leaks where water was observed dripping inside. Blistering paint areas around the windows were noted and particulate matter count levels indoors were elevated as compared to outdoors. The first-floor bathroom and shower room were elevated for larger particles. Inspection of the crawl space revealed the south wall footing was leaking rainwater and as a result, the soil was moist outside. The bottom shelf of the first-floor bathroom supply cabinet wood was deteriorated and was one of the locations showing false positives for elevated levels of moisture. The summer 2019 quarterly report detected fungal/mold spores in one of three samples in the third bedroom.

2.5 Review of State of California Division of Oil, Gas, and Geothermal Resources Records

A review of the Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System[2] indicates that there are no production wells located on or within ¼ mile of the subject property. The nearest oil field is mapped approximately 800 feet to the southwest of the subject property.

2.6 Review of National Pipeline Mapping System Records

A review of the National Pipeline Mapping System (NPMS) online Public Map Viewer[3] indicates that there are no hazardous material (liquid) pipelines located on or adjacent to the subject property.

2.7 Review of California Statewide PFAS Investigation

Earlier in 2019, the SWRCB sent assessment requirements to property owners of sites that may be potential sources of PFAS. These sites currently include select landfills, airports, and chrome plating facilities. According to the SWRCB, "PFAS are a large group of human-made substances that do not occur naturally in the environment and are resistant to heat, water, and oil." (SWRCB, 2019).

Our November 20, 2019 review of the California 2019 Statewide PFAS Investigation online Public Map Viewer[4] indicates that there are no current chrome plating, airport, or landfill PFAS orders at any facilities located within one half mile of the subject property.

[4] https://gispublic.waterboards.ca.gov/portal/apps/webappviewer/index.html?id=4feba1766c224dc99eadea06ef3bd019

2.8 Known or Suspect Contaminated Release Sites with Potential Vapor Migration

The EDR report was reviewed to identify nearby known or suspect contaminated sites that have the potential for contaminated vapor originating from the nearby site to be migrating beneath the subject property. Based on the ASTM E 2600-15, *Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*, the following minimum search distances were initially used to determine if contaminated soil vapors from a nearby known or suspect contaminated site have the potential to be migrating beneath the subject property:

- 1/10 mile (528 feet) for petroleum hydrocarbons
- 1/3 mile (1,760 feet) for other contaminants of concern (COCs)

If upgradient known or suspect contaminated sites are located within the above referenced distances from the subject property, online resources are reviewed to determine the extent of the contaminated plume at those sites. The following describes search distances for contaminated plumes of petroleum hydrocarbons (30 feet from the subject property) and other Contaminants of Concern (COCs) (100 feet from the subject property). Per ASTM E 2600-15, vapors associated with impacted soil or groundwater present within these distances have the potential to migrate beneath the subject property.

Petroleum Hydrocarbons

The subject property is associated with a 550-gallon UST that has been reported by the Fire Prevention Bureau as being abandoned in-place by slurry. The Fire Prevention Bureau also reported that no confirmation soil samples were collected in the vicinity of the UST at the time of closure. Based on this information, there is the potential for hydrocarbon-impacted soil and soil vapor to be present onsite.

Other COCs

Based on our review of the EDR report, there are no upgradient known or suspect sites contaminated with other COCs within 1,760 feet of the subject property. Therefore, per ASTM E 2600-15, as this distance exceeds the 100-foot distance considered the critical distance wherein such migration may pose a threat to the subject property, there are no potential threats to the subject property posed by the potential migration of other COC vapors from listed sites.

2.9 Historical Use Information on the Property and the Adjoining Properties

The historical records reviewed for this Study included aerial photographs, topographic maps, historical fire insurance maps (Sanborns), and city directories as detailed in the following sections. Copies of the historical resources reviewed are included in Appendix C.

Review of Aerial Photographs

Aerial photographs from EDR's aerial photograph collection were obtained. In addition, a current aerial from Google Earth was reviewed. The aerial photographs were reviewed on November 1, 2019.

Review of Historical Topographic Maps

Historical topographic maps from EDR's map collection were obtained. The historical topographic maps were reviewed on November 1, 2019.

Review of City Directory Listings

EDR was contracted to provide copies of city directory listings for the subject property. The city directory listings were reviewed on November 1, 2019.

Review of Fire Insurance Maps

EDR was contracted to provide copies of fire insurance maps (Sanborns) for the subject property. The maps were reviewed on November 1, 2019.

