

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Lemoore Union Elementary School District

Lead Agency: Lemoore Union Elementary School District

Contact Name: Chris Surratt - Director of Facilities, Maintenance, and Operations

Email: Chris Surratt <csurratt@myluesd.net>

Phone Number: (559) 924-6816

Project Location: Lemoore, California

City

Tulare

County

Project Description (Proposed actions, location, and/or consequences).

The project would include the construction of a New Elementary School at the northwest corner of the intersection of 19th Avenue and Cinnamon Drive (Figure 1). The proposed project would construct six single-story, wood frame, slab on grade structures. The new school would house 550 K-6 students. Building 100 would consist of Administration and Library. Building 200 would be a Multi-purpose Building, which would contain a Kitchen and Dining facility, along with a Music Classroom and a Stage, which would be used for performances and presentations. Buildings 300, 400 and 500 would contain the required classrooms, each of these buildings would house six classrooms for a total of 18 teaching stations with collaborative spaces, restrooms, and pull-out rooms. Building 600 would contain 4 Kindergarten classrooms which would be utilized as a single session. The total number of teaching stations would be 22. The total square footage of all six buildings would be approximately 49,000 square feet. The site plan indicates an area for a future classroom building, making the potential of a Master Planned Capacity of 700 students. The project also proposes development of an outdoor amphitheater, play fields, hardcourts, apparatus areas, bus loop, and parking lot (Figure 2). Proposed offsite improvements include improvements to 19th Avenue, including street demolition to allow for new curb

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Mitigation Measure AQ-1, as required by the SJVAPCD would reduce construction-related impacts to less than significant. Mitigation Measure GEO-1 would reduce potential impacts to paleontological resources to a less-than-significant level.

Mitigation Measure HYD-1 requires the preparation and implementation of a SWPPP to comply with the Construction General Permit requirements

Mitigation Measure NOI-1 would limit construction hours and require the construction contractor to implement noise-reducing measures during construction, which would reduce short-term construction noise impacts to a less-than-significant level.

To improve the LOS at the Liberty Drive / Hanford-Armona Road, 19th Avenue / Project Driveway 1, and 19th Avenue / Cinnamon Drive intersections under near term conditions, Mitigation Measure TRANS-2 would be implemented to reduce this impact to less than significant.
