10-1J010 Project Description

The California Department of Transportation (Caltrans) proposes to construct a canopy structure to provide coverage during adverse weather conditions for the fuel tanks at the following maintenance stations: Woodfords Maintenance Station (Facility #31M3725), Caples Lake Maintenance Station (Facility #31M5730), and West Point Maintenance Station (Facility #30M5727). The project would construct canopy structures and foundations at the three maintenance station locations, remove and replace guard posts, and install light fixtures.

The project locations were identified on the Cortese List as sites with leaking underground storage tanks. Caltrans determined that an Initial Study should be prepared to adequately satisfy the requirements of the California Environmental Quality Act (CEQA) for Cortese List sites.