Review of City of Long Beach Building Permit Records

Since the subject property has historically been occupied by the existing onsite fire station, building permit records were not reviewed.

Other Historical Sources

Based on the historical information obtained, no additional historical sources were reviewed.

Summary of Historical Uses

Subject Property

Based on our review of the documents listed above, it appears that the subject property was previously developed with the following:

- 1896, 1899, 1902 (Topographic Map [TM]): Undeveloped
- 1923 (Sanborn Map [SM]): Undeveloped
- 1928 (Aerial Photograph [AP]): Undeveloped; vacant parcel
- 1938 (Historical Resource Evaluation Report – 3917 Long Beach Boulevard, 2019): The existing fire station building was constructed.
- 1947 (AP): Developed with a structure
- 1950 (SM): Occupied by Long Beach Fire Department Engine Co. No. 9
- 1963 (SM): Similar to 1950 SM
- 1953, 1963, 1972, 1977, 1981, 1989, 1994, 2002, 2005, 2009, 2012, and 2016 (APs): The subject property remains unchanged and has been historically developed with the Long Beach Fire Department Engine Co. No. 9 since 1938.

City directories indicate that the subject property was occupied by the fire stations in 1939, 1944, 1952, 1957, 1963, and 1969.

Northern Adjacent Properties

Based on our review of the documents listed above, it appears that the northern adjacent property was developed with the following:

- 1896, 1899, 1902 (TM): Undeveloped
- 1923 (SM): Undeveloped
- 1928 (AP): Undeveloped; vacant parcel
- 1947 (AP): Developed with a structure
- 1950 (SM): Occupied by one structure with multiple stores
- 1963 (SM): Similar to 1950 SM
- 1953, 1963, 1972, 1977, 1981, 1989, 1994, 2002, 2005, 2009, 2012, and 2016 (APs): The northern adjacent property generally remains unchanged and has been historically occupied by a commercial structure.

Eastern Adjacent Properties

Based on our review of the documents listed above, it appears that the eastern adjacent property on the other side of Long Beach Boulevard was developed with the following:

- 1896, 1899, 1902 (TM): Undeveloped
- 1923 (SM): Undeveloped
- 1928 (AP): Undeveloped; vacant parcel
- 1947, 1953 (AP): Mostly vacant parcel occupied by a small structure
- 1950 (SM): Mostly vacant parcel occupied by a small restaurant fronting Long Beach Boulevard; gas and oils station to the southeast on the corner of Long Beach Boulevard and East Roosevelt Road
- 1963 (SM): Similar to 1950 SM
- 1963, 1972, 1977, 1981, 1989, 1994 (APs): The eastern adjacent property generally remains unchanged and occupied by a structure and paved parking areas.
- 2002 (AP): Vacant
- 2005 (AP): Under construction
- 2009, 2012, 2016 (AP): Occupied by a new commercial building

Southern Adjacent Properties

Based on our review of the documents listed above, it appears that the southern adjacent property was developed with the following:

- 1896, 1899, 1902 (TM): Undeveloped
- 1923 (SM): Vacant, followed by a gas & oil station
- 1928 (AP): Possibly vacant
- 1947 (AP): Vacant parcel, followed by a gasoline station
- 1950 (SM): Vacant parcel, followed by a gasoline station on the corner of Long Beach Boulevard and East Roosevelt Road
- 1953 (AP): Vacant parcel, followed by a gasoline station on the corner of Long Beach Boulevard and East Roosevelt Road

- 1963 (SM): A commercial structure has been built, the gasoline station has been replaced by a commercial structure
- 1963 (AP): Similar to 1963 SM
- 1972, 1977, 1981, 1989, 1994, 2002, 2005, 2009, 2012 (APs): The southern adjacent property generally remains unchanged and occupied by commercial structures.

Western Adjacent Properties

Based on our review of the documents listed above, it appears that the western adjacent property on the other side of Virginia Road was developed with the following:

- 1896, 1899, 1902 (TM): Undeveloped
- 1923 (SM): Occupied by a dwelling
- 1928, 1947 (AP): Occupied by a dwelling
- 1950 (SM): Similar to the 1923 SM
- 1953 (AP): Occupied by a dwelling
- 1963 (SM): Similar to the 1950 SM
- 1963 (AP): Similar to 1963 SM
- 1972, 1977, 1981, 1989, 1994, 2002, 2005, 2009, 2012 (APs): Redeveloped as an apartment complex

Gaps in Historical Sources

Several gaps of greater than five years were identified in the historical records reviewed, from 1902 to 1924, 1928 to 1942, 1953 to 1963, 1964 to 1972, 1981 to 1989, and 1994 to 2002. These gaps are considered insignificant because the subject property use appears to be similar prior to and following the gaps.

