Project Description: (please use a separate page if necessary)

The project would involve a comprehensive tear-down and reinforcement/rebuild to extend the building's useful lifespan. Upgrades would be made to: fire and life-safety; accessibility; the building envelop; remove hazardous materials; replace the plumbing and heating; replace the air systems; replace the electrical, telecommunications and security systems; replace landscaping; and replace the elevators. The project would make the building safe while honoring the building's historic qualities. The project goal is to achieve Zero Net Energy and Leadership in Energy and Environmental Design (LEED) Silver certification.
