Project Description: (please use a separate page if necessary)

Proposed installation and operation of two (2), 2.7-megawatt (MW) commercial wind energy conversion systems ("wind turbines") to supply a total of 5.4 MW of renewable energy to power the on-site agricultural processing facility. Each of the proposed wind turbines would consist of a three-bladed turbine on a tubular steel tower with a hub height of approximately 291-feet (89 meters). The diameter of the proposed turbines is approximately 416 feet (127 meters) and the radius is half that amount (208 feet or 64 meters) resulting in a total height (hub height plus rotor radius) of 499 feet (153 meters) maximum to the rotor tip.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "X".
If you have already sent your document to the agency please denote that with an "S".