3 Interviews

Rincon performed interviews regarding the subject property and surrounding areas. The purpose of the interviews was to discuss current and historical conditions and to obtain information indicating the presence of recognized environmental conditions in connection with the subject property.

3.1 Interview with Site Manager

A site manager was not identified by the City.

3.2 Interviews with Occupants

The fire station building has been vacated due to the mold; therefore, no occupants were interviewed as part of this Study.

3.3 Interviews with Local Government Officials

A request for UST records was submitted to Ms. Victoria Chavez with the City of Long Beach Health and Human Services Department on October 31, 2019. On November 19, 2019 Ms. Chavez responded that UST files for the site are not available at the Health and Human Services Department and that Rincon should contact Ms. Carmen Piro at the Long Beach Fire Prevention Bureau. On November 20, 2019 Rincon spoke with Ms. Piro who reported that a 550-gallon UST was installed in 1938 and that the tank was slurried in-place (abandoned) in 1988. She reported that confirmation soil samples were not collected during the tank abandonment activities and that she is unable to produce case closure documentation/records.

3.4 Interviews with Others

Rincon did not attempt to interview neighboring property owners or others as part of this Study.

4 Site Reconnaissance

Rincon performed a reconnaissance of the subject property on November 20, 2019 accompanied by Maryanne Cronin, Planner with the City of Long Beach, and the Fire Department Battalion Chief. The purpose of the reconnaissance was to observe existing subject property conditions and to obtain information indicating the presence of recognized environmental conditions in connection with the property.

4.1 Methodology and Limiting Conditions

The site reconnaissance was conducted by:

1. Observing the subject property from public thoroughfares,
2. Observing the adjacent properties from public thoroughfares,
3. Observing the interior of the onsite structure,
4. Observing the exterior of the structure,
5. Backtracking to correlate exterior features with interior features, as necessary, and
6. Observing the subject property from driveways, paved roads, and walking paths.

4.2 Current Use of the Property and Adjacent Properties

The subject property is currently occupied by a City of Long Beach Fire Department engine building. Adjacent properties are occupied by commercial and residential land use.

4.3 Past Use of the Property and Adjacent Properties

Based on our site reconnaissance, past uses at the subject property and adjacent properties are not readily apparent.

4.4 Current or Past Uses in the Surrounding Areas

The subject property is surrounded by residential and commercial land uses as detailed in the Site Description section of this report. Past uses of the surrounding area are not readily apparent based on the site reconnaissance.

4.5 Geologic, Hydrogeologic, Hydrologic, and Topographic Conditions

Geologic, hydrogeologic, hydrologic, and topographic information are as previously stated in the Physical Settings Section of this report.

4.6 General Description of Structures

The subject property is described in the Site Description section of this report.

4.7 Roads

The site is located on the triangular block bounded by East Marshall Place on the north, Long Beach Boulevard on the east, and North Virginia Road to the west.

4.8 Potable Water Supply

The City of Long Beach supplies potable water to the subject property.

4.9 Sewage Disposal System

The City of Long Beach provides sewer service to the subject property.

4.10 Interior and/or Exterior Observations

Hazardous Substances and Petroleum Products in Connection with Identified Uses

Hazardous substances and petroleum products were not observed onsite.

Storage Tanks

Based on the original building plans, a 550-gallon gasoline UST was located on the northeast corner of the fire station building; however, no indications that a tank is present onsite were noted during the November 2019 site reconnaissance.

Odors

During the site reconnaissance, Rincon did not identify any strong, pungent, or noxious odors.

Pools of Liquid

During the site reconnaissance, no pools of liquid were observed.

Drums

During the site reconnaissance, industrial drums were not observed onsite.

Hazardous Substances and Petroleum Products Containers Not in Connection with Identified Uses

Hazardous substances or petroleum products not in connection with identified uses were not observed at the subject property.

Unidentified Substance Containers

No unidentified substance containers or unidentified containers that might contain hazardous substances were observed during the site reconnaissance.

Indications of Polychlorinated Biphenyls (PCBs)

The fire station building is currently unoccupied and there were no indications of PCBs or transformers operating onsite.

