Existing Bridge/RS -6 Single Family Residential /Residential 1-6 dwelling units per acre/

Project Description: (please use a separate page if necessary)

The existing Meadow Way Bridge is reported to have been constructed in the 1950s over San Anselmo Creek in the Town of Fairfax by the U.S. Army Corps of Engineers (Corps). The Town proposes to construct a 70-foot long single-span concrete arch replacement bridge. The replacement bridge would be 21.5-feet wide to allow safe passage for both automobiles and pedestrians. The proposed replacement bridge would also include raised reflective pavement markers at proper intervals to alert the drivers and pedestrians of the two separate travel zones. The new bridge would comply with federal and state design codes and weight limits and would do away with the deficiencies of the existing bridge.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Revised 2010

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
