Project Title: Antone Dam Removal and Meadow Restoration Project

Project Applicant: California State Parks (CSP)

Project Location (include county): Burton Creek State Park in Placer County

## Project Description:

CSP proposes to remove the existing compromised Antone Dam, at Burton Creek State Park and construct in-stream features to stabilize the Burton Creek channel profile. In-stream features consist of the construction of cobble-boulder sills, a new floodplain surface and removal of berms along the meadow edge. All areas will be revegetated with native species. These actions will result in decreased erosion and increased sediment deposition, benefiting water quality as well as riparian habitat. +