Other Conditions of Concern

During the site reconnaissance, Rincon did not note any of the following:

- Pits, ponds, and lagoons
- Stained soil or stained pavement
- Stressed vegetation
- Solid waste/debris
- Wastewater
- Wells
- Septic systems/effluent disposal system
- Mold

5 Findings and Opinions

Based on the research conducted as part of this assessment, three hazardous material findings that may affect demolition and/or grading/construction of the project have been identified. The locations of these hazards are summarized in Table 2. If additional assessment is warranted, the necessary recommendations are identified below and described in the following section.

Table 2 Summary of Hazardous Material Findings

Environmental Concern/Opinion	Demolition and Grading/ Construction Impacts	Location	Recommendations
An abandoned in place UST may remain present onsite and a release of petroleum product may have occurred onsite. Based on the lack of soil or groundwater sampling during abandonment in place and unavailable tank closure documentation for the site, the former use of an onsite fuel UST may have impacted the subject property.	An onsite UST may be encountered during demolition and grading/construction activities. If encountered, UST permitting, and removal of the UST will impact demolition and construction of the project. Additionally, if soil and/or groundwater are impacted, a health risk could exist for site workers during demolition, UST removal, and grading/construction.	Northwest corner of the current onsite structure	R-1
Based on our understanding of the site history, mold was present in the existing fire station building.	The HSA mold report says that the mold has been abated, however, if mold is still present onsite, a health risk could exist for site workers during demolition of the fire station.	Kitchen, exercise room, and room #3 on the second floor	R-2
Lead was identified in some onsite building materials and ACM were not identified onsite. Although ACM were not found, due to the age of the structure, hidden or unknown suspect ACM, LBP, or other hazardous materials may be uncovered during demolition activities.	Since lead is present, and asbestos may be present onsite, a health risk could exist for site workers during demolition of the fire station.	Kitchen ceiling paint/ exercise room wall paint	R-2

6 Conclusions and Recommendations

Rincon has performed a Hazardous Materials Technical Study for the property located at 3917 Long Beach Boulevard in Long Beach, California. This assessment has revealed evidence of three Environmental Conditions with the potential to impact demolition and/or grading/construction of the project. To evaluate the potential project impact associated with the hazardous material findings identified above, we recommend the following:

R-1 Regarding the onsite UST, closure documentation was not provided by the City of Long Beach Fire Protection Bureau, nor was there any information available as to whether a new UST was installed during the 1988 historical tank closure event. Therefore, Rincon recommends potholing in the vicinity of the former UST. If there is a UST present onsite, then the tank should be permitted for installation (if required by the City) and for removal. Any UST found onsite should be removed under regulatory oversight and sidewall and bottom soil matrix confirmation samples should be collected to evaluate onsite impacts associated with the UST.

R-2 Based on the previous detections of mold, known lead impacts, and possible asbestos building materials present in the building materials, all contractors performing mold, lead, and asbestos related work at this location must be trained, at minimum, in mold, lead, and asbestos-safe work practices and perform their work pursuant to all appropriate regulations. Additionally, the materials should be handled by workers with the appropriate certifications.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/19/2019 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/29/2019 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 10 UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/24/2019 has revealed that

there are 6 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

- Owner/Op end date: Not reported

Handler Activities Summary:
- U.S. importer of hazardous waste: No
- Mixed waste (haz. and radioactive): No
- Recycler of hazardous waste: No
- Transporter of hazardous waste: No
- Treater, storer or disposer of HW: No
- Underground injection activity: No
- On-site burner exemption: No
- Furnace exemption: No
- Used oil fuel burner: No
- Used oil processor: No
- User oil refiner: No
- Used oil fuel marketer to burner: No
- Used oil Specification marketer: No
- Used oil transfer facility: No
- Used oil transporter: No

Historical Generators:
- Date form received by agency: 2013-10-01 00:00:00.0
- Site name: LASER SKIN CARE CENTER
- Classification: Small Quantity Generator

Hazardous Waste Summary:

- Waste code: 121
- Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

LASER SKIN CARE CENTER (Continued) **1016447634**

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 291
. Waste name: Latex waste

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D011
. Waste name: SILVER

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: P058

LASER SKIN CARE CENTER (Continued) **1016447634**

. Waste name: ACETIC ACID, FLUORO-, SODIUM SALT (OR) FLUOROACETIC ACID, SODIUM SALT

. Waste code: P082
. Waste name: METHANIMINE, N-METHYL-N-NITROSO- (OR) N-NITROSODIMETHYLAMINE

. Waste code: U112
. Waste name: ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

