Notice of Completion and Environmental Document Transmittal

ATTACHMENT 1

Project Description:

The project will restore vegetation on previously degraded primary and secondary floodplain lands along the San Joaquin River. Site preparation will include clearing debris and weeds. Fields will be leveled and slightly modified (all grading will include mass balance on site) to promote improved hydraulic conditions for floodplain wildlife. A drip irrigation system will be installed above-ground to provide irrigation for part of the restoration project, while existing furrow irrigation systems will be used to irrigate the balance of the restoration project. Native plants will be propagated from local material and planted across the site in a patterned configuration parallel to the direction of flow. Weed control and irrigation will be performed during the growing season for three years. Irrigation will be sourced through onsite wells. Detailed information is provided in the Draft Restoration Plan for the Riparian Habitat Restoration at Grayson Riverbend Preserve Project (final version expected Fall 2019).
