STATE CLEARINGHOUSE

MITIGATED NEGATIVE DECLARATION FOR AT&T OSBORNE-BENNETT
CONDITIONAL USE PERMIT ED19-256 DRC2019-00071 – DATED
NOVEMBER 26, 2019
(STATE CLEARINGHOUSE NUMBER: UNK)

Dear Ms. Sugiyama:

The Department of Toxic Substances Control (DTSC) received a Mitigated Negative Declaration (MND) for the AT&T & Osborne–Bennett Conditional Use Permit ED19-256 DRC2019-00071.

The project is a request by John and Etta Osborne and AT&T Mobility for a Conditional Use Permit (DRC2019-00071) to allow for the construction and operation of a wireless communications facility consisting of twelve (12) panel antennas, thirty-six (36) remote radio units, eight (8) surge suppression units, two (2) microwave dishes, and associated equipment and hardware, all within an approximately 24-foot wide, 28-foot tall cylinder portion of a new 62-foot tall faux elevated water tank to be located within a 28-foot by 55-foot lease area, surrounded by a 8-foot tall wooden fence enclosure. The enclosed lease area also includes a 118-squarefoot equipment shelter and a diesel standby emergency generator.

DTSC recommends that the following issues be evaluated in the MND, Hazards and Hazardous Materials section:

1. The MND should acknowledge the potential for project site activities to result in the release of hazardous wastes/substances. In instances in which releases may occur, further studies should be carried out to delineate the nature and extent of the contamination, and the potential threat to public health and/or the environment should be evaluated. The MND should also identify the

mechanism(s) to initiate any required investigation and/or remediation and the government agency who will be responsible for providing appropriate regulatory oversight.

2. If buildings or other structures are to be demolished on any project sites included in the proposed project, surveys should be conducted for the presence of lead-based paints or products, mercury, asbestos containing materials, and polychlorinated biphenyl caulk. Removal, demolition and disposal of any of the above-mentioned chemicals should be conducted in compliance with California environmental regulations and policies. In addition, sampling near current and/or former buildings should be conducted in accordance with DTSC's 2006 *Interim Guidance Evaluation of School Sites with Potential Contamination from Lead Based Paint, Termiticides, and Electrical Transformers* (https://dtsc.ca.gov/wpcontent/uploads/sites/31/2018/09/Guidance_Lead_Contamination_050118.pdf).
3. If any projects initiated as part of the proposed project require the importation of soil to backfill any excavated areas, proper sampling should be conducted to ensure that the imported soil is free of contamination. DTSC recommends the imported materials be characterized according to DTSC's 2001 *Information Advisory Clean Imported Fill Material* (https://dtsc.ca.gov/wp-content/uploads/sites/31/2018/09/SMP_FS_Cleanfill-Schools.pdf).
4. If any sites included as part of the proposed project have been used for agricultural, weed abatement or related activities, proper investigation for organochlorinated pesticides should be discussed in the MND. DTSC recommends the current and former agricultural lands be evaluated in accordance with DTSC's 2008 *Interim Guidance for Sampling Agricultural Properties (Third Revision)* (<https://dtsc.ca.gov/wp-content/uploads/sites/31/2018/09/Ag-Guidance-Rev-3-August-7-2008-2.pdf>).

DTSC appreciates the opportunity to review the MND for the AT&T & Osborne-Bennett Conditional Use Permit ED19-256 DRC2019-00071. Should you need any assistance with an environmental investigation, please submit a request for Lead Agency Oversight Application, which can be found at: https://dtsc.ca.gov/wp-content/uploads/sites/31/2018/09/VCP_App-1460.doc. Additional information regarding voluntary agreements with DTSC can be found at: <https://dtsc.ca.gov/brownfields/>.

Ms. Emi Sugiyama