. Waste code: U122
. Waste name: FORMALDEHYDE

. Waste code: U239
. Waste name: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Violation Status: No violations found

FINDS:

Registry ID: 110056300943

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:

Registry ID: 110002820350

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/19/2019

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/19/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/11/2019

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/14/2019
Date Data Arrived at EDR: 05/14/2019
Date Made Active in Reports: 08/05/2019

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

3917 LONG BEACH BOULEVARD
3917 LONG BEACH BOULEVARD
LONG BEACH, CA 90807

TARGET PROPERTY COORDINATES

Latitude (North):	33.829696 - 33° 49' 46.91''
Longitude (West):	118.189652 - 118° 11' 22.75''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	389914.0
UTM Y (Meters):	3743715.8
Elevation:	111 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5652670 LONG BEACH, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

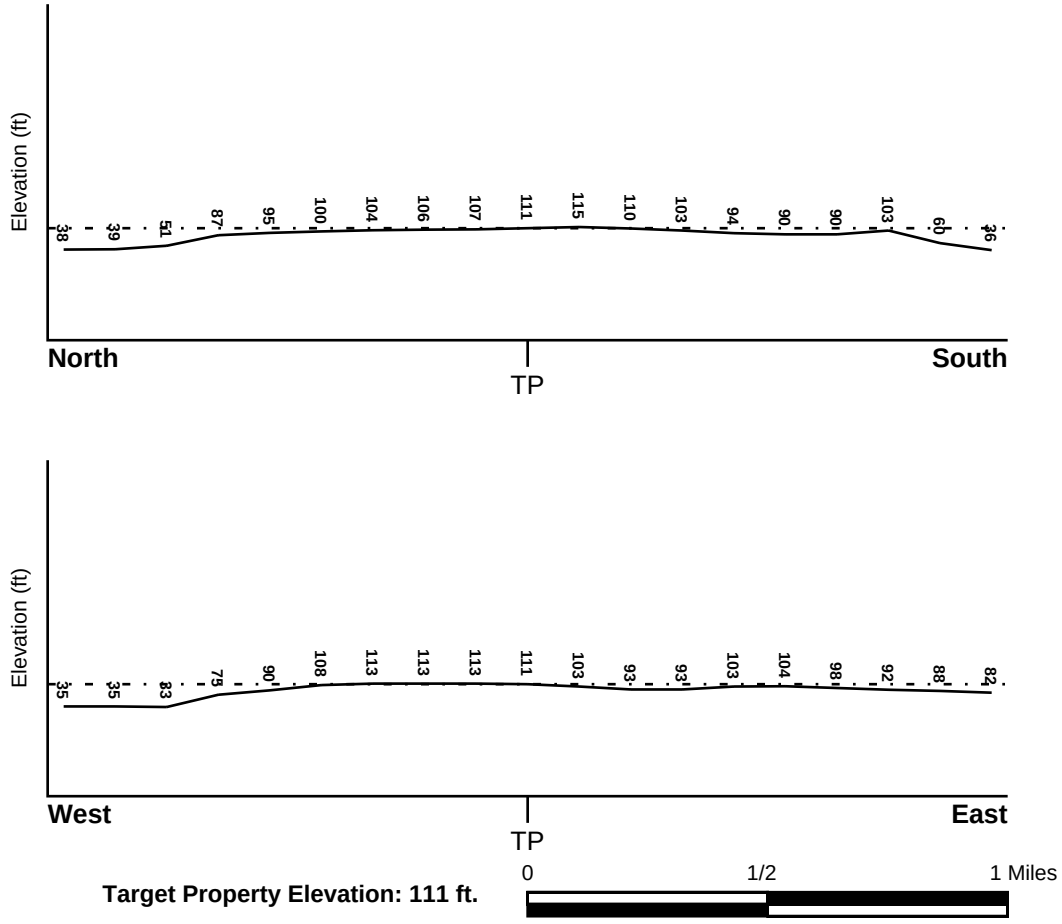
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 111 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1955F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1960F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
NORTH LONG BEACH (OE)	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Surficial Soil Types:
loam
clay
silt loam
loamy sand
sandy loam
fine sand
clay loam
gravelly - sandy loam
coarse sand
gravelly - sand
sand

Shallow Soil Types:
fine sandy loam
gravelly - loam
sand
silty clay

Deeper Soil Types:
stratified
clay loam
silty clay loam
gravelly - sandy loam
coarse sand
sand
weathered bedrock
very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Rincon were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.
