Subject: Shirk Road Widening and Mill Creek Culvert Modification Project SCH#2019129049
Date: Tuesday, January 7, 2020 12:09:22 PM

Good afternoon Paul,

After further review, Caltrans has a 'No Comment' on the proposed project. Additionally, Caltrans concurs with the installation of pedestrian/bike facilities, as stated on page 71 of the document, in an effort to encourage alternative modes of transportation.

As a point of information, Caltrans's SR 198 Corridor Study provides a conceptual plan to upgrade the existing tight diamond interchange at SR 198 and Shirk Road to a partial cloverleaf (L-9 configuration) interchange in the future.

Respectfully,

Edgar Hernandez
