Project Description: (please use a separate page if necessary)

The project proposes the replacement of two structurally deficient bridges on Manning Avenue: the James Bypass Overflow Bridge Nos. 42C0066 and 42C0067. The scope of work includes placing an asphalt concrete overlay on approximately 790 feet of Manning Avenue to match the approach work associated with the proposed new bridges and complete the previously placed asphalt concrete overlay previously placed and lying outside the current project limits. The propose project would increase public safety by replacing the existing structurally deficient bridges with bridges built to current design standards.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
