STATE CLEARINGHOUSE

February 3, 2020

Ms. Rachel Wyse
Stanislaus County Planning and Community Development
1010 10th Street, Suite 3400
Modesto, California 95354

REQUEST FOR EARLY CONSULTATION FOR GPA/REZ/TM PLN2019-0131 –
LARK LANDING – DATED JANUARY 2020 (STATE CLEARINGHOUSE NUMBER:
2020010333)

Dear Ms. Wyse:

The Department of Toxic Substances Control (DTSC) received a Request for Early Consultation for GPA/REZ/TM PLN2019-0131 – Lark Landing.

The request is to amend the General Plan and Community Plan designation on an 8.02-acre site from Commercial to Planned Development. The request also proposes to amend the zoning designation of Salida Community Plan General Commercial (SCP C-2) on the subject property to Planned Development. The project involves the subdivision of an 8.02-acre property into 9 parcels.

DTSC recommends that the following issues be evaluated in the Initial Study (IS) for the Negative Declaration or Environmental Impact Report, Hazards and Hazardous Materials section:

1. The IS should acknowledge the potential for project site activities to result in the release of hazardous wastes/substances. In instances in which releases may occur, further studies should be carried out to delineate the nature and extent of the contamination, and the potential threat to public health and/or the environment should be evaluated. The IS should also identify the mechanism(s) to initiate any required investigation and/or remediation and the government agency who will be responsible for providing appropriate regulatory oversight.
2. If buildings or other structures are to be demolished on any project sites included in the proposed project, surveys should be conducted for the presence of lead-based paints or products, mercury, asbestos containing materials, and polychlorinated biphenyl caulk. Removal, demolition and disposal of any of the above-mentioned chemicals should be conducted in compliance with California

environmental regulations and policies. In addition, sampling near current and/or former buildings should be conducted in accordance with DTSC's 2006 *Interim Guidance Evaluation of School Sites with Potential Contamination from Lead Based Paint, Termiticides, and Electrical Transformers* (https://dtsc.ca.gov/wpcontent/uploads/sites/31/2018/09/Guidance_Lead_Contamination_050118.pdf).

3. If any projects initiated as part of the proposed project require the importation of soil to backfill any excavated areas, proper sampling should be conducted to ensure that the imported soil is free of contamination. DTSC recommends the imported materials be characterized according to *DTSC's 2001 Information Advisory Clean Imported Fill Material* (https://dtsc.ca.gov/wp-content/uploads/sites/31/2018/09/SMP_FS_Cleanfill-Schools.pdf).
4. If any sites included as part of the proposed project have been used for agricultural, weed abatement or related activities, proper investigation for organochlorinated pesticides should be discussed in the IS. DTSC recommends the current and former agricultural lands be evaluated in accordance with DTSC's 2008 *Interim Guidance for Sampling Agricultural Properties (Third Revision)* (<https://dtsc.ca.gov/wp-content/uploads/sites/31/2018/09/Ag-Guidance-Rev-3-August-7-2008-2.pdf>).

DTSC appreciates the opportunity to review the IS. Should you need any assistance with an environmental investigation, please submit a request for Lead Agency Oversight Application, which can be found at: https://dtsc.ca.gov/wp-content/uploads/sites/31/2018/09/VCP_App-1460.doc. Additional information regarding voluntary agreements with DTSC can be found at: <https://dtsc.ca.gov/brownfields/>.

If you have any questions, please contact me at (916) 255-3710 or via email at Gavin.McCreary@dtsc.ca.gov.

Sincerely,

Gavin McCreary
